Most Americans only get about one serving (16g) of whole grain a day, compared with the recommended minimum three servings (at least 48g) per day, which means they could be missing the important nutrition benefits that whole grain offers. Eating a variety of foods to reach the recommended amount of three or more servings of whole grains can help consumers get fiber, B vitamins, and minerals like iron and magnesium.

COMBINING THE GOODNESS OF WHOLE GRAIN WITH THE TASTE CONSUMERS LOVE

Kraft Foods has spent four years and invested significant resources in its flour milling technology, recipe development and testing to find ways to add more whole grain to its popular cracker brands. The company will be using whole grain wheat flour to increase the whole grain content of these products. Whole grain wheat flour is milled using the entire wheat kernel (bran, endosperm and germ) to offer the benefits of whole grain.

"It was critical for us to get the recipe right to deliver the benefits of whole grain without sacrificing the taste consumers expect from their favorite crackers," said Carlos Abrams Rivera, Vice President for Nabisco crackers. "Just adding whole grain can change a product's flavor and, in the case of crackers, can make them denser and grittier. But the combination of the right recipe and ingredients can help us maintain delicious taste and texture while adding significant levels of whole grain."

ACCELERATING HEALTH AND WELLNESS EFFORTS

Today's announcement is a continuing demonstration of Kraft Foods' commitment to health and wellness. Earlier this year, the company announced plans to reduce sodium by an average of 10% across its North American portfolio of products, including crackers. And over the past five years, Kraft Foods has reformulated about one in four products in the United States to make them better for consumers.

"We're accelerating our efforts in health and wellness because it's good for consumers and good for business," said Jordan. "Whether it's adding more whole grain, reducing sodium or removing calories from our products, we're making the foods consumers love even better."

ABOUT KRAFT FOODS

With annual revenues of approximately \$48 billion, Kraft Foods is a global powerhouse in snacks, confectionery and quick meals. The company is the world's second largest food company, making delicious products for billions of consumers in more than 160 countries. The portfolio includes 11 iconic brands with revenues exceeding \$1 billion-Oreo, Nabisco and LU biscuits; Milka and Cadbury chocolates; Trident gum; Jacobs and Maxwell House coffees; Philadelphia cream cheeses; Kraft cheeses, dinners and dressings; and Oscar Mayer meats. Approximately 70 brands generate annual revenues of more \$100 million. Kraft Foods than (www.kraftfoodscompany.com; NYSE: KFT) is a member of the Dow Jones Industrial Average, Standard & Poor's 500, Dow Jones Sustainability Index and Ethibel Sustainability Index.

JAMES ZADROGA 9/11 HEALTH AND COMPENSATION ACT OF 2010

SPEECH OF

HON. EDOLPHUS TOWNS

OF NEW YORK IN THE HOUSE OF REPRESENTATIVES

Thursday, July 29, 2010

Mr. TOWNS. Mr. Speaker, I rise to speak on H.R. 847—The 9/11 Health and Compensation Act.

There have been few events in our history as traumatic as the attacks our nation suffered on September 11, 2001. The lives of millions of Americans were changed on that day. People in New York were devastated. Yet the incredible response by people all over this great country reminded us of the generous and caring people we Americans are.

Now many of those people who came from every state in the country need our help. They were willing to put their own health at risk to help their neighbors. We now have the opportunity to repay them for their courageous actions.

H.R. 847—the 9/11 Health and Compensation Act will do just that. It will provide critical health monitoring and treatment and compensate these angels of mercy for their economic sacrifices.

We are pleased that this bill is revenue neutral. But we could never place a monetary value on the bravery and service of these heroes. I urge my colleagues in the House to do right by these brave Americans. Passing this bill will be another noble act in our nation's proud heritage.

NATIONAL HEALTH CENTER WEEK

HON. MARSHA BLACKBURN

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES Friday, July 30, 2010

Mrs. BLACKBURN. Madam Speaker, across the country partnerships built of people, governments, and communities are coming together offering health services to local patients. Health care centers serve 20 million people nationally and improve access to care for millions of Americans. I rise today in support of National Health Center Week and two centers, Three Rivers Community Health Center and Perry County Medical Center, who are celebrating accordingly.

Built by community initiative, health care centers are community-driven and patient-centered. In 23 centers, over 300,000 patients are treated throughout the great state of Tennessee. Regardless of insurance status or ability to pay, patients receive preventative and accessible care when healthcare is needed but scarce. The Three Rivers and Perry County Centers focus on high-need areas identified by elevated poverty, higher than average infant mortality, and few physicians in residence.

By reducing costly emergency, hospital, and specialty care, Community Health Centers save the health care system \$24 billion a year. During National Health Center Week, we celebrate the care offered to the nation's most vulnerable populations. I ask my colleagues to join me in thanking the Three Rivers Community Health and Perry County Medical Centers for providing access to affordable, high quality, and cost-effective health care to the citizens of the 7th District.

