

option, just like we did in Iraq. And that's just not the best way to stop the violent extremists who threaten us.

If you need proof of that, just remember that al Qaeda has launched more attacks since 9/11 than before 9/11. And our National Intelligence Estimates have warned us that al Qaeda is getting stronger—stronger—not weaker. And if you need even more proof, Madam Speaker, that military force doesn't work, I urge you to read the RAND Corporation report entitled "How Terrorist Groups End."

RAND studied 648 extremist groups that existed between 1968 and 2006. It found that military force was effective against these groups only 7 percent of the time. In its analysis, RAND discovered two strategies that actually worked better. The first was negotiated political settlements; the second was the use of intelligence and police agencies to penetrate and disrupt extremist organizations. Combined, these two strategies were effective 83 percent of the time.

RAND applied its analysis to al Qaeda and concluded that "policing and intelligence should be the backbone of U.S. efforts." And they believe this to be true in Afghanistan and other parts of the world. This is because "al Qaeda consists of a network of individuals who need to be tracked and arrested," which requires the cooperation of U.S. and foreign intelligence agencies.

RAND also said that America "should generally resist being drawn into combat operations in Muslim societies, since its presence is likely to increase" the recruitment of violent extremists.

Madam Speaker, instead of using military force, we must change our mission in Afghanistan. We must use the far more effective tools of SMART power. SMART power can do a much better job of ending violent extremism than bombs, bullets, invasions, and occupations.

In this session of Congress, I have introduced House Resolution 363, the SMART Security Platform For the 21st century. It calls for strengthening intelligence and law enforcement agencies to track and arrest those involved in violent acts, while still respecting the rule of law.

SMART security also calls for improvements in civilian policing. A well-trained police force is a highly effective counterinsurgency tool because it is located where the extremists actually lurk. My SMART security platform also includes many other initiatives to provide for stopping extremism in Afghanistan and other parts of the world. SMART security addresses the root causes of violence and it encourages diplomatic and multilateral action. It promotes nuclear nonproliferation, and it ends our dependence on foreign oil.

Madam Speaker, the death toll in Afghanistan is on the rise. A summer of heavy fighting is ahead of us. Let's

stop this bloodshed before we have another Iraq on our hands. Let's do the smart thing. Let's change our strategy before it's too late.

HONORING THE OLD GUARD

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from North Carolina (Mr. JONES) is recognized for 5 minutes.

Mr. JONES. Madam Speaker, I rise today to honor the outstanding individuals of the Old Guard located at Fort Myer, Virginia.

The 3rd United States Infantry, proudly nicknamed the Old Guard, has served our Nation since 1784, making it the oldest active duty infantry unit in the United States Army.

□ 1945

Since World War II, the Old Guard has served as the Army's official Honor Guard. Soldiers from the Old Guard protect Washington, D.C., escort the President, and conduct military ceremonies at the White House, Pentagon and national memorials in the capital, including funeral details and other special ceremonies at Arlington National Cemetery.

Last month, I had the pleasure of spending the morning at Arlington National Cemetery and seeing the inside workings of the Old Guard. One of their most recognized duties is to provide sentinel at the Tomb of the Unknowns. Since April the 6th of 1948, the Tomb of the Unknowns has been guarded 24 hours a day, 365 days a year, regardless of weather. The sentinels rotate walks every hour in the winter and at night and every half hour in the day during the summer. They are all volunteers and considered to be the best of the Old Guard. Each soldier must be in superb physical condition, hold an untarnished military record, and be between 5 foot 10 and 6 feet 4 inches tall with the proportionate weight and build.

During the trial phase, soldiers are required to memorize seven pages of Arlington National Cemetery history, and the knew sentinels learn the grave locations of nearly 300 veterans.

The sentinels' duty time not walking is spent in the Tomb Guard Quarters below the Memorial Amphitheater, where they study cemetery "knowledge," clean their weapons, and help the rest of their relief prepare for the Changing of the Guard. The guards also train on their days off.

A portion of the Sentinels' Creed states: "My dedication to this sacred duty is total and wholehearted. In the responsibility bestowed upon me never will I falter, and with dignity and perseverance my standard will remain perfection."

Madam Speaker, it was a humbling experience to witness the sentinels' dedication and commitment to honoring all American servicemembers who are "Known But to God."

