STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. LEAHY:

S. 1490. A bill to prevent and mitigate identity theft, to ensure privacy, to provide notice of security breaches, and to enhance criminal penalties, law enforcement assistance, and other protections against security breaches, fraudulent access, and misuse of personally identifiable information; to the Committee on the Judiciary.

Mr. LEAHY. Mr. President, today, I am pleased to reintroduce the Personal Data Privacy and Security Act. The recent and troubling cyber attack on U.S. Government computers is clear evidence that developing a comprehensive national strategy for data privacy and cybersecurity is one of the most challenging and important issues facing our nation. The Personal Data Privacy and Security Act will help to meet this challenge, by better protecting Americans from the growing threats of data breaches and identity theft.

When Senator SPECTER and I first introduced this bill 4 years ago, we had high hopes of bringing urgently needed data privacy reforms to the American people. Although the Judiciary Committee favorably reported this bill twice, in 2005 and again in 2007, the legislation languished on the Senate calendar and the Senate adjourned without passing comprehensive data privacy legislation.

While the Congress has waited to act, the dangers to our privacy, economic prosperity and national security posed by data breaches have not gone away. Just this week, the Government Accountability Office released a report finding that almost all of our major federal agencies have systemic weaknesses in the information security controls. According to the Privacy Rights Clearinghouse, more than 250 million records containing sensitive personal information have been involved in data security breaches since 2005.

This loss of privacy is not just a grave concern for American consumers; it is also a serious threat to the economic security of American businesses. The President's recent report on Cyberspace Policy Review noted that industry estimates of losses from intellectual property to data theft in 2008 range as high as \$1 trillion.

The FBI's Internet Fraud Complaint Center also recently reported that
