The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Michigan (Mr. LEVIN) and the gentleman from Michigan (Mr. CAMP) each will control 20 minutes.

The Chair recognizes the gentleman from Michigan (Mr. LEVIN).

GENERAL LEAVE

Mr. LEVIN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. LEVIN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I urge Members to support the U.S. Manufacturing Enhancement Act of 2010, also known as the Miscellaneous Tariff Bill, MTB.

The MTB temporarily reduces or suspends tariffs on raw materials and components used in U.S. manufacturing. This bill is a shot in the arm for U.S. manufacturers and workers who need these products to keep making their goods and supporting American jobs. I want to underscore that point. This bill supports U.S. manufacturing jobs.

Provisions in this bill reduce tariffs on inputs that are used for numerous industries, including chemical, pharmaceutical, automotive, agricultural, textiles, electronics, machinery and equipment.

When the cost of these inputs is lowered, U.S. producers’ overall costs are reduced, making their products more competitive in this market and globally, and that increased competitiveness translates into increased production and more jobs.

All of these provisions have been extensively vetted to ensure that the inputs covered by any tariff suspensions are not made here. In the vetting process, there is review by the administration, by the independent ITC, and also there is an opportunity for public comment.

So, as a result we have, for example, the two leading textile associations who represent an industry that has been hard hit by global competition view the MTB as key to their competitiveness.

I quote NCTO, saying, MTB is “a critical cost reduction measure for many U.S. manufacturers, supporting domestic production and employment.” And that’s why the bill is supported by U.S. manufacturing.

The NAM has said this about MTB, “one of the most important short-term actions Congress can take to preserve

and expand good American jobs, cut the costs of doing business in the United States and boost American manufacturing exports," and the U.S. Chamber has said, alike, the same thing.

We have been, in the past, considering duty suspension bills like this since the 97th Congress, and usually, indeed in every case, they have been noncontroversial and supported on a bipartisan basis.

And I quote two documents recently put out by Ways and Means Republicans, my colleagues. I quote from that put out under the name of a ranking member, the distinguished Member from Michigan, DAVE CAMP. And I quote his description of the MTB. "The bill helps U.S. manufacturers and their employees compete by temporarily reducing duties on foreign-made intermediate products or materials and some finished products that are not made domestically or where there is no domestic opposition.

□ 1040

Such reductions or suspensions reduce the costs for U.S. employers. If there is any objection to including a specific provision, such as because a U.S. manufacturer is identified, the item is dropped from the bill."

I also quote a recent statement by the ranking member, Mr. BRADY, on the Subcommittee on Trade: "This traditionally bipartisan legislation reduces unnecessary costs for American businesses and consumers and increases U.S. competitiveness. A model of transparency, the bill is carefully vetted during a long public process to ensure domestic producers are protected. As the ranking member of the Trade Subcommittee of Ways and Means, I have long been a strong advocate for it and have called for its passage for the past 3 years."

So what's changed? What changed was that the Republican Conference decided recently to oppose all earmarks. The House rules distinguish between earmarks and limited tariff benefits; they are defined separately in the rules. So therefore there is really no basis for lumping them together; and when they are lumped together, manufacturers and their workers in this country will be taking their lumps.

So I close with this: in terms of transparency, this process is thorough, rigorous, and transparent to ensure there is no domestic opposition. As indicated, the ITC has to vet this. And all of the information from this extensive review process can be found on the Ways and Means Committee Web site. As a result, the Sunlight Foundation, which has been in the lead in favor of transparency, has called this process "transparency done right."

In sum, a vote for H.R. 4380 is a vote for U.S. manufacturing and U.S. jobs. And so I hope my Republican colleagues, many of them who have businesses and workers in their districts which need this help and many of

whom have introduced legislation incorporated in this bill, I hope they will join the Democrats and stand up for American businesses and workers and support this legislation.

I reserve the balance of my time.

Mr. CAMP. Mr. Speaker, I yield myself such time as I may consume.

I'm disappointed that I can't support this legislation. The Miscellaneous Tariff bill has long been a bipartisan effort that helps both American manufacturers and consumers obtain lower-cost access to products that aren't made in the United States.

I appreciate the chairman following my statements so carefully and even quoting them to this House, because the process used to assemble this legislation is a model in transparency and accountability. It has been a long-standing process used by many Congresses under both Republican and Democrat control, and it should serve as an example of how similar legislation should be prepared.

Every provision is first introduced as a separate bill. Each provision is vetted by the administration and by the U.S. ITC, the International Trade Commission, and is subject to public notice and comment. All information is posted on the committee Web site. And any provision receiving any opposition is removed from the final package.

In my view, this bill technically does not contain earmarks in the form of limited tariff benefits. Each provision lowers duties on imports; and any company or entity or person that imports that product receives the benefit of those lower duties, not just those few that we can positively identify today. But despite these facts, Democrats have written the rules of the House in such a way as to treat limited tariff benefits like other earmarks, and the Democrats were wrong to do so.

