

Rogers, several grandchildren, his sister Sharon Gugat and her husband Kevin, and several nieces, nephews, and cousins. He is also missed by those in the community and his classmates from the Naval Academy.

Madam Speaker, I am privileged to have known such a wonderful citizen of Heath, Texas, who leaves a legacy in public service and in science that will be long remembered.

IN APPRECIATION OF MARY
COLLEEN MCCARTY

HON. ALAN B. MOLLOHAN

OF WEST VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 21, 2010

Mr. MOLLOHAN. Madam Speaker, on January 2, 1974, a gallon of gas cost about 53 cents, the Dow Jones Industrial Average closed at 855, and the top-selling 45 on Billboard's chart was Jim Croce's "Time in a Bottle." That was also the day a recent college graduate, Mary Colleen McCarty, began her professional career, reporting to work in the personal office of Representative Robert H. Mollohan of West Virginia's first congressional district.

On January 2, 2011, Colleen will bring that remarkable career to a close, retiring from my office as Chief of Staff. For the 37 years between those two January days—9 years spent working for my father and 28 in my office—Colleen built a record of service and accomplishment that few congressional staffers can match.

All of us understand how important staff is to our work. It's been one of my privileges to work with many terrific staffers throughout my 28 years in Congress, men and women who have contributed to the first district in a wide variety of ways and whom I am proud to call friends today. But Colleen has always been the one constant. Few staffers survive, let alone thrive, for 37 years in what can be a stressful and demanding work environment. But what's behind that longevity? In Colleen's case, several things.

First is a real commitment to public service. Colleen never lost sight of our purpose here. She came to work every day determined to help the residents of the first district. She began her career as a caseworker, helping somebody get the VA benefits he'd earned or qualify for black lung benefits after a career in the mines, or maybe making sure someone else was getting the right social security check or helping an American stranded overseas with a visa problem. There's nothing abstract about that work; you see the results immediately and tangibly, and that was a lesson that Colleen applied to all of her work in my office—what we do up here matters to people and for that reason alone all of us need to do our best.

Another thing that Colleen brought to work every day was her honesty and the courage of that honesty. I learned early on not to ask Colleen's advice unless I were willing to hear something completely opposite of what I believed or hoped to hear. Colleen never hesitated to speak her mind to me, and, fortunately, she didn't always wait to be asked. I have always understood how important that quality is.

Honesty is only one measure of Colleen's personal integrity. She also has strength and

compassion in equal measures. That is true in her personal life as well as her professional one. I know, for example, how deeply her parents came to rely on Colleen as they negotiated the not uncommon challenges of aging. They knew, as I do, that you can always rely on Colleen.

A Congressman's Chief of Staff generally has two major responsibilities. The first is to serve as principal adviser. I just touched on how important Colleen's counsel has been. The other role, of course, is building and managing a good staff, something at which Colleen has always excelled. She cares about people, supports them, and helps them grow, both professionally and personally.

The culture of my office has always been a positive one, and that is thanks in large part to Colleen's leadership. I speak for myself as well as scores of staffers over the years in thanking Colleen for a thousand kindnesses, large and small, visible and hidden. In a very real way, Colleen retires with two bodies of work. The first is her sizable contributions to the congressional work of my father and me. And the second is the large network of staffers who have benefited from her support and mentoring over the years. In both bodies of work, Colleen enters retirement knowing that she made a difference in people's lives, that she left things better than she found them. And what more satisfaction could one ask of any career?

I always dreaded the prospect of having to replace Colleen. She actually tried to retire once or twice but always made the mistake of asking me rather than telling me. My response never varied—"No, Colleen, I just don't think it's the right time." And it never was the right time, for me anyway. I simply relied on her too much.

Well, Madam Speaker, now it is, finally, the right time. As I prepare to leave office, I take with me many wonderful things. But few mean as much to me as the support and the friendship of Mary Colleen McCarty. My wife, Barbara, and I offer Colleen our warmest wishes for a wonderful retirement.

TO CELEBRATE THE 25TH ANNI-
VERSARY OF THOMAS JEFFER-
SON HIGH SCHOOL OF SCIENCE
AND TECHNOLOGY

HON. GERALD E. CONNOLLY

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 21, 2010

Mr. CONNOLLY of Virginia. Madam Speaker, I rise today to congratulate Thomas Jefferson High School for Science and Technology, TJHSST, on the occasion of its 25th Anniversary. Established in 1985, Thomas Jefferson High School for Science and Technology is the result of collaboration among the local and State leaders, Fairfax County Public Schools and the business community to improve education in science, mathematics, and technology.

Located in the heart of the 11th Congressional District of Virginia, TJHSST is the premier high school in the United States, and its success continues to make Fairfax County one of the most sought out communities in which to live and do business. It is one of 18 Governor's Schools in the Commonwealth of

Virginia and is a founding member of the National Consortium of Specialized Secondary Schools of Mathematics, Science, and Technology.