H.R. 4173, THE DODD-FRANK WALL STREET REFORM AND CON-SUMER PROTECTION ACT CLARI-FICATION OF INTENT WITH RE-SPECT TO TITLE V

HON. DENNIS MOORE

OF KANSAS IN THE HOUSE OF REPRESENTATIVES

Friday, July 30, 2010

Mr. MOORE of Kansas. Madam Speaker, as a House conferee and the chief sponsor of H.R. 2571, the Nonadmitted and Reinsurance Reform Act, that was included in the conference report for H.R. 4173, the Dodd-Frank Wall Street Reform and Consumer Protection Act, I want to make several important clarifications of intent on the final language. The President signed the Dodd-Frank Act into law last week (P.L. 111–203).

With respect to Sec. 533(5) of the Dodd-Frank Act, the definition of "reinsurer" is not to be construed narrowly, thereby limiting or avoiding the intent of Congress with respect to Title V, Subtitle B, Part II.

Additionally, Sections 531 and 532 of the Dodd-Frank Act entitled "Regulation of Credit for Reinsurance and Reinsurance Agreements" and "Regulation of Reinsurer Solvency", respectively, are also not to be construed narrowly so as to limit or avoid the intent of Congress with respect to Title V, Subtitle B, Part II. Furthermore, the clear intent of Section 532 in the manner it is written and should be understood is that the regulation of reinsurer solvency, pursuant to the Dodd-Frank Act, includes the NAIC Financial Regulation Standards and Accreditation Program's laws and regulations.

Finally, in order to ensure the States are appropriately implementing the Nonadmitted and Reinsurance Reform Act, it is the intent of Congress that the Study and Report on Regulation of Insurance required pursuant to Title V, Subtitle A, Sec. 502 of the Dodd-Frank Act include an evaluation of each State's compliance with Title V, Subtitle B.

SUPPLEMENTAL APPROPRIATIONS ACT, 2010

SPEECH OF

HON. RUSH D. HOLT

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 27, 2010

Mr. HOLT. Madam Speaker, this bill has not improved since the House voted on it earlier this year. This bill spends money on training police in Afghanistan as communities in New Jersey lay off police officers because of budget shortfalls. Our first responsibility to our citizens is to help keep them safe in their homes and their communities. This bill does the opposite: It allocates billions more for a war that cannot be won militarily while allowing our own communities to become much easier targets of crime and violence. Moreover, this bill is paid for by borrowing more money from countries like China, and it violates President Obama's pledge that the funding for our actions in Iraq and Afghanistan would be done through the usual appropriations process. By passing this unfunded bill, we will be adding tens of billions of dollars in new debt. I cannot support such reckless policy.

Further, the bill does not include funding that is essential to stop massive layoffs among teachers and other public servants we count on. The recession that began in 2008—the worst economic crisis since the Great Depression—has hit our communities hard, forcing school districts to layoff teachers and cut services. Previously, the American Recovery and Reinvestment Act made several sound investments in public education to keep teachers in the classroom and help school districts avoid painful cuts.

Most, if not all, of this emergency funding has been spent.

I cannot in good conscience vote for a bill that is so at odds with the most basic of our values, and I urge my colleagues to join me in voting against it.

RECOGNIZING N. PATRICK RANGE, SR.

HON. KENDRICK B. MEEK

OF FLORIDA IN THE HOUSE OF REPRESENTATIVES

Friday, July 30, 2010

Mr. MEEK of Florida. Madam Speaker, today I rise to recognize and congratulate Mr. N. Patrick Range, Sr., a friend as well as a constituent in my Congressional district and recipient of this year's Robert H. Miller Professional of the Year Award. He will be honored by the National Funeral Directors and Mortician's Association during its 2010 convention in Fort Lauderdale, Florida. Mr. Range is the third Floridian nominated for the award, named after Mr. Miller, the first NFDMA executive director. It is because of his outstanding service and commitment that he undoubtedly deserves this great honor for his many years of devotion to the South Florida community.

"He's had a significant role in supporting colleagues and in serving the community in a comparable manner," said Henry Postell, president of the Florida Mortician Association. "Professionalism is there regardless of the families' financial situation."

Mr. Range is the current owner of Range Funeral Homes of Greater Miami, founded in 1953. He has been in the funeral industry as a licensed funeral director and embalmer for over 50 years. He obtained his license in 1965 after matriculating at the New England Institute of Anatomy following the death of his father and founder of Range Funeral Homes, Oscar L. Range, Sr., in 1960.

After obtaining his license, Mr. Range returned to Miami to partner with "my mentor, my guide, my inspiration, my mom," M. Athalie Range, in a relationship that would last 45 years in the family-owned funeral home. After his mother's death in 2006, Mr. Range continued his parents' legacy as the principal of Range Funeral Homes.