The Republican Conference has taken the position, and correctly so, that we are taking a 1-year moratorium on all the provisions included in the Democrat rule to demonstrate our commitment to getting government spending under control. I am committed to both the letter and spirit of that moratorium and therefore will vote against the bill.

In fact, the majority is well aware of our earmark ban, and I can't help but wonder if this wasn't put on the suspension calendar after 3½ years without a vote so that it would fail and they might avoid taking the blame. It's a sham and it won't work. The business community knows it, the American workers whose jobs depend on it know it, and we know it. Democrats have had 3½ years to pass the Miscellaneous Tariff bill and they have failed to do so.

Congress has not passed a miscellaneous tariff bill since December of 2006, right before the Democrats took the majority and except for the Peru Free Trade Agreement have brought no trade legislation to the floor in the time that they have been in the major-

ity. Given the state of our economy, given the loss of jobs, I think that record is not only an embarrassing one; it's a shameful one.

And the record speaks for itself. Republicans have long supported the MTB and U.S. employers, while the Democrats have written the rules of the House to discriminate against this bill. Under this majority, business investment and hiring are frozen in the face of looming tax hikes, smothering government regulation, and little, very little—frankly, no action on the trade agenda. A true commitment to trade and the good-paying U.S. jobs it provides would involve passing the pending bilateral trade agreements which economically are even more important to this country than the bill before us today.

Mr. Speaker, what you're seeing today is merely one more attempt by the majority to distract American workers and employers from the real damage they've done to the American economy. This legislation cannot overcome the \$670 billion in new taxes already passed by this Congress and the billions more coming. It cannot overcome the anti-business attitude of so much of the legislation produced by the majority.

Mr. Speaker, if my friends on the other side of the aisle were truly interested in helping American manufacturers, they would be lowering taxes, knocking down trade barriers, and supporting the private sector. This legislation is no substitute for those policies.

The House should take a breather from earmarks as called for in the moratorium from the Republican Conference. It is unfortunate that this pause includes the MTB; but we didn't write the rule, the majority did. I urge my colleagues to show the American people that we are serious about reforming the way Washington works and vote "no."

I reserve the balance of my time.

Mr. LEVIN. Mr. Speaker, I yield myself 15 seconds.

Rule XXI, clause 9, specifically defines congressional earmarks in one clause and limited tariff benefits in another. You lump them together, you are lumping hurt against manufacturing in the U.S.

I yield 3 minutes to the gentleman who chairs the Trade Subcommittee, my colleague from Tennessee (Mr. TANNER).

Mr. TANNER. Thank you, Mr. Chairman.

I guess this probably symbolizes as much as anything what's wrong with Congress. Here are people who get up and say this is a good bill that's good for job creation in this country, it had been bipartisan for 30 years, and because we made a mistake in the Republican Conference with respect to lumping it in as some sort of earmark, we have to oppose it, even though it's good for job creation in this country and good for our Nation. This is almost Alice in Wonderland where up is down

and down is up. I have to vote against a bill I know will help create jobs because they did it when they wrote the rules. And we misinterpreted the rules, so now we're going to have two wrongs make a right.

If job creation is important, and everyone knows that this bill will help create jobs in the United States of America, it seems to me that to vote against it for the reasons—and by the way, part of the time delay was because of a Senator in the other body who is in the Republican Party. But all that aside, if we cannot rise above some inane technicality that is in the rules that we just don't like or we can't interpret correctly, or whatever, and we're going to vote against American workers and the industrial base of this country because of that, then I suggest we give our voting cards to whoever the leadership of the Republican Conference is and go home.

□ 1050

What do we have brains for? We are not supposed to park our brains at the door because of some sort of partisan political advantage we think we might be able to get by hurting our own country.

I would like to place in the RECORD a series of letters of support from the National Association of Manufacturers, the Chamber of Commerce, AMTAC, NCTO, and from U.S. manufacturers all across the Nation.

They say this is for us to create jobs. I know I'm running out of time, but this is a perfect example of what is wrong with this House of Representatives—when we put partisan politics ahead of the country's interest.

UNITED STATES OF AMERICA
CHAMBER OF COMMERCE,
Washington, DC, July 19, 2010.

TO THE MEMBERS OF THE U.S. HOUSE OF REPRESENTATIVES: The U.S. Chamber of Commerce, the world's largest business federation representing the interests of more than three million businesses and organizations of every size, sector, and region, strongly supports H.R. 4380, the "Miscellaneous Trade and Technical Corrections Act," commonly referred to as the Miscellaneous Tariff Bill (MTB). Tens of thousands of American workers and hundreds of American companies depend on the MTB for relief from tariffs that serve only to raise costs for U.S. manufacturers and other U.S. businesses.

