

HONORING ANDREW TINGWALL

HON. HARRY TEAGUE

OF NEW MEXICO

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. TEAGUE. Madam Speaker, today I would like to honor a very special New Mexican, Andrew Tingwall of the New Mexico State Police. Sergeant Tingwall served our country and my home state with distinction and honor for almost two decades, beginning with his tenure in the United States Marine Corps, where he was a Jump Qualified Reconnaissance Marine. Sergeant Tingwall then went on to join the New Mexico State Police, where he became the youngest pilot on the force. During his time with the State police he was named the 2008 Officer of the year by the New Mexico Sheriffs and Police Association for his lifesaving efforts of a man that had fallen into an arroyo in Albuquerque.

On several occasions, Sergeant Tingwall risked his own life to save others. He did so without any thought of personal gain. The only driving force for him was his mission to serve and protect and sadly that discipline cost him his life when Sergeant Tingwall flew his last mission earlier this year in an attempt to find lost hikers in the Sangre de Cristo Mountains. Andrew did all he could, but in the end, this mission was his last.

Throughout his career in public service he exemplified the attributes that make both the New Mexico State Police and the United States Marine Corps premier organizations that defend liberty and security of Americans and New Mexicans.

ENERGY**HON. BETSY MARKEY**

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Ms. MARKEY of Colorado. Mr. Speaker, I rise today to remind my colleagues to continue the dialogue on the American Clean Energy and Security Act over the August recess. I supported this legislation because I believe western states like Colorado stand to gain much from this energy bill. Renewable energy companies like Abound Solar and Vestas Wind Systems are already creating jobs and driving economic development in northern and eastern Colorado.

I believe the House-passed bill will help farmers and ranchers reap great benefits in America's renewable energy economy. I worked hard with my colleagues on the Agriculture Committee to ensure the concerns of America's farmers and ranchers were addressed. By developing cleaner energy here at home and using the vast domestic resources we currently have, we can work towards a less volatile energy market that will benefit us all.

I encourage all my colleagues in the House and the Senate to continue this important work.

HONORING THE MEMORY OF
OSCAR OLCHYK**HON. ILEANA ROS-LEHTINEN**

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Ms. ROS-LEHTINEN. Madam Speaker, I would like to take this opportunity to honor the memory of one of my fellow South Florida constituents, Oscar Olchyk. Oscar passed away peacefully on Thursday, July 23 at the age of 82, surrounded by his loving family.

Oscar spent his life completely and wholeheartedly dedicating himself to his family, including his wife of 50 years, Marta, his children, Sonia and Samuel, his grandchildren, Abram and Ross, his brother Bernardo, and his sister Mary. He also held an immense devotion for his mother and father-in-law, his daughter-in-law, Debbie, and his brother-in-law, Boris.

Born in Havana, Cuba in 1927, Oscar spent his first 33 years in Cuba, where he became a Certified Public Accountant and a Professor of Accounting at the University of Havana. It was also in Cuba where he met the love of his life, Marta, and where they were married and started a family together. Oscar and Marta, along with their son Samuel, fled Cuba for a new life in the United States after the Castro takeover.

Oscar spent most of his life in Dallas, Texas, where he continued to raise a family with his wife. In addition to his family, he devoted himself to pursuing a higher education, serving his community, and his accounting practice. Oscar and Marta spent the last decade enjoying their retirement in beautiful South Florida and near their family. They both had the opportunity to travel around the world and spend their 50th anniversary with their grandson, Abram.

My greatest sympathy goes to all of his loving family and friends whom he treasured so deeply throughout his life.

HONORING THE PUBLIC SERVICE
AND COMMUNITY ACTIVISM OF
MR. CLYDE MCINTOSH OF NORTH
CAROLINA

HON. HEATH SHULER

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. SHULER. Madam Speaker, I rise today to honor an outstanding public servant and dedicated volunteer in Yancey County, North Carolina. Mr. Clyde McIntosh of Burnsville has dedicated his life to service and activism. After graduating from Burnsville High School in 1950, Mr. McIntosh proudly served four years in the United States Navy. Upon completion of his service, he moved back to the mountains of western North Carolina, where he built a successful real estate and development business and operated a dairy farm. During this period, he worked diligently toward the goal of preserving the rural heritage of the area.

Mr. McIntosh assumed public office when he was elected Sheriff of Yancey County in 1986. From 1999 to 2005, he served on the Board of Directors of the Yancey County Department of Social Services, spending a por-

tion of his tenure as Chair. For many years, Mr. McIntosh has been an active community volunteer for the Lions Club and Meals on Wheels.

