Last week, 30 evangelical, nonpolitical pastors were arrested by Cuban authorities. This is a clear attack on religion by the Castro regime.

On top of these atrocities, we hear that two Castro spies may have been working among us in our government for decades. It is crucial that the United States Government move slowly and cautiously in our relationship with Cuba. In light of this, the administration must not make any further decisions regarding Cuba until a comprehensive damage assessment is completed and Congress is fully briefed.

CHINA AND AMERICA'S DEBT

(Mr. PITTS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PITTS. Mr. Speaker, during a speech last week at Beijing University in China, U.S. Treasury Secretary Timothy Geithner was laughed at when he attempted to assure students that the Chinese government could continue to safely invest in American debt. The largest holder of our national debt is now openly laughing at our financial situation. At the same time, Federal Reserve Chairman Ben Bernanke was here on Capitol Hill calling for fiscal restraint. Every dollar spent by the government is taken from the people in taxes or borrowed against future generations.

Our Nation's fiscal responsibility is so lacking that a developing nation snickers at the mention of sound investment in our debt. Traveling the world, begging creditor nations to allow us to continue our spending binge is not the kind of international engagement we need. Our economy will turn around because of the ingenuity of the American people, not because of out-of-control, irresponsible government spending and borrowing.

HEALTH CARE

(Mr. DEFAZIO asked and was given permission to address the House for 1 minute.)

Mr. DEFAZIO. Republicans gave us a Medicare prescription drug benefit complete with a donut hole based on subsidizing the health insurance industry and the prescription drug industry. Now they are at it again. They are absolutely opposed to a public plan option for health insurance, because that would make the health insurance industry compete. Their solution to the 50 million Americans without health insurance and those who are one pink slip away from losing it is tax breaks, so they can go out and buy private insurance.

Well, here is a little secret. Private insurance is exempt from antitrust laws, thanks to the Republicans, so they can and do collude. They won't let you have a preexisting condition. They

can discriminate in any way they want. They can price gouge. They can price fix. And the Republicans say that driving people to that system, not giving them a low-cost, public plan option, and making the health insurance industry more cost effective and truly competitive is a better solution.

Now, come on, guys. Do you really care about those 50 million people, or not?

LOWERING STANDARDS OF LIVING THROUGH THE WAXMAN-MARKEY BILL.

(Mr. LUCAS asked and was given permission to address the House for 1 minute.)

Mr. LUCAS. The Waxman-Markey bill is one of the most monumental bills that this Congress will consider. It has the potential to permanently damage the standard of living for every man, woman, and child for decades to come. Yet Speaker Pelosi and the administration want to force this bill through Congress.

This bill will tax you. It creates a massive national energy tax that will be devastating to those who live and work in rural America. It promises higher energy costs, lost jobs and higher food prices. This bill will affect all of us. If you like being warm in the winter, if you like being cool in the summer, if you own a farm or a small business, if you like to eat, if you like to go anywhere, this bill will affect you.

Agriculture is squarely in the crosshairs of this bill because it is energy intensive. That is why 40 agricultural groups, including the American Farm Bureau, have expressed opposition to it. No large farm group has endorsed it.

A 1,000-page bill of this magnitude deserves thoughtful consideration and debate. Instead, Speaker Pelosi is rushing it through Congress to the detriment of all of us

HEALTH CARE REFORM

(Mr. BUTTERFIELD asked and was given permission to address the House for 1 minute.)

Mr. BUTTERFIELD. Mr. Speaker, from the creation of Medicare and Medicaid in 1965 to the reauthorization of SCHIP earlier this year, we have come a long way toward ensuring that every American has access to affordable, quality health care. These programs, Mr. Speaker, ensure that our children and the disabled and the elderly have access to health care. Now it is time to get serious and to help those people in the middle who have been left out.

Family health care costs are increasing. Families cannot afford the rising cost of health premiums, many employer-sponsored plans are providing less coverage and higher deductibles, and there are 45 million Americans with no insurance.