According to guidelines established by Congress, the MTB is a vehicle for the temporary suspension or reduction of duties levied on imported materials or intermediate products that are not produced domestically, or where there is no domestic opposition. By eliminating these tariffs, the MTB lowers costs and helps U.S. businesses maintain their competitive edge.

The process for approving products for duty suspension under the MTB is fully transparent. All tariff suspension requests go through a vetting process to determine whether any affected products are produced domestically or whether there is any domestic opposition. Requests are subject to review by the Department of Commerce, the Office of the U.S. Trade Representative, U.S. Customs and Border Protection, and the U.S. International Trade Commission. Opportunities for public comment are provided by both the executive branch and Congress.

Since the expiration of the last MTB on December 31, 2009, U.S. businesses both large and small have faced higher costs for imported inputs not available from domestic sources. The savings afforded by the MTB will help these firms to invest in training and equipment and enhance their competitiveness.

Given its importance for preserving American jobs, the MTB should receive the same strong bipartisan support it has in the past, and the Chamber urges you to support its swift approval. The Chamber will consider including votes on, or in relation to, this issue in our annual How They Voted scorecard.

Sincerely,

R. BRUCE JOSTEN.

NATIONAL ASSOCIATION OF
MANUFACTURERS,
Washington, DC, July 20, 2010.

House of Representatives,
Washington, DC.

DEAR REPRESENTATIVES: The National Association of Manufacturers (NAM), the nation's largest industrial trade association representing small and large manufacturers in every industrial sector and in all 50 states, urges you to support H.R. 4380, the U.S. Manufacturing Enhancement Act, also known as the Miscellaneous Tariff Bill (MTB).

The MTB is one of the most important short-term actions Congress can take to preserve and expand good American jobs, cut the costs of doing business in the United States and boost American manufacturing exports. U.S. manufacturers large and small use the MTB's tariff suspension provisions to obtain raw materials, proprietary inputs and other products that are not available in our nation.

Without the MTB, the cost of these companies' products will inevitably increase, forcing them to pass higher costs on to consumers and making their products less competitive. These higher costs translate into lost jobs for American workers.

The MTB process is wholly transparent and open to the public. Each proposed duty suspension is subject to a meticulous and non-partisan vetting process to ensure that no domestic producers of the affected product exist. The International Trade Commission, U.S. Commerce Department, U.S. Customs and Border Protection, Office of Management and Budget and the congressional committees of jurisdiction collaborate to review each proposed duty suspension.

A July 2009 study by economist Andrew Szamosszegi of Capital Trade, Inc. concluded that, if enacted, the MTB would increase U.S. production by \$4.6 billion and support almost 90,000 jobs. Costs savings realized under the MTB allow U.S. companies to maintain competitive operations, invest in new facilities and re-train workers. Few bills give Members of Congress such a clear opportunity to support American manufacturing jobs. We urge your support for H.R. 4380.

The NAM's Key Vote Advisory Committee has indicated that all votes related to H.R. 4380, including procedural motions and votes under suspension, may be considered for designation as Key Manufacturing Votes in the 11th Congress.

Thank you for your consideration.

Sincerely,

JAY TIMMONS.

NATIONAL COUNCIL OF
TEXTILE ORGANIZATIONS,
Washington, DC.

On behalf of the National Council of Textile Organizations, we write to urge a YES vote on H.R. 4380, the Miscellaneous Trade and Technical Corrections Bill of 2009. H.R. 4380 is expected to be considered on the House floor Wednesday July 21, 2010.

H.R. 4380 supports U.S. jobs in the textile industry by suspending duties in whole or in part on acrylic and rayon fibers. Acrylic fiber is the primary raw material and highest cost input for U.S. textile manufacturers that utilize these fibers. Acrylic must be imported because there is no domestic supplier for this product and the average duty is 6 percent. Because of the unique characteristics of these fibers—water resistant, fade resistant, and durability—manufacturers who use these raw materials are at the high-end of the value-added chain. U.S. textile producers are able to compete against foreign manufacturers IF they have access to raw materials at competitive prices. Over the last nine months, prices for acrylic fiber have increased 50 percent. On top of this companies are paying full duty at six percent on top of this enormous price increase means that textile mills are losing profit margins. If this situation continues further into 2010 the viability of our mills and workers will be put at risk.

In addition, rayon fibers are no longer produced in the United States and are unlikely to be produced here in the foreseeable future and, through the MTB bill, have been at zero duty for many years. Today, imports of these essential fibers are now being taxed equal to 5 to ten cents per pound of fiber. Rayon fibers have a wide-range of applications including apparel, home furnishings and industrial fabrics. An extension of the current duty suspension on these fibers is justified, necessary, and would continue to improve the international competitiveness of the U.S. textile industry.

