

(1) congratulates the Duke team for winning the 2010 NCAA Division I Men's Basketball Tournament;

(2) recognizes the achievements of the players and coaches; and

(3) directs the Secretary of the Senate to make available enrolled copies of this resolution to Duke University President Richard H. Brodhead, Athletic Director Kevin White, and Head Coach Mike Krzyzewski for appropriate display.

SENATE RESOLUTION 506—DESIGNATING MAY 2010 AS “NATIONAL X AND Y CHROMOSOMAL VARIATIONS AWARENESS MONTH”

Mr. BROWNBACK (for himself and Mr. CARDIN) submitted the following resolution; which was referred to the Committee on the Judiciary:

S. RES. 506

Whereas 1 in 500 children in the United States have X and Y chromosomal variations that cause complex learning disabilities, including reading, language, and motor-planning impairments;

Whereas 1 in 10 babies born every day has an X and Y chromosomal variation, but only 30 percent of those babies will ever receive the treatment needed in order to succeed academically;

Whereas, although all physicians, ancillary health care providers, and special educators are taught that genetic abnormalities can impact the development of a child, most practitioners receive insufficient information about X and Y chromosomal variations;

Whereas many health care and educational providers do not consider testing for X and Y chromosomal variations when the providers encounter a child who presents with developmental disabilities;

Whereas widespread misinformation about X and Y chromosomal variations causes unnecessary distress to families dealing with such a diagnosis;

Whereas, with greater national awareness about the existence of X and Y chromosomal variations, children with these disorders can be diagnosed and provided with the syndrome-specific medical care and academic intervention the children need to succeed academically, to prepare for the workforce, and to live full and productive lives; and

Whereas, with the proper diagnosis and intervention, children who have X and Y chromosomal variations can excel academically and in the workforce: Now, therefore, be it

Resolved, That the Senate—

(1) designates May 2010 as “National X and Y Chromosomal Variations Awareness Month”; and

(2) encourages the appropriate organizations to recognize the month with appropriate activities.

SENATE RESOLUTION 507—DESIGNATING APRIL 30, 2010, AS “DIA DE LOS NIÑOS: CELEBRATING YOUNG AMERICANS”

Mr. MENENDEZ (for himself, Mr. HATCH, Mr. REID, Mr. LUGAR, Mr. DURBIN, Mr. BINGAMAN, Mr. LAUTENBERG, Mrs. MURRAY, Mr. CASEY, Mrs. GILLIBRAND, and Mr. AKAKA) submitted the following resolution; which was considered and agreed to:

S. RES. 507

Whereas many nations throughout the world, and especially within the Western

hemisphere, celebrate “el Día de los Niños”, or “Day of the Children”, on April 30, in recognition and celebration of the future of the nations—their children;

Whereas children represent the hopes and dreams of the people of the United States and are the center of families in the United States;

Whereas children should be nurtured and invested in to preserve and enhance economic prosperity, democracy, and the spirit of the United States;

Whereas according to the latest Census report, there are more than 47,000,000 individuals of Hispanic descent living in the United States, nearly 16,000,000 of whom are children;

Whereas Hispanics in the United States, the youngest and fastest growing ethnic community in the Nation, continue the tradition of honoring their children on el Día de los Niños, and wish to share this custom with the rest of the Nation;

Whereas the primary teachers of family values, morality, and culture are parents and family members, and people in the United States rely on children to pass on these family values, morals, and culture to future generations;

Whereas the importance of literacy and education are most often communicated to children through family members;

Whereas families should be encouraged to engage in family and community activities that include extended and elderly family members and that encourage children to explore and develop confidence;

Whereas the designation of a day to honor the children of the United States will help affirm for the people of the United States the significance of family, education, and community;

Whereas the designation of a day of special recognition for the children of the United States will provide an opportunity for children to reflect on their future, to articulate their aspirations, and to find comfort and security in the support of their family members and communities;