We must seize this opportunity to enact reforms that reduce costs, pro-

tect existing plans, preserve our choices in doctors, hospitals and care, and ensure affordable quality health care for all. I support President Obama and the Democratic leadership. We must act now.

WAXMAN-MARKEY BILL IS ALL HAT AND NO CATTLE

(Mr. NEUGEBAUER asked and was given permission to address the House for 1 minute.)

Mr. NEUGEBAUER. Mr. Speaker, in Texas there is an old saying about the cowboy that was all hat and no cattle; in other words, he was all show and no substance.

At a time of economic hardship, Mr. Speaker, this Waxman-Markey energy bill is all tax and no energy. It is going to cost every American family a \$3,100 increase in their energy costs. Farm income is expected to decrease \$8 billion in the near term and almost \$50 billion in the outyears, a 57 percent decrease in farm income over the next 20 years.

The trouble with this cap-and-tax is it is also going to increase the cost of buildings and construction of farm buildings. In a town hall meeting last week, Mr. Speaker, the people in the 19th Congressional District said, Congressman, please stop this cap-and-tax bill. They know that this is a plan not to produce more energy, but it is a plan to increase taxes, to take more money out American families' pockets.

Mr. Speaker, I stand for the American farmers and families and small businesses all across America. I opposed this cap-and-tax plan. The Waxman-Markey bill is all hat and no cattle

ENERGY

(Ms. TITUS asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. TITUS. Mr. Speaker, I rise today in support of efforts to spur investment in clean-energy and energy-efficiency technology that will create clean-energy jobs back home in Nevada and across our country.

Investments in clean-energy technologies like solar, wind, geothermal, smart grid and advanced batteries will help the United States regain its competitive edge in a global green economy, reduce our reliance on foreign oil and improve our energy security.

Clean-energy jobs, like manufacturing solar panels and windmills and constructing new energy-efficient buildings, are jobs that can stay right here at home in the United States. But the United States is currently losing the clean-energy jobs and marketplace share to countries like China, Germany and Korea.

A thriving clean-energy economy will ensure that the United States creates a sustainable manufacturing base that will compete with the rest of the world. I look forward to working with

my colleagues on both sides of the aisle to make the investments necessary to help create a booming, clean-energy economy right here in the United States.

SOLDIERS OVERSEAS SHOULD HAVE THEIR VOTES COUNTED

(Mr. FLEMING asked and was given permission to address the House for 1 minute.)

Mr. FLEMING. Mr. Speaker, I rise today out of concern with the recent news that one out of every four ballots requested by military personnel and other Americans living overseas may have gone uncounted in the 2008 election. These findings were released in a recent Senate hearing.

The report claims that of 441,000 absentee ballots requested, 98,000 were claimed to be lost. Over 13,000 were rejected because of missing signatures or failure to notarize. Another 11,000 were returned as undeliverable.

I agree with Senator SCHUMER that this system needs an overhaul. While serving our country overseas, our soldiers deserve to have their votes counted and their voices heard. We need to ensure there is sufficient time for ballots to reach them and have them fill them out and return them for inclusion for their vote to count.

The cornerstone of democracy, Mr. Speaker, is the right to vote. Those sacrificing to protect this right should be given every chance to participate in the electoral process.

REMEMBERING THOSE DEVASTATED BY IOWA FLOODS

(Mr. BRALEY of Iowa asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BRALEY of Iowa. Mr. Speaker, one year ago today, I got in a plane and flew back home to Waterloo, Iowa, to a district and a State underwater. The railroad bridge in downtown Waterloo was torn down by the raging waters of the Cedar River, and my entire State went through the worst natural disaster in our State's history.

It is hard to believe that that much time has passed, but the work continues and the good, resilient people of Iowa continue to build, which is why Secretary Donovan is there today announcing the latest rounds of HUD assistance to help people get back on their feet and rebuild their homes.

I will be wearing next week, in the congressional baseball game, the jersey of the Anamosa Blue Raiders. Last year, this baseball team's entire field was under 10 feet of water, and it is a symbol of what happens when communities all over this country are devastated by natural disasters. That is why the work we do in this body is so important, and I continue to call upon people to keep in mind those who are devastated in a similar way in the years and days ahead.

