and nays are ordered, or on which the vote incurs objection under clause 6 of rule XX.

Record votes on postponed questions will be taken later.

WIND ENERGY RESEARCH AND DEVELOPMENT ACT OF 2009

Mr. TONKO. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 3165) to provide for a program of wind energy research, development, and demonstration, and for other purposes, as amended.

The Clerk read the title of the bill. The text of the bill is as follows:

H.R. 3165

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Wind Energy Research and Development Act of 2009".

SEC. 2. WIND ENERGY RESEARCH AND DEVELOP-MENT PROGRAM.

- (a) In General.—The Secretary of Energy shall carry out a program of research and development to—
- (1) improve the energy efficiency, reliability, and capacity of wind turbines;
- (2) optimize the design and adaptability of wind energy systems to the broadest practical range of atmospheric conditions; and
- (3) reduce the cost of construction, generation, and maintenance of wind energy systems.
- (b) PROGRAM.—The program under this section shall focus on research and development of—
- (1) new materials and designs to make larger, lighter, less expensive, and more reliable rotor blades:
- (2) technologies to improve gearbox performance and reliability;
- (3) automation, materials, and assembly of large-scale components to reduce manufacturing costs:
- (4) low-cost transportable towers greater than 100 meters in height to capitalize on improved wind conditions at higher elevations;
- (5) advanced computational modeling tools to improve—
- (A) the reliability of aeroelastic simulations of wind energy systems;
- (B) understanding of the interaction between each wind turbine component;
- (C) siting of wind energy systems to maximize efficiency and minimize variable generation;
- (D) integration of wind energy systems into the existing electric grid to ensure reliability; and
- (E) understanding of the wake effect between upwind and downwind turbine operations;
- (6) advanced control systems and blade sensors to improve performance and reliability under a wide variety of wind conditions;
 - (7) advanced generators, including—
 - (A) medium-speed and low-speed generators;
 - (B) direct-drive technology; and
- (C) the use of advanced magnets in generator rotors;
- (8) wind technology for offshore applications; (9) methods to assess and mitigate the effects of wind energy systems on radar and electro-
- (10) wind turbines with a maximum electric power production capacity of 100 kilowatts or less;
 - (11) technical processes to enable-

magnetic fields:

- (A) scalability of transmission from remotely located renewable resource rich areas; and
- (B) optimization of advanced infrastructure design, including high voltage transmission; and
- (12) other research areas as determined by the Secretary.

SEC. 3. WIND ENERGY DEMONSTRATION PROGRAM.

- (a) IN GENERAL.—The Secretary of Energy shall conduct a wind energy demonstration program. In carrying out this section, the Secretary shall ensure that—
- (1) the program is of sufficient size and geographic diversity to measure wind energy system performance under the full productive range of wind conditions in the United States:
- (2) demonstration projects carried out under this program are—
- (A) conducted in collaboration with industry and, as appropriate, with academic institutions; and
- (B) located in various geographic areas representing various wind class regimes; and
- (3) data collected from demonstration projects carried out under this program is useful for carrying out section 2(b).
- (b) COST-SHARING.—The Secretary shall carry out the program under this section in compliance with section 988(a) through (d) and section 989 of the Energy Policy Act of 2005 (42 U.S.C. 16352(a) through (d) and 16353).

SEC. 4. EQUAL OPPORTUNITY.

- In carrying out this Act, the Secretary of Energy shall— $\,$
- (1) coordinate with the Office of Minority Economic Impact and with the Office of Small and Disadvantaged Business Utilization; and
- (2) provide special consideration to applications submitted by institutions, businesses, or entities containing majority representation by individuals identified in section 33 or 34 of the Science and Engineering Equal Opportunities Act (42 U.S.C. 1885a or 1885b).

SEC. 5. COMPETITIVE AWARDS.

Awards under section 2 and section 3 shall be made on a competitive basis with an emphasis on technical merit

SEC. 6. COORDINATION AND NONDUPLICATION.

To the maximum extent practicable the Secretary of Energy shall coordinate activities under this Act with other programs of the Department of Energy and other Federal research programs.

SEC. 7. AUTHORIZATION OF APPROPRIATIONS.

There are authorized to be appropriated to the Secretary of Energy to carry out this Act \$200,000,000 for each of the fiscal years 2010 through 2014.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from New York (Mr. Tonko) and the gentleman from Texas (Mr. HALL) each will control 20 minutes.

