

stakeholders in Iowa watersheds for the purpose of improving agriculture's environmental performance and watershed health. The project design employs science-based applied evaluation tools at field, farm, and watershed level (such as water monitoring, soil sampling, and guided stalk sampling) to collect performance data that can be applied in a feedback loop to the planning process. The project supports expert staff to assist watershed organizations and groups of farmers in developing and maintaining these adaptive management plans and in measuring and reporting performance in optimizing fertilizer use efficiency, mediating agricultural pollutants, decreasing soil erosion, building soil carbon, improving on-farm energy efficiency, reducing greenhouse gas emissions, enhancing wildlife habitat, and maintaining or increasing yield and profitability. Private-public partnerships among agencies, private industry, producers, environmental groups, all levels of government, water utilities, and the university are fundamental to the design of this project, and those functioning partnerships to achieve the above project objectives are a measure of the project's success. This project also enables farmers to engage in watershed leadership and planning, employing their expertise and motivating more effective environmental management practices.

Federal funding will be used to support integration of watershed planning and privately funded conservation practices with planning and performance reporting conducted by USDA NRCS in Iowa; integration of watershed planning with individual producers' conservation planning in targeted watersheds in 4–6 additional targeted watersheds; development and evaluation of solutions to agricultural non-point source pollution targeted to prioritized Iowa watersheds; and integration of data collection and reporting focused on soil, atmosphere, and energy conservation as indirect attributes of water quality improvement efforts in agricultural watersheds. One of the greatest challenges to achieving and documenting actual improvements in water quality and watershed health where Rapid Watershed Assessment and Watershed Planning has taken place and where significant farmer participation in conservation planning and implementation is taking place is the lack of sustained funding for planning, technical assistance to farmers and watersheds, and water monitoring implementations. Previous appropriations for this project are helping meet that challenge in at least three major agricultural watersheds in Iowa—Raccoon, Boone, and Iowa River-Upper. FY10 funding will help continue to meet that challenge for the period of time required to achieve and document results and to demonstrate a performance-based model for achieving agronomic, environmental, and economic goals in farm-belt watersheds. The planning and monitoring infrastructure and watershed partnerships developed under previous federal funding are in place, and these appropriations help ensure the necessary scope and scale of implementation and the integration of otherwise discreet programs. The work being done in these watersheds, linked to sophisticated water monitoring and analysis and other resource monitoring tools, can have a significant impact on the ability of farmers and other agricultural watershed stakeholders to achieve and document real advances in watershed health and water quality, if given time

to work. This can have significant impacts on the ability of agencies to tailor their program incentives, cost share, and delivery systems to be more effective in helping groups of producers in watershed achieve success in meeting natural resource conservation goals and improving water quality. It will also demonstrate effective models for the private sector's role in working with agencies to more efficiently and effectively meet environmental performance goals.

Requesting Member: Congressman STEVE KING

Bill Number H.R. 2997, the Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriations Act, 2010

Account: Natural Resources Conservation Service, Watershed/Flood Prevention Operations

Amount: \$1,146,000

Legal Name of Requesting Entity: USDA—Natural Resources Conservation Services

Address of Requesting Entity: 210 Walnut Street, 693 Federal Building, Des Moines, IA 50309

Description of Request: The requested funding will be used to reduce flood damage, gully erosion damage, stream channel degradation, and to improve water quality within the Little Sioux River Watershed of western Iowa. The Little Sioux watershed in western Iowa is an area that is intensively farmed due to productive but easily erodible soils. This funding will help to provide landowners and communities much-needed assistance in installing soil and water conservation practices to slow water runoff and reduce erosion damage to agricultural land, public infrastructure including roads and bridges, and to reduce sediment and associated agricultural nutrients and pesticides being delivered to streams and rivers.

EARMARK DECLARATION

HON. TIMOTHY V. JOHNSON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 8, 2009

Mr. JOHNSON of Illinois. Madam Speaker, pursuant to the Republican Leadership standards on project funding, I am submitting the following information regarding project funding I requested as part of Fiscal Year 2010 Agriculture Appropriations bill—H.R. 2997:

Requesting Member: TIMOTHY V. JOHNSON
Bill Number: H.R. 2997—Fiscal Year 2010 Agriculture Appropriations bill

Account: National Institute of Food and Agriculture—SRG

Legal Name of Requesting Entity: University of Illinois

Address of Requesting Entity: College of Agricultural, Consumer and Environmental Sciences, 1301 West Gregory Drive, Urbana, IL 61801

Description of Request: \$176,000 for the University of Illinois Extension to extend its MarketMaker information technology platform to a national level that will enable food producers, processors, wholesalers and retailers electronic access to geographically-referenced data, thus enhancing the opportunity for food and agricultural entrepreneurs to identify and develop new and profitable markets and improve the efficiency and profitability of food

systems in the United States and globally. Of this amount \$91,277 is for personnel; \$28,752 for Supplies; \$17,204 for Publications; \$13,198 for Services; \$13,679 for travel; and \$11,890 for USDA administrative costs.

