Bill Number: H.R. 2647 the National Defense Authorization Act for Fiscal Year 2010

Account: Other Procurement, Air Force
Legal Name of Receiving Entity: Telos Corporation

Address of Receiving Entity: 7956 Vaughn Road, Suite 134, Montgomery, AL 36116

Description of Request: Provide \$5,000,000 in funding for Application Software Assurance Center of Excellence. This funding will provide the Air Force additional tools, training and subject matter experts to robust the analysis capability at the newly established Application Software Assurance Center of Excellence (ASACoE). To counter the growing threats in information operations, the Air Force established the Application Software Assurance Center of Excellence (ASACoE) to assess and strengthen its defenses against cyber attacks. The center's mission is to develop application security best practices that can be put in place Air Force-wide. Over the last year, the center has successfully assessed and identified vulnerabilities in numerous applications across multiple functional communities. The requested additional funding will ensure the security of the people, systems, and equipment software applications that support the Warfighter. The Center currently has 12 contracted personnel that are charged with reviewing over 3,000 software applications. At the current funding levels, the Center will complete approximately 300 within a year. The requested funding would enable the Center to accelerate the completion of the most critical tasks. The fund would increase local labor by up to 12 advanced security engineers/computer programmers in Alabama. The remaining funds would support the application tools, software and Air Force-wide training. The lead agency executing this mission for the United States Air Force is the 554th Electronic Systems Wing located at Maxwell AFB—Gunter Annex in Montgomery, Alabama. This request is consistent with the intended and authorized purpose of this unit. The funding would be provided on an existing Air Force program line. The funding will provide for software tools that includes approximately \$1,000,000 for source code analysis, \$750,000 for web pen test tools, and \$750,000 for database scanning tools in addition to \$400,000 for training and \$2,100,000 for subject matter experts and travel. The funding for Long term funds is being pursued in the Department's Future Years Defense Plan.

Bill Number: H.R. 2647 the National Defense Authorization Act for Fiscal Year 2010

Account: RDT&E, Army
Legal Name of Receiving Entity: BAE Systems

Address of Receiving Entity: 1101 Wilson Blvd., Suite 2000, Arlington, VA 22209

Description of Request: Provide \$9,000,000 for the Paladin Integrated Management for work to be completed in Anniston, AL. The FY 10 President's Budget contains funding for research and development Army funds to assist in making the M109A6 Paladin and its companion vehicle the Field Artillery Ammunition Support Vehicle (FAASV) sustainable through the year 2050. The changes to this vehicle will incorporate the Bradley's drive train and suspension components that will reduce the logistics footprint thereby reducing operational and support costs. This \$9,000,000 in funding is needed in order to insure that this program be reinstated to its original schedule (the program was Congressionally reduced by that same amount during the FY09 budget process). Procurement funds to initiate low rate initial production are in the FY10 procurement budget. The Army intends to fund this program through completion. This is a national defense program which provides firepower to our troops engaged in combat.

Bill Number: H.R. 2647 the National Defense Authorization Act for Fiscal Year 2010

Account: RDT&E, Army

Legal Name of Receiving Entity: Electric Fuel Battery Corporation (Arotech Subsidiary)

Address of Receiving Entity: 354 Industry Drive, Auburn, Alabama 36832

Description of Request: Provide \$4,000,000 for the Novel Zinc Air Power Sources for Military. This funding will develop Zinc-Air battery technology that will provide the soldier with a high energy density power source that significantly reduces battery carry weight. Previous advances in the technology have helped to cut warfighter battery carry weight in half. Continued development of body-worn energy distribution systems, coupled with further development of Zinc-Air battery technology, promises to cut warfighter battery carry weight further, while reducing battery quantities carried on long missions. Reducing battery type and count lowers operational risk by reducing the need for re-supply. In addition, Zinc-Air battery's intrinsic safety (cannot combust or explode even when penetrated by hot projectiles) enhances warfighter safety. Lithium-Air battery technology is in its infancy but has the highest possible energy density of any battery system promising a quantum leap in the warfighter mission length.

Account: RDT&E, Army

Legal Name of Receiving Entity: SCRA, Institute for Solutions Generation (funding will benefit the Anniston Army Depot)

Address of Receiving Entity: 5300 International Boulevard, N. Charleston, SC 29418

Description of Request: Provide \$8,200,000 in funding for the Highly Integrated Production for Expediting RESET. This funding was requested by the Calhoun County Chamber of

Commerce to benefit the Anniston Army Depot, located at 7 Frankford Avenue, Anniston, AL 36201. A critical readiness issue facing the military today is repairing and restoring military equipment that has been damaged or worn out in battle. Resetting small arms and crew served weapons is particularly challenging, given their sheer numbers and the fact that, there is a growing incidence of non-conforming parts used to support reset operations there. In addition, under the current system, a lot of time and cost are required to design and apply product improvements during reset. HIPER ensure a quick and efficient RESET turn-around for weapons to the theater. The requested funding will drive downstream efficiencies in manufacturing and quality inspection by enabling the utilization of laser scanning technology to significantly shorten the time and lower the cost for resetting and modernizing the military's small arms and crew-served weapons. This funding will provide \$4,800,000 for integration, collaboration, scanning and reverse engineering technology, and supply chain improvements to enhance and expedite RESET efforts: \$7,596,000 for labor, \$544,000 for materials and \$60,000 for travel.