I encourage every American who visits our Nation's capital to stop by Ar-

lington National Cemetery to pay tribute to the fallen military heroes of the past, and to witness the dedication of the Old Guard.

I also encourage my colleagues in Congress to make the time to visit Arlington National Cemetery and meet with the fine soldiers of the Old Guard. Their motivation and dedication to service should truly fill every American with pride.

And as I close, Madam Speaker, as I do many times on this floor, I ask God to please bless our men and women in uniform. I ask God in his loving arms to hold the families whose child has given their life for freedom in Afghanistan and Iraq. And I ask three times, God please, God please, God please continue to bless America.

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Oregon (Mr. DEFAZIO) is recognized for 5 minutes.

(Mr. DEFAZIO addressed the House. His remarks will appear hereafter in the Extensions of Remarks.)

CELEBRATING THE 40TH ANNIVERSARY OF THE APOLLO 11 MOON LANDING

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from Texas (Ms. JACKSON-LEE) is recognized for 5 minutes.

Ms. JACKSON-LEE of Texas. Madam Speaker, as a 12-year member of the House Science Committee and a resident in Houston, Texas, I too rise to celebrate and to commemorate the 40th anniversary of Apollo 11.

This coming Friday, the NASA community and all of Houston will join in a splashdown celebrating the 40th anniversary of Apollo 11 at Space Center Houston.

Madam Speaker, I cannot tell you the great excitement in our community, because NASA has been a real anchor both economically, but really one of great pride, even though we realize it is a national treasure.

The words of a young President John F. Kennedy in his May 25, 1961, speech to Congress rings clear in our ears because he challenged America. He challenged those who had the ability to dream and gave them the goal of landing a man on the Moon and returning him safely to Earth.

The Apollo 11 program was designed to achieve the goal established by President Kennedy, by sending a crew of three astronauts to the Moon and returning them safely, but he didn't realize the drama and the excitement and the inspiration that that would provide. He did not realize what it would mean when Buzz Aldrin and Neil Armstrong and Michael Collins took flight in Apollo 11. He did not realize that when the crew of Apollo 11 launched into space aboard a Saturn V rocket on July 16, 1969, was almost equal to, I guess, the discovery of this Nation.

And then on July 20, 1969, Neil Armstrong and Buzz Aldrin successfully piloted the Eagle lunar module to the

surface of the Moon. And who can forget "The Eagle has landed." It was exciting for all of us who really believed in the greatness of America, but also the peace that America generated.

And then on July 20, 1969, when Neil Armstrong took his first step on the Moon, he became the first person to walk on the surface of another celestial body. We know his famous words that, in fact, as I paraphrase them, one step for man and one giant step for mankind.

And so we recognize how important it is to celebrate 40 years, because we want there to be another 40 years of NASA, to recognize the economic arm that it presents, to recognize the value of the inquisitiveness of scientists, mathematicians, doctors, those who are engaged in the business of exploration and human challenges.

Astronauts have come from all walks of life. They've happened to be my neighbors. We've lost some in Columbia and Challenger. We mourn for their families, but we celebrate their families and thank them for their sacrifice because we recognize that this is a time that we are now to pay tribute to them by continuing our work with NASA.

How excited we are to have retired General Charles Bolden to be the new NASA administrator, a former astronaut, the first African American, a Houstonian in the years that he lived there.

And so we celebrate and hope that this inspiration goes into the nooks and crannies of prekindergarten, kindergarten, primary, secondary education, college, graduate school. Let us send forth more astronauts, chemists, physicists, biologists, doctors, mechanical engineers, engineers, all of the people that can help us discover a peaceful way to live in this wonderful universe. That's what Apollo 11 was all about. Showing us that it is a place of peace, the Moon, that we can explore, we can find out information, we can make lives better for Americans and others around the world.

I always believed in the international space station. As a member of the Science Committee, I was able to craft legislation to create a safety scheme, if you will, to ensure that the international space station is safe. We see now that there are constant checks and constant emphasis on ensuring the safety of this particular large building in space, if you will, the size of large football fields. We know that that is important, even to the extent of fixing a toilet.

So, Madam Speaker, I rise to support and to salute Buzz Aldrin, the lunar module pilot; Michael Collins, the command module pilot; and Neil Armstrong, the mission commander, who understood what it was to make this giant step.