Requesting Member: TIMOTHY V. JOHNSON
Bill Number: H.R. 2997—Fiscal Year 2010 Agriculture Appropriations bill

Account: National Institute of Food and Agriculture—SRG

Legal Name of Requesting Entity: University of Illinois

Address of Requesting Entity: College of Veterinary Medicine, 1008 Hazelwood Dr., Urbana, IL 61802

Description of Request: \$235,000 for the Illinois Center for One Medicine, One Health at the University of Illinois which will focus on research, training and outreach efforts designed to improve our society's preparedness and response to natural and intentional exposures of biological, chemical and physical agents. Of this amount \$117,500 is for research; \$47,000 is for the instruction of courses various academic programs; and \$70,500 for training programs and exercises to serve state departments of agriculture and public health.

Requesting Member: TIMOTHY V. JOHNSON
Bill Number: H.R. 2997—Fiscal Year 2010 Agriculture Appropriations bill

Account: National Institute of Food and Agriculture—SRG

Legal Name of Requesting Entity: University of Illinois

Address of Requesting Entity: College of Agricultural, Consumer and Environmental Sciences, 1301 West Gregory Drive, Urbana, IL 61801

Description of Request: \$461,000 for the University of Illinois to conduct collaborative, multidisciplinary research to promote optimal human health by studying novel attributes of food. Of this amount \$322,300 is for Personnel; \$14,000 is for Participant/Trainee Support; \$60,600 for Supplies; \$3,300 for Publications; \$29,800 for Travel; and \$31,000 for USDA administrative costs.

Requesting Member: TIMOTHY V. JOHNSON
Bill Number: H.R. 2997—Fiscal Year 2010 Agriculture Appropriations bill

Account: National Institute of Food and Agriculture—SRG

Legal Name of Requesting Entity: University of Illinois

Address of Requesting Entity: College of Agricultural, Consumer and Environmental Sciences, 1301 West Gregory Drive, Urbana, IL 61801

Description of Request: \$745,000 for the Soybean Disease Biotechnology Center, located within the National Soybean Research Laboratory (NSRL) at the University of Illinois, which provides cutting edge research and a first line of defense against major soybean diseases. Of this amount \$595,000 is for Personnel; \$80,000 for Supplies; \$20,000 for Travel; and \$50,000 for USDA administrative costs.

EARMARK DECLARATION

HON. GREGG HARPER

OF MISSISSIPPI

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 8, 2009

Mr. HARPER. Madam Speaker, pursuant to the Republican Leadership standards on earmarks, I am submitting the following information regarding earmarks I received as part of

H.R. 2997—Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriations Act, 2010:

Requesting Member: Congressman GREGG HARPER

Bill Number: H.R. 2997

Account: Cooperative State Research Education and Extension Service

Project Name: Genomics for Southern Crop Stress and Disease

Recipient and Address: Mississippi State University, P.O. Box 9800, Mississippi State, MS 39762

Amount: \$797,000

Description: Mississippi State will provide innovative genomics research solutions to address disease and climatic stressors in Mississippi's most valuable commodity crops. Forestry, Poultry, Catfish, and many more Mississippi industries will benefit from this research. Advances in understanding genomic responses to stress and disease are anticipated to have a beneficial impact on yields, costs, and environmental sustainability.

Requesting Member: Congressman GREGG HARPER

Bill Number: H.R. 2997

Account: Cooperative State Research Education and Extension Service

Project Name: Biomass-based Energy Research Program

Recipient and Address: Mississippi State University, P.O. Box 9800, Mississippi State, MS 39762

Amount: \$839,000

Description: The Consortium is developing a unique gasification-catalytic process that utilizes all of the plant biomass, including the lignin, to produce liquid fuel. Mississippi State University and Oklahoma State University will cooperate in conducting technical and economic evaluation for the gasification-catalytic conversion process. Currently, MSU is conducting research to develop new catalysts to improve the conversion of syngas into liquid hydrocarbons.

Requesting Member: Congressman GREGG HARPER

Bill Number: H.R. 2997

Account: Cooperative State Research Education and Extension Service

Project Name: Wood Utilization Project

Recipient and Address: Mississippi State University, P.O. Box 9680, Mississippi State, MS 39672

Amount: \$4,545,000

Description: Mississippi State University will conduct vital research and education on wood use to support the competitiveness of small and medium wood product manufacturers and the needs of the public through the Wood Utilization Research (WUR) Program. 12 Wood Utilization Research Centers at state universities across the U.S. will participate in this program. Mississippi has the potential to economically grow much larger volumes of wood. Focused research is essential to enhance the development of the current industry and to create new wood-based industries such as that of energy and chemicals.