Mr. McIntosh has worked for years to educate Yancey County youth on the importance of civic engagement and community involvement. He has acted as a mentor for the Young Democrats organization of Yancey County, encouraging young people to be politically active.

I commend his outstanding contributions to the Democratic Party. In April 2001, he was named Mountain Democrat of the Year and also served as Yancey County Democratic Party Chair throughout the years. He has served as Precinct Chair for both Jacks Creek and Burnsville Townships, and he is currently the Burnsville Township Chair.

Madam Speaker, I ask my colleagues to join me in honoring Mr. Clyde McIntosh and recognizing his service to Yancey County, North Carolina.

BOB BARKER'S LIFELONG PASSION
TO PROTECT ANIMALS

HON. C.W. BILL YOUNG

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. YOUNG of Florida. Madam Speaker, Bob Barker is a household name who is known nationally and internationally as the beloved host of the Price is Right. While he has retired from his career in television, he has redoubled his lifelong efforts to protect animals around the world.

I first met Bob Barker a number of years ago when he was here in the Capitol in support of legislation to stop the inhumane treatment of animals. We quickly became good friends and my wife Beverly and I have come to respect not only his commitment to animals but also his unwavering support for our men and women who serve in uniform.

Bob Barker is a great American with a very unique background. He grew up on the Rosebud Indian Reservation in South Dakota and was a Navy fighter pilot at the end of World War II.

Yesterday Beverly joined Bob Barker for a press conference about another case of the mistreatment of animals that was brought to his attention and which he has in turn called to the attention of our nation. Following my remarks, I would like to include for the benefit of my colleagues an Associated Press report about that event. While I wish I could have been there with Bob to show my support for his work and lifelong passion, I had to be here in the House as we debated the rule and began consideration of the Defense Appropriations Bill.

However, Madam Speaker, I wanted to commend Bob Barker for once again crisscrossing our nation in his continuing commitment to protect innocent animals that cannot protect themselves.

BOB BARKER ASKS CHEROKEES TO END NORTH
CAROLINA BEAR PIT ATTRACTIONS

(From The Canadian Press, July 29, 2007)

ASHEVILLE, N.C.—Former game show host and longtime animal rights activist Bob Barker has made a personal appeal to the Eastern Band of Cherokee Indians in North Carolina to stop exhibiting bears in pit-like enclosures at three local zoos.

The Asheville Citizen-Times reported that Barker met Tuesday with Principal Chief Michell Hicks and five members of the Tribal Council. He called the bears' conditions inhumane and asked that they be turned over to a sanctuary in California.

"To think that with as advanced as our civilization is now that there is any place in the United States where bears are kept in pits is just unbelievable," said Barker, who is part American Indian and grew up on the Rosebud Indian Reservation in South Dakota. "Just picture yourself, if your life, 24 hours a day, seven days a week, month after month, was in a pit."

The bears are displayed in walled enclosures set into the ground at three local attractions that bill themselves as zoos and theme parks.

Barker will discuss the meeting at a news conference Wednesday morning in Asheville.

Hicks told the Asheville Citizen-Times that the tribe follows federal regulations in caring for the bears.

Collette Coggins, who owns one of the attractions, the Cherokee Bear Zoo, with her husband, Barry, said the bears don't stay in the pits all day, every day. "We love our animals," she said. "They are like our pets."

drug resistant infections are rapidly increasing in hospitals and community settings adding to the economic burden of the U.S. healthcare costs.

Specifically, we support the FDA's calls for phasing out the use of antimicrobial drugs for growth promotion and feed efficiency, and for requiring that all other uses of these drugs be carried out under the supervision of a veterinarian and within the boundaries of a valid veterinarian-client-patient relationship—which we expect will end over-the-counter sales of tons of antimicrobial drugs annually. We also support the agency's expressed intent to clearly define the limited instances where antimicrobials may be used judiciously in food animals for purposes of disease prevention and control and are eager to work with FDA to ensure that the policy developed is the most protective of public health. We also urge the agency to make the new antimicrobial policy mandatory, retroactive to already-approved drugs, and enforceable, in order to best guarantee a significant reduction in antimicrobial use. The Administration's statement clearly demonstrates a commitment to sound and science-based policies that are backed up by scores of scientific and medical publications and will protect the health of every American.

The development of antimicrobial agents to treat life-threatening infections has been one of the most notable medical achievements of the past century. Physicians, healthcare professionals, and public health and food safety advocates are greatly concerned about the growing body of scientific evidence demonstrating that antimicrobial drug use in livestock and poultry contributes to the spread of drug-resistant bacteria to people. Drug-resistant organisms are plaguing Americans, including otherwise healthy individuals, in healthcare settings and communities across the country. We are pleased that these concerns finally are being recognized and addressed by the federal government to forestall epidemics of untreatable infections.

