

when you consider that during that 5 years, the plaintiff can diligently be preparing a lawsuit while the defendant is ignorant about the very grievance itself, perhaps, and memories and records fade.

So I think it is important, as we go into this bill, that it be characterized as the Trojan horse that it is. This is just the beginning. If you eliminate the statute of limitations in employment discrimination claims, why not eliminate the statute of limitations in other claims: medical malpractice, any other business disputes, and the like? It is just not fair, and it is not right. We should not allow this bill to be represented as a blow for women's equality and women's rights because it simply is much broader and has much more of a broader implication than that.

I am convinced this bill is actually a solution in search of a problem because it is worth noting that in fiscal year 2007, a total of 82,000-plus people timely filed complaints of employment discrimination with the EEOC. It is important to ask what prevented Ms. Ledbetter from doing exactly the same thing, from filing her complaint at the time she knew that perhaps she had a grievance that could be presented to the employer.

So I thank you, Mr. President, for the opportunity to speak briefly on the bill. Assuming cloture is adopted, I hope we will be taking up Senator HUTCHISON's alternative, which I think strikes the fair balance for which I would hope we would all strive, protecting the rights of both those who are victims of discrimination and the companies that have to defend against those claims.

Mr. President, I yield the floor.

#### CONCLUSION OF MORNING BUSINESS

The ACTING PRESIDENT pro tempore. Morning business is closed.

#### DESIGNATING CERTAIN LAND AS COMPONENTS OF THE NATIONAL WILDERNESS PRESERVATION SYSTEM

The ACTING PRESIDENT pro tempore. Under the previous order, the Senate shall resume consideration of S. 22, which the clerk will report by title.

The assistant legislative clerk read as follows:

A bill (S. 22) to designate certain land as components of the National Wilderness Preservation System, to authorize certain programs and activities in the Department of the Interior and the Department of Agriculture, and for other purposes.

Pending:

Reid amendment No. 15, to change the enactment date.

Reid amendment No. 16 (to Reid amendment No. 15), of a perfecting nature.

Motion to commit the bill to the Committee on Energy and Natural Resources, with instructions to report back forthwith,

with Reid amendment No. 17, to change the enactment date.

Reid amendment No. 18 (to the instructions of the motion to commit), of a perfecting nature.

Reid amendment No. 19 (to Reid amendment No. 18), of a perfecting nature.

The ACTING PRESIDENT pro tempore. Under the previous order—the majority leader is recognized.

Mr. REID. I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. REID. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Under the previous order, there shall be 10 minutes of debate equally divided and controlled between the Senator from New Mexico, Mr. BINGAMAN, and the Senator from Oklahoma, Mr. COBURN, or their designees.

The Senator from New Mexico.

Mr. BINGAMAN. Mr. President, as I understand it, we now have 10 minutes equally divided to complete debate on S. 22, and then there will be a vote on passage. Is that correct?

The ACTING PRESIDENT pro tempore. The Senator is correct.

Mr. BINGAMAN. Mr. President, in just a few minutes, the Senate will vote on S. 22, the Omnibus Public Land Management Act. The vote will culminate years of work on more than 160 bills that are included in this package and represents a major achievement for the protection of our Nation's natural, cultural, and historic resources. Taken collectively, I believe the package represents the most significant conservation legislation passed by the Senate in many years.

In addition, it will finally resolve three very important, very complex water rights settlements in three different States ending, literally, decades of litigation and controversy.

#### AMENDMENTS NOS. 23 AND 24, EN BLOC

Before concluding, I wish to take care of a few administrative matters. The unanimous consent agreement for the bill today allows for the adoption of managers' amendments if they have been cleared by the managers and leaders on both sides. We have two such amendments which are at the desk. I understand they have been cleared by all my colleagues. These amendments make a number of technical, clerical, and clarifying corrections.

At this time I ask unanimous consent to call up those two amendments and have them considered and adopted en bloc, as provided for in the unanimous consent agreement.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Under the previous order, the pending amendments are withdrawn.

The clerk will report the managers' amendments en bloc.

The assistant legislative clerk read as follows:

The Senator from New Mexico [Mr. BINGAMAN], for himself and Ms. MURKOWSKI, proposes amendments en bloc numbered 23 and 24.

Mr. BINGAMAN. Madam President, I ask unanimous consent that the reading of the amendments be dispensed with.

The PRESIDING OFFICER (Mrs. MCCASKILL). Without objection, it is so ordered.

#### COLORADO RIVER BASIN

Mr. BINGAMAN. Madam President, the Senate is now considering the Omnibus Public Land Management Act of 2009, S. 22, a bill that contains a number of important water resource initiatives. Given the ongoing need to work closely with the states on water resource issues, I believe it important as chairman of the Energy and Natural Resources Committee for myself, and the new ranking member of the Committee, to acknowledge the hard work of representatives from the Colorado River Basin States of New Mexico, Colorado, Utah, Wyoming, Arizona, Nevada, and California, in reaching agreement regarding certain provisions in title X, subtitle B of S. 22, which contains the Northwestern New Mexico Rural Water Projects Act, hereafter referred to as the "Act".

On August 27, 2008, the Governors' representatives on Colorado River Operations sent a letter to me and Senator DOMENICI, then the ranking member of the committee, requesting certain modifications to the Northwestern New Mexico Rural Water Projects Act. These modifications, which were subsequently incorporated, reflect the joint

consideration, input, and understandings of the Governors' representatives from the Basin States concerning the act and how it relates to the interstate compacts for the Colorado River system. I want to congratulate the representatives on reaching agreement regarding what I recognize are complicated legal and operational issues associated with the Colorado River.

Ms. MURKOWSKI. I join with the chairman of the Energy and Natural Resources Committee in congratulating the representatives of the seven Colorado River Basin States on reaching agreement regarding certain provisions in the Northwestern New Mexico Rural Water Projects Act, and concur in the request for unanimous consent that the August 27, 2008, letter be made a part of the RECORD relating to the consideration of S. 22.

Mr. BINGAMAN. Madam President, I ask unanimous consent that the August 27, 2008, letter be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

AUGUST 27, 2008.

Hon. JEFF BINGAMAN,  
U.S. Senator, Committee Chairman, Energy and Natural Resources Committee, Hart Senate Office Building, Washington, DC.

Hon. PETE DOMENICI,  
U.S. Senator, Ranking Member, Energy and Natural Resources Committee, Hart Office Building, Washington, DC.

DEAR SENATOR BINGAMAN AND SENATOR DOMENICI: In recent years, the seven Colorado River Basin States, ("Basin States"), have, through extensive interstate consultation, taken steps and forged agreements designed to ensure that use and management of the Colorado River System continues to meet existing and future demands in a manner that respects and protects the interests, rights, claims and privileges of each of the seven states. Along those lines, enclosed are the Basin States' recommended modifications to S. 1171, the Northwestern New Mexico Rural Water Project Act, as reported by the Senate Energy and Natural Resources Committee on June 25, 2008, and consolidated into S. 3213, the Omnibus Public Land Management Act as Title X, Subtitle B. The undersigned Governors' Representatives on Colorado River Operations request that Congress adopt proposed modifications to S. 1171/S. 3213 in a form substantially consistent with the attached language, and that the Congressional legislative history of S. 1171/S. 3213 specifically reflect and reference the joint consideration, input and consensus from the Basin States as provided herein.

S. 1171/S. 3213 provides Congressional approval of a settlement of the Navajo Nation's claims to water rights in the San Juan River Basin in New Mexico that will authorize diversion and distribution of San Juan River water through the Navajo-Gallup Water Supply Project to Navajo and non-Navajo communities in the Upper Colorado River Basin, the Lower Colorado River Basin and the Rio Grande Basin within New Mexico. Contingent upon enactment of federal legislation approving a water rights settlement between the State of Arizona and the Navajo Nation, S. 1171/S. 3213 also authorizes the diversion of up to 6,411 acre-feet of water by the Project from the San Juan River in New Mexico in the Upper Colorado River Basin for delivery to the Navajo reservation in Arizona in the Lower Colorado River Basin. S. 1171/S. 3213

directs that Project diversions for use within New Mexico will be accounted as part of the State of New Mexico's Upper Basin allocation of Colorado River water. Pursuant to the attached, recommended modifications, S. 1171/S. 3213 would also direct that Project diversions for use in Arizona be accounted as either part of the State of Arizona's Upper Basin or Lower Basin allocation of Colorado River water, provided that any Lower Basin accounting of such water would occur only under specific conditions as set forth in the recommended modifications.

The undersigned Governors' Representatives consider S. 1171/S. 3213, as modified by the attached, recommended modifications, which are non-precedential in nature, to address unique, critical water supply needs in the context of Indian water rights settlements that involve the diversion of water from the Upper Colorado River Basin for use in the Lower Colorado River Basin, and support such diversions as reflected in our recommended modifications to the legislation.

Herbert R. Guenther, Director, Arizona Department of Water Resources; Patricia Mulroy, General Manager, Southern Nevada Water Authority; Dana B. Fisher, Jr., Chairman, Colorado River Board of California; George Caan, P.E., Executive Director, Colorado River Commission of Nevada; Gerald R. Zimmerman, Executive Director, Colorado River Board of California; Jennifer Gimbel, Director, Colorado Water Conservation Board; John R. D'Antonio, Jr., New Mexico State Engineer, Governor's Representative; Dennis J. Strong, Director, Utah Division of Water Resources, Utah Interstate Stream Commissioner; Patrick T. Tyrrell, Wyoming State Engineer, Governor's Representative.

4. Proposed new definition of Upper Basin in Section 2—( ) *THE UPPER BASIN*.—The term "Upper Basin" has the same meaning given the term in Article II(f) of the Colorado River Compact.

5. See below for proposed modifications to Section 303. \* \* \*

303(c) Conditions for Use in Arizona.—

(1) REQUIREMENTS.—Project water shall not be delivered for use by any community of the Nation located in the State of Arizona under subsection (b)(2)(D) until—

(A) the Nation and the State of Arizona have entered into a water rights settlement agreement approved by an Act of Congress that settles and waives the Nation's claims to water in the Lower Basin and the Little Colorado River Basin in the State of Arizona, including those of the United States on its behalf; and

(B) the Secretary and the Navajo Nation have entered into a Navajo Reservoir water supply

delivery contract for the physical delivery and diversion of water via the Project from the San Juan River system to supply uses in the State of Arizona.

(2) ACCOUNTING OF USES IN ARIZONA.—Pursuant to paragraph (1) and notwithstanding any other provision of law, water may be diverted by the Project from the San Juan River in the State of New Mexico in accordance with an appropriate permit issued under New Mexico law for use in the State of Arizona within the Navajo Reservation in the Lower Basin; provided that any depletion of water that results from the diversion of water by the Project from the San Juan River in the State of New Mexico for uses within the State of Arizona (including depletion incidental to the diversion, impounding, or conveyance of water in the State of New Mexico for uses in the State of Arizona) shall be administered and accounted for as either—

(A) a part of, and charged against, the available consumptive use apportionment made to the State of Arizona by Article III(a) of the Compact and to the Upper Basin by Article 111(a) of the Colorado River Compact, in which case any water so diverted by the Project into the Lower Basin for use within the State of Arizona shall not be credited as water reaching Lee Ferry pursuant to Article III(c) and III(d) of the Colorado River Compact;

or

(B) a part of, and charged against, the consumptive use apportionment made to the Lower Basin by Article III(a) of the Colorado River Compact, in which case it shall—

(i) be a part of the Colorado River water that is apportioned to the State of Arizona in Article II(B) of the Consolidated Decree of the Supreme Court of the United States in *Arizona v. California* (547 U.S. 150 as may be amended or supplemented);

(ii) be credited as water reaching Lee Ferry pursuant to Article III(c) and III(d) of the Colorado River Compact; and

(iii) be accounted as the water identified in Section 104(a)(1)(B)(ii) of the Arizona Water Settlements Act, (118 Stat. 3478);

(C) However, no water diverted by the Project shall be accounted for pursuant to subparagraph (B) until such time that:

(i) the Secretary has developed and, as necessary and appropriate, modified, in consultation with the Upper Colorado River Commission and the Governors' Representatives on Colorado River Operations from each State signatory to the Colorado River Compact, all operational and decisional criteria, policies, contracts, guidelines or other documents that control the operations of the Colorado River System reservoirs and diversion works, so as to adjust, account for, and offset the diversion of water apportioned to the State of Arizona, pursuant to the Boulder Canyon Project Act (43 U.S.C. 617 et seq.), from a point of diversion on the San Juan River in New Mexico; provided that all such modifications shall be consistent with the provisions of this Section, and the modifications made pursuant to this clause shall be applicable only for the duration of any such diversions pursuant to Section 303(c)(2)(B); and

(ii) Article II(B) of the Decree of the Supreme Court of the United States in *Arizona v. California* (547 U.S. 150 as may be amended or supplemented) is administered so that diversions from the main stream for the Central Arizona Project, as served under existing contracts with the United States by diversion works heretofore constructed, shall be limited and reduced to offset any diversions made pursuant to Section 303(c)(2)(B) of this Act. This clause shall not affect, in any manner, the amount of water apportioned to Arizona pursuant to the Boulder Canyon Project Act (43 U.S.C. 617 et seq.), or amend any provisions of said decree or the Colorado River Basin Project Act (43 U.S.C. 1501 et seq.).

(3) UPPER BASIN PROTECTIONS.