In 2007, 2008, 2009, and 2010, TJHSST was ranked the best public school in the Nation by U.S. News & World Report and has fielded more National Merit Semifinalists than any other high school for most the 1990s and 2000s. Between 2000 and 2005, more TJHSST students qualified for the United States of America Mathematical Olympiad than from any other high school and the school has a distinguished history of U.S. Physics Olympiad Team participation and medal winners. In 2007, 2009, and 2010, TJHSST held the record for the highest number of Intel Science Talent Search Semifinalists. Seven Rhodes Scholars have graduated from TJHSST, more than the number of Rhodes Scholars at most colleges in the entire country.

Each year, more than 25 percent of the graduating class accepts admission to the University of Virginia. Other prominent colleges popular among the graduates include the College of William and Mary, Duke University, and Princeton University. A number of graduates also have accepted appointments to West Point or the U.S. Naval Academy, becoming officers in our Armed Forces.

The incredible success of TJHSST would not be possible without the commitment of an exceptional educational staff, the dedication of parents and families, and the determination and drive of the students. All work together to support the efforts of every student and help ensure that each will succeed in college and during their professional lives.

Madam Speaker, I ask that my colleagues join me in congratulating Thomas Jefferson High School for Science and Technology on its 25th Anniversary and in commending the community and the school for providing the very best education possible for our next great generation.

COMMEMORATING THE 96TH NA-
TIONAL CONVENTION OF THE
CHURCH OF GOD BY FAITH

HON. CORRINE BROWN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 21, 2010

Ms. CORRINE BROWN of Florida. Madam Speaker, I rise today to commemorate the 96th National Convention of The Church of God By Faith. The Church Of God By Faith was founded in 1914 for the expressed purpose of glorifying God in the beauty of "Holiness". The Founders, Crawford Bright, Elder John Bright, Aaron Matthews, Sr., and Nathaniel Sciplo had a desire to seek the quality of life and character which is set before Christians as an ideal guide and moral obligation. This bonding or coming together and consequent formation of the Church of God By Faith was to serve as a basis whereby believers could be encouraged, educated in the Word of God, strengthened, sustained, spiritually grow, and be united in an environment where the Spirit of Christ is truly active. The Church was materialized from the perceptual thought of foresighted, spiritually led and blessed individuals.

This enlightened tradition and founding principle is emboldened by its current spiritual leader, Bishop James E. McKnight, a man of great vision and purpose, whose leadership has spanned generations well into the present millennium and well poised for the future. We are indeed indebted to Bishop McKnight, all the Presiding Elders, Pastors, Officers and Members who, by faith and by practice, adhere to the founders' dreams and goals by maintaining the vibrancy and relevance of the Church of God By Faith for all its parishioners and the communities they serve.

Congratulations on the observance of this Ninety-Sixth National Convention on December 16–19, 2010, in Atlanta, Georgia.

COMMENDING DAVID L. CAVICKE

HON. JOE BARTON

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 21, 2010

Mr. BARTON of Texas. Madam Speaker, my Chief of Staff on the Energy and Commerce Committee, David L. Cavicke, will be leaving the Committee in January after nearly 16 years of service on the Committee. Staff work quietly out of the spotlight, and I want to take this occasion to commend David for the many issues on which he provided counsel to the Members of the Committee and for his leadership of the Committee staff as Chief of Staff.

David joined the Committee staff in 1995, early in the tenure of Chairman Tom Bliley and Speaker Newt Gingrich. He came to Washington in his '84 Chevy Caprice with six suits and a 486 computer, knowing no one and hoping to contribute to the public policy changes following the historic 1994 election. Tom Bliley hired David as the Committee finance counsel based on a keen intellect, a creative gift for policy ideas that manifested itself in some of the most important changes made to financial regulation in the 1990s, a sense of due process and willingness to listen to all sides of an issue, as well as a very good sense of humor.

David helped Tom Bliley and Newt Gingrich develop and pass milestone legislation that included the Private Securities Litigation Reform Act, the only public law to be enacted over President Clinton's veto.

He worked with Jack Fields and ED MARKEY to pass The National Securities Markets Improvement Act of 1996, which preempted state regulatory authority over national securities offerings; required consideration of efficiency, competition and capital formation in addition to investor protection as elements of SEC rulemakings; and also included the Bliley SEC Fee reduction agreement, which saved one billion dollars worth of fees over 10 years.