Whereas the National Latino Children's Institute, serving as a voice for children, has worked with cities throughout the Nation to declare April 30 as “el Día de los Niños: Celebrating Young Americans”, a day to bring together Hispanics and other communities nationwide to celebrate and uplift children; and

Whereas the children of a nation are the responsibility of all its people, and people should be encouraged to celebrate the gifts of children to society: Now, therefore, be it

Resolved, That the Senate—

(1) designates April 30, 2010, as “el Día de los Niños: Celebrating Young Americans”; and

(2) calls on the people of the United States to join with all children, families, organizations, communities, churches, cities, and States across the Nation to observe the day with appropriate ceremonies, including activities that—

(A) center around children, and are free or minimal in cost so as to encourage and facilitate the participation of all our people;

(B) are positive and uplifting and that help children express their hopes and dreams;

(C) provide opportunities for children of all backgrounds to learn about one another's cultures and to share ideas;

(D) include all members of the family, especially extended and elderly family members, so as to promote greater communication among the generations within a family, enabling children to appreciate and benefit from the experiences and wisdom of their elderly family members;

(E) provide opportunities for families within a community to get acquainted; and

(F) provide children with the support they need to develop skills and confidence, and to find the inner strength and the will and fire of the human spirit to make their dreams come true.

SENATE RESOLUTION 508—RECOGNIZING JUNE 2010 AS NATIONAL HEREDITARY HEMORRHAGIC TELANGIECTASIA (HHT) MONTH ESTABLISHED TO INCREASE AWARENESS OF HHT, WHICH IS A COMPLEX GENETIC BLOOD VESSEL DISORDER THAT AFFECTS APPROXIMATELY 70,000 PEOPLE IN THE UNITED STATES

Mr. JOHNSON (for himself and Mr. BENNETT) submitted the following resolution; which was referred to the Committee on Health, Education, Labor, and Pensions:

S. RES. 508

Whereas according to the HHT Foundation International, Hereditary Hemorrhagic Telangiectasia (HHT), also referred to as Osler-Weber-Rendu Syndrome, is a long-neglected national health problem that affects approximately 70,000 (1 in 5,000) people in the United States and 1,200,000 people worldwide;

Whereas HHT is an autosomal dominant, uncommon complex genetic blood vessel disorder, characterized by telangiectases and artery-vein malformations that occurs in major organs including the lungs, brain, and liver, as well as the nasal mucosa, mouth, gastrointestinal tract, and skin of the face and hands;

Whereas left untreated, HHT can result in considerable morbidity and mortality and lead to acute and chronic health problems or sudden death;

Whereas according to the HHT Foundation International, 20 percent of those with HHT, regardless of age, suffer death and disability;

Whereas according to the HHT Foundation International, due to widespread lack of knowledge of the disorder among medical professionals, approximately 90 percent of the HHT population has not yet been diagnosed and is at risk for death or disability due to sudden rupture of the blood vessels in major organs in the body;

Whereas the HHT Foundation International estimates that 20 to 40 percent of complications and sudden death due to these “vascular time bombs” are preventable;

Whereas patients with HHT frequently receive fragmented care from practitioners who focus on 1 organ of the body, having little knowledge about involvement in other organs or the interrelation of the syndrome systemically;

Whereas HHT is associated with serious consequences if not treated early, yet the condition is amenable to early identification and diagnosis with suitable tests, and there are acceptable treatments available in already-established facilities such as the 8 HHT Treatment Centers of Excellence in the United States; and

Whereas adequate Federal funding is needed for education, outreach, and research to prevent death and disability, improve outcomes, reduce costs, and increase the quality of life for people living with HHT: Now, therefore, be it

Resolved, That the Senate—

(1) recognizes the need to pursue research to find better treatments, and eventually, a cure for HHT;

(2) recognizes and supports the HHT Foundation International as the only advocacy organization in the United States working to find a cure for HHT while saving the lives

and improving the well-being of individuals and families affected by HHT through research, outreach, education, and support;

(3) supports the designation of June 2010 as National Hereditary Hemorrhagic Telangiectasia (HHT) month, to increase awareness of HHT;