(A)—Consultations.—Henceforth, in any consultation pursuant to 16 U.S.C. 1536(a) with respect to water development in the San Juan

*River Basin, the Secretary shall, consistent with the provisions of Section 5 of the "Principles for Conducting Endangered Species Act Section 7 Consultations on Water Development and Water Management Activities Affecting Endangered Fish Species in the San Juan River Basin" as adopted by the Coordination Committee, San Juan River Basin Recovery Implementation Program, on June 19, 2001, and as may be amended or modified, confer with the States of Colorado and New Mexico.*

(B)—*Preservation of Existing Rights.—Rights to the consumptive use of water available to the Upper Basin from the Colorado River System under the Colorado River Compact and the Compact shall not be reduced or prejudiced by any use of water pursuant to Subsection 303(c). Nothing in this Act shall be construed so as to impair, conflict with, or otherwise change the duties and powers of the Upper Colorado River Commission.*

303(h) NO PRECEDENT.—*Nothing in this Act shall be construed as authorizing or establishing a precedent for any type of transfer of Colorado River System water between the Upper Basin and Lower Basin. Nor shall anything in this Act be construed as expanding the Secretary's authority in the Upper Basin.*

303(i) UNIQUE SITUATION.—*Diversions by the Project consistent with this Section address critical tribal and non-Indian water supply needs under unique circumstances, which include, among other things:*

(A) *the intent to benefit an American Indian tribe;*

(B) *the Navajo Nation's location in both the Upper and Lower Basin;*

(C) *the intent to address critical Indian water needs in the State of Arizona and Indian and non-Indian water needs in the State of New Mexico,*

(D) *the location of the Navajo Nation's capital city of Window Rock in the State of Arizona in close proximity to the border of the State of New Mexico and the pipeline route for the Project;*

(E) *the lack of other reasonable options available for developing a firm, sustainable supply of municipal water for the Navajo Nation at Window Rock in the State of Arizona; and*

(F) *the limited volume of water to be diverted by the Project to supply municipal uses in the Window Rock area in the State of Arizona.*

303(j) CONSENSUS.—*Congress notes the consensus of the Governors' Representatives on Colorado River Operations of the States that are signatory to the Colorado River Compact regarding the diversions authorized for the Project under this Section.*

303(k) EFFICIENT USE.—*The diversions and uses authorized for the Project under this Section represent unique and efficient uses of Colorado River apportionments in a manner that Congress has determined would be consistent with the obligations of the United States to the Navajo Nation.*

ALVA B. ADAMS TUNNEL AND GRAND RIVER  
DITCH

Mr. SALAZAR. Madam President, I commend the chairman and ranking member of the Energy and Natural Resources Committee for their diligent work on this package, which contains several bills that I have championed for Colorado. I particularly wish to thank my colleague and friend, Chairman BINGAMAN, and his staff, for his work and cooperation on the Rocky Mountain National Park Wilderness and Indian Peaks Wilderness Expansion Act, which is included in subtitle N of title I of S. 22, and which is critical to preserving some of the Nation's most beautiful and critical wilderness lands. This has been a long road to reach agreement with all constituencies in-

involved and we have faced some unique challenges. But ultimately, and with the chairman's assistance, we have worked through a number of issues to our mutual satisfaction in order to pass a bill that is good for all Coloradans.

One of those challenges has been our effort to protect the operation and maintenance of the Alva B. Adams Tunnel which is the critical component of the Colorado-Big Thompson Reclamation Project. The Adams tunnel was authorized in 1915 by Congress and later constructed within the park and has delivered water from the Colorado River drainage to Colorado's north eastern communities for decades.

I appreciate the Chairman working with us on protecting this facility that provides water to hundreds of thousands of people in Colorado. With his help, we included within section 1953(d) a provision that ensures that nothing in the subtitle, including the designation of wilderness, "prohibits or affects current and future operation and maintenance activities . . . that were allowed as of the date of enactment . . . under the Act of January 26, 1915 (16 U.S.C. 191), relating to the Alva B. Adams Tunnel or other Colorado-Big Thompson Project facilities located within the Park."

The bill also includes in section 1953(g) an additional savings clause, which ensures that the Secretary of the Interior's authority to manage lands and resources within the park is not diminished. It is my understanding that this type of general savings clause does not undermine or contradict the more specific provisions included in section 1953(d) of the subtitle. That is, the savings clause included as section 1953(g) does not alter or affect the provisions in section 1953(d), which make clear that the designation of the park as wilderness is not meant to affect the current and future operation and maintenance activities for the tunnel nor to prohibit or restrict the conveyance of water through the Alva B. Adams Tunnel for any purpose.

Am I correct in my understanding of section 1953(g)?

Mr. BINGAMAN. The Senator from Colorado is correct.

Mr. SALAZAR. I thank the Chairman.

As with any wilderness legislation in a headwaters State, the water rights language in the Rocky Mountain National Park wilderness bill proved to be the most challenging. This legislation strikes a good balance between protection of park wilderness resources and protection of existing water rights, ditch rights-of-way, and water infrastructure, some of which predate the existence of the park.

The Water Supply and Storage Company—WSSC—owns and operates the Grand River Ditch, which is a water supply ditch located in the Never Summer Range in RMNP. The Grand River Ditch provides irrigation water to approximately 40,000 acres of land located

in Larimer and Weld Counties in northern Colorado. WSSC owns, operates and maintains 11 reservoirs and 7 ditch systems, including the Grand River Ditch. WSSC's system of ditches, canals and laterals is more than 100 miles in total length and provides approximately 60,000 acre-feet of water annually to 173 shareholders. The Grand River Ditch is an integral component of WSSC's system. WSSC holds a right-of-way for the Grand River Ditch under the Irrigation or General Right of Way Act of March 3, 1891—1891 Act—codified at 43 U.S.C. §§ 946-49.

The Rocky Mountain National Park Wilderness Act itself should not cause any change in land use, land management, or water rights within Rocky Mountain National Park. Towards this end, section 1953(e) is intended to clarify that neither the Grand River Ditch nor its right-of-way will be adversely affected if the end use of water diverted by the Grand River Ditch is for municipal purposes as opposed to irrigated agriculture. The Grand River Ditch diverts water high in the Colorado mountains and transports it some 50 miles downstream to its location of use. At present, all of the water is used for agricultural irrigation; however, a portion of WSSC's stock is owned by Colorado municipalities and Grand River Ditch water will be used for this purpose in the future. No matter what the end use is, the existence of the Grand River Ditch in RMNP imposes the same burden on the park. In other words, there is no difference in land use, land management or water rights in the park, whether the end use of water is agricultural irrigation or municipal use.

In 1921, the Supreme Court approved forfeiture of a right-of-way that had never been used for its authorized purpose of irrigation, but instead was used for developing electric power. See *Kern River Co. v. United States*, 257 U.S. 147, 1921. The case is distinguishable on several grounds from the Grand River Ditch, but the purpose of Section 1953 (e) is to avoid any attempt to apply a Kern River-type theory to the Grand River Ditch. Over 20 years ago the U.S. Department of Agriculture recognized this point when it said: "The end use of water off the Federal lands, as it may change over time, casts no greater burden on the Federal property to carry the water to its place of use." See letter dated October 1, 1986, from Douglas W. MacCleery, Deputy Assistant Secretary for Natural Resources and Environment, Department of Agriculture, to Malcolm Wallop of the United States Senate, included in the legislative history of Public Law 99-545.

Conversion of agricultural water to municipal purposes is commonplace in Colorado, and the Grand River Ditch is no exception. In a mutual ditch company such as WSSC, ownership of stock represents a pro rata share of ownership in the water rights of the company. The language of section 1953(e)

ensures that WSSC and the right-of-way of the Grand River Ditch will not be adversely affected by the change in end use of GRD water.

The language of section 1953(e), “primarily for domestic purposes or any purpose of a public nature,” was not lightly chosen. It was taken directly from the act of May 11, 1898, which—in the words of the great Justice Van Devanter, who is considered the most knowledgeable authority on public land law to ever sit on the Supreme Court—“permit[ted] rights of way obtained under the Act of 1891 [like the Grand River Ditch], the use of which was restricted to irrigation, to be also used for the other purposes named in the section,” namely “purposes of a public nature” and “domestic purposes.” See *Kern River Co. v. U.S.*, 257 U.S. 147, 152–153, 1921. After more than a century, the terms “purposes of a public nature” and “domestic purposes” seem to be fairly well understood. The phrases “purposes of a public nature” and “domestic purposes” are especially broad, and include municipal uses following delivery, by a potable water provider, through the Grand River Ditch or by means of another conveyance structure. We have agreed to exempt the Grand River Ditch from any restriction that conditions the existence of the right-of-way on agricultural uses and instead to allow them to make “purposes of a public nature” or “domestic purposes” the sole or predominate purpose.

The Grand River Ditch “right of way . . . was granted on an implied condition that it should revert to the United States in the event the grantee ceased to use or retain it for the purpose indicated in the [1891 and 1898] statutes. That purpose—the main and controlling one—was irrigation.” See *Kern River Co. v. U.S.*, 257 U.S. 147, 154 (1921). In the future, the water transported in the ditch will be increasingly used for water supply and municipal purposes, not irrigation. This transition may eventually “entitle[] the United States to assert and enforce a forfeiture of the grant. . . .” 257 U.S. at 154. To address this concern, we have agreed to state in the bill that “the right of way . . . shall not be terminated, forfeited, or otherwise affected as a result” of the change in purpose, “unless the Secretary determines that the change in main purpose or use adversely affects the park.” If the Secretary, in his discretion, makes that determination, he would then have to assert and enforce a forfeiture of the grant in court.

Mr. BINGAMAN. Madam President, I concur in the statements made by the Senator from Colorado and thank him for working carefully with me and my staff to resolve these issues in a way that will ensure protection of park resources and provide for the continued operation of the Grand River Ditch and the Colorado-Big Thompson Projects.

Mr. FEINGOLD. Madam President, today I will vote to support final passage of the Omnibus Public Land Man-

agement Act of 2009, S. 22. While I oppose two provisions in the bill, there are many other provisions that I support.

Yesterday I voted to oppose bringing an end to debate on the bill since the majority leader used a procedural tactic to prevent Senators from offering amendments. I had hoped that cloture would be defeated so that we could reach agreement to allow a few amendments.

One such amendment was one I cosponsored to strike a troublesome provision that would authorize the transfer of Federal land in Alaska’s Izembek National Wildlife Refuge—a designated wilderness area and internationally recognized Ramsar site—so that a road could be built. The road is purportedly to allow travel between two Alaskan communities in cases of medical emergencies. However, Congress has already appropriated more than \$36 million to provide a hovercraft, which I am told crosses Cold Bay in about 20 minutes and to date has met every medical evacuation need in all weather conditions, over 30. The road, on the other hand, would need to avoid the numerous ponds and priority wetland areas—taking 1 to 2 hours to drive—and would not provide safer, faster, or more cost-effective transportation than the hovercraft.

Another provision that troubles me was considered by neither the House nor the Senate Energy and Natural Resources Committee, a prerequisite for all the other public lands bills in the package. The Washington County, UT, provision was air-dropped into this legislation. It is unfortunate that the wilderness designations in the provision fall well short of the wilderness-quality land in the county that should be protected. This public lands bill only proposes to designate 44 percent of what is included in the America’s Red Rock Wilderness Act, which I have been pleased to join Senator DURBIN in supporting. Furthermore, this public lands package omits a wilderness unit, Dry Creek, that Senator BENNETT has previously agreed to protect in his Washington County Growth and Conservation Act of 2008, S. 2834.

There are two provisions in the public lands bill that will impact Wisconsin. The first is Section 5301, the “National Trails System Willing Seller Authority.” This section is based on a bill I cosponsored in the 110th Congress, S. 169, and will allow the Federal Government to purchase lands from willing sellers for two important trails in Wisconsin: the North Country National Scenic Trail and the Ice Age National Scenic Trail. I would like to acknowledge the efforts by the Ice Age Park and Trail Foundation, North Country Trail Association, Partnership for the National Trail System, and the Conservation Fund to help the National Park Service complete these trails. This provision will establish willing seller authority as a uniform policy for the entire National Trail

System, allowing these two trails and seven others to benefit from this commonsense policy.

Section 7116 of the bill also makes a technical correction to the name of the wilderness area in the Apostle Islands, now to be called the Gaylord Nelson Wilderness. Removing the “A” from the former name—Gaylord A. Nelson Wilderness—is supported by the National Park Service and Nelson’s family. Though this is a small change, I do want to take the opportunity to again express my deep respect for the former U.S. Senator and Wisconsin Governor and my support for the Apostle Islands National Lakeshore and the Gaylord Nelson Wilderness. In August 2005, I was deeply honored to participate in a ceremony marking the creation of the Gaylord Nelson Wilderness and honoring the remarkable life of Gaylord Nelson, father of Earth Day. I worked with Representative OBEY to obtain the wilderness designation for 80 percent of the Apostle Islands, but it was Gaylord who was so essential in the effort to recognize the Apostle Islands as a national treasure and establish the national lakeshore.

Mr. LEVIN. Madam President, passage of the Omnibus Public Land Management Act of 2009 would wrap up one of the major pieces of unfinished business from last year. The majority leader promised he would take up this legislation early in 2009, and indeed he has. The omnibus public land bill includes four provisions that will directly benefit Michigan by preserving precious natural resources and improving our parks and trails.

The lands bill includes legislation I authored that would authorize the Federal Government to purchase land from willing sellers for the North Country National Scenic Trail. The North Country Trail will be the Nation’s longest hiking trail, traversing seven States including Michigan, which has the longest trail segment of 1,150 miles. The Federal Government has land acquisition authority for the majority of its national scenic and historic trails, but for no good reason this authority has not been available for the North Country Trail. Willing sellers should have the right to sell portions of their land, or grant easements for trail users across their land, should they choose to do so, and if it is in the public interest. This provision will allow for the eventual completion of the North Country Trail, giving more users the opportunity to enjoy scenic hiking in Michigan as well as the six other States along the planned route. For nearly 10 years, I have been working on this willing seller authority, and I am delighted that Congress has finally approved this important legislation.