David was also the lead staffer on the Committee's efforts to pass the Gramm-Leach-Bliley Act that removed the Depression era's barriers between banking, investment and insurance. He worked closely with Republican Committee members and Democratic Committee members like JOHN DINGELL and ED MARKEY to see that investors' interests would be protected and that the sovereign credit of the United States would not be extended to guarantee underwriting activities by banks. Had the Congress accepted the Committee's

work product rather than watering down these protections in Conference, we might have avoided some of the financial problems we experienced at the end of 2008. Other products of his work for the Committee were the Securities Litigation Reform Uniform Standards legislation, which first asserted federal jurisdiction over class action lawsuits in securities matters, as well as E-SIGN, which made digital signatures enforceable in electronic commerce, facilitating legal certainty for internet commerce.

In Billy Tauzin's chairmanship, David worked on investigations into financial fraud at Enron and Arthur Andersen. His expertise in financial markets and training as a Wall Street lawyer proved vital to the work we did to expose wrongdoing at those firms. This expertise made him the natural choice to depose the key executives at those firms. He subsequently worked on accounting standards, anti-spam legislation, anti-spyware initiatives and legislation to protect consumers' personal data, as well as leading staff investigations into accounting fraud at Fannie Mae and Freddie Mac.

When I became Chairman, I promoted David twice, first to be Committee General Counsel where he was a tireless advocate for the Committee's jurisdiction on behalf of Members of both parties. David made the arguments that finally caused the parliamentarians to recognize the Committee on Energy and Commerce's exclusive jurisdiction over telecommunications issues as a result of the passage of the Telecommunications Act of 1996.

I then promoted David to be Committee Chief of Staff in 2007. He was the first person on the Republican side to have been promoted to Chief of Staff directly from the staff since the beginning of the Gingrich era.

In his role as chief staff strategist for the loyal opposition on the Committee to the Obama Administration, David's command of details and marshalling of resources made possible a legendary 17-day stand by a handful of Republican Members (me, Nathan Deal, JOHN SHADEGG and the rest of the gang of 23) against passage of the wide-ranging health reform law. Similarly, his careful planning helped the emboldened Republican minority resist the Administration's global warming bill until it was shelved. He has been a vigorous advocate for transparency—be it in government, or health care pricing.

Since becoming Chief of Staff, David has become the second best Texas Hold 'em player on the Committee. He beat Howard Lederer, a world champion poker player, in heads up play in a charity tournament this year. As Chief of Staff, he always defended the prerogatives of the Committee and its Members, for which we are very grateful. My colleagues and I on the Committee will certainly miss his good counsel, his great admiration for the institutional importance of the Committee, and his good cheer.

PERSONAL EXPLANATION

HON. TIM MURPHY

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 21, 2010

Mr. TIM MURPHY of Pennsylvania. Madam Speaker, on rollcall No. 653, H.J. Res. 1776,

Providing for consideration of the joint resolution (H.J. Res. 105) making further continuing appropriations for fiscal year 2011, and for other purposes, had I been present, I would have voted "no."

TRIBUTE TO CHAIRMAN BART
GORDON

HON. JOHN GARAMENDI

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 21, 2010

Mr. GARAMENDI. Madam Speaker, I rise today to honor House Science and Technology Chairman BART GORDON.

Chairman GORDON understands that America is in a race—a race against other nations to invent the most advanced technologies in the world. And the stakes of this competition could not be higher. Only with the most advanced technological innovation can this Nation achieve economic growth, energy independence, and strengthen our national security.

For two decades, Chairman GORDON has risen to the challenge of catalyzing American ingenuity by spearheading leading science and technology policies. He requested a complete report on America's global competitiveness, Rising Above the Gathering Storm, and has steadfastly charged up this mountain of challenges. Chairman GORDON authored two landmark bills to enhance our competitiveness, the America COMPETES Act, which became law in 2007, and its reauthorization, which will be signed into law in these last days of 2010. Through these bills, the Chairman is dramatically improving STEM education, strengthening research and development, and restoring America's scientific edge. The Chairman has also lead initiatives to reuse electronic waste and to harness Nanotechnology, which could transform everything from cancer treatment to computers. In an increasingly partisan atmosphere, Chairman GORDON has kept alive the bi-partisan spirit of the Science committee.

I thank Chairman GORDON for his profound service to our Nation, and I urge Congress to carry on his legacy of boldly investing in America's future—science and technology.

THANK YOU TO THE PEOPLE OF
THE 11TH CONGRESSIONAL DISTRICT
OF PENNSYLVANIA

HON. PAUL E. KANJORSKI

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 21, 2010

Mr. KANJORSKI. Madam Speaker, over the last 26 years it has been an enormous honor and privilege to represent the people of the 11th congressional district of Pennsylvania as a member of this body, and I rise today to express my eternal appreciation to the people who gave me the extraordinary opportunity to serve them.

The youngest son of a lawyer and homemaker who was also a teacher, I was blessed to grow up in a loving, supportive family who