The Chair recognizes the gentleman from New York

GENERAL LEAVE

Mr. TONKO. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days to revise and extend their remarks and to include extraneous material on H.R. 3165, the bill now under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. TONKO. Mr. Speaker, I yield myself such time as I may consume.

I am pleased that today we are considering H.R. 3165, the Wind Energy Research and Development Act of 2009.

The United States has enough wind energy resources to meet all of our electricity needs several times over, but experience over the last several years has shown that many significant technical issues remain before wind can serve as a major provider of baseload electricity. This bipartisan bill

will establish a far more comprehensive research, development and demonstration program for wind technologies at the Department of Energy than currently exists. It is based on several recent assessments of the challenges that need to be overcome for wind power to reach its full potential in the United States and has been fully endorsed by the American Wind Energy Association.

If enacted, H.R. 3165 would become the first law to set an authorization level for wind research and development since DOE's immediate predecessor, the Energy Research and Development Administration, was established in 1975. As we continue to develop a national energy strategy, this will provide crucial guidance for the Department in the years ahead.

I would like to thank my colleagues on the Science and Technology Committee on both sides of the aisle for working with me to make this bill as strong as possible. In particular, I have great thanks for our chairman of the committee, who has made a stalwart effort in advancing our legislation.

In addition to the two Democratic amendments offered, we approved all five Republican amendments offered by voice vote. Thus, the bill ensures geographic diversity, coordination across the Federal Government, and a meritreviewed award process, among other important provisions.

I ask my colleagues in the House to support H.R. 3165, and look forward to working with our counterparts in the Senate to get this to the President's desk as soon as possible.

Mr. Speaker, I reserve the balance of my time.

Mr. HALL of Texas. Mr. Speaker, I yield myself such time as I may consume.

I rise today in support of H.R. 3165, the Wind Energy Research and Development Act of 2009.

Wind energy has been and continues to be a very important part of the electricity-generating portfolio in this country, and in particular in my State of Texas, which I understand is the largest producer of wind energy in our country. However, the technology can be improved upon to make the wind turbines, systems and farms more efficient and more effective at producing energy.

Renewable energy from wind currently makes up almost 2 percent of the energy generated in this country, but industry experts believe that number can be as high as 20 percent. H.R. 3165 can help this country reach that goal.

The bill addresses the key research areas needed to expand our country's production of wind energy, and I thank Mr. Tonko for his work on this important renewable energy source and for working with both sides of the aisle to move this bill unanimously out of the Science Committee and before the House today.

With that, I reserve the balance of my time.

□ 1045

Mr. TONKO. Mr. Speaker, I reserve the balance of my time.

Mr. HALL of Texas. Mr. Speaker, I yield 2 minutes to the gentleman from Nebraska (Mr. SMITH).

Mr. SMITH of Nebraska. Mr. Speaker, I rise today in support of H.R. 3165, the Wind Energy Research and Development Act of 2009.

My home State of Nebraska is sixth in the Nation in wind energy potential, yet lacks in transmission capacity and development for additional generation. As this legislation made its way through the Science and Technology Committee, we adopted my amendment, which will allow for research and development into ways to efficiently and cost effectively create high-voltage transmission for renewable energy.

America needs a comprehensive national energy plan. An all-of-the-above approach to our energy policy, one which includes offshore oil and gas production, as well as the advancement of technologies to develop alternative sources of energy such as wind power, needs to be on the table.

Mr. TONKO. Mr. Speaker, I reserve the balance of my time.

Mr. HALL of Texas. Mr. Speaker, I yield back the balance of my time.

Mr. TONKO. Mr. Speaker, as we continue to grow our dependency on wind power to meet this Nation's energy needs, it is important, critically important that we move forward aggressively with all efforts towards energy efficiency. This measure will do that. I strongly encourage our colleagues to support H.R. 3165.

Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from New York (Mr. Tonko) that the House suspend the rules and pass the bill, as amended.

The question was taken; and (twothirds being in the affirmative) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

RECOGNIZING CONTRIBUTIONS OF AMERICAN COUNCIL OF ENGI-NEERING COMPANIES

Mr. TONKO. Mr. Speaker, I move to suspend the rules and agree to the resolution (H. Res. 447) recognizing the remarkable contributions of the American Council of Engineering Companies for its 100 years of service to the engineering industry and the Nation.