The omnibus lands bill also includes legislation I sponsored last Congress to improve the Keweenaw National Historical Park, located in Michigan’s Upper Peninsula. By removing overly restrictive property acquisition requirements, changing unfair matching

requirements for Federal funds, and increasing the authorized level of funds to be appropriated for the park, we can improve the visitors' experience. Established in 1992, this unique park is a partnership with nearly 20 independently operated heritage sites, and preserves and interprets the incredible story of the copper rush in Michigan's Keweenaw Peninsula during the Industrial Revolution. I am pleased that this legislation is finally being acted upon so the park can more fully carry out its statutory mission to preserve and bring to life the vibrant history of Michigan's "copper country"—an essential part of the Nation's history of industrial and technological development, immigration, labor relations, and natural resources, and a key component to the economic revitalization of this area.

The omnibus lands bill also provides important protections for 12,000 acres within the Pictured Rocks National Lakeshore, located in Michigan's Upper Peninsula along the south shore of majestic Lake Superior. I introduced this wilderness bill during the last Congress, and I am pleased that one of the first actions the Senate has taken this year is to pass this bill, which would protect the Beaver Basin for future generations, while ensuring continued public enjoyment of the land. The Beaver Basin wilderness comprises about 12,000 acres, or 16 percent, of Pictured Rocks National Lakeshore, and was proposed after 5 years of careful planning and extensive public consultation. The wilderness designation is responsive to many of the concerns expressed by citizens and ensures its continued recreational use. The access road to the lakes and campground are not included in the wilderness designation, so vehicles would still have access to this popular recreation area. Also, all motor boats would still be able to access the miles of the Lake Superior shoreline, as the wilderness area does not include the Lake Superior surface water. In addition, boats using electric motors would still be allowed on Little Beaver and Beaver Lakes within the wilderness area. The Beaver Basin area has been managed as a backcountry and wilderness area since 1981, and this wilderness designation will ensure that the valuable habitat and pristine natural features of the region remain the treasure they are today.

Finally, the omnibus lands bill includes legislation that I sponsored in the Senate last year as a companion bill to Representative DINGELL's legislation in the House of Representatives, which would designate land in Monroe and Wayne County, MI, related to the battles of the River Raisin fought during the War of 1812 as a unit of the National Park System. While there are currently eight War of 1812 battlefield sites that are in the National Park System, none of these sites are located in areas that were once considered the "Northwest," a key strategic front in the War of 1812. The River Raisin bat-

tlefield sites were the place of horrific events; yet these events became a turning point that spurred our troops to future victories, protected our lands, and culminated in a celebration of America's "Second War of Independence." With the approaching 200th anniversary of the War of 1812, I am pleased that the Senate has this legislation before it, and I look forward to the bill becoming law in time for this national celebration.

Mr. INOUE. Madam President, S. 22, the Omnibus Public Land Management Act, includes five bills vital for increasing our Nation's understanding of our oceans, Great Lakes, and coastal areas. The ocean bills included in this package are all strong bipartisan pieces of legislation that were favorably reported by the Senate Commerce Committee in the 110th Congress and passed the House of Representatives.

The oceans cover two-thirds of our planet, yet we know little about what lies beneath them or how the changing climate is affecting marine resources. Millions of Americans depend directly and indirectly on healthy and bountiful oceans. In 2007, our Nation's coastal economies contributed nearly 50 percent, or \$6.7 trillion, to the national gross domestic product.

While our Nation relies on our ocean, Great Lakes, and coastal resources, tremendous gaps exist in our knowledge of these ecosystems. The Senate Commerce Committee provisions included in S. 22 will strengthen and improve our marine, coastal, and scientific programs, and will help us make the best possible decisions about how to manage, conserve, and protect these valuable resources.

The Ocean Exploration and National Oceanic and Atmospheric Administration, NOAA, Undersea Research Program Act, included in this package, will give us a better understanding of our marine ecosystems and resources. This legislation reflects a long history of bipartisan collaboration in the Senate. It passed the Senate by unanimous consent in the both the 108th and 109th Congresses and was reported favorably in the 110th Congress by the Commerce Committee. The provision establishes an interdisciplinary ocean exploration program to gather observations and data from areas in the ocean we have previously been unable to explore. In addition, this legislation would help strengthen and coordinate NOAA's National Undersea Research Program. The National Undersea Research Program seeks to increase scientific knowledge for the management, use, and preservation of ocean, Great Lakes, and coastal resources through undersea research, exploration, education, and technology development. These essential activities are imperative given that approximately 95 percent of the ocean floor remains unexplored. Ocean exploration and undersea research provides unprecedented opportunities to discover items of natural, cultural, and economic value including

new sources of minerals, drugs, habitats, species, artifacts, and shipwrecks.

The Ocean and Coastal Mapping Integration Act included in S. 22 would integrate Federal and coastal mapping activities throughout the U.S. Exclusive Economic Zone. Approximately 90 percent of our Nation's maritime territory remains unmapped by modern technology. Improved mapping of our Nation's coastal and ocean waters will increase our understanding of the marine environment, thereby increasing the safety of navigation in our maritime domain, supporting national security missions of the U.S. Navy and Coast Guard, and allowing for better management of marine ecosystems and resources. This bill also has a long-standing history of broad bipartisan support in both the Senate and House.

The Integrated Coastal and Ocean Observation System Act would build on current regional systems to establish a national integrated ocean, Great Lakes, and coastal observing system to collect, compile, and make available data to support marine commerce; weather, climate, and marine forecasting; energy siting and production; navigation; ecosystem-based resource management; and public safety. The legislation passed the Senate by unanimous consent in both the 108th and 109th Congresses. During the 110th Congress, the legislation passed the House and was reported favorably by the Senate Commerce Committee.

The Federal Ocean Acidification Research and Monitoring Act in S. 22 mandates that steps be taken to understand and address climate change and its impacts on our oceans, a much needed and important action. Over the past 200 years, human activities have resulted in dramatic increases in greenhouse gases that are altering the Earth's climate. The oceans mitigate the effects of global warming by absorbing approximately half of all this atmospheric carbon dioxide. However, as the oceans absorb more carbon dioxide, their chemistry is changing and the oceans are becoming more acidic. The Federal Ocean Acidification Research and Monitoring Act would establish an interagency committee to develop a strategic research plan on ocean acidification and establish an ocean acidification program within NOAA to conduct research and long-term monitoring on our acidifying oceans and to develop adaptation strategies and techniques for conserving marine ecosystems. This legislation represents a bipartisan effort to promote climate change research and adaptation activities. The bill was reported favorably by the Senate Commerce Committee and passed the House in the 110th Congress.

The final oceans bill included in S. 22 is the Coastal and Estuarine Land Conservation Program Act. As the U.S. population grows and more people move to the coasts, our coastal lands and ecosystems are threatened by

unsustainable development. This legislation authorizes NOAA to award competitive grants to coastal States, including the Great Lakes, to protect coastal and estuarine areas which have significant conservation, recreation, ecological, historic, or watershed protection value and are threatened by conversion to other uses.

As chairman of the Commerce Committee during the 110th Congress, I was pleased to favorably report these important ocean policy bills. Unfortunately, we were unable to pass these bills last Congress. I am glad that the Senate is considering their passage as one of the first major pieces of legislation in the 111th Congress. Our oceans, Great Lakes, and coasts provide many environmental and economic benefits to our Nation, and their conservation must be one of our highest national priorities.

Mr. ROCKEFELLER. Madam President, today the Senate will pass a comprehensive public lands bill that will protect our Nation's public lands and conserve our planet's oceans. I thank the majority leader and Senator BINGAMAN for including important bills from the Committee on Commerce, Science, and Transportation in this package. I commend Senators INOUE, STEVENS, CANTWELL, SNOWE, LAUTENBERG, and GREGG for their leadership in drafting these bills. Senator INOUE, in particular, has aggressively advocated for improved stewardship of our oceans and this package reflects his careful work as chairman of the Commerce Committee which has jurisdiction over our Nation's oceans. As the incoming chair of the Commerce Committee, I will continue to work closely with my dear friend and mentor Senator INOUE on these issues. And I look forward to collaborating closely with him on oceans policy and other areas in the committee's jurisdiction that are particularly critical to the Hawaiian Islands. Our colleagues should know that the ocean and coastal bills included in the Consolidated Natural Resources Act enjoy broad bipartisan and national support because they are sorely needed and important to our Nation's environmental and economic future.

The Federal Government owns nearly 653 million acres of land in the United States. As the owner of these lands, the Federal Government has a responsibility to protect this land for current and future generations. Likewise, and as importantly, the Federal Government has an equal responsibility to protect and manage our Nation's marine and coastal resources. The oceans cover over two-thirds of our planet, yet we know little about what lies beneath or how the changing climate is affecting marine resources. The United States' Exclusive Economic Zone, covers 3.4 million square miles of the Earth's surface, an area greater than the whole United States. Unfortunately, our efforts to sustainably manage and conserve these submerged lands and living resources are ham-

pered by our limited scientific research and understanding of our Exclusive Economic Zone. That is irresponsible and must change. The five ocean bills included in this legislation will authorize programs necessary to increase our Nation's understanding about ocean and coastal areas, which in turn will enable us to make the best possible decisions about how to manage, preserve, and protect our oceans and their living marine resources for current and future generations.

The Ocean and Coastal Exploration and National Oceanic and Atmospheric Administration Act is critical to our ability to gather observations and data from areas in the ocean that have never been explored. The legislation would establish a national ocean exploration program within the National Oceanic and Atmospheric Administration, which would conduct interdisciplinary ocean exploration voyages to explore and survey little known areas of the marine environment and inventory, observe, and assess living and nonliving marine resources. In addition, this legislation would establish a coordinated national undersea research program, which would increase scientific knowledge for the management, use, and preservation of oceanic, coastal, and Great Lakes resources through undersea research, exploration, education, and technology development.

These activities are vital given that approximately 95 percent of the ocean floor remains unexplored. Increasing our knowledge of our oceans through exploration and undersea research provides unprecedented opportunities to discover new sources of minerals, drugs, habitats, species, artifacts, and shipwrecks. Expeditions could provide images of ancient human artifacts, rare or previously undiscovered species, and exciting new ecosystems.

The Ocean and Coastal Mapping Act would direct the Federal Government to integrate Federal and coastal mapping activities throughout the U.S. Exclusive Economic Zone. Approximately 90 percent of our Nation's maritime territory remains unmapped by modern technology. Improving our mapping activities, the promotion of the development and dissemination of new technologies, and the coordination of efforts across the 10 federal agencies currently involved in marine mapping are essential. Better mapping of these waters will help to minimize maritime accidents, support the national security missions of the U.S. Navy and U.S. Coast Guard, and improve our knowledge of ocean and coastal ecosystems.

The Integrated Coastal and Ocean Observation System Act would establish a national integrated ocean, coastal, and Great Lakes observing system that would collect, compile, and make available data to support marine commerce; navigation safety; weather, climate and marine forecasting; energy siting and production; ecosystem-based resource management; and public safe-

ty. This legislation represents an acknowledgement of our need as a country to improve our ability to measure, track, explain, and predict events related to weather and climate change. It represents a consensus that our understanding of natural climate variability and interactions between ocean and atmospheric environments needs strengthening and improvement. Information generated by the Integrated Coastal and Ocean Observation System would assist in providing advanced warning of hazardous coastal and ocean conditions to State managers and potentially affected communities and could help coastal communities prepare for and minimize losses for a range of potentially harmful ocean conditions. Additionally, this Integrated Coastal and Ocean Observation System has the potential to provide economic and ecological benefits for other coastal and ocean activities. For example, fisheries scientists and managers could use the data to predict biological productivity which would facilitate ecosystem-based management. Fishermen and mariners could better predict sea conditions for safe navigation and transport. Ocean scientists and regulators could better understand, predict, and rapidly respond to the distribution and impacts of marine pollution, harmful algal blooms, or other hazardous conditions. Educators and students could learn more about basic functions and processes of the marine environment.

Increasing carbon dioxide absorption in our oceans is acidifying waters and could be threatening the foundation of the ocean's food web. The Federal Ocean Acidification Research and Monitoring Act highlights the need for action to be taken to understand and confront climate change and its impacts on our oceans by authorizing a coordinated Federal research program on ocean acidification. Over the past 200 years, human activities have resulted in dramatic increases in greenhouse gases that are altering the Earth's climate. The oceans mitigate the effects of global warming by absorbing atmospheric carbon dioxide, which is changing ocean carbon chemistry and causing the oceans to become more acidic. There is significant concern among the scientific community, resource managers, and policymakers that ocean acidification could adversely impact our Nation's marine ecosystems, the food webs of many fish and marine mammals, and the economies of many coastal States that rely upon the seafood industry and coastal and ocean tourism. The Federal Ocean Acidification Research and Monitoring Act would establish an interagency committee, chaired by the National Oceanic and Atmospheric Administration, to develop and provide Congress with a strategic research plan on ocean acidification. Additionally, it vests the authority within the National Oceanic and Atmospheric Administration to establish an ocean acidification program

within the agency to conduct research and long-term monitoring, education and outreach, and development of adaptation strategies and techniques for conserving marine ecosystems.

The Coastal and Estuarine Land Conservation Program Act would authorize the Secretary of Commerce, through the National Oceanic and Atmospheric Administration, to make grants to coastal States for the purposes of protecting important coastal and estuarine areas that have significant conservation, recreation, ecological, historical, or aesthetic values, or that are threatened by conversion from their natural, undeveloped, or recreational state to other uses, and it provides grants for lands to be managed or restored to effectively conserve, improve, or restore ecological function. Estuaries, wetlands, and the watersheds that flow into them support fisheries and wildlife and substantially contribute to coastal economies. The pressures of urbanization and pollution in coastal areas threaten to impair watersheds, undermine natural protections from coastal storms, impact wildlife habitat, and cause irreparable damage to coastal ecology. As our population grows, more and more people are moving to our coasts to enjoy their beauty and recreational opportunities. Coastal land protection partnership programs can help our Nation meet a number of diverse priorities such as promoting recreation, increasing wildlife, improving or conserving ecological quality and diversity, and preserving historical or cultural resources. The legislation would foster partnership programs among the Federal Government, State agencies, local governments, private landowners, and nonprofits to effectively conserve and manage coastal lands.