A member of the Epsilon Nu Delta Mortuary Fraternity, Mr. Range also serves on the advisory board of the Miami-Dade College Department of Funeral Service Education. An active member in a host of other professional organizations, Mr. Range was most recently recognized by his peers as the "Mortician of the Year" in 2006 by both the First Regional District of Florida and the State of Florida Mortician's Association. He has done an abundant of fundraising work for mortuary science scholarships and career-related organizations, such as 100 Black Women in Funeral Service.

Madam Speaker, Mr. N. Patrick Range, Sr. is an inspiration not only to the South Florida community, but to the nation at large. Morticians provide a service like no other. The care and dedication you provide our loved ones before their homegoing services stay in our hearts and minds forever. Please join me in applauding the achievements of Mr. Range.

EXPLANATION REGARDING SUB-MISSION OF AMENDMENTS TO COMMITTEES

HON. BRAD SHERMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 30, 2010

Mr. SHERMAN. Madam Speaker, I should note that I sometimes submit amendments to committees so that they are available for discussion. I do not necessarily support any amendment drafted by myself and my staff unless I formally offer the amendment. Accordingly, no conclusion can be drawn from the process of simply providing the text of a possible amendment to the clerk of any committee.

HONORING JOSEPH H. HAMILTON

HON. JIM COOPER

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Friday, July 30, 2010

Mr. COOPER. Madam Speaker, to a boy from Louisiana, the building blocks of life are food, faith, and a healthy dose of Southern hospitality. Joseph Hamilton, grew up to learn that our world is not so simple.

By January 2010 Hamilton had played a crucial role in an astounding discovery. He helped find something that no one knew existed. His work was critical in forming a multinational research team, and carrying out the discovery of Element 117—Ununseptium—the newest addition to the Periodic Table of Elements.

Hamilton's life started like that of any southern boy. Born in the humble town of Ferriday, Louisiana, he stayed true to his Baptist upbringing. He attended Christian Mississippi College, where God's calling led him to be a physicist. Hamilton then took his studies to Indiana University, where he studied nuclear physics and the elements. Their tiny atoms and their nuclei are invisible except to a select group of scientists with very advanced equipment. For everyone outside this elite group, the existence of atoms and their nuclei is purely a matter of faith. The only way to observe individual atoms of elements is through their impact on the world.

A skeptic may say that Christianity and physics, the two most important parts of Hamilton's life, cannot coexist, but Hamilton disagrees. He has pursued his passion without abandoning his beliefs, and has found that the

two go gracefully hand in hand. As a professor at Vanderbilt University in Nashville, Tennessee, he and his wife have coauthored more than twenty papers on the harmony of physics and religion.

Professor Hamilton has dedicated himself to the growth of his students. Recognizing that they will soon take his place in research, Hamilton has supervised over 60 PhD dissertations and over 100 post-doctoral fellows at Vanderbilt. He includes his students in almost everything he does. One of his few regrets in his storied career is that he did not intimately involve his students in the discovery of Element 117.

Hamilton's research career at Vanderbilt over the last fifty-two years has taken him around the world. Russia, China, Sweden, and Germany have been but a few stops on his journeys. The creation of Element 117 in Dubna, Russia, just north of Moscow, was the result of a multinational project that Hamilton helped create. He believes that scientific discovery is a global effort, not a local one. Collaboration is key because science is one of the few things that unite us all in peaceful ways. Scientific principles apply around the world, regardless of race, creed, and nationality.

The first collaborative project that Hamilton initiated, the University Isotope Separator, has been a key operation at the Oak Ridge National Laboratory for more than forty years. This began as a collaboration of 11 Southeastern universities, ORNL and the State of Tennessee. Hamilton is also a founder of the Joint Institute for Heavy Ion Research, a cooperation of Vanderbilt, the University of Tennessee, and Oak Ridge National Laboratory. This Institute has become a world-class scientific resource. Moreover, this Institute opened doors that helped transform ORNL through the development of three major new joint institutes.

By January 2010, Hamilton's critical role in a joint Russian-American project came to fruition in the creation of six atoms of Element 117. While this new radioactive element has a half-life of only 78 milliseconds faster than the blink of an eye—its discovery points towards a fascinating possibility. Its half-life is longer than that of other recently discovered super heavy elements, and suggests that we may be on the path towards finding new, more stable, super heavy elements.

Hamilton and his coworkers' discovery will be forever emblazoned on the walls of chemistry and physics labs worldwide as the newest member of the Periodic Table of Elements. Generations of scientists will discover Element 117's properties, but no matter what is learned about Element 117, this Southern gentleman will always know that his work added to the building blocks of our world.

CONGRATULATING MAJOR GEN-ERAL ROBERT WILLIAMS ON HIS RETIREMENT

HON. TODD RUSSELL PLATTS

OF PENNSYLVANIA IN THE HOUSE OF REPRESENTATIVES

Friday, July 30, 2010

Mr. PLATTS. Madam Speaker, I rise today to recognize Major General Robert Williams, 47th Commandant of the United States Army