The most recent recession has put immense pressure on textile manufacturers to further evolve their business model through innovation, advanced mechanization, and lean manufacturing practices in order to remain globally competitive. Payment of duty on acrylic and rayon fibers diminishes this competitive advantage and in many cases has eliminated any profit margins for companies that rely on these fibers as part of their manufacturing process.

A textile mill can support an entire community; and over the past decade the industry has lost an untold number of mills most of which were located in the Southeast where the unemployment rates per county far exceed the national average. Given that textile mills are closing in some of the hardest hit areas of the country it is more important than ever to ensure that the industry is able to import components that are no longer made in the United States.

NCTO strongly believes that duty suspensions are extremely beneficial to U.S. manufacturers and promotes U.S. competitiveness. In addition, there has been significant debate surrounding whether a duty suspension constitutes an earmark. NCTO believes that a duty suspension should not constitute what is defined as an earmark. The entire duty suspension process is transparent and contributes to the preservation and creation of U.S. jobs and provides domestic producers with necessary tools to be globally competitive.

We urge all members of the Textile Caucus to support the Miscellaneous Trade and Technical Corrections Bill of 2009 since it is a critical cost reduction measure for many U.S. manufacturers, supporting domestic production and employment. If you have any questions regarding H.R. 4380 please feel free to email me or call (202) 822-8026.

Sincerely,

SARAH FAYE PIERCE,
Senior Vice President,
National Council of
Textile Organizations (NCTO).

AMERICAN MANUFACTURING
TRADE ACTION COALITION,
Washington, DC, July 19, 2010.

DEAR U.S. REPRESENTATIVE: The American Manufacturing Trade Action Coalition (AMTAC) strongly urges you to vote in favor of H.R. 4380, the U.S. Manufacturing Enhancement Act of 2010, also known as the miscellaneous tariff bill (MTB). H.R. 4380 has been placed on the House suspension calendar for this week and is listed as item #24.

The MTB helps U.S. manufacturers compete at home and abroad by temporarily suspending or reducing duties on inputs that are not made domestically, or where there is no domestic opposition.

Such suspensions or reductions reduce input costs for U.S. business and ultimately increase the competitiveness of their products.

For example, H.R. 4380 includes fiber-related provisions that will significantly reduce costs associated with various synthetic, acrylic and rayon staple fibers and filaments. Our textile members have experienced longstanding problems sourcing these components in the United States and will benefit significantly from lowered costs for imported sources.

Adding to the urgency of this bill, all of the duty suspensions and reductions put into place by the last MTB have expired, and the U.S. government re-imposed full duties as of January 1, 2010. This has raised production costs for U.S. manufacturers using these components as they struggle to emerge from a severe recession.

While AMTAC is often a critic of U.S. trade policy, the MTB is one element that is actually extremely beneficial to U.S. manufacturers and promotes U.S. competitiveness. In addition, there has been a lot of confusion surrounding whether the MTB constitutes an earmark. We feel that this label is misplaced, as the MTB process is an extremely valuable program for U.S. producers and workers. Furthermore, it is an extremely transparent process that is handled as a collaboration among Congress, private industry, the executive branch, the U.S. International Trade Commission. Only non-controversial provisions are included.

We urge members to support the MTB since it is a critical cost reduction measure for many U.S. manufacturers, supporting domestic production and employment. Thank you for your consideration of our views on this important matter and please feel free to contact me if you have any questions.

AUGUSTINE TANTILLO,
Executive Director.

Mr. CAMP. Mr. Speaker, at this time I yield such time as he may consume to the ranking member of the Trade Subcommittee, the gentleman from Texas (Mr. BRADY).

Mr. BRADY of Texas. Mr. Speaker, I would like to support this legislation, but I cannot.

As Mr. CAMP has pointed out, this has always been a bipartisan process. When Republicans were in the majority, we regularly prepared this legislation in a bipartisan, transparent manner. It was bipartisan because Democrats and Republicans worked together to review every provision and to ensure there was no opposition to any provision and that it protected American companies. It was transparent because every provision was reviewed by the U.S. International Trade Commission, and the ITC's report was posted online for all of America to review. Every provision was subject to public notice and comment.

I am happy to say, and I compliment our Democrat majority for continuing these transparent policies in this legislation, but as lead Republican originally on this bill, however, I will vote against this legislation because it violates the letter and the spirit of the Republican moratorium on earmark requests. Congress has to get a handle on earmarks. There is no question about it.

While the miscellaneous tariff bill, the one we are looking at today, ought to be a model for the way other committees deal with the earmark requests, in the House rule, clause 9, the majority's overbroad and, I think, carelessly written effort to handle the earmark problem has, unfortunately, netted these provisions. As a result, in establishing a moratorium to discipline the process, Republicans have no choice but to include a miscellaneous tariff bill. That is the only reason I'm voting against this bill.

