

“We can only hope in the years ahead that scientific creativity will make embryo destruction unnecessary and that, as a society, we will not pave the way to the brave new world with the best medical intentions.”

Madam Speaker, I just conclude by saying that despite all of the new and the extraordinary processes in adult stem cell research and applications, despite these magnificent breakthroughs in induced pluripotent stem cells, a part of adult stem cells, the Obama administration and, I am sad to say, the leadership of this House, remain fixated on killing human embryos for experimentation at taxpayers' expense.

The alternative has continued and will continue to prove itself to be highly efficacious. That is to say, adult stem cells. We don't need to kill human embryos to effectuate cures and to mitigate disease.

With that, I yield back the balance of my time.
