

added the fine against the company “demonstrates that such blatant and continued disregard of the law will not be tolerated.”

Health and Human Services Secretary Kathleen Sebelius called it a “historic settlement” and said the government is looking “for new ways to prevent fraud before it happens. Healthcare is too important to let a single dollar go to waste.”

Assistant Attorney General Tony West said, “Illegal conduct and fraud by pharmaceutical companies puts the public health at risk, corrupts medical decisions by healthcare providers and costs the government billions of dollars,” adding that the plea agreements “represent yet another example of what penalties will be faced when a pharmaceutical company puts profits ahead of patient welfare.”

Patrick McFarland, inspector general of the Office of Personnel Management, said the settlement “reminds the pharmaceutical industry that it must observe those standards and reflects the commitment of federal law enforcement organizations to pursue improper and illegal conduct that places healthcare consumers at risk.”

The head of the Defense Criminal Investigative Service said that Pfizer’s actions “significantly impacted the integrity of TRICARE, the Department of Defense’s healthcare system,” saying “This illegal activity increases patients’ costs, threatens their safety and negatively affects the delivery of healthcare services to the over 9 million military members, retirees and their families who rely on this system.”

Yet, despite all of these tough statements—and many more by top officials—Pfizer and its vast network of subsidiaries continue to win massive government contracts. Last year Pfizer made more than \$40 billion in profits, and in 2007 it had more than \$73 million in federal contracts.

Loucks points out that “at the very same time Pfizer was in our office negotiating and resolving the allegations of criminal conduct by its then newly acquired subsidiary, Warner-Lambert, Pfizer was itself in its other operations violating those very same laws.” In other words, the criminal conduct continues even as the company settles cases. “The CEO and Board of Directors should have been indicted,” wrote former New York City Mayor Ed Koch. “That is truly the only way to stop the practices which produce so much wealth for the company, its stockholders, officers and directors.”

The glaring question here is, Why is the “corporate felon” Pfizer still on the federal dole? ACORN, which received a total of \$53 million in federal funds over fifteen years, much of it going toward low-income housing initiatives, was singled out for a ban on funding over the actions of a handful of employees that were promptly fired. The fact is, Congress went after ACORN with a legislative nuke but, for years, has greeted Pfizer with welcoming arms and open wallets.

McCollum’s legislation states that no federal contract, grant or “any other form” of agreement “may be awarded to or entered into with the corporation or company for a 5-year period beginning 30 days after the date of the criminal conviction involved” and states that “no Federal funds in any other form may be provided to the corporation or company for such 5-year period.” The legislation also goes after criminal corporations’ ability to inject cash into the campaign coffers of politicians, prohibiting “corporate felons” from “contributing to a candidate for federal office, to a political party, or to a federal political action committee for five years.”

In 2008 Pfizer gave \$980,048 in campaign contributions to Democrats, representing 52 percent of its total campaign contributions.

It was the first year since 1990 that Pfizer gave more to Democrats than Republicans. The biggest recipients of Pfizer campaign dollars last year were Democratic Congressman Allen Boyd, who serves on the Appropriations Committee, and Democratic Senator Chris Dodd, a senior member of the Health, Education, Labor and Pensions Committee. In the 2010 cycle, the company has given 60 percent of its campaign cash to Democrats. Barack Obama blew out John McCain in contributions from the pharmaceutical industry, taking in some \$2.1 million compared to the \$668,000 contributed to McCain’s campaign.

McCollum’s legislation would limit the amount of lobbying expenditures by “corporate felons” to \$1 million a calendar year. In 2009 Pfizer has already spent \$11,720,000 on lobbying.

ACORN does not have high-powered lobbyists, and its 400,000 member families do not give major campaign contributions. If they did, the Defund Acorn bill would never have passed Congress. The question for those Democrats who voted to go after this community organization on dubious allegations is a simple one: will you apply that standard to actual corporate felons with real-life rap sheets whose actions have actually harmed ordinary Americans and ripped off taxpayers?

#### SPECIAL ORDERS

The SPEAKER pro tempore. Under the Speaker’s announced policy of January 6, 2009, and under a previous order of the House, the following Members will be recognized for 5 minutes each.

#### OLDER DRIVER AND PEDESTRIAN SAFETY AND ROADWAY ENHANCEMENT ACT OF 2009

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. ALTMIRE) is recognized for 5 minutes.

Mr. ALTMIRE. Mr. Speaker, I rise today in support of legislation that I have introduced that will help reduce the number of deaths and injuries occurring on our Nation’s roadways.