I guess I am puzzled. This is no surprise. We visited as Republicans and Democrats on this issue, trying to find a way forward for months now. If you are truly serious about passing this measure, why would you demand a supermajority that ensures its defeat rather than a normal majority vote that ensures its passage? For months, we've said we cannot help the moratorium on this bill this year, and we are sincere about it. By choosing the suspension route, you have killed this bill.

So the question is: Where do we go from here?

We have so many trade issues that we face as Republicans and Democrats. We have differences about what that trade agenda should be. I worry—and others do—that we have moved to the sidelines. Other countries have stepped ahead of us, selling their products ahead of U.S. products. We've seen this in Colombia, where American farmers have now lost half of our market because of our benching ourselves as a country.

We have to find a bipartisan way forward on opening new markets for U.S. companies. We have to find a bipartisan way forward on facilitating trade, on modernizing our own customs and border processes to allow trade while we become more secure. We have to find a bipartisan way forward on the pending trade agreements with Colombia and Panama and Korea. The President has asked us to find a way forward as he tries to as well.

We have to find a way forward in a bipartisan manner on China—on currency, on protecting intellectual property rights, on setting standards and rules for trade throughout this world. We have a lot at stake in working together, which is why I think choosing the most confrontational method on this bill is shortsighted and why, unfortunately, this bill will be defeated—because of the choice to seek a supermajority rather than the normal route of a majority vote in this House.

Reluctantly but strongly, I oppose this bill because of the earmark moratorium.

I am hopeful that the majority will bring this back under regular order. Democrats with an almost supermajority in this House already can pass this bill, but we have been very open from the beginning about the fact that, if it is brought up under suspension, it will die. I regret that. I would encourage us to find a bipartisan way forward on trade and facilitation on the miscellaneous tariff bill.

Mr. LEVIN. I yield myself 10 seconds.

Mr. BRADY, it is your choice.

Mr. Speaker, I yield 3 minutes to the distinguished gentleman from Massachusetts (Mr. NEAL).

Mr. NEAL. Mr. Speaker, I stand in support of this job-creating legislation. This legislation before us today is going to advance American manufacturing competitiveness in an increasingly global economy, and it furthers our goal of doubling exports over the next 5 years. Yet we hear strong opposition to this legislation today. Let me tell you something: It's Orwellian what you just heard—or, in street parlance, it's a reach.

There is clearly an opportunity for us to get past some of the pettiness of this institution and move forward on legislation that at one time would guarantee 400 votes. There is nothing that we are attempting to hide with this legislation. The markings have been posted on the Internet. Now, our opponents have even authored some of these provisions. They have decided, if somehow they help an American company, that it's dirty business.

One of the provisions that I've offered in this bill today helps a manufacturing company in my district—and by the way, it's headquartered in a Republican Member's district, a Member who, apparently, is going to vote against it today, and we are going to hear opposition that doesn't stand up under the magnifying glass.

These tariff reductions are simply taxes on imports, but these imported products are based upon no American manufacturer making them; so it only raises taxes on the cost of an American importer who uses the raw material to create a marketable product for sale. This bill will lower production costs and increase American manufacturing competitiveness.

Now, the U.S. Chamber of Commerce and the National Association of Manufacturers and others have said this is a job booster, estimated to increase the GDP by—listen to this—several billion dollars. This has been a model for bipartisanship in the past, for transparency and for good policy that promotes American manufacturing and jobs, which ought to be our current and lasting priority—but today, things have changed.

There is no other bill, no other legislative process that requires the same magnitude of disclosure that this legislation does. No other bill requires the certification that this legislation does. It is a model for sunlight and transparency. Yet some today will urge a

vote against this legislation? I'm not one of them. I am glad to stand here and to support the provision that I have offered that will help a company in my district that supports 500 very good jobs.

I urge adoption.

Mr. CAMP. At this time, Mr. Speaker, I yield 3 minutes to the gentleman from California (Mr. DREIER).

(Mr. DREIER asked and was given permission to revise and extend his remarks.)

Mr. DREIER. Mr. Speaker, I want to begin by praising my colleagues Messrs. CAMP and BRADY for the hard work they have put into the overall job-creating and trade agenda.

We all know very well that opening up new markets for U.S. goods and services around the world is one of the most important things that we can do if we, in fact, are going to do what everybody says we want to do, and that is to create good American jobs.

□ 1100

We have pending, as we all know, the Colombia and Panama agreements and the South Korea agreement. It's wonderful to hear the kinds of supportive remarks that come regularly from the President of the United States. After the G-20 meeting, he was very supportive of it. He stood right here when he addressed us in his State of the Union message saying that he thought it very important that we pass the Colombia and the Peru agreements, but he has yet to send them up. And so I will say that we are all anxiously awaiting the arrival of those job-creating measures.

Now, what is it that we're doing here?