Fundamental to FDA's new approach—and our support for it—are the principles that: "protecting public health requires the judicious use in animal agriculture of those antimicrobials of importance in human medicine" and that "purposes other than for the advancement of animal and human health should not be considered judicious use."—Dr. Joshua Sharfstein, FDA's Principal Deputy Commissioner, July 13, 2009.

The Administration's vision to eliminate non-judicious uses of antimicrobial drugs, including for purposes of growth promotion and feed efficiency and non-judicious disease prevention which have been practiced in animal agriculture for several decades, demonstrates a critical public policy shift that will better protect the public against resistant infections and preserve the power of existing antibiotics. In addition, we urge FDA to formalize its position on veterinary supervision of all antimicrobial uses and ending the over-the-counter sale of antibiotics for animal agricultural uses, which are long-overdue. The sale of antimicrobials for use in human medicine requires a prescription; there is no reason to permit a lower standard for agricultural purposes where considerably more antimicrobial drugs are used annually.

The Administration's new policy direction appears intended to reflect the concerns of a broad consensus of the scientific, medical, public health and international health communities. Such consensus is buttressed by the actions of expert bodies and governments. For example:

Since 2002, the World Health Organization (WHO) has called upon all nations to shift from use of antimicrobials in non-human medicine.

In 2003, the Institute of Medicine (IOM) of the National Academies of Science called on the FDA to ban the use of antimicrobials for growth promotion in animals, if those drugs were also used in human medicine.

In 2006, the European Union banned non-therapeutic use of antimicrobials, because such use was found to raise food safety concerns, and the ban was instituted to protect against further development of antimicrobial resistance.

We recognize that phasing out of antimicrobials for non-judicious uses in animals will require changes in the agricultural industry. But protection of the public's health must come first, and the phase out can be conducted in a way that that minimizes costs to the agriculture industry. Farmers in Europe have adapted to such a policy without undue disruption of production or increased consumer costs; the United States can learn from that experience while also protecting American lives. In addition, the U.S. Department of Agriculture has recognized that various production methods used in the United States today are viable alternatives to non judicious antimicrobial uses and such alternatives are employed with little negative—or even with somewhat positive—economic impact to producers.

We urge you to maintain the scientifically sound positions the Administration already has taken in support of phasing out growth promotion and feed efficiency uses, and to finalize a policy that will strictly manage a narrow set of prophylactic uses while mandating veterinary-patient relationships and eliminating the over-the-counter sale of antibiotics for use in animals.

We remain committed to working with the Administration to implement these new approaches in ways that will best protect the lives and health of both humans and animals.

PERSONAL EXPLANATION

HON. J. GRESHAM BARRETT

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. BARRETT of South Carolina. Madam Speaker, unfortunately I missed recorded

FOOD SAFETY ENHANCEMENT ACT OF 2009

SPEECH OF

HON. JANICE D. SCHAKOWSKY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 29, 2009

Ms. SCHAKOWSKY. Mr. Speaker, the use of massive amounts of human antibiotics for non-therapeutic purposes in industrial food animal production is seriously jeopardizing the health of Americans. This practice is contributing to the emergence and spread of antibiotic-resistant bacteria, often rendering ineffective human life-savings drugs.

I am submitting for the record a letter to the White House, signed by twenty reputable organizations such as the Infectious Diseases Society of America, American Medical Association, American Academy of Pediatrics, and Pew Charitable Trusts, which supports the Food and Drug Administration's early steps to phase out the use of antibiotics for growth promotion and feed efficiency in food animals, and calls on the Administration to go further.

JULY 24, 2009.

Ms. MELODY BARNES,
Assistant to the President for Domestic Policy,
The White House, Washington, DC.

DEAR MS. BARNES: As organizations committed to protecting patients, public health, animal health, and food safety, the undersigned groups are writing to express our grave concern about the misuse of antibiotics in agriculture and our strong support for the Administration's new "public health approach to antimicrobial use in animals," which was articulated by the Food and Drug Administration (FDA) in its July 13th statement before the Rules Committee of the U.S. House of Representatives. The Obama Administration's leadership in providing a clear path forward on this highly politically charged issue is very much welcomed after decades of inertia.

Our combined memberships include the country's foremost scientific and medical experts and represent more than eleven million concerned Americans and health professionals. Our position is based on objective health interests and concerns that dangerous