Over 50 percent of our population lives along our coasts and our coastal economies generate one-half of our Nation's gross domestic product. The planet's oceans produce an untold amount of wealth, both economic and ecological, for our Nation. What is good for the health of our coastal communities and oceans is good for the Nation. Given the reliance our citizens have on our marine and coastal resources and the large gaps exist in our knowledge regarding U.S. ocean and coastal areas, strengthening and improving our marine, coastal, and scientific programs will enable us to make the best possible decisions about how to manage, preserve and protect our oceans.

Mr. BINGAMAN. Madam President, earlier today the Senate passed S. 22, the Omnibus Public Lands Management Act of 2009. As I said during the debate, S. 22 includes over 160 bills from the Committee on Energy and Natural Resources and reflects many years of hard work.

This achievement would not have been possible without the hard work of our outstanding staff. Both our ranking member, Senator MURKOWSKI, and I

are very fortunate to have a very dedicated and experienced professional staff. They service the committee and the Senate well. They deserve our thanks.

On the Democratic staff of the committee, I would like to thank the committee's staff director, Bob Simon, and chief counsel, Sam Fowler, for all of their work on this legislation, as on all the legislation that comes through our committee. I would also like to thank senior counsel Patty Beneke; counsel Mike Connor, who worked on all of the water issues included in the bill; counsels David Brooks, Kira Finkler, and Scott Miller, who coordinated all of the park and public lands bills; professional staff members Jorge Silva-Banuelos, who worked very hard on many of the New Mexico land bills; and Jonathan Epstein; and two National Park Service fellows, Karl Cordova, who worked on the committee last year, and Mike Gauthier, who is on the staff for the current year.

I would also like to thank the committee's chief clerk, Mia Bennett; executive assistant Amanda Kelly; communications director Bill Wicker; press secretary David Marks; and staff assistants Rachel Pasternack, Gina Weinstock, and Rosemarie Calabro.

On the Republican side, let me acknowledge Senator MURKOWSKI's new staff director, McKie Campbell, and chief counsel Karen Billups. I would also like to note my thanks to former Senator Domenici's staff director during the previous Congress, Frank Macchiarola; and former minority chief counsel, Judy Pensabene. I would also like to recognize counsel Kellie Donnelly; as well as professional staff members Frank Gladics, Josh Johnson, and Tom Lillie, all of whom made significant contributions to this bill.

In addition, I am very grateful to the committee's nondesignated staff: Anna-Kristina Fox, Dawson Foard, Nancy Hall, Amber Passmore, Monica Chestnut, and Wanda Green.

S. 22 contains over 1,200 pages of text, and was the subject of numerous revisions. I am grateful to the help of the Senate legislative counsel office, and Gary Endicott, Heather Burnham, and Colin Campbell in particular.

I would also like to thank Cliff Isenberg from the Senate Budget Committee for his help as well as Deb Reis from the Congressional Budget Office, and Tyler Kruzich, formerly with CBO.

Finally, let me acknowledge the great help in bringing the bill to the floor we received from the majority leader and his staff: Neil Kornze, Chris Miller, Randy DeValck, Gary Myrick, and, as always, the secretary for the majority, Lula Davis, as well as Tim Mitchell, the assistant secretary for the majority. I would also like to thank the cloakroom staff, Joe Lapia, Meredith Mellody, Brandon Durlinger, and Estaban Galvan, for all of their assistance.

All of these fine staff members had a hand in putting S. 22 together and

moving it through the legislative process. We would not have been able to pass the bill without their hard work and their professionalism. I wish to thank each and every one of them for their good work.

Mr. AKAKA. Madam President, today I rise to express my support for S. 22, the Omnibus Public Land Management Act of 2009. I commend Chairman BINGAMAN and former Ranking Member Domenici of the Senate Committee on Energy and Natural Resources for their leadership and their staff for their dedication during the previous Congress to move this important legislation forward. While we were unable to vote on this package last year, it is time that we pass these bills. During these times of economic downturn, our national parks and public lands are some of the few affordable recreational opportunities available to the American people.

This legislation is a bipartisan package of more than 160 individual bills, and incorporates a wide range of public land measures that impact various regions of our Nation. All of the bills included in the package have been thoroughly reviewed and favorably reported by the Senate Committee on Energy and Natural Resources during the 110th Congress. By utilizing, to the full extent, the committee vetting process that includes acquiring testimonies from Federal agencies, stakeholders, and members of the public, concerns were addressed and bills were amended, as needed. In addition to the Senate committee's approval, many of these measures were passed by the House of Representatives last Congress.

As chairman of the National Parks Subcommittee, I had the opportunity to hold hearings on a number of the bills included in this package. This legislation includes many important provisions for protecting and preserving America's national parks and enhancing the experiences to be gained by park visitors. Today, I wish to highlight four provisions that I sponsored during the 110th Congress: H.R. 3332, the Kalaupapa Memorial Act; S. 1728, Na Hoa Pili O Kaloko-Honokohau Advisory Commission Reauthorization Act; S. 2220, Outdoor Recreation Act of 1963 Amendments Act; and S. 320, the Paleontological Resource Preservation Act. In addition, I appreciate the inclusion of S. 1680, the Izembek and Alaska Peninsula Refuge Enhancement Act of 2008. This provision addresses the needs of a rural and indigenous Alaska Native community.

The first three of these provisions are particularly meaningful as they acknowledge the historical contributions and preserve Hawaii's unique heritage for future generations. The remembrance and revitalization of our culture, heritage, and natural resources are an essential way to build upon the values and traditions of our past and move forward into the future. I am proud that the people of Hawaii, through partnerships at the State and

Federal levels, have embraced this opportunity. These efforts perpetuate a legacy to be embraced by not only the people of Hawaii, but a legacy to be shared with people across this Nation. I am confident that these measures which I sponsored will enable continued good work and progress in promoting and protecting the natural and cultural resources of my home State.

The Kalaupapa Memorial Act would authorize a memorial to be established at Kalaupapa National Historical Park in Hawaii. This long overdue memorial will honor and perpetuate the memory of those Hansen's disease patients who were forcibly relocated to the Kalaupapa community, which is located on a remote peninsula on the Island of Molokai.

For over 100 years, from 1866 to 1969, Kalaupapa was a colony on the Hawaiian island of Molokai where patients with Hansen's disease, also known as leprosy, were forced to live. These individuals were directed to live there by the Hawaiian and, later, the American Governments in the belief that leprosy was rampantly contagious and that isolation was the only effective means of controlling the disease. In 1865, acting on the counsel of his American and European advisers, Lot Kamehameha, the Hawaiian King, signed into law "An Act to Prevent the Spread of Leprosy," which criminalized the disease. In the ensuing 103 years, men, women, and children of all ages—including those who were mistakenly believed to have leprosy—were captured and forcibly exiled to the brutal northern coast of Molokai, chosen due to its isolated and inaccessible location.

Ultimately, more than 8,000 people were sent to Kalaupapa, of which only about 1,300 graves have been identified. Most of those patients who were sent to Kalaupapa before 1900 have no marked graves. Others were buried in places marked with a cross or a bare tombstone, but those markers have seen great deterioration over time. As a result, there are many family members and descendants of these residents who cannot find the graves of their loved ones and are unable to properly honor and pay tribute to them.

This measure would authorize a non-profit organization consisting of Kalaupapa residents and their families and friends, and known as "Ka 'Ohana O Kalaupapa," to establish a memorial at a suitable location in the park to honor the memory of the 8,000 residents who lived at the Kalaupapa and Kalawao communities. This monument will provide closure and a sense of belonging to these many family members, who have no knowledge of their ancestors' whereabouts. Through this monument, the Hansen's disease patients will forever be memorialized as having been a part of the history of Kalaupapa.

The Na Hoa Pili O Kaloko-Honokohau Advisory Commission Act would reauthorize the Advisory Commission for Kaloko-Honokohau Na-

tional Historical Park through 2018. Kaloko-Honokohau National Historical Park, located on the western coast of the Island of Hawaii, was established in 1978 to provide for the preservation, interpretation, and perpetuation of traditional Native Hawaiian activities and culture; to demonstrate historic land use patterns; and to provide for the education, enjoyment, and appreciation of traditional Native Hawaiian activities and culture. This Advisory Commission advises the National Park Service on historical, archaeological, cultural, and interpretive programs for the park and serves as a living resource for the education, enjoyment, and understanding of traditional Hawaiian culture and activities. This legislation would extend the Advisory Commission through the end of 2018.

The Outdoor Recreation Act of 1963 Amendments Act seeks to authorize \$500,000 in funds for fiscal years 2008 through 2017 to the National Tropical Botanical Gardens. The measure will authorize appropriations to the corporation governing the Botanical Gardens for operation and maintenance expenses. These funds will contribute towards the private donations that the Botanical Gardens already raises to support its annual operating budget of over \$10 million.

The National Tropical Botanical Gardens is a private charitable corporation, chartered by legislation that was enacted in 1964 to foster horticultural research, education, and plant preservation. Its congressional charter mandates the Botanical Gardens to preserve, for the people of the United States, species of tropical plant life threatened with extinction.

Conservation is one of the National Tropical Botanical Garden's key roles. This role has become even more critical as tropical plant species continue to become extinct at a disturbing rate. As many as one-third of the remaining global plant species are considered at risk of extinction. Since 1976, the National Tropical Botanical Gardens has recognized and worked with urgency to preserve and cultivate native Hawaiian plants, and has made its program of preserving Hawaii's endangered and threatened flora a matter of the highest priority.

The unique flora of 1,300 species that has evolved over millions of years in Hawaii represents a significant resource to the people of the United States in terms of the biodiversity it represents. Further, many of these botanical species serve as the foundation of entire ecosystems, serving as food sources or habitats for other larger species that are either threatened or endangered. These are species that are not represented in any of the other 49 States in our Nation. Each of these species contains unique genes that express themselves in a myriad of ways. Each time we lose a species to extinction we lose an irreplaceable reservoir of unique genes and eliminate their usage as a possible benefit to humanity.

The Paleontological Resources Preservation Act incorporates many of the recommendations on the subject issued by the Department of the Interior in 2000. This act would help protect and preserve the nation's important fossil resources that are found on Federal lands for the benefit of our citizens. This provision will still allow the practice of casual collecting that is being enjoyed on Federal lands. While I recognize the educational benefits and the major fossil discoveries made by amateur collectors and curio hunters, fossil theft has become an increasing problem. Vertebrate fossils are rare and important natural resources that have become increasingly endangered due to an increase in the illegal collection of fossil specimens for commercial sale. However, at this time there is no unified policy regarding the treatment of fossils by Federal lands management agencies which would help protect and conserve fossil specimens. We risk the deterioration or loss of these valuable scientific resources. This act will correct that omission by providing uniformity to the patchwork of statutes and regulations that currently exist. It will create a comprehensive national policy for preserving and managing fossils and other artifacts found on Federal lands, and will prevent future illegal trade. I would like to emphasize that this bill covers only paleontological remains on Federal lands and in no way affects archaeological or cultural resources under the Archaeological Resources Protection Act of 1979 or the Native American Graves Protection and Repatriation Act.

Lastly, I express my support for a provision in the omnibus lands bill that I cosponsored in the 110th Congress, S. 1680, the Izembek and Alaska Peninsula Refuge and Wilderness Enhancement Act. This measure paves the way for a road that would provide dependable and safe year-round access for the residents of King Cove in Alaska to the nearby Cold Bay Airport. I believe that the 800 residents of King Cove, most of whom are Native Aleut, have an absolute right to a means of transport that is accessible under all weather conditions, including gale force winds and fog. This reliable means of getting to the airport will help address many of the community's safety, health, and medical concerns because the Cold Bay Airport is an all-weather airport.

In addition to providing an essential passageway, this provision will authorize a land transfer in which nearly 56,000 acres of pristine land will be classified as wildlife refuge wilderness. In contrast, only about 2,000 acres of Federal land could potentially be exchanged for the purpose of constructing a one-lane gravel road. This measure has been in the making for 10 years. I commend the Energy and Natural Resources Committee for working across the aisle to modify and refine the original language to be acceptable to all parties and stakeholders. Neither

the land exchange nor the construction of the road will occur without a stringent environmental impact statement required under the National Environmental Policy Act of 1969 and assurances by the Secretary of the Department of the Interior that the construction of the road and the land exchange are in the public interest and sufficient environmental safeguards are in place.

I strongly support the Omnibus Public Land Management Act of 2009 and those provisions that protect and preserve the historical contributions made by Hawaii's environmental and cultural heritage. We must protect our legacies, and I encourage my colleagues to join in keeping our precious national resources and historic sites available for future generations.

Ms. CANTWELL. Madam President, today, the Senate can be very proud of a very significant accomplishment for the enjoyment and protection of wilderness areas, historical sites, national parks, forests, trails and scenic rivers. Collectively, this is one of the most sweeping conservation bills the Senate has passed in many years.

This bill has been through many twists and turns over the last year. But today's successful vote could not have been possible without the tenacity and dedication of the Majority Leader.

I thank the majority leader for his steadfast support and dedication to seeing that these important public land priorities become law.

There are a number my bills in this omnibus lands package that I would like to speak to.

First, the Ice Age Floods National Geologic Trail Designation Act. This bill will create a National Park Service trail to celebrate the remarkable geologic history of the Pacific Northwest region. This bill has enjoyed regional, bipartisan support. I would like to thank Senators MURRAY, WYDEN, CRAPO, and my former colleagues Senators Smith and Craig for working with me on this legislation.

There are too many people to thank by name but I want to acknowledge the dedication of the Ice Age Floods Institute, particularly its President, Gary Kleinknecht, who has worked tirelessly to educate our country on the significance of the Ice Age Floods Geologic Trail.

In many ways, the members of the Institute serve as the protégés of people like University of Washington professor J. Harlan Bretz and USGS geologist Joseph Pardee, who fought to make credible their hypothesis about the historic existence of the Ice Age Floods.