H.R. 3355, the Older Driver and Pedestrian Safety and Roadway Enhancement Act of 2009, authorizes \$500 million annually to be distributed to States from the existing highway trust fund to make our roads safer for older Americans. These funds can be used to make roadway improvements as described in the Federal Highway Administration’s Older Driver Handbook.

While older drivers have years of experience behind the wheel, they often require more time than younger drivers to react to changes on the road and are sometimes restricted in movement and cannot always meet the physical demands of turning to look at a blind spot or making sharp turns. According to the American Traffic Safety Services Association and the National Association of County Engineers’ “Low Cost Local Road Safety Solutions” publication, simple changes to signs and markings have a proven track record of being both affordable and extremely effective at reducing roadway deaths and injuries.

Some examples of these vital road safety improvements that would be funded by this legislation are signs with more legible font, retro-reflective sheeting and retro-reflective pavement markings, left turn lanes at intersections and improved sign placement to ensure that drivers have adequate time to make informed decisions on the road.

Last year, more than 37,000 men, women and children perished on America’s roadways. This bill will be an effective step forward in reducing this sobering statistic. According to the AARP’s Public Policy Institute, as of 2003, 80 percent of persons age 65 and older were licensed drivers, and 90 percent of all trips by older Americans are by automobile, whether as a driver or passenger. This is especially true in suburban and rural areas where mass transportation systems are limited or nonexistent. By 2020, one in five licensed drivers will be 65 years or older. By 2025, this number is expected to be one in four.

With Congress continuing to debate the next transportation authorization, it is important that we do not lose sight of the older citizens in our communities. By improving the safety of our roads and highways and making their daily travel as safe as possible, we increase road safety for all Americans.

Mr. Speaker, I urge my colleagues on both sides of the aisle to support this legislation that will improve road safety in every one of their districts. Please join me in raising awareness for road safety and the wellbeing of older and younger drivers alike by supporting H.R. 3355.

#### AMERICA FUNDING OFFSHORE DRILLING IN BRAZIL

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. POE) is recognized for 5 minutes.

Mr. POE of Texas. Mr. Speaker, just one short year ago, the ban was lifted for drilling for oil on the Outer Continental Shelf. We call that the OCS. And that was a good thing. We should be one year closer to all those high-paying jobs. We should be one year closer to that shot in the arm for the American economy. We should be one year closer to American energy independence. But we’re not.

Not by a long shot, because, you see, Mr. Speaker, the government still stonewalls offshore drilling. And that’s unfortunate for America. Between the OCS and oil shale resources, America could replace all of the oil Saudi Arabia sends us for the next 20 years. And that’s a lot of oil.

During that time, we could explore and develop other alternative energies to power our economy in the future. Also, by providing for our own energy with natural gas, solar, oil and nuclear, all of those issues are national security issues, so we won’t depend on foreign countries for our energy in the future.

Drilling off of our shore means jobs for Americans right now, real jobs, high-paying jobs, the kind of jobs that support whole families and pay to get kids into college. And it's not jobs on just oil platforms in the gulf. Think about all the other support industries, transportation, food, equipment, parts, insurers, construction and so. These real, high-dollar jobs would give a boost to our economy. These jobs are vital to America's families and to our economy, and it would keep American money in America. There's a real solution right in front of us for job and energy development.

But the government continues to move in the opposite direction. The cap-and-trade national energy tax, now called the climate change bill, will destroy the U.S. energy industry. Millions of jobs that go along with it will also be lost.

□ 1945

It is a national tax on energy consumption. Plus, it won't really help the climate. Instead of taxing energy, we should find more energy and encourage American energy development.

But we cannot drill off of our shores because I guess it will upset the blood pressure of the environmental elites. So, no new drilling.

However, Mr. Speaker, I do have breaking news. The administration does support offshore drilling. According to the Wall Street Journal, the government is loaning over \$2 billion in taxpayer money to a Brazilian company called Petrobras. Now, where did the United States, first of all, get that \$2 billion to loan to a foreign company? I thought we were broke. How come taxpayer money is going to a Brazilian oil company anyway? Why isn't that money staying here in America?

This Brazilian oil company is drilling off the shore of, not the United States, but Brazil. And are we getting that oil? Well, no, because China has a contract to purchase the hundreds of millions of barrels of oil those Brazilian oil fields will produce with taxpayer money. Isn't that lovely?