And, Mr. Speaker, I've got to say that I always pride myself on being a bit of a Reagan optimist and occasionally skeptical, and I don't want to say that I've moved over toward cynicism. But when we have a measure like this that is being brought up under the suspension the rules, which, as Mr. BRADY said, will, in fact, die if we're not going to get it, it means that the majority understands full well that this measure ain't going to happen.

Now, let's look at what is it that has gotten us to the point where we are, Mr. Speaker. The fact of the matter is we made it very clear that in our attempt to rein in Federal spending, the notion of continuing to expand earmarks was a nonstarter for us. And so our Republican leader, Mr. BOEHNER, encouraged all of us under his leadership to say that we would have a moratorium on earmarks.

Well, Mr. Speaker, it was not until the 110th Congress, not until this Congress, under the rules established by the Democratic majority, did we have these tariff measures included under the earmark designation. And so, while there's criticism leveled at us over here, the fact is, you all, Mr. Speaker, your party, actually designed this new definition, which included these meas-

ures under earmarks. And so the majority knew full well that those of us who are opposed to this dramatic expansion and earmark spending would, in fact, come to the conclusion that we would not be supportive of this measure, as much as we would like to, as much as we are passionately committed, I believe more so than many of our colleagues on the other side of the aisle. We're more passionately committed to the notion of breaking down tariff and nontariff barriers to encourage the free flow of goods and services around the world. As much as we would like to do that, the majority knew full well that creating, under their new definition—

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. CAMP. I yield the gentleman an additional minute.

Mr. DREIER. That under their definition, under their definition, Mr. Speaker, what is it that's happened?

They knew that we would not be in a position to do this. And so it is with a great deal of regret that I join with Mr. CAMP and Mr. BRADY and encourage our colleagues to vote "no" but to say that, as Mr. BRADY pointed out, a bipartisan agreement that could allow us to address these measures is something that we should be working on and we could do in the House Rules Committee.

And so I will say, just as we are ready, willing, and able to take on and, I hope, pass the South Korea, Colombia, and Panama agreements if the President were to send them up, I stand ready, willing, and able to work in the Rules Committee in a bipartisan way to make sure that we can address this issue and bring it here so that we can work together to create good American jobs.

Mr. LEVIN. Mr. Speaker, I yield myself 10 seconds.

The rule has separate provisions on congressional earmarks and limited tariff benefits. You are using an excuse that does not exist.

I yield 2 minutes to the gentleman from Texas (Mr. DOGGETT), a distinguished member of our committee.

Mr. DOGGETT. The Republicans do, indeed, have a moratorium. It's a moratorium on cooperation. It's a moratorium on voting for good bills they say they're for. It's a moratorium on reality.

They never miss an opportunity to let their rigid ideology get in the way of us doing something for America, and that's what's happening here today. We reach out a hand on a bill they say they're for and they slap it back.

Let me say just a word about openness in government, which has a lot to do with earmarks and this bill, because it's too often good talk but little meaningful action.

In the past, this very piece of legislation to spend or reduce hundreds of individual tariffs for specific businesses has been a troubling example of government in the shadows. As in previous

Congresses, when I first attempted to learn more about what was in this bill, I found it an impenetrable process. Even my efforts as a member of the committee of jurisdiction to determine specifics about this bill were initially thwarted.

True to its name, the Sunlight Foundation shed light on this opaque process. In 2008, it took on the laborious task of creating a database to improve the public's ability to understand who would benefit from the bill, at the request of which lobbyist, and for which corporation.

This year, the Ways and Means Committee, under the leadership of Chairman LEVIN, has built upon the Sunlight Foundation's laudable work, substantially changing the secretive process of the past that governs the Miscellaneous Tariff Bill.

I'm pleased to have worked with the Sunlight Foundation and Chairman LEVIN to make this official database a reality. Now any citizen can look up the details of this bill, learn who the winners and losers were, and see who pushed them over the finish line. Today we have not only a new name for this legislation, but we have a new process involving public participation and understanding in its development.

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. LEVIN. I yield an additional 15 seconds to the gentleman.

Mr. DOGGETT. This is just the latest example of public access in this Congress. With the encouragement of the Sunlight Foundation and other public interest groups, we must continue building on such success, arming citizens with the tools they need to make informed decisions.

Mr. CAMP. Mr. Speaker, I reserve the balance of my time.

Mr. LEVIN. Mr. Speaker, I yield 2 minutes to the gentleman from Oregon (Mr. BLUMENAUER), another distinguished member of our committee.

Mr. BLUMENAUER. I rise in support of this legislation today. I've worked on miscellaneous tariff bills in the past that are important to open up markets here at home.