This is a wonderful day for many communities, scientists, and Ice Age Floods enthusiasts throughout the Pacific Northwest, and for tourism and geologic education.

The Ice Age Floods Institute has promoted the development of an Ice Age Floods National Geologic Trail for over 12 years. With the growing interest and enthusiasm for this concept, this Geo-

logic Trail is a long time coming. The story of the Ice Age Floods is a truly amazing story of the forces of nature and their impact on our lives.

When geologists first saw the vast Columbia Basin in eastern Washington, they recognized that glaciers and flowing water had played a large part in shaping the extraordinary landscape, with its canyons, buttes, dry cataracts, boulder fields, and gravel bars.

During the last Ice Age, some 13,000 to 18,000 years ago, an ice cap covered almost all of Canada and extended down across much of the Pacific Northwest. In Idaho, a 2,000-foot-high glacier backed water up in western Montana until it formed Glacial Lake Missoula, totaling 530 cubic miles or more than Lakes Erie and Ontario combined.

When Glacial Lake Missoula deepened enough, the sheer force of the backed up water undermined the glacial ice dam, and the ice gave way in a cracking explosion. The huge lake was released all at once.

When the dam broke, a towering mass of water and ice was released and swept across parts of Idaho, Washington, and Oregon on its way to the ocean.

The peak rate of flow was ten times the combined flow of all the rivers of the world. The huge lake may have emptied in as little as 2 or 3 days.

Geologists at the University of Washington counted 89 floods without reaching bottom, leading to present-day estimates of up to 100 catastrophic water releases.

The glacial ice dam would break, sparking cataclysmic floods, fresh ice would eventually flow from Canada to once more create an ice dam and Lake Missoula, and the cycle would be repeated every 50 years or so. It ended only with the melting of the continental ice cap.

These epic floods fundamentally changed the geography and way of life in the Pacific Northwest. The coulees, buttes, boulder fields, lakes, ridges and gravel bars they left behind still define the unique landscape of our State and our region today.

These floods are a remarkable part of our natural heritage. They have profoundly affected the geography and ways of life in the region but have remained largely unknown to the general public.

The legacy of the floods includes not only stark scabland and dramatic dry coulees and cataracts, but also exceptionally fertile, productive farmland, and significant wetlands and aquifers.

Creating a National Park Service trail to recognize and celebrate how these floods literally shaped the face of our state will provide an unparalleled educational resource for Washingtonians and visitors from across the country.

It will also spur economic development and create jobs in local communities across eastern and central Washington.

I appreciate the Senate's attention to this bill that will help educate and in-

terpret one of the largest flooding events known to science.

To date, more than 30 entities spanning State and local governments, chambers of commerce, and other civic and community organization support creation of the trail concept.

This Omnibus Public Land Management Act of 2009 also includes my Snoqualmie Pass Land Conveyance Act. This bill would transfer an acre and a half of Forest Service land to the Snoqualmie Pass fire district to help them build a new fire station.

I specifically thank the fire district commissioner Chris Caviezel for working so hard on behalf of the people at Snoqualmie Pass and providing top rate emergency services at one of the most traveled mountain passes in the country.

During our recent winter storms, which brought several feet of snow, following by pounding rain and massive land slides at the Pass, Chris has been on the front lines providing tireless and dedicated round the clock public service to keep Snoqualmie Pass safe.

The Snoqualmie Pass Fire Department serves a portion of two counties on both sides of the Cascade Mountains along Interstate 90, a community of 350 full-time residents that peaks to 1,500 during the ski season.

Additionally, the ski area estimates 20,000 patrons on a busy weekend, and the Department of Transportation estimates that up to 60,000 vehicles travel through the fire district on a busy day, making it the busiest mountain highway in the country.

This area is also the major transportation corridor for goods and services between eastern and western Washington. The all-volunteer fire department averages over 300 calls a year with about a 10 percent annual increase in call volumes, which is more than triple the amount of calls a typical all-volunteer fire department would respond to in a year.

Eighty-four percent of those incidents are for nontax paying residents. Consequently, the fire department has the characteristics of a large city with the limited resources of a small community.

In recent years, this area has been the scene of major winter snowstorms, multi-vehicle accidents, and even avalanches.

The fire district is often the first responder to incidents in the area, which is prone to rock slides and avalanches and it is not uncommon for this community to be isolated for hours or even days at a time.

Several thousand people can be stranded at the pass during those periods when the Pass is closed and while the Department of Transportation works quickly to get the roads back open, it can be very taxing on local resources.

For decades, the fire district has been leasing its current site from the Forest Service. They operate out of an aging building that was not designed to be a fire station.

Through their hard work and dedication, they have served their community ably despite this building's many shortcomings. However, with traffic on the rise and the need for emergency services in the area growing, the fire district needs to move to a true fire station.

The fire district has identified a nearby site that would better serve the public safety needs at the pass. This location would provide easy access to the interstate in either direction, reducing emergency response times.

The parcel is on Forest Service property, immediately adjacent to a freeway interchange, between a frontage road and the interstate itself. The parcel was formerly a disposal site during construction of the freeway and is now a gravel lot.

It is my understanding that there are offers of support to construct a new fire station from State and local officials, and to mitigate any effects of construction, and I support those efforts.

I appreciate the efforts of Senator MURRAY and my colleagues on the Energy and Natural Resources Committee to review this issue and bring this bill forward. I look forward to continuing to work with the community at the pass and my colleagues to improve public safety in the area.

This Omnibus Public Land Management Act of 2009 also includes my Pacific Northwest National Scenic Trail Act. This bill would designate the Pacific Northwest trail a national scenic trail.

The Pacific Northwest is home to some of the most pristine and breathtaking scenery this country has to offer—from vast patches of forest and steep, snow capped mountain ranges to sandy beaches, rocky ocean coast, and green pastures.

The Pacific Northwest Trail, zig-zagging from the Continental Divide to the Pacific Coast, offers all of these spectacular views. The Pacific Northwest Trail, running from the Continental Divide to the Pacific Coast, is 1,200 miles long and ranks among the most scenic trails in the world.

This carefully chosen path runs through the Rocky Mountains, Selkirk Mountains, Pasayten Wilderness, North Cascades, Olympic Mountains, and Wilderness Coast. From beginning to end it passes through three States, crosses three national parks, and winds through seven national forests.

And designating the Pacific Northwest trail a national scenic trail will give it the proper recognition, bring benefits to neighboring rural communities, and promote its protection, development, and maintenance.

In 1980, the National Park Service and the Forest Service completed a feasibility study of the proposed Pacific Northwest trail. And the study concluded that the Pacific Northwest trail has the scenic and recreational qualities needed for designation as a national scenic trail.

Today, approximately 950 miles of the Pacific Northwest trail are completed and provide significant outdoor recreational experiences to citizens and visitors of the United States.

With more recognition and more people from all over the country "putting on their hiking boots," the trail will receive more eligibility for grants funding and increased attention, which in turn will result in increased use and more economic activity in rural areas.

National scenic trails provide recreation, conservation, and enjoyment of significant scenic, historic, natural, and cultural qualities. The Pacific Northwest trail is a national prize and should be recognized as such.

This Omnibus Public Land Management Act of 2009 also includes my wildland firefighter safety legislation. This legislation will improve accountability and transparency in wildland firefighter safety training programs. Wildland firefighting and the safety of wildland firefighters is vitally important to our brave men and women who battle these blazes, and for the communities that depend on them.

When wildfires do occur we rely on courageous men and women to protect our communities and natural resources. Every summer, we send thousands of brave firefighters into harm's way to protect our Nation's rural communities and public lands.

Of course, fighting fires is inherently dangerous. But we must not abide preventable deaths: We must not lose firefighters simply because rules are broken, policies are ignored, and no one is held accountable.

Six years ago, Washington State suffered a horrible tragedy. On July 10, 2001, near Winthrop in Okanogan County, during the second worst drought in Washington history, the Thirtymile fire burned out of control and four courageous firefighters died. Sadly, subsequent investigations revealed that they didn't have to die. The Forest Service has said the tragedy "could have been prevented."

Since then, the courage of the Thirtymile families, standing up and demanding change, has had a positive impact on the safety of our wildland firefighters. But we must do much more.

Through training and certification we can lower the risk to the brave men and women who protect our forests and communities. It's critical that Congress is actively engaged to ensure this happens.

An inspector general's report released in March 2006 found problems in the Forest Service's oversight of contracting firefighting crews. Hundreds are contracted by the Forest Service and State agencies every year to fight fires. Roughly one-third of the records it sampled showed that fire fighters' qualification standards had not been met. Too many have been dispatched to fight fires without the necessary preparation.

This is not new. A 2003 Seattle Times report cited an internal Forest Service

memo identifying the lack of accountability in the contract firefighting program. A 2004 GAO report found that insufficiently trained contract crews hampered firefighting efforts. And a 2004 IG audit found that at the time the Forest Service could not monitor the certification of more than 80 percent of its own firefighters. That is unacceptable.

This legislation is a very modest yet important proposal. The Senate has already passed it once as an amendment to the 2003 healthy forests legislation, but sadly, it was not included in the conference version of the bill.

It is clear: this bill's provisions are still a necessary tool to ensure that Congress and Federal wildland firefighting agencies are as proactive as possible in protecting the lives of wildland firefighters.

First, the Wildland Firefighter Safety and Transparency Act requires the Secretaries of Agriculture and Interior to track the funds they spend on firefighter safety and training. Congress and taxpayers deserve to know whether and how Federal funds are being spent to ensure the safety of firefighters.

Improved accountability means improved safety: I hope the Forest Service will agree to track its funds as part of the administration's annual budget request.

Second, my legislation requires the Secretaries to report to Congress annually on their departments' safety and training programs. We need to monitor Federal firefighting agencies and ensure commitments to reform are being acted upon. An annual check-in on safety programs from Congress is essential to making that happen.

Finally, my bill would require the Forest Service to ensure that private firefighting crews working under federal contracts receive training consistent with their Federal counterparts. This is critical not only to protect those private crews but also to safeguard the Federal, State and tribal employees who stand shoulder-to-shoulder with the contractors on the fire line.

And so we have an obligation to protect and prepare the brave firefighters we send into harm's way. I look forward to working with my House colleagues on approving this legislation.

All of this could not have been accomplished without the strong support and hard work and dedication of the majority leader and I thank the leader for successfully moving these priorities.

Mr. DURBIN. Madam President, the Omnibus Public Land Management Act of 2009 (S. 22) combines more than 160 individual bills to protect America's wilderness and responsibly manage our natural resources. The individual measures in this bill were originally introduced by nearly equal numbers of Democratic and Republican Senators and the vast majority have broad bipartisan support.

S. 22 would protect over 2 million acres of land by designating it as wilderness, making it the largest expansion of the National Wilderness Preservation System in almost 15 years.

The new and expanded wilderness areas established by this bill would span nine States and include such treasures as: Pictured Rocks National Lakeshore in Michigan; Monongahela National Forest in West Virginia; Oregon's Mount Hood; Idaho's Owyhee canyons; the Sierra Nevada Mountains of California; the Rocky Mountain National Park in Colorado; Zion National Park in Utah; as well as wilderness-quality lands in Virginia and New Mexico.

S. 22 would also protect more than 1,000 miles of free-flowing rivers by adding them to the National Wild and Scenic Rivers System. It would add thousands of new miles of trails to the National Trails System, expand the National Park System, and establish new National Conservation Areas.

The Omnibus Public Land Management Act would create new National Heritage Areas and authorize additions to the National Park System to preserve historical sites, including the creation of the Abraham Lincoln Birthplace National Historic Park in Kentucky.

The package also contains critical measures to responsibly manage our Nation's water resources, including a provision to assess the impact of climate change on our national water supply, authorizations to repair water infrastructure, and the resolution of important water settlements in the West.

Other key provisions include the establishment of a 26-million-acre National Landscape Conservation System and protecting more than 1 million acres of Wyoming's Bridger-Teton National Forest from oil and gas development.

In its waning days, the current administration went forward with a controversial oil and gas lease sale in Utah that included wilderness quality lands near several national parks. This sale highlights the need for Congress to come together and protect our public lands and precious natural resources for future generations.

I support this package to protect our wilderness areas and preserve the country's natural resources.

Mr. BINGAMAN. Madam President, this package would not have been possible without the dedicated work of the majority leader over the past several months. I wish to particularly thank him for his commitment to calling up this bill early in this Congress and proceeding with it. I wish to also acknowledge the excellent work and energy of the Natural Resources Committee's new ranking minority member Ms. MURKOWSKI. We have been able to work together to develop a truly bipartisan combination of bills which is reflected in the broad support for this package. Of course, I wish to acknowledge the

role of Senator Domenici, who was the ranking member in the prior Congress, for his hard work that also is reflected in this legislation.

I wish to also recognize the work of three of our subcommittee chairmen and ranking members: Senators AKAKA and BURR on the National Parks Subcommittee, Senators WYDEN and BARRASSO from the Public Lands and Forests Subcommittee, Senator JOHNSON and Senator CORKER of the Water and Power Subcommittee. Most of the hearings for the bills in this package were held in those subcommittees. These Senators laid much of the groundwork for today's vote. Of course, I wish to recognize Chairman RAHALL of the House Natural Resources Committee for all his work and the work of his staff to resolve any differences that could have existed with the other body.

We have had superb staff work in developing this legislation. Let me particularly mention David Brooks, Kara Finkler and, of course, our staff director, Bob Simon, as well as Sam Fowler, the counsel for our Energy and Natural Resources staff; also, Mike Connor, who worked very hard on many of the water provisions contained in the legislation; Scott Miller, who worked on many of the forest-related sections of this legislation. I know Senator MURKOWSKI and, prior to her, Senator Domenici, also had excellent staff work on the Republican side, which resulted in this legislation coming together in a bipartisan fashion.