Let me explain it this way. Here is a chart. Right here this represents the United States. Of course we have these signs, no offshore drilling off the United States coast. We can't do that. But we are sending \$2 billion of American money down to a Brazilian oil company so they can, of course, drill off their shores. And is that money or oil coming back to us? I don't think so. That bag of money is going to China.

Now, this seems a bit strange to me. Why are American taxpayers footing the bill in Brazil without getting the oil or getting the money? Why aren't we expanding our own offshore drilling instead of sending American money to Brazil? Does anybody have the answer to that question? It seems like we should drill off our own coast, keep American money in America and take care of our own energy needs. We have millions of jobs just sitting there wait-

ing to be created off our shores. Drilling on the Outer Continental Shelf and extracting oil shale would provide the much-needed boost to the American economy. And we should stop funding oil-producing countries that support terrorism and the Middle East.

So what are we waiting for? If we would have started a year ago when the ban was lifted, our economy would be better than it is today. We would have had more jobs, jobs, jobs. It is way past the time for us to get started taking care of America. Don't drill in Brazil with American money. Don't take care of China. Drill American and take care of America.

And that's just the way it is.

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from California (Ms. WOOLSEY) is recognized for 5 minutes.

(Ms. WOOLSEY addressed the House. Her remarks will appear hereafter in the Extensions of Remarks.)

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from North Carolina (Mr. JONES) is recognized for 5 minutes.

(Mr. JONES addressed the House. His remarks will appear hereafter in the Extensions of Remarks.)

#### WHERE ARE THE JOBS?

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from Michigan (Mrs. MILLER) is recognized for 5 minutes.

Mrs. MILLER of Michigan. Mr. Speaker, I come from the great State of Michigan where we currently have the highest unemployment in the Nation and where our citizens have suffered more than most in this economic downturn. And every week when I come to Washington, I am constantly amazed that this Congress isn't laser focused on creating jobs, because the question being asked by the American people is: Where are the jobs?

When President Obama said he wanted an economic stimulus bill principally focused on tax cuts and infrastructure investment, I was all for it. But the bill that was passed by the Democrat majority in Congress really was unrecognized from what was originally proposed. That bill focused much more on expanding the size of government than expanding jobs in the private sector. Americans were told that if this huge expansion of government were passed, that 2 to 3 million new jobs would be created and unemployment would not reach 8 percent. And what are the results actually?

Well, since that time, our economy has shed nearly 3 million jobs and the unemployment rate has now reached nearly 10 percent. In my home State of Michigan, it is in the 15 percentile.

Nine months after the passage of the failed stimulus plan, Americans are still asking: Where are the jobs?

After passing a jobs bill that did not create jobs, House Democrats passed a cap-and-trade national energy tax. This national energy tax will destroy millions of jobs in this struggling economy. Manufacturing, which is so important in my home State of Michigan, would be especially hard hit when millions more good-paying jobs are shipped overseas to nations that are not going to put this jobs-killing tax on their manufacturing companies.

Struggling American families will also be very hard hit. The Obama administration's own estimates project that this legislation would cost our economy \$200 billion every year, which means an increase of \$1,700 for every American household. That means hard-pressed Americans are going to pay more for energy while at the same time having their jobs put at risk.

I would ask this, Mr. Speaker, as the American people continue to do: Where are the jobs?

Congress is now considering a health care reform bill that would amount to a government takeover and would be funded with job-killing tax increases and cuts to Medicare impacting the coverage of millions of American seniors. That bill, H.R. 3200, places an 8 percent tax on payroll for every business in this Nation that does not offer health care coverage to their workers.

Well, I have talked to countless employers, and they tell you that their costs run much higher than 8 percent, so they would end the private coverage that they currently give to their employees and dump them all out on the public plan.

Republicans have been accused of being the party of no because we have stood against this job-killing agenda, but we have offered alternatives, better alternatives, and it is actually the Democrats in Congress who have said no to these ideas. Let me cite a few specific examples.

We have offered an alternative to the stimulus plan that, according to the formula created by President Obama's own economic team, would create twice the jobs at half the cost. We have offered an all-of-the-above national energy plan as an alternative to the Democrats' national energy tax. Our plan would encourage the development of clean alternative energy while allowing the development of domestic supplies, which would bring energy costs down instead of driving them up. And it would create jobs here in America, and it would make America more energy independent.

We have offered commonsense approaches to health care reforms that would provide greater competition, increase access to care, and reduce costs. We feel that individuals should be able to purchase health care across State lines, and small businesses should be able to group together to open up more options and reduce costs to protect private health care. And we believe we need to enact real medical liability reform to end junk lawsuits that drive up