(4) acknowledges the need to identify the approximately 90 percent of the HHT population that has not yet been diagnosed and is at risk for death or disability due to sudden rupture of the blood vessels in major organs in the body;

(5) recognizes the importance of comprehensive care centers in providing complete care and treatment for each patient with HHT;

(6) recognizes that stroke, lung, and brain hemorrhages can be prevented through early diagnosis, screening, and treatment of HHT;

(7) recognizes severe hemorrhages in the nose and gastrointestinal tract can be controlled through intervention, and that heart failure can be managed through proper diagnosis of HHT and treatments;

(8) recognizes that a leading medical and academic institution estimated that \$6,600,000,000 of 1-time health care costs can be saved through aggressive management of HHT in the at-risk population; and

(9) encourages the people of the United States and interested groups to observe and support the month through appropriate programs and activities that promote public awareness of HHT and potential treatments for it.

SENATE RESOLUTION 509—DESIGNATING APRIL 2010 AS “NATIONAL STD AWARENESS MONTH”

Mr. BURRIS submitted the following resolution; which was referred to the Committee on the Judiciary.

S. RES. 509

Whereas sexually transmitted infections (referred to in this preamble as “STIs”) (also commonly known as sexually transmitted diseases, or “STDs”) are a major public health challenge for the United States in economic and human terms;

Whereas the United States has the highest rate of people with STIs in the industrialized world, with an estimated 19,000,000 new cases occurring each year;

Whereas, each year, approximately ½ of the new cases of STIs occur in young people between the ages of 15 to 24;

Whereas all people of the United States have an interest in STIs because every community is impacted and everyone pays for the cost of the infections, either directly or indirectly;

Whereas, according to the Centers for Disease Control and Prevention (referred to in this preamble as “CDC”), STIs impose a tremendous economic burden on the United States, with direct medical costs for treating STIs as high as \$15,900,000 per year;

Whereas, in 2008, the CDC estimated that 1 in 4 young women between the ages of 14 and 19 in the United States, or 3,200,000 teenage girls, and nearly 1 in 2 African-American young women are infected with 1 or more of the most common sexually transmitted infections, including the human papillomavirus (referred to in this preamble as “HPV”), chlamydia, herpes simplex virus, and trichomoniasis;

Whereas, in 2010, CDC data indicated that 1 in 6 Americans between the ages of 14 and 49 years old are infected with type 2 of the herpes simplex virus, a lifelong and incurable infection, and that of the group of infected Americans, African-American women were the most affected group, with a prevalence rate of 48 percent;

Whereas poverty and lack of access to quality health care exacerbate the rate of infection with the human immunodeficiency virus (referred to in this preamble as “HIV”) and other STIs;

Whereas men who have sex with men continue to be disproportionately impacted by STIs, accounting for 63 percent of all syphilis cases in 2008 as compared to only 4 percent of STIs in 2000;

Whereas racial disparities in rates of STIs are among the worst health disparities in the United States for any health condition;

Whereas most STIs have been associated with increased risk of HIV transmission and are likely contributing to the ongoing HIV epidemic in the United States;

Whereas the CDC reports that the 2 most common STIs among young women are HPV, with 18 percent infected, and chlamydia, with 4 percent infected;

Whereas the long-term health effects of HPV and chlamydia are especially severe for women and include infertility and cervical cancer;

Whereas vaccination, screening, and early treatment can prevent some of the most devastating effects of STIs;

Whereas high STI infection rates in the United States demonstrate the need for better ways to reach the individuals most at risk for infection;

Whereas the CDC recommends—

(1) annual chlamydia screenings for sexually active women 25 years of age and younger;

(2) HPV vaccination for girls and women between the ages of 11 and 26 who have not been vaccinated, or who have not completed the full series of shots; and

(3) screening for HIV, syphilis, chlamydia, and gonorrhea at least once a year for men who have sex with men and who are not in a long-term, mutually monogamous relationship;

