

Whereas obesity is a significant predictor of the severity of prostate cancer and the probability that the disease will lead to death, and high cholesterol levels are strongly associated with advanced prostate cancer;

Whereas if a man in the United States has 1 family member diagnosed with prostate cancer, he has a 1 in 3 chance of being diagnosed with prostate cancer, if he has 2 family members with such diagnoses, he has an 83 percent risk, and if he has 3 family members with such diagnoses, he then has a 97 percent risk of prostate cancer;

Whereas screening by both a digital rectal examination and a prostate-specific antigen blood test can detect the disease in its early stages, increasing the chances of surviving more than 5 years to nearly 100 percent, while only 33 percent of men survive more than 5 years if diagnosed during the late stages of the disease;

Whereas there are no noticeable symptoms of prostate cancer while it is still in the early stages, making screening critical;

Whereas ongoing research promises further improvements in prostate cancer prevention, early detection, and treatments; and

Whereas educating people in the United States, including health care providers, about prostate cancer and early detection strategies is crucial to saving the lives of men and preserving and protecting families: Now, therefore, be it

Resolved, That the Senate—

(1) designates September 2009 as “National Prostate Cancer Awareness Month”;

(2) declares that steps should be taken—

(A) to raise awareness about the importance of screening methods for, and treatment of, prostate cancer;

(B) to increase research funding that is commensurate with the burden of the disease so that the screening and treatment of prostate cancer may be improved, and so that the causes of, and a cure for, prostate cancer may be discovered; and

(C) to continue to consider ways for improving access to, and the quality of, health care services for detecting and treating prostate cancer; and

(3) calls on the people of the United States, interested groups, and affected persons—

(A) to promote awareness of prostate cancer;

(B) to take an active role in the fight to end the devastating effects of prostate cancer on individuals, their families, and the economy; and

(C) to observe National Prostate Cancer Awareness Month with appropriate ceremonies and activities.