So I will put a more complete statement acknowledging the great work of members of our committee staff in the RECORD and elaborate on that as the day proceeds, but I do wish to mention them now.

Madam President, I see my colleague from Oklahoma is here to speak. How much time remains on the two sides? I know he has 5 minutes. Is there any time remaining on our side?

The PRESIDING OFFICER. There is no time remaining on the majority side.

Mr. BINGAMAN. I yield the floor.

The PRESIDING OFFICER. The Senator from Oklahoma is recognized.

Mr. COBURN. Madam President, in thinking about where we are today, I asked myself what the average Oklahoman would ask of me about this bill, or the average person from Wyoming or California.

As I think about it, we have a bill that has 45 blatant earmarks in it. It is not a new day in Washington. Despite arguments to the contrary, we are going to significantly alter our access to millions of barrels of oil and trillions of cubic feet of natural gas by what we are doing. We are going to create a further imbalance. We have almost 107 million acres of wilderness area. We are going to add another 2.2 million acres to that today. We are going to trample on property rights as we haven't in decades, both directly and indirectly. I asked myself: Why are we doing it? I believe we are doing it

because we are thinking in the very short term. I also believe we are doing it because we pride ourselves in the parochial benefits that we can return to our States at the expense of the best judgment in terms of decisionmaking for our future.

As has been noted on this floor, there are many of these bills that I don't approve that don't have an impact, that aren't earmarks, that aren't going to take property rights away, that aren't going to limit our access to available oil and natural gas, proven reserves, but nevertheless we are going to do those things today, and there are going to be 20 or 25 votes against it. That doesn't mean the people who are promoting this are any more genuine or sincere than I am, but I think what it does mean is we have a short-term, myopic-focused leadership in the Congress that does not weigh properly the benefits of pleasing the parochial interests at the expense of our future.

So I have fought very hard for many months to try to make sure a majority of these bills don't become law—not because I am opposed to wilderness or heritage areas but because I am for constitutional right of property ownership, because I know the more and more we take away from our ability to fill the gap as we transition to alternative energy, the more money we are going to fund to those people who would like to see us nonexistent.

It is a privilege to serve in this body. It is a privilege to serve with gentlemen such as the Senator from New Mexico, the chairman of this committee, and to benefit from his integrity and his demeanor and cooperation, but it is also a disappointment that, in my line of thinking, when you talk with the average American, we shouldn't be doing anything to take away property rights. We should be doing everything to assure ourselves increased access to energy in the future. We should, for sure, eliminate this blatant, corrupt process of earmarking, not because it is corrupt in terms of at this time or at that time; it is corrupt because it ignores the future and the costs and the lack of priority about how we should be spending what are going to be very limited resources in the future.

So I thank my colleagues for giving me the opportunity to attempt to put forward what I think are important principles.

I yield the floor.

Mr. BINGAMAN. Madam President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. REID. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF PROCEDURE

Mr. REID. Madam President, I had a conversation with the distinguished

Republican leader, and based on that conversation, I am going to propound the following unanimous consent request.

I ask unanimous consent that immediately following the vote on the motion to invoke cloture on the motion to proceed to S. 181, regardless of the outcome, the Senate proceed to the consideration of calendar No. 16, S. J. Res. 5, the disapproval resolution relating to Emergency Economic Stabilization Act, and that the vote on passage of the joint resolution occur at 4:30 p.m., notwithstanding rule XII, paragraph 4; that the time be divided as provided for under the statute; that at 2 p.m. the consideration and debate be interrupted for the swearing in of Senator-appointee BURRIS and that the time utilized be charged against the majority; and that at 4:30 p.m. today, the Senate proceed to vote on the joint resolution, with no further intervening action or debate.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. REID. Madam President, I ask unanimous consent that prior to the second vote on cloture, there be 4 minutes equally divided and controlled between Senators MIKULSKI and ENZI or their designees, and that the second vote in the sequence be 10 minutes in duration.

I suggest this is the so-called Lilly Ledbetter legislation about which we have been talking.

The PRESIDING OFFICER. Without objection, it is so ordered.

Under the previous order, the question is on the engrossment and third reading of the bill, as amended.

The bill was ordered to be engrossed for a third reading and was read the third time.

Mr. BINGAMAN. Madam President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There appears to be a sufficient second.

The question is, Shall the bill, S. 22, as amended, pass?

The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. DURBIN. I announce that the Senator from Delaware (Mr. BIDEN), the Senator from Ohio (Mr. BROWN), and the Senator from Massachusetts (Mr. KENNEDY) are necessarily absent.

Mr. KYL. The following Senator is necessarily absent: the Senator from Kentucky (Mr. BUNNING).

Further, if present and voting, the Senator from Kentucky (Mr. BUNNING) would have voted "nay."

The result was announced—yeas 73, nays 21, as follows:

(2) **PARTICIPATION IN ENVIRONMENTAL REVIEW PROCESS.**—In undertaking the measures authorized by section 10004, and for which environmental review is required, the Secretary may provide funds made available under this part to affected Federal agencies, State agencies, local agencies, and Indian tribes if the Secretary determines that such funds are necessary to allow the Federal agencies, State agencies, local agencies, or Indian tribes to effectively participate in the environmental review process.

(3) **LIMITATION.**—Funds may be provided under paragraph (2) only to support activities that directly contribute to the implementation of the terms and conditions of the Settlement.

(d) **NONREIMBURSABLE FUNDS.**—The United States’ share of the costs of implementing this part shall be nonreimbursable under Federal reclamation law, provided that nothing in this subsection shall limit or be construed to limit the use of the funds assessed and collected pursuant to sections 3406(c)(1) and 3407(d)(2) of the Reclamation Projects Authorization and Adjustment Act of 1992 (Public Law 102-575; 106 Stat. 4721, 4727), for implementation of the Settlement, nor shall it be construed to limit or modify existing or future Central Valley Project ratesetting policies.

**SEC. 10007. COMPLIANCE WITH CENTRAL VALLEY PROJECT IMPROVEMENT ACT.**

Congress hereby finds and declares that the Settlement satisfies and discharges all of the obligations of the Secretary contained in section 3406(c)(1) of the Reclamation Projects Authorization and Adjustment Act of 1992 (Public Law 102-575; 106 Stat. 4721), provided, however, that—

(1) the Secretary shall continue to assess and collect the charges provided in section 3406(c)(1) of the Reclamation Projects Authorization and Adjustment Act of 1992 (Public Law 102-575; 106 Stat. 4721), as provided in the Settlement; and

(2) those assessments and collections shall continue to be counted toward the requirements of the Secretary contained in section 3407(c)(2) of the Reclamation Projects Authorization and Adjustment Act of 1992 (Public Law 102-575; 106 Stat. 4726).

**SEC. 10008. NO PRIVATE RIGHT OF ACTION.**

(a) **IN GENERAL.**—Nothing in this part confers upon any person or entity not a party to the Settlement a private right of action or claim for relief to interpret or enforce the provisions of this part or the Settlement.

(b) **APPLICABLE LAW.**—This section shall not alter or curtail any right of action or claim for relief under any other applicable law.

**SEC. 10009. APPROPRIATIONS; SETTLEMENT FUND.**

(a) **IMPLEMENTATION COSTS.**—

(1) **IN GENERAL.**—The costs of implementing the Settlement shall be covered by payments or in-kind contributions made by Friant Division contractors and other non-Federal parties, including the funds provided in subparagraphs (A) through (D) of subsection (c)(1), estimated to total \$440,000,000, of which the non-Federal payments are estimated to total \$200,000,000 (at October 2006 price levels) and the amount from repaid Central Valley Project capital obligations is estimated to total \$240,000,000, the additional Federal appropriation of \$250,000,000 authorized pursuant to subsection (b)(1), and such additional funds authorized pursuant to subsection (b)(2); provided however, that the costs of implementing the provisions of section 10004(a)(1) shall be shared by the State of California pursuant to the terms of a memorandum of understanding executed by the State of California and the Parties to the Settlement on September 13, 2006, which includes at least \$110,000,000 of State funds.

(2) **ADDITIONAL AGREEMENTS.**—

(A) **IN GENERAL.**—The Secretary shall enter into 1 or more agreements to fund or implement improvements on a project-by-project basis with the State of California.

(B) **REQUIREMENTS.**—Any agreements entered into under subparagraph (A) shall provide for recognition of either monetary or in-kind contributions toward the State of California’s share of the cost of implementing the provisions of section 10004(a)(1).

(3) **LIMITATION.**—Except as provided in the Settlement, to the extent that costs incurred solely to implement this Settlement would not otherwise have been incurred by any entity or public or local agency or subdivision of the State of California, such costs shall not be borne by any such entity, agency, or subdivision of the State of California, unless such costs are incurred on a voluntary basis.

(b) **AUTHORIZATION OF APPROPRIATIONS.**—

(1) **IN GENERAL.**—In addition to the funding provided in subsection (c), there are also authorized to be appropriated not to exceed \$250,000,000 (at October 2006 price levels) to implement this part and the Settlement, to be available until expended; provided however, that the Secretary is authorized to spend such additional appropriations only in amounts equal to the amount of funds deposited in the San Joaquin River Restoration Fund (not including payments under subsection (c)(1)(B) and proceeds under subsection (c)(1)(C)), the amount of in-kind contributions, and other non-Federal payments actually committed to the implementation of this part or the Settlement.

(2) **USE OF THE CENTRAL VALLEY PROJECT RESTORATION FUND.**—The Secretary is authorized to use monies from the Central Valley Project Restoration Fund created under section 3407 of the Reclamation Projects Authorization and Adjustment Act of 1992 (Public Law 102-575; 106 Stat. 4727) for purposes of this part in an amount not to exceed \$2,000,000 (October 2006 price levels) in any fiscal year.

(c) **FUND.**—

(1) **IN GENERAL.**—There is hereby established within the Treasury of the United States a fund, to be known as the San Joaquin River Restoration Fund, into which the

following funds shall be deposited and used solely for the purpose of implementing the Settlement except as otherwise provided in subsections (a) and (b) of section 10203:

(A) All payments received pursuant to section 3406(c)(1) of the Reclamation Projects Authorization and Adjustment Act of 1992 (Public Law 102-575; 106 Stat. 4721).

(B) The construction cost component (not otherwise needed to cover operation and maintenance costs) of payments made by Friant Division, Hidden Unit, and Buchanan Unit long-term contractors pursuant to long-term water service contracts or pursuant to repayment contracts, including repayment contracts executed pursuant to section 10010. The construction cost repayment obligation assigned such contractors under such contracts shall be reduced by the amount paid pursuant to this paragraph and the appropriate share of the existing Federal investment in the Central Valley Project to be recovered by the Secretary pursuant to Public Law 99-546 (100 Stat. 3050) shall be reduced by an equivalent sum.

(C) Proceeds from the sale of water pursuant to the Settlement, or from the sale of property or interests in property as provided in section 10005.

(D) Any non-Federal funds, including State cost-sharing funds, contributed to the United States for implementation of the Settlement, which the Secretary may expend without further appropriation for the purposes for which contributed.

(2) **AVAILABILITY.**—All funds deposited into the Fund pursuant to subparagraphs (A), (B), and (C) of paragraph (1) are authorized for appropriation to implement the Settlement and this part, in addition to the authorization provided in subsections (a) and (b) of section 10203, except that \$88,000,000 of such funds are available for expenditure without further appropriation; provided that after October 1, 2019, all funds in the Fund shall be available for expenditure without further appropriation.

(d) **LIMITATION ON CONTRIBUTIONS.**—Payments made by long-term contractors who receive water from the Friant Division and Hidden and Buchanan Units of the Central Valley Project pursuant to sections 3406(c)(1) and 3407(d)(2) of the Reclamation Projects Authorization and Adjustment Act of 1992 (Public Law 102-575; 106 Stat. 4721, 4727) and payments made pursuant to paragraph 16(b)(3) of the Settlement and subsection (c)(1)(B) shall be the limitation of such entities’ direct financial contribution to the Settlement, subject to the terms and conditions of paragraph 21 of the Settlement.

(e) **NO ADDITIONAL EXPENDITURES REQUIRED.**—Nothing in this part shall be construed to require a Federal official to expend Federal funds not appropriated by Congress, or to seek the appropriation of additional funds by Congress, for the implementation of the Settlement.

(f) **REACH 4B.**—

(1) **STUDY.**—

(A) **IN GENERAL.**—In accordance with the Settlement and the memorandum of understanding executed pursuant to paragraph 6 of the Settlement, the Secretary shall conduct a study that specifies—

(i) the costs of undertaking any work required under paragraph 11(a)(3) of the Settlement to increase the capacity of reach 4B prior to reinitiation of Restoration Flows;

(ii) the impacts associated with reinitiation of such flows; and

(iii) measures that shall be implemented to mitigate impacts.

(B) **DEADLINE.**—The study under subparagraph (A) shall be completed prior to restoration of any flows other than Interim Flows.

(2) **REPORT.**—

(A) IN GENERAL.—The Secretary shall file a report with Congress not later than 90 days after issuing a determination, as required by the Settlement, on whether to expand channel conveyance capacity to 4500 cubic feet per second in reach 4B of the San Joaquin River, or use an alternative route for pulse flows, that—

(i) explains whether the Secretary has decided to expand Reach 4B capacity to 4500 cubic feet per second; and

(ii) addresses the following matters:

(I) The basis for the Secretary's determination, whether set out in environmental review documents or otherwise, as to whether the expansion of Reach 4B would be the preferable means to achieve the Restoration Goal as provided in the Settlement, including how different factors were assessed such as comparative biological and habitat benefits, comparative costs, relative availability of State cost-sharing funds, and the comparative benefits and impacts on water temperature, water supply, private property, and local and downstream flood control.

(II) The Secretary's final cost estimate for expanding Reach 4B capacity to 4500 cubic feet per second, or any alternative route selected, as well as the alternative cost estimates provided by the State, by the Restoration Administrator, and by the other parties to the Settlement.