Whereas chlamydia can lead to pelvic inflammatory disease, chronic pelvic pain, infertility, and tubular pregnancies, which can affect the health and well-being of a woman throughout her lifetime;

Whereas STIs can be transmitted from infected mothers to infants during childbirth and can cause severe health consequences in the infants;

Whereas STIs often cause social stigma and may have a serious psychological impact among the individuals who are infected;

Whereas people protect themselves against STIs through participation in programs that provide comprehensive and medically accurate health information and screening and treatment services, including title X of the Public Health Service Act (42 U.S.C. 300 et seq.) and the STI prevention program of the CDC;

Whereas school-based STI screening programs have been highly successful in cases in which the programs are implemented and are effective at preventing the spread of STIs among adolescents;

Whereas the sexual and reproductive health needs of men must be more thoroughly recognized and better addressed by the public health and medical provider community in order to more effectively combat the spread of STIs;

Whereas STI programs in State and local health departments that are funded through the Division of STD Prevention of the CDC are the frontline of the defense of the United States against the spread of STIs;

Whereas STI screening, vaccination, and other prevention strategies for sexually active women should be among the highest public health priorities; and

Whereas the CDC observes April as “National STD Awareness Month”: Now, therefore, be it

Resolved, That the Senate—

(1) designates April 2010 as “National STD Awareness Month”;

(2) encourages the Federal Government, States, localities, and nonprofit organizations to observe the month with appropriate programs and activities, with the goal of increasing public knowledge of the risks of sexually transmitted infections (referred to in this resolution as “STIs”) and protecting people of all ages;

(3) recognizes the human toll of STIs and the importance of making the prevention, diagnosis, and treatment of STIs an urgent public health priority;

(4) calls on all people of the United States to learn about STIs and the prevention approaches recommended for STIs; and

(5) encourages all sexually active individuals to get tested for STIs and to seek appropriate care if infected.

SENATE CONCURRENT RESOLUTION 62—CONGRATULATING THE OUTSTANDING PROFESSIONAL PUBLIC SERVANTS, BOTH PAST AND PRESENT, OF THE NATURAL RESOURCES CONSERVATION SERVICE ON THE OCCASION OF ITS 75TH ANNIVERSARY

Mrs. LINCOLN (for herself, Mr. CHAMBLISS, Mrs. MURRAY, Mr. PRYOR, Mr. BAUCUS, Mr. CASEY, Mr. DURBIN, Mr. REID, Mr. KOHL, Mr. HARKIN, Mr. BENNET, Mr. BROWNBACK, Mr. GRASSLEY, Mr. CRAPO, Mr. LEAHY, and Mr. JOHANNIS) submitted the following concurrent resolution; which was considered and agreed to:

S. CON. RES. 62

Whereas the well-being of the United States is dependent on productive soils along with abundant and high-quality water and related natural resources;

Whereas the Natural Resources Conservation Service (in this resolution referred to as “NRCS”) was established as the Soil Conservation Service in the Department of Agriculture in 1935 to assist farmers, ranchers, and other landowners in protecting soil and water resources on private lands;

Whereas Hugh Hammond Bennett, the first Chief of the Soil Conservation Service and the “father of soil conservation”, led the creation of the modern soil conservation movement that established soil and water conservation as a national priority;

Whereas the NRCS, with the assistance of President Franklin D. Roosevelt, State governments, and local partners, developed a new mechanism of American conservation service delivery, which brings together private individuals with Federal, State, and local governments to achieve common conservation objectives;

Whereas the NRCS provides a vital public service by supplying technical expertise and financial assistance to cooperating private landowners for the conservation of soil and water resources;

Whereas the NRCS, as authorized by Congress, has developed and provided land conservation programs that have resulted in the restoration and preservation of millions of acres of wetlands, forests, and grasslands that provide innumerable benefits to the general public in the form of recreational opportunities, wildlife habitat, water quality, and reduced soil erosion;

Whereas the NRCS is the world leader in soil science and soil surveying;

Whereas the NRCS is the national leader in the inventory of natural resources on private