One of the areas that I've been involved with over the years has dealt with the bicycle industry, which benefits dramatically. It's a \$133 billion part of the United States economy. It supports over a million jobs, generates almost \$20 billion in taxes. We've got elements here that are not manufactured in the United States that are necessary for the bicycle industry to thrive. I'm pleased that they're in this legislation.

But I am stunned at what I'm hearing from my friends on the other side of the aisle. It is, sadly, a symbol of their hollow rhetoric and shallow thinking. They want to do the right thing, but they can't. They can't take "yes" for an answer because it's partisan. It's partisan because they refuse to vote for things that they know are right, that they helped craft.

And the notion that this is somehow an earmark—I'm sorry. I was pained when I heard my good friend from Texas on the floor. The top Republican on trade, KEVIN BRADY, has said that, while he supports the GOP earmark prohibition, he has never considered a tariff suspension an earmark, and added that he considers it important that the bill moves in this Congress.

It's not an earmark unless you want to pretend that it's an earmark. But for heaven's sakes, this is something that even the Republicans agree they're not going to do next year. It's an election year ploy to try and get attention to a problem that they made worse when they were in charge.

We've opened this process up. It's transparent. It's important.

I hope my friends on the other side of the aisle will take "yes" for an answer and join me in voting for this legislation.

Mr. CAMP. Mr. Speaker, I continue to reserve the balance of my time. I will make a statement when it's time to close.

Mr. LEVIN. I yield 2 minutes to the gentleman from New Jersey (Mr. PASCRELL), another distinguished member of our committee.

□ 1110

Mr. PASCRELL. Here we go again on process. We want results. We need to look back at the record since 1995 on this legislation. The House has approved the MTB six times under suspension. Two of those votes, Mr. Speaker, two of the votes, voted on in the 104th Congress and the 107th Congress, were voiced. We didn't even have a roll call vote.

So for you to come before this House and tell us that the world was turned upside down, you turned it upside down when you look at the 104th and the 107th Congress. And we know who the majority was in those Congresses. That's the record.

Now, we know there is a very clear distinction between earmarks and the MTB provision which this bill enunciates. You know that an earmark provides for the authorization of a specific district or State, et cetera, et cetera. But a limited tariff benefit is defined as a provision modifying harmonized tariffs. We don't know what the word "harmony" means in this House.

So I am in strong support of H.R. 4380. This bill will lower costs for American small businesses, allowing them to prosper and making their products more competitive both here and abroad. This is what we should all be about. This will create tens of thousands of United States jobs, increase United States production, and expand GDP by several billion dollars. In my district, two towns, Bloomfield and Paterson, will benefit from duty suspensions on certain products. This is significant not only for the people who work there but for the customers of these products.

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. LEVIN. I yield the gentleman 10 additional seconds.

Mr. PASCRELL. In fact, the Sunlight Foundation, which is no stranger to criticizing this Congress on earmarks, has called this bill "transparency done right." I rest my case. Let's pass this legislation.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. The Chair will remind Members to address their remarks to the Chair and not to fellow Members in the second person.

Mr. LEVIN. I yield for the purpose of making a unanimous consent request to the gentleman from Virginia (Mr. SCOTT).

(Mr. SCOTT of Virginia asked and was given permission to revise and extend his remarks.)

Mr. SCOTT of Virginia. Mr. Speaker, I rise in support of the bill, which will promote competitiveness, innovation, exports, and, most importantly, jobs in the Richmond, Virginia area.

Mr. Speaker, I rise today in support of the U.S. Manufacturing Enhancement Act, and I thank Chairman LEVIN and the Ways and Means Committee for their diligent work on this bill over the last two years.

The legislation before the House today will help American manufacturers compete at home and abroad by temporarily providing import relief on certain intermediate products or materials that are not made domestically or are not opposed by domestic producers.

This bill will help level the playing field of U.S. firms, increase competitiveness of American products at home and abroad, provide support for tens of thousands of American jobs, and help increase American production and expand our nation's gross domestic product by billions of dollars. As we continue our economic recovery, this bill is an important short-term action that Congress can take now to protect and expand American jobs and provide another boost to our economy.

I especially appreciate the Committee's work to include several duty suspensions for Hamilton Beach/Proctor Silex, a distributor of small kitchen appliances based in Richmond, Virginia. These duty suspensions for Hamilton Beach/Proctor Silex were first included in the Harmonized Tariff Schedule by Senator George Allen in 2006. I was happy to support the extensions of these duty suspensions in the 110th Congress and I thank the Chairman for including these suspensions in this bill. By providing this import relief through 2012, these duty suspensions will protect important manufacturing jobs in and around my Congressional district.

Mr. Speaker, the U.S. Manufacturing Enhancement Act will promote competitiveness, innovation, exports and, most importantly, job creation for American manufacturers. I urge my colleagues to support this important job protection and job creation legislation.

Mr. CAMP. Mr. Speaker, I yield myself such time as I may consume.