(III) The Secretary's plan for funding the costs of expanding Reach 4B or any alternative route selected, whether by existing Federal funds provided under this subtitle, by non-Federal funds, by future Federal appropriations, or some combination of such sources.

(B) DETERMINATION REQUIRED.—The Secretary shall, to the extent feasible, make the determination in subparagraph (A) prior to undertaking any substantial construction work to increase capacity in reach 4B.

(3) COSTS.—If the Secretary's estimated Federal cost for expanding reach 4B in paragraph (2), in light of the Secretary's funding plan set out in that paragraph, would exceed the remaining Federal funding authorized by this part (including all funds reallocated, all funds dedicated, and all new funds authorized by this part and separate from all commitments of State and other non-Federal funds and in-kind commitments), then before the Secretary commences actual construction work in reach 4B (other than planning, design, feasibility, or other preliminary measures) to expand capacity to 4500 cubic feet per second to implement this Settlement, Congress must have increased the applicable authorization ceiling provided by this part in an amount at least sufficient to cover the higher estimated Federal costs.

**SEC. 10010. REPAYMENT CONTRACTS AND ACCELERATION OF REPAYMENT OF CONSTRUCTION COSTS.**

(a) CONVERSION OF CONTRACTS.—

(1) The Secretary is authorized and directed to convert, prior to December 31, 2010, all existing long-term contracts with the following Friant Division, Hidden Unit, and Buchanan Unit contractors, entered under subsection (e) of section 9 of the Act of August 4, 1939 (53 Stat. 1196), to contracts under subsection (d) of section 9 of said Act (53 Stat. 1195), under mutually agreeable terms and conditions: Arvin-Edison Water Storage District; Delano-Earlimart Irrigation District; Exeter Irrigation District; Fresno Irrigation District; Ivanhoe Irrigation District; Lindmore Irrigation District; Lindsay-Strathmore Irrigation District; Lower Tule River Irrigation District; Orange Cove Irrigation District; Porterville Irrigation District; Saucelito Irrigation District; Shafter-Wasco Irrigation District; Southern San Joaquin Municipal Utility District; Stone Corral Irrigation District; Tea Pot Dome Water Dis-

trict; Terra Bella Irrigation District; Tulare Irrigation District; Madera Irrigation District; and Chowchilla Water District. Upon request of the contractor, the Secretary is authorized to convert, prior to December 31, 2010, other existing long-term contracts with Friant Division contractors entered under subsection (e) of section 9 of the Act of August 4, 1939 (53 Stat. 1196), to contracts under subsection (d) of section 9 of said Act (53 Stat. 1195), under mutually agreeable terms and conditions.

(2) Upon request of the contractor, the Secretary is further authorized to convert, prior to December 31, 2010, any existing Friant Division long-term contract entered under subsection (c)(2) of section 9 of the Act of August 4, 1939 (53 Stat. 1194), to a contract under subsection (c)(1) of section 9 of said Act, under mutually agreeable terms and conditions.

(3) All such contracts entered into pursuant to paragraph (1) shall—

(A) require the repayment, either in lump sum or by accelerated prepayment, of the remaining amount of construction costs identified in the Central Valley Project Schedule of Irrigation Capital Rates by Contractor 2007 Irrigation Water Rates, dated January 25, 2007, as adjusted to reflect payments not reflected in such schedule, and properly assignable for ultimate return by the contractor, no later than January 31, 2011, or if made in approximately equal annual installments, no later than January 31, 2014; such amount to be discounted by ½ the Treasury Rate. An estimate of the remaining amount of construction costs as of January 31, 2011, as adjusted, shall be provided by the Secretary to each contractor no later than June 30, 2010;

(B) require that, notwithstanding subsection (c)(2), construction costs or other capitalized costs incurred after the effective date of the contract or not reflected in the schedule referenced in subparagraph (A), and properly assignable to such contractor, shall be repaid in not more than 5 years after notification of the allocation if such amount is a result of a collective annual allocation of capital costs to the contractors exercising contract conversions under this subsection of less than \$5,000,000. If such amount is \$5,000,000 or greater, such cost shall be repaid as provided by applicable Reclamation law, provided that the reference to the amount of \$5,000,000 shall not be a precedent in any other context;

(C) provide that power revenues will not be available to aid in repayment of construction costs allocated to irrigation under the contract; and

(D) conform to the Settlement and this part and shall continue so long as the contractor pays applicable charges, consistent with subsection (c)(2) and applicable law.

(4) All such contracts entered into pursuant to paragraph (2) shall—

(A) require the repayment in lump sum of the remaining amount of construction costs identified in the most current version of the Central Valley Project Schedule of Municipal and Industrial Water Rates, as adjusted to reflect payments not reflected in such schedule, and properly assignable for ultimate return by the contractor, no later than January 31, 2014. An estimate of the remaining amount of construction costs as of January 31, 2014, as adjusted, shall be provided by the Secretary to each contractor no later than June 30, 2013;

(B) require that, notwithstanding subsection (c)(2), construction costs or other capitalized costs incurred after the effective date of the contract or not reflected in the schedule referenced in subparagraph (A), and properly assignable to such contractor, shall be repaid in not more than 5 years after noti-

fication of the allocation if such amount is a result of a collective annual allocation of capital costs to the contractors exercising contract conversions under this subsection of less than \$5,000,000. If such amount is \$5,000,000 or greater, such cost shall be repaid as provided by applicable Reclamation law, provided that the reference to the amount of \$5,000,000 shall not be a precedent in any other context; and

(C) conform to the Settlement and this part and shall continue so long as the contractor pays applicable charges, consistent with subsection (c)(2) and applicable law.

(b) FINAL ADJUSTMENT.—The amounts paid pursuant to subsection (a) shall be subject to adjustment following a final cost allocation by the Secretary upon completion of the construction of the Central Valley Project. In the event that the final cost allocation indicates that the costs properly assignable to the contractor are greater than what has been paid by the contractor, the contractor shall be obligated to pay the remaining allocated costs. The term of such additional repayment contract shall be no less than 1 year and no more than 10 years, however, mutually agreeable provisions regarding the rate of repayment of such amount may be developed by the parties. In the event that the final cost allocation indicates that the costs properly assignable to the contractor are less than what the contractor has paid, the Secretary is authorized and directed to credit such overpayment as an offset against any outstanding or future obligation of the contractor.

(c) APPLICABILITY OF CERTAIN PROVISIONS.—

(1) Notwithstanding any repayment obligation under subsection (a)(3)(B) or subsection (b), upon a contractor's compliance with and discharge of the obligation of repayment of the construction costs as provided in subsection (a)(3)(A), the provisions of section 213(a) and (b) of the Reclamation Reform Act of 1982 (96 Stat. 1269) shall apply to lands in such district.

(2) Notwithstanding any repayment obligation under paragraph (3)(B) or (4)(B) of subsection (a), or subsection (b), upon a contractor's compliance with and discharge of the obligation of repayment of the construction costs as provided in paragraphs (3)(A) and (4)(A) of subsection (a), the Secretary shall waive the pricing provisions of section 3405(d) of the Reclamation Projects Authorization and Adjustment Act of 1992 (Public Law 102-575) for such contractor, provided that such contractor shall continue to pay applicable operation and maintenance costs and other charges applicable to such repayment contracts pursuant to the then-current rate-setting policy and applicable law.

(3) Provisions of the Settlement applying to Friant Division, Hidden Unit, and Buchanan Unit long-term water service contracts shall also apply to contracts executed pursuant to this section.

(d) REDUCTION OF CHARGE FOR THOSE CONTRACTS CONVERTED PURSUANT TO SUBSECTION (A)(1).—

(1) At the time all payments by the contractor required by subsection (a)(3)(A) have been completed, the Secretary shall reduce the charge mandated in section 10007(1) of this part, from 2020 through 2039, to offset the financing costs as defined in section 10010(d)(3). The reduction shall be calculated at the time all payments by the contractor required by subsection (a)(3)(A) have been completed. The calculation shall remain fixed from 2020 through 2039 and shall be based upon anticipated average annual water deliveries, as mutually agreed upon by the Secretary and the contractor, for the period from 2020 through 2039, and the amounts of such reductions shall be discounted using the

Treasury Rate; provided, that such charge shall not be reduced to less than \$4.00 per acre foot of project water delivered; provided further, that such reduction shall be implemented annually unless the Secretary determines, based on the availability of other monies, that the charges mandated in section 10007(1) are otherwise needed to cover ongoing federal costs of the Settlement, including any federal operation and maintenance costs of facilities that the Secretary determines are needed to implement the Settlement. If the Secretary determines that such charges are necessary to cover such ongoing federal costs, the Secretary shall, instead of making the reduction in such charges, reduce the contractor's operation and maintenance obligation by an equivalent amount, and such amount shall not be recovered by the United States from any Central Valley Project contractor, provided nothing herein shall affect the obligation of the contractor to make payments pursuant to a transfer agreement with a non-federal operating entity.

(2) If the calculated reduction in paragraph (1), taking into consideration the minimum amount required, does not result in the contractor offsetting its financing costs, the Secretary is authorized and directed to reduce, after October 1, 2019, any outstanding or future obligations of the contractor to the Bureau of Reclamation, other than the charge assessed and collected under section 3407(d) of Public law 102-575, by the amount of such deficiency, with such amount indexed to 2020 using the Treasury Rate and such amount shall not be recovered by the United States from any Central Valley Project contractor, provided nothing herein shall affect the obligation of the contractor to make payments pursuant to a transfer agreement with a non-Federal operating entity.

(3) Financing costs, for the purposes of this subsection, shall be computed as the difference of the net present value of the construction cost identified in subsection (a)(3)(A) using the full Treasury Rate as compared to using one half of the Treasury Rate and applying those rates against a calculated average annual capital repayment through 2030.

(4) Effective in 2040, the charge shall revert to the amount called for in section 10007(1) of this part.

(5) For purposes of this section, "Treasury Rate" shall be defined as the 20 year Constant Maturity Treasury (CMT) rate published by the United States Department of the Treasury as of October 1, 2010.

(e) SATISFACTION OF CERTAIN PROVISIONS.—

(1) IN GENERAL.—Upon the first release of Interim Flows or Restoration Flows, pursuant to paragraphs 13 or 15 of the Settlement, any short- or long-term agreement, to which 1 or more long-term Friant Division, Hidden Unit, or Buchanan Unit contractor that converts its contract pursuant to subsection (a) is a party, providing for the transfer or exchange of water not released as Interim Flows or Restoration Flows shall be deemed to satisfy the provisions of subsection 3405(a)(1)(A) and (I) of the Reclamation Projects Authorization and Adjustment Act of 1992 (Public Law 102-575) without the further concurrence of the Secretary as to compliance with said subsections if the contractor provides, not later than 90 days before commencement of any such transfer or exchange for a period in excess of 1 year, and not later than 30 days before commencement of any proposed transfer or exchange with duration of less than 1 year, written notice to the Secretary stating how the proposed transfer or exchange is intended to reduce, avoid, or mitigate impacts to water deliveries caused by the Interim Flows or Restoration Flows or is intended to otherwise

facilitate the Water Management Goal, as described in the Settlement. The Secretary shall promptly make such notice publicly available.

(2) DETERMINATION OF REDUCTIONS TO WATER DELIVERIES.—Water transferred or exchanged under an agreement that meets the terms of this subsection shall not be counted as a replacement or an offset for purposes of determining reductions to water deliveries to any Friant Division long-term contractor except as provided in paragraph 16(b) of the Settlement. The Secretary shall, at least annually, make publicly available a compilation of the number of transfer or exchange agreements exercising the provisions of this subsection to reduce, avoid, or mitigate impacts to water deliveries caused by the Interim Flows or Restoration Flows or to facilitate the Water Management Goal, as well as the volume of water transferred or exchanged under such agreements.

(3) STATE LAW.—Nothing in this subsection alters State law or permit conditions, including any applicable geographical restrictions on the place of use of water transferred or exchanged pursuant to this subsection.

(f) CERTAIN REPAYMENT OBLIGATIONS NOT ALTERED.—Implementation of the provisions of this section shall not alter the repayment obligation of any other long-term water service or repayment contractor receiving water from the Central Valley Project, or shift any costs that would otherwise have been properly assignable to the Friant contractors absent this section, including operations and maintenance costs, construction costs, or other capitalized costs incurred after the date of enactment of this Act, to other such contractors.

(g) STATUTORY INTERPRETATION.—Nothing in this part shall be construed to affect the right of any Friant Division, Hidden Unit, or Buchanan Unit long-term contractor to use a particular type of financing to make the payments required in paragraph (3)(A) or (4)(A) of subsection (a).

#### SEC. 10011. CALIFORNIA CENTRAL VALLEY SPRING RUN CHINOOK SALMON.

(a) FINDING.—Congress finds that the implementation of the Settlement to resolve 18 years of contentious litigation regarding restoration of the San Joaquin River and the reintroduction of the California Central Valley Spring Run Chinook salmon is a unique and unprecedented circumstance that requires clear expressions of Congressional intent regarding how the provisions of the Endangered Species Act of 1973 (16 U.S.C. 1531 et seq.) are utilized to achieve the goals of restoration of the San Joaquin River and the successful reintroduction of California Central Valley Spring Run Chinook salmon.

(b) REINTRODUCTION IN THE SAN JOAQUIN RIVER.—California Central Valley Spring Run Chinook salmon shall be reintroduced in the San Joaquin River below Friant Dam pursuant to section 10(j) of the Endangered Species Act of 1973 (16 U.S.C. 1539(j)) and the Settlement, provided that the Secretary of Commerce finds that a permit for the reintroduction of California Central Valley Spring Run Chinook salmon may be issued pursuant to section 10(a)(1)(A) of the Endangered Species Act of 1973 (16 U.S.C. 1539(a)(1)(A)).