The Clerk read the title of the resolu-

The text of the resolution is as follows:

H. RES. 447

Whereas the American Council of Engineering Companies (ACEC) and its thousands of member firms are celebrating the Council's 100th anniversary in 2009;

Whereas the ACEC is the oldest and largest business association of America's engineering industry, representing more than 5,000 engineering firms that employ 500,000 professionals, engaged in a wide range of practices that propel our economy and ensure a high quality of life for all people in the United States:

Whereas the ACEC represents engineers in private practice, who design the infrastructure, energy, and technological projects that ensure our Nation enjoys the highest standard of living in the world and continues to compete successfully in the 21st century economy;

Whereas the ACEC member firms have been responsible for many of the Nation's most significant achievements over the past 100 years, including the roads, bridges, subways, airports, buildings, industrial facilities, and water systems that are the most advanced in the world: and

Whereas the ACEC member firms have also been at the forefront of the environmental movement, cleaning up hazardous waste sites and incorporating sustainable solutions in infrastructure works: Now, therefore, be it

Resolved, That the House of Representatives congratulates the American Council of Engineering Companies for its 100 years of service.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from New York (Mr. Tonko) and the gentleman from Texas (Mr. Hall) each will control 20 minutes.

The Chair recognizes the gentleman from New York.

GENERAL LEAVE

Mr. TONKO. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days to revise and extend their remarks and to include extraneous material on House Resolution 447, the resolution now under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. TONKO. Mr. Speaker, I yield myself as much time as I may consume.

I rise today in support of House Resolution 447, recognizing the remarkable contributions of the American Council of Engineering Companies for its 100 years of service to the engineering industry and our Nation. I also want to thank the gentleman from North Carolina (Mr. Shuler) for introducing this resolution.

The American Council of Engineering Companies is the oldest and largest business association representing America's engineering industry. It represents more than 5,000 engineering firms that employ more than 500,000 engineers, architects, land surveyors, scientists and others. Its members engage in a wide range of engineering work, including designing the infrastructure, energy and technological projects that contribute to our economy and our quality of life.

The American Council of Engineering Companies traces its roots back to 1909, when a group of engineers in private practice established the American Institute of Consulting Engineers. Today, the American Council of Engineering Companies is a large federation of 51 State and regional councils representing a large section of America's engineering industry.

I congratulate the American Council of Engineering Companies on its 100 years of service and urge passage of House Resolution 447.

Mr. Speaker, I reserve the balance of my time.

Mr. HALL of Texas. Mr. Speaker, I yield myself such time as I may consume.

I rise today, of course, in support of House Resolution 447, recognizing the very remarkable contributions of the American Council of Engineering Companies for its 100 years of service to the engineering industry and to the Nation. ACEC is a large federation of 51 State and regional councils representing the great breadth of America's engineering industry. This includes one of the largest councils serving 325 firms in my home State of Texas.

ACEC represents more than 5,000 engineering firms that employ more than 500,000 engineers, architects, land surveyors, scientists and other specialists responsible for more than \$100 billion of private and public works annually.

It's an effective and growing advocate for advancing the practice of consulting engineering and the promotion of private enterprise, working to further the business interests and opportunities of the world's most respected engineering companies, those that design and build the roads, the bridges, the subways and the airports, industrial facilities and water systems of America. These buildings and infrastructure have truly been the backbone of American commerce and industry during the last 100 years. The ACEC member companies that have helped to construct them will no doubt be on the front lines of the economic recovery that lies ahead of us.

I commend ACEC and its member companies and employees for the immeasurable service and contribution to the country.

I reserve the balance of my time.

Mr. TONKO. Mr. Speaker, I reserve the balance of my time.

Mr. HALL of Texas. Mr. Speaker, I yield 2 minutes to the gentleman from Arkansas (Mr. BOOZMAN).

Mr. BOOZMAN. Mr. Speaker, I rise today in support of H. Res. 447, which recognizes the significant contributions of the American Council of Engineering Companies during its 100 years of service.

The American Council of Engineering Companies, or ACEC, represents more than 5,000 engineering firms across the Nation who work to enhance and safeguard America's quality of life. These companies are involved in every aspect of our economy, from highways and infrastructure to drinking water to new technologies. In 1909, a loosely organized group of engineers in private practice established the American Institute of Consulting Engineers, AICE, the forerunner of ACEC.

Since then, the organization has grown to encompass member firms that employ more than hundreds of thousands of engineers, architects, land surveyors, scientists and other specialists
