COMMEMORATING THE TURKISH
INVASION OF CYPRUS**HON. NITA M. LOWEY**

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 23, 2009

Mrs. LOWEY. Madam Speaker, this week, we commemorate the 35th anniversary of the Turkish invasion of Cyprus. Over a third of a century ago, more than 200,000 Cypriots were driven from their homes and forced to live under foreign occupation. We are at a critical juncture in the pursuit of peace and prosperity for all Cypriots, and I urge all parties to move toward a peaceful resolution and reunification effort that will build a more united and prosperous Cyprus.

There is a strong view that any solution to the Cyprus problem must include a bicomunal, bi-zonal federal State of Cyprus. The international community has stressed that this should include a single sovereignty and a single citizenship, with its independence and territorial integrity safeguarded, and comprising two politically equal communities as described by the relevant UN Security Council Resolutions.

I welcome the renewed interest in the efforts for a lasting solution. Under initiatives undertaken by President Christofias since his election in 2008, there is a movement which I hope will finally lead to a comprehensive solution to the problems facing Cyprus.

The leaders of the Greek and Turkish-Cypriot communities have demonstrated a strong commitment by holding more than 35 rounds

of direct talks starting on September 3, 2008, and continuing on a regular basis. These ongoing reunification talks between the two Cypriot leaders offer real opportunity to advance peace and work toward a just and lasting reunification. If there is commitment to establishing one prosperous Cyprus in which all people benefit from good relations with the international community and membership in the EU, we must resolve to do everything we can to make this goal a reality.

I am confident the Cypriots' desire to reunify their country, to bring peace and prosperity throughout the region, and ultimately to stand up for what they believe in, will prevail. I sincerely hope a solution to reunifying the island of Cyprus will be reached under a government that safeguards basic human rights and democracy and respects the fundamental freedoms of the people as a whole.

The new College Center will serve the area by creating a "one-stop" consolidated service center offering community and economic development resources in addition to providing educational opportunity for area residents at an affordable price. This funding would assist with the purchase of distance learning equipment, nursing/health/science lab technology and equipment; business and industry training technology equipment; and general classroom equipment.

Amount: \$150,000

Name and Address of Requesting Entity: University of Nebraska Medical Center located at 986380 Nebraska Medical Center, Omaha, Nebraska 68198

Description: The funding would be used by the University of Nebraska Medical Center (UNMC) to create a biomarkers database of rural diseases to assess environmental influences on the development of diseases by collecting health information from at least 50,000 Midwesterners. Currently most information about the relationship between disease and the environment is generated by major databases located in large urban areas on the east and west coasts which tend to be regionally specific and generally not applicable to rural areas. This database would be the first research cohort in the Midwest to study the relationship between rural populations, the environment, and disease development. This project could reveal environmental factors responsible for birth defects or lymphoma, a cancer with high incidence in Nebraska. The data will provide valuable information on the factors influencing development of deadly diseases like cancer and position UNMC Eppley Cancer Institute to be designated a National Cancer Institute (NCI) Comprehensive Cancer Center. This high distinction will allow for the most advanced patient care and research to be available in Nebraska. UNMC is the ideal institution to spearhead this database with its numerous resources, well-established statewide hospital network to collect data, a state-of-the-art cancer research team and facilities, and comprehensive database capabilities to collect and assess acquired data from this project.

Special Olympics offers year-round sports training and competition opportunities for both children and adults with an intellectual disability, giving them the opportunity to develop physical fitness, demonstrate courage, experience joy, and become integrated and valued members of our society. There will be 3,000 athletes, 1,000 coaches, 8,000 volunteers, and an estimated 15,000 family and friends in Lincoln and Omaha during the week of the games. The games are projected to generate \$40 million in local economic impact and an additional \$5 million in tax revenue alone.