(c) FINAL RULE.—

(1) DEFINITION OF THIRD PARTY.—For the purpose of this subsection, the term "third party" means persons or entities diverting or receiving water pursuant to applicable State and Federal laws and shall include Central Valley Project contractors outside of the Friant Division of the Central Valley Project and the State Water Project.

(2) ISSUANCE.—The Secretary of Commerce shall issue a final rule pursuant to section 4(d) of the Endangered Species Act of 1973 (16

U.S.C. 1533(d)) governing the incidental take of reintroduced California Central Valley Spring Run Chinook salmon prior to the reintroduction.

(3) REQUIRED COMPONENTS.—The rule issued under paragraph (2) shall provide that the reintroduction will not impose more than de minimus: water supply reductions, additional storage releases, or bypass flows on unwilling third parties due to such reintroduction.

(4) APPLICABLE LAW.—Nothing in this section—

(A) diminishes the statutory or regulatory protections provided in the Endangered Species Act of 1973 for any species listed pursuant to section 4 of the Endangered Species Act of 1973 (16 U.S.C. 1533) other than the reintroduced population of California Central Valley Spring Run Chinook salmon, including protections pursuant to existing biological opinions or new biological opinions issued by the Secretary or Secretary of Commerce; or

(B) precludes the Secretary or Secretary of Commerce from imposing protections under the Endangered Species Act of 1973 (16 U.S.C. 1531 et seq.) for other species listed pursuant to section 4 of that Act (16 U.S.C. 1533) because those protections provide incidental benefits to such reintroduced California Central Valley Spring Run Chinook salmon.

(d) REPORT.—

(1) IN GENERAL.—Not later than December 31, 2024, the Secretary of Commerce shall report to Congress on the progress made on the reintroduction set forth in this section and the Secretary's plans for future implementation of this section.

(2) INCLUSIONS.—The report under paragraph (1) shall include—

(A) an assessment of the major challenges, if any, to successful reintroduction;

(B) an evaluation of the effect, if any, of the reintroduction on the existing population of California Central Valley Spring Run Chinook salmon existing on the Sacramento River or its tributaries; and

(C) an assessment regarding the future of the reintroduction.

(e) FERC PROJECTS.—

(1) IN GENERAL.—With regard to California Central Valley Spring Run Chinook salmon reintroduced pursuant to the Settlement, the Secretary of Commerce shall exercise its authority under section 18 of the Federal Power Act (16 U.S.C. 811) by reserving its right to file prescriptions in proceedings for projects licensed by the Federal Energy Regulatory Commission on the Calaveras, Stanislaus, Tuolumne, Merced, and San Joaquin rivers and otherwise consistent with subsection (c) until after the expiration of the term of the Settlement, December 31, 2025, or the expiration of the designation made pursuant to subsection (b), whichever ends first.

(2) EFFECT OF SUBSECTION.—Nothing in this subsection shall preclude the Secretary of Commerce from imposing prescriptions pursuant to section 18 of the Federal Power Act (16 U.S.C. 811) solely for other anadromous fish species because those prescriptions provide incidental benefits to such reintroduced California Central Valley Spring Run Chinook salmon.

(f) EFFECT OF SECTION.—Nothing in this section is intended or shall be construed—

(1) to modify the Endangered Species Act of 1973 (16 U.S.C. 1531 et seq.) or the Federal Power Act (16 U.S.C. 791a et seq.); or

(2) to establish a precedent with respect to any other application of the Endangered Species Act of 1973 (16 U.S.C. 1531 et seq.) or the Federal Power Act (16 U.S.C. 791a et seq.).

**PART II—STUDY TO DEVELOP WATER PLAN; REPORT**

**SEC. 10101. STUDY TO DEVELOP WATER PLAN; REPORT.**

(a) PLAN.—

(1) GRANT.—To the extent that funds are made available in advance for this purpose, the Secretary of the Interior, acting through the Bureau of Reclamation, shall provide direct financial assistance to the California Water Institute, located at California State University, Fresno, California, to conduct a study regarding the coordination and integration of sub-regional integrated regional water management plans into a unified Integrated Regional Water Management Plan for the subject counties in the hydrologic basins that would address issues related to—

- (A) water quality;
- (B) water supply (both surface, ground water banking, and brackish water desalination);
- (C) water conveyance;
- (D) water reliability;
- (E) water conservation and efficient use (by distribution systems and by end users);
- (F) flood control;
- (G) water resource-related environmental enhancement; and
- (H) population growth.

(2) STUDY AREA.—The study area referred to in paragraph (1) is the proposed study area of the San Joaquin River Hydrologic Region and Tulare Lake Hydrologic Region, as defined by California Department of Water Resources Bulletin 160-05, volume 3, chapters 7 and 8, including Kern, Tulare, Kings, Fresno, Madera, Merced, Stanislaus, and San Joaquin counties in California.

(b) USE OF PLAN.—The Integrated Regional Water Management Plan developed for the 2 hydrologic basins under subsection (a) shall serve as a guide for the counties in the study area described in subsection (a)(2) to use as a mechanism to address and solve long-term water needs in a sustainable and equitable manner.

(c) REPORT.—The Secretary shall ensure that a report containing the results of the Integrated Regional Water Management Plan for the hydrologic regions is submitted to the Committee on Energy and Natural Resources of the Senate and the Committee on Natural Resources of the House of Representatives not later than 24 months after financial assistance is made available to the California Water Institute under subsection (a)(1).

(d) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to carry out this section \$1,000,000 to remain available until expended.

**PART III—FRIANT DIVISION IMPROVEMENTS**

**SEC. 10201. FEDERAL FACILITY IMPROVEMENTS.**

(a) The Secretary of the Interior (hereafter referred to as the "Secretary") is authorized and directed to conduct feasibility studies in coordination with appropriate Federal, State, regional, and local authorities on the following improvements and facilities in the Friant Division, Central Valley Project, California:

(1) Restoration of the capacity of the Friant-Kern Canal and Madera Canal to such capacity as previously designed and constructed by the Bureau of Reclamation.

(2) Reverse flow pump-back facilities on the Friant-Kern Canal, with reverse-flow capacity of approximately 500 cubic feet per second at the Poso and Shafter Check Structures and approximately 300 cubic feet per second at the Woollomes Check Structure.

(b) Upon completion of and consistent with the applicable feasibility studies, the Secretary is authorized to construct the improvements and facilities identified in sub-

section (a) in accordance with all applicable Federal and State laws.

(c) The costs of implementing this section shall be in accordance with section 10203, and shall be a nonreimbursable Federal expenditure.

**SEC. 10202. FINANCIAL ASSISTANCE FOR LOCAL PROJECTS.**

(a) AUTHORIZATION.—The Secretary is authorized to provide financial assistance to local agencies within the Central Valley Project, California, for the planning, design, environmental compliance, and construction of local facilities to bank water underground or to recharge groundwater, and that recover such water, provided that the project meets the criteria in subsection (b). The Secretary is further authorized to require that any such local agency receiving financial assistance under the terms of this section submit progress reports and accountings to the Secretary, as the Secretary deems appropriate, which such reports shall be publicly available.

(b) CRITERIA.—

(1) A project shall be eligible for Federal financial assistance under subsection (a) only if all or a portion of the project is designed to reduce, avoid, or offset the quantity of the expected water supply impacts to Friant Division long-term contractors caused by the Interim or Restoration Flows authorized in part I of this subtitle, and such quantities have not already been reduced, avoided, or offset by other programs or projects.

(2) Federal financial assistance shall only apply to the portion of a project that the local agency designates as reducing, avoiding, or offsetting the expected water supply impacts caused by the Interim or Restoration Flows authorized in part I of this subtitle, consistent with the methodology developed pursuant to paragraph (3)(C).

(3) No Federal financial assistance shall be provided by the Secretary under this part for construction of a project under subsection (a) unless the Secretary—

#### Subtitle C—Shoshone-Paiute Tribes of the Duck Valley Reservation Water Rights Settlement

#### SEC. 10801. FINDINGS.

Congress finds that—

(1) it is the policy of the United States, in accordance with the trust responsibility of the United States to Indian tribes, to promote Indian self-determination and economic self-sufficiency and to settle Indian water rights claims without lengthy and costly litigation, if practicable;

(2) quantifying rights to water and development of facilities needed to use tribal water supplies is essential to the development of viable Indian reservation economies and the establishment of a permanent reservation homeland;

(3) uncertainty concerning the extent of the Shoshone-Paiute Tribes' water rights has resulted in limited access to water and inadequate financial resources necessary to achieve self-determination and self-sufficiency;

(4) in 2006, the Tribes, the State of Idaho, the affected individual water users, and the United States resolved all tribal claims to water rights in the Snake River Basin Adjudication through a consent decree entered by the District Court of the Fifth Judicial District of the State of Idaho, requiring no further Federal action to quantify the Tribes' water rights in the State of Idaho;

(5) as of the date of enactment of this Act, proceedings to determine the extent and nature of the water rights of the Tribes in the East Fork of the Owyhee River in Nevada are pending before the Nevada State Engineer;

(6) final resolution of the Tribes' water claims in the East Fork of the Owyhee River adjudication will—

(A) take many years;

(B) entail great expense;

(C) continue to limit the access of the Tribes to water, with economic and social consequences;

(D) prolong uncertainty relating to the availability of water supplies; and

(E) seriously impair long-term economic planning and development for all parties to the litigation;

(7) after many years of negotiation, the Tribes, the State, and the upstream water users have entered into a settlement agreement to resolve permanently all water rights of the Tribes in the State; and

(8) the Tribes also seek to resolve certain water-related claims for damages against the United States.

#### SEC. 10802. PURPOSES.

The purposes of this subtitle are—

(1) to resolve outstanding issues with respect to the East Fork of the Owyhee River in the State in such a manner as to provide important benefits to—

(A) the United States;

(B) the State;

(C) the Tribes; and

(D) the upstream water users;

(2) to achieve a fair, equitable, and final settlement of all claims of the Tribes, members of the Tribes, and the United States on behalf of the Tribes and members of Tribes to the waters of the East Fork of the Owyhee River in the State;

(3) to ratify and provide for the enforcement of the Agreement among the parties to the litigation;

(4) to resolve the Tribes' water-related claims for damages against the United States;

Mr. LEVIN. Madam President, I move to reconsider the vote.

Mrs. LINCOLN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

#### LILLY LEDBETTER FAIR PAY ACT OF 2009—MOTION TO PROCEED

##### CLOTURE MOTION

The PRESIDING OFFICER. Under the previous order, there is 4 minutes equally divided between Senators MIKULSKI and ENZI.

Ms. MIKULSKI. Madam President, the Senate is not in order.

The PRESIDING OFFICER. The Senate will be in order.

The Senator from Maryland is recognized.

Ms. MIKULSKI. Madam President, I rise to urge my colleagues, on a bipartisan basis, to vote for the legislation that is pending, which is the cloture motion on the motion to proceed to the Lilly Ledbetter Act. The reason we are advocating cloture on the motion to proceed is that we do not have to filibuster this bill because we guarantee an open process, that Senators will be able to offer amendments. We will be able to debate with civility and comity, arrive at good ideas, consider all good ideas and so on, so we do not need to filibuster. Second, we do not need to delay. We need to vote for the motion to proceed because that is what the American people are telling us to do. Much is talked about economic stimulus, but if you want to help women, let's start paying them equal pay for equal or comparable work. That is what the Lilly Ledbetter bill will ensure. It will restore the law to the way it was before the Supreme Court decision on Ledbetter v. Goodyear.

One of the objections to the bill is that the Ledbetter bill will trigger lawsuits. Nothing could be further from the truth because it did not trigger, open-ended, millions of lawsuits before the Supreme Court decision.

We need to act. It is great to talk about a stimulus bill, but the real stimulus is paying people for what they do. Madam President, you should know.

This is a very serious bill. I know what my colleagues are talking about is important, but women are waiting for us to act, so Senators, if they could wait a minute, we could move ahead.

The Supreme Court rule is that a pay discrimination lawsuit must be filed with the EEOC within 180 days of the initial decision to pay her less than men performing similar acts.

The PRESIDING OFFICER. The time of the Senator has expired.

The Senator from Wyoming is recognized.

Mr. ENZI. Madam President, I have spent my 12 years in the Senate trying to work across the aisle, trying to get things to happen around here. I found the way things happen is, if they go through the whole process—

Ms. MIKULSKI. I say to the Senator, I am not done. I have not completed my statement.

Mr. ENZI. I think the Senator's time expired.

The PRESIDING OFFICER. The Senator's time had expired.

Ms. MIKULSKI. Madam President, first of all, I, of course, want to proceed in the spirit of comity. I lost my time because this place was so noisy. I couldn't talk because everybody else was talking. Frankly, I will be happy for my colleague to speak, but I am going to ask unanimous consent for an additional 4 minutes.

The PRESIDING OFFICER. Is there objection?

Mr. ENZI. Madam President, reserving the right to object, our side would like the additional 4 minutes, then, as well.

The PRESIDING OFFICER. Is there objection? The Senator from Maryland has asked for an additional 4 minutes. Is there objection to that request?

The Senator from Texas is recognized.

Mrs. HUTCHISON. Madam President, can we amend the request to allow both sides to have an equal amount of added time?

The PRESIDING OFFICER. That is the request. Is there objection to both sides receiving a total of 6 minutes on this matter?

Mr. CORKER. Reserving the right to object, what will happen to floor time thereafter? Where many of us have time to talk about TARP later on, will we still have that time set aside prior to the TARP vote at 4:30?

The PRESIDING OFFICER. This will take an additional 8 minutes from the time that is allocated for the TARP discussion, prior to the vote that is scheduled at 4:30.

Mr. VITTER. I object.

The PRESIDING OFFICER. Objection is heard.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from Wyoming has the floor at the current time.

Ms. MIKULSKI. May I ask the Senator from Wyoming for the ability to ask a unanimous consent request. I do not want to drag out the debate, but I would like to make a few points. What I would like to be able to do, with your concurrence, is just ask for 2 minutes and just have a little bit of say, but you have your 4 minutes.