EARMARK DECLARATION

HON. GINNY BROWN-WAITE

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 8, 2009

Ms. GINNY BROWN-WAITE of Florida. Madam Speaker, pursuant to the Republican

Leadership standards on earmarks, I am submitting the following information regarding earmarks I received as part of H.R. 2647—National Defense Authorization Act for Fiscal Year 2010.

I requested one project in H.R. 2647.

In coordination with thirteen other Members of Congress, I sent a letter to the Chairman and Ranking Member requesting support for additional funding for the Army National Guard's H60 Black Hawk Helicopter modernization program. As a result of this letter, \$20.4 million was included in the Defense Authorization Act for this purpose. Army National Guard operational tempos are the highest they have ever been supporting the full spectrum of state missions including search and rescue, utility/lift, disaster relief, firefighting, medical evacuation, all while sustaining deployments to Iraq, Afghanistan and the Balkans. This high operational tempo is wearing out the National Guard H60 fleet much faster than planned and as a result of this request, we can ensure the National Guard has the tools and equipment they need to do their job.

EARMARK DECLARATION

HON. GLENN THOMPSON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 7, 2009

Mr. THOMPSON of Pennsylvania. Madam Speaker, pursuant to the Republican standards on earmarks, I am submitting the following information regarding earmarks I received as a part of H.R. 2997, the Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Act, 2010. The entity to receive funding is the Pennsylvania State University, 117 Old Main, University Park, PA 16802, in the amount of \$133,000. Funding will be used to increase field research/demonstration in order to increase farmer and farm advisor exposure to sustainable cropping system practices.

NATIONAL DEFENSE AUTHORIZATION ACT FOR FISCAL YEAR 2010

SPEECH OF

HON. ANTHONY D. WEINER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 25, 2009

The House in Committee of the Whole House on the State of the Union had under consideration the bill (H.R. 2647) to authorize appropriations for fiscal year 2010 for military activities of the Department of Defense, to prescribe military personnel strengths for fiscal year 2010, and for other purposes:

Mr. WEINER. Mr. Chair, I rise today in support of language in the manager's amendment to the Defense Authorization Bill (H.R. 2647) requiring the Government Accountability Office to study the costs to states and localities that choose to cover the difference between a first responder's military salary and their city salary.

After the tragic events of September 11th, many New Yorkers heard the call to service and joined the Army, Marines, Navy, and Air Force in defense of their country. More than

11,000 New Yorkers went to Iraq and Afghanistan and 59 tragically lost their lives in defense of our country. Among these New Yorkers were the brave first responders who had already performed so admirably on that day, the police officers, fire fighters, and paramedics who put their lives at risk to help their fellow New Yorkers. In recognition of this further sacrifice, New York City revised its personnel code to maintain first responders' municipal salaries even during active duty military service.

Five hundred ten New York City municipal employees, including 76 firefighters and 293 police officers, are currently serving overseas, putting the total number of City first responders who have served in Iraq and Afghanistan since 9/11 at over 2,000, with New York Police Department Officers comprising close to half of these. The combined salaries of these employees is over \$ 148 million dollars, and it is estimated that the city has recouped only \$59 million, costing the City over \$89 million. These financial costs are further compounded by lost man hours, over 800,000 in all. This lost manpower has disproportionately affected the New York City Police Department to the tune of over 472,000 days.

To explain this program better, let's take the hypothetical case of NYPD and Army Reserve Sergeant Smith. Sergeant Smith makes \$55,000 annually as an NYPD officer and his active duty salary is \$35,000. Being called to Iraq for a year-long tour of duty costs Sergeant Smith \$20,000. New York City's program continues Sergeant Smith's \$55,000 annual salary and Sergeant Smith would pay his military salary back to the City. Through New York City's policy, Sergeant Smith is made whole while still patriotically serving his country.

New York City is not alone in honoring its first responders who choose to serve overseas in this way. Boston, Chicago, Indianapolis, Phoenix, and San Jose have similar programs, and many states, including Ohio, Texas, North Carolina, Wisconsin, and Washington have laws that provide full pay for all state and municipal employees serving on active duty. At this time, it is not known how many millions of dollars these programs are costing cities and states around the country. Through my amendment the GAO will study the costs incurred by local governments for picking up the costs for their employees serving on active duty. I would like to thank Chairman IKE SKELTON and Ranking Member BUCK MCKEON for accepting this amendment.

PERSONAL EXPLANATION

HON. PAUL C. BROUN

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 8, 2009

Mr. BROUN of Georgia. Madam Speaker, on Tuesday, July 7, 2009, I missed the following votes: rollcall Nos. 478 and 479. If I had been able to make these votes, I would have voted "aye" on rollcall vote 478. I would have voted "nay" on rollcall vote 479.