KEEPING AMERICA COMPETITIVE IN THE GLOBAL ECONOMY

(Mr. REICHERT asked and was given permission to address the House for 1 minute.)

Mr. REICHERT. Mr. Speaker, American jobs are being threatened by new proposals to tax the earnings of American employers operating in markets around the world. We cannot forget that we are in a global economy. America cannot just be a participant in this global economy, but they have to lead in this global economy. In the middle of a downturn, it makes no sense to eliminate a tax incentive like deferral that American employers need to compete in a global marketplace and create American jobs at home.

Eliminating tax incentives like deferral would send U.S. jobs overseas and almost make it impossible for us to compete with China, India and Europe. Raising taxes on the earnings of U.S. companies discourages investments at home and increases the cost of employing U.S. workers. One of the largest employers in my districts, Microsoft, said last week that raising these taxes on their foreign earnings would force them to move thousands of employees out of the United States.

Congress must help to protect, promote and create jobs at home by encouraging American employers to invest and engage in new markets.

PROTECTING AMERICAN WORKING WATERFRONTS

(Ms. PINGREE of Maine asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. PINGREE of Maine. Mr. Speaker, coastal communities across this Nation are in trouble. In Maine and in other coastal States, working waterfronts and the jobs they provide are quickly disappearing.

Working waterfronts include commercial fishing, boatyards and other businesses who need access to the water. Once these businesses close, once the waterfront stops supporting these businesses, history shows us they do not come back.

Recently, I introduced the Keep America's Waterfronts Working Act of 2009. This bill will help communities acquire permanent access to the water and develop programs to protect working waterfronts and the jobs they provide, the backbone of our coastal communities.

A report released this week, the "State of the U.S. Ocean and Coastal Economies," coauthored by Professor Charlie Colgan from the University of Southern Maine, found that coastal counties contributed 42 percent of the national economic output in 2007, and working waterfronts are critical to supporting this economy.

We must protect working waterfronts and the jobs they provide. I would like to thank my colleagues for joining to-

gether to protect working waterfronts, and I look forward to working together to move this legislation through Congress.

RECOGNIZING DR. TERRY BRAD-LEY ON THE OCCASION OF HIS RETIREMENT

(Mr. NUNES asked and was given permission to address the House for 1 minute.)

Mr. NUNES. Mr. Speaker, today I rise to offer my gratitude on behalf of the people of the 21st Congressional District for the lifetime service of Dr. Terry Bradley. He is retiring from his position as superintendent of the Clovis Unified School District.

I have known Terry for many years as his Representative in Congress. His hard work and commitment to the students and faculty of Clovis Unified has always impressed me. Indeed, Terry's legacy is one that should be celebrated. During his tenure, he presided over faculty investments amounting to over \$1 billion. These improvements, as well as his commitment to excellence, have made a real difference in the quality of education for the students.

While the parents and students of Clovis will miss him, Terry can leave his position with full confidence that Clovis Unified School District, a school district that has helped lead the valley into the 21st century, will continue to thrive for future generations.

WE MUST REFORM HEALTH CARE

(Mr. PAYNE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PAYNE. Mr. Speaker, the time has come to take decisive action on health care reform. We simply cannot afford to wait any longer. American families and small businesses have seen the cost of health care coverage steadily rise to the point where many can no longer afford to pay their premiums. We know that our system is broken when we have 46 million Americans, many of them in my home State of New Jersey, who are only one illness or one accident away from being wiped out financially.

As President Obama and the majority in Congress work to take our Nation in a new direction, we are firmly committed to making improvements in our health care system in a way which will reduce costs, preserve a patient's choice of doctors and plans, and ensure quality, affordable health care for all.

It is important that we promote wellness by investing in prevention and educating about healthy life choices. Health care reform is an issue that we can resolve if we work together in good faith for a solution. Just saying "no," as some in Congress have chosen to do, will only worsen the problem.