First, let me address the rule of the House. It's very clear that these are treated the same way, if you look at the rules. In fact, if you pull the rules of the House out, there is subsection called "Congressional Earmarks." All of this is listed in that section. So it's very clear that there was an intent to

incorporate, unfortunately wrongly, these kinds of provisions in the earmark process. We didn't write that rule. The Democrats wrote that rule. We are trying to have some integrity to the entire process.

Now, I realize that on the other side, whether it's a budget, and the Budget Act of 1974, you ignore that; whether it's PAYGO, you ignore that whenever it suits your needs and, quote, "find an emergency" to get around that. But the fact is we need to reform this process. We have not done that.

And I have in personal terms urged the chairman not to bring this under suspension of the rules. The last time this bill was on suspension in the 109th Congress it failed, and a majority of the Democrats voted against the bill. I think this is not the process in order to find a bipartisan path forward on this bill. What we really need to do, I think what should have been done, is not bring this bill where it requires a supermajority, because I think it is very likely the bill will fail. And that may be the political outcome that my friends on the other side wanted.

But in order to move this legislation in a bipartisan way forward, I think it's going to be important to get a rule, which I am certain will occur, and we will be back on the floor very shortly addressing this matter with a rule and a simple majority vote.

So I would just urge my colleagues to vote "no" on this bill until we can find a way to bring this legislation to the floor with a bipartisan rule that we have had the ranking member on the Rules Committee come forward and say he would be willing to work with the majority to find a way to resolve this issue.

Again, I urge a "no" vote on this legislation, and I yield back the balance of my time.

Mr. LEVIN. I yield the balance of my time to the gentleman from North Carolina (Mr. ETHERIDGE), a distinguished member of our committee.

The SPEAKER pro tempore. The gentleman is recognized for 1¼ minutes.

Mr. ETHERIDGE. I thank the gentleman for yielding.

Mr. Speaker, I rise in strong support of the Manufacturing Enhancement Act. My top priority, and the priority of this Congress ought to be three things: jobs, jobs, jobs when people are hurting. I know too many North Carolinians who are out of work. Families are hurting. They are being squeezed. And this helps small businesses. It will support tens of thousands of jobs in my State and across America. It will strengthen our manufacturing sector. And it is a time when we really need that kind of support. Fixing these tariffs is a boon to U.S. manufacturing, it lowers costs for consumers, and makes sure that U.S. jobs stay in the United States of America.

My colleagues on the other side remind me of the story of the young man who came before this aged gentleman, and he had a bird in his hand. And he

said, "Old man," he said, "is this bird alive or is he dead?" Knowing that if he said he was alive, he would crush him, and if he said he was dead, he would release him. And the old gentleman said to him, "Young man, it is up to you." When you say whether this bill will pass or die, to my colleagues on this side of the aisle, it's up to you. But the American people are watching, and they will suffer.

I urge you to reconsider and vote "yes" on this legislation not just to make a point, but to make a difference for the American people.

Mr. DAVIS of Illinois. Mr. Speaker, I join my colleagues in support of the U.S. Manufacturing Enhancement Act of 2010, H.R. 4380. This bill seeks to bolster manufacturing across the country through reductions and suspensions of duty taxes on non-competitive industrial goods. American manufacturing companies will be able to save considerably on production costs due to the decreased prices of industrial materials. I believe this legislation is essential to saving American manufacturing by creating jobs all across the country and by improving the competitiveness of American manufacturing in the global market. It will ease the pressure on American manufacturers at a time when it is most necessary.

American manufacturing is in dire need of government support. From the years 2002–2007, the GDP of America's private manufacturing sector expanded at 2.3% per year, an adequate growth rate. In 2008, the GDP declined by 2.5%, and last year, the GDP growth rate plummeted by 5.3%. Congress must act to reverse this trend. This bill is projected to expand the GDP by billions of dollars.

Locally, the Cook County unemployment rate currently stands at 10.7%. As a major industrial center of the U.S., Chicago businesses will benefit significantly from this bill. It will produce tens of thousands of jobs nationwide and many in the Chicago area. The bill is supported by over 130 companies as well as the Chamber of Commerce and the National Association of Manufacturers. Reducing the cost of industrial materials will create jobs, boost revenues, and put the U.S. in a better position to compete on the international market.

I strongly believe the U.S. Manufacturing Enhancement Act of 2010 is critical to the future of American manufacturing, and I look forward to seeing this bill move through the House.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Michigan (Mr. LEVIN) that the House suspend the rules and pass the bill, H.R. 4380, as amended.

The question was taken.

The SPEAKER pro tempore. In the opinion of the Chair, two-thirds being in the affirmative, the ayes have it.

Mr. LEVIN. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX and the Chair's prior announcement, further proceedings on this motion will be postponed.

INDIAN ARTS AND CRAFTS AMENDMENTS ACT OF 2010