His other words as well, as we came in peace for all of mankind, that should be the mantra, the standard, the medal, if you will, the heart of NASA

as we explore: We come in peace for all of mankind.

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from South Carolina (Mr. INGLIS) is recognized for 5 minutes.

(Mr. INGLIS addressed the House. His remarks will appear hereafter in the Extensions of Remarks.)

THE IRANIAN PEOPLE'S PEACEFUL STRUGGLE FOR FREEDOM

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Michigan (Mr. MCCOTTER) is recognized for 5 minutes.

Mr. MCCOTTER. Madam Speaker, the Iranian people's peaceful struggle for freedom continues despite the tyrannical regime's barbarous crackdown. In fact, in his Friday's sermon, former President Rafsanjani called into question legitimacy of the present government and rebuked the regime for its crackdown on peaceful protesters and its cavalier rejection of the cries that the election was stolen.

Finally, former President Rafsanjani called upon the regime to free and fully account for all those peaceful freedom seekers who have been arrested in the repression. Then, on Sunday, former President Khatami called for a referendum on the legitimacy of the Iranian regime and asked that the results be tallied by an objective independent Iranian body to ensure its accuracy.

This led the current opposition, Presidential candidate Hossein Mousavi, to say, You are facing something new, an awakened nation, a nation that has been born again and is here to defend its achievements. Arrests won't put an end to this problem. End this game as soon as possible and return to the nation its arrested sons.

While humanity agrees, Supreme Leader Khamenei disagrees. And to leaders who both tacitly and expressly support the freedom seekers in Iran, Khamenei issued this warning. The elite should be watchful since they have been faced with a big test. Failing the test will cause their collapse.

I'd ask Supreme Leader Khamenei to look at this picture. Her name is Taraneh Mousavi. She was arrested near Ghoba Mosque, where she was on her way to attend hairdressing college. After her arrest, she was raped, sodomized and tortured by her captors, taken to a hospital in a coma, and it was there that she died. Upon her death, her body was removed to the outskirts of Karaj Qasim where, to prevent an autopsy, it was burned.

She came from a religious family. Taraneh was only 19 and an only child. Her family has been threatened to keep quiet, and yet the resistance wants her story out. Why? Because here's the truth denied by Khamenei and his misogynistic, murderous regime. Your referendum has been held and you have failed your test. Taraneh and Nadeh

condemn you as the despicable killers of women. You have no legitimacy either in the eyes of the Iranian people or in the eyes of the civilized world. You are doomed by your own hands, and it is but a matter of time until your regime collapses and the Iranian people breathe free.

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Indiana (Mr. BURTON) is recognized for 5 minutes.

(Mr. BURTON of Indiana addressed the House. His remarks will appear hereafter in the Extensions of Remarks.)

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mrs. SCHMIDT) is recognized for 5 minutes.

(Mrs. SCHMIDT addressed the House. Her remarks will appear hereafter in the Extensions of Remarks.)

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Kansas (Mr. MORAN) is recognized for 5 minutes.

(Mr. MORAN of Kansas addressed the House. His remarks will appear hereafter in the Extensions of Remarks.)

ALL JOBS ARE NEEDED NOW

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Minnesota (Mrs. BACHMANN) is recognized for 5 minutes.

Mrs. BACHMANN. Madam Speaker, all jobs are needed now in the United States. We need jobs here and we need jobs now. Unemployment stands at a 26-year high at 9.5 percent.

And what is the response of Washington, D.C.? Government is increasing the costs on job creators. By the end of this week, Madam Speaker, government will have mandated that the price of the minimum wage will increase another \$0.70 per hour. This comes when teenage unemployment stands at nearly 25 percent, nearly another record. Employers expect to be cutting more minimum wage jobs as a result of this action, not adding more jobs. Teenagers in my district are going from day to day to day, many of whom have given up now that it's the end of July, looking for work. Unemployment stands at a high for teenagers. They're competing with 40-year-olds for jobs at fast food companies.

So what else does Washington do?

Washington is passing a crushing debt burden on to the 19- and 20-year-olds with our \$1.1 trillion stimulus plan. Clearly, the stimulus plan hasn't worked to create more jobs for Americans. Two million jobs have been lost since the stimulus law was passed earlier this year. The public was told that if Congress failed to pass the President's stimulus plan that we would see 8 percent unemployment. A lot of
