Subtitle B—Fighting Fraud and Abuse to Save Taxpayers' Dollars

SEC. 960. FINDINGS.

Congress makes the following findings:

(1) The Medicare program loses an estimated \$60,000,000,000 annually to wasted and fraudulent payments.

(2) The Medicaid program also suffers from rampant fraud. As the Office of the Inspector General of the Department of Health and Human Services noted in 2009, in an analysis of the only source of nationwide Medicaid claims and beneficiary eligibility information, the Medicaid Statistical Information System, the Federal Government does not have “timely, accurate, or comprehensive information for fraud, waste, and abuse detection” in the Medicaid program.

(3) Absent comprehensive estimates, the Medicaid program’s improper payment rate may be the most objective measure of taxpayer dollars lost to fraud. The national average improper payment rate ranges between 8.7 percent and 10.5 percent, but many States have much higher improper payment rates.

(4) The new Federal health reform law substantially expands the Medicaid program, significantly changes the Medicare program, creates new mandates and regulations, and will send hundreds of billions of dollars to insurance companies.

(5) It is the duty of public officials and public servants in Congress and the Administration to protect the American public’s taxpayer dollars. Congress and the Administration must continue to aggressively combat waste, fraud, and abuse in public health care programs.

(6) The Inspector General of the Department of Health and Human Services has stated that “swift and effective detection of and response to waste, fraud, and abuse remain an essential program integrity strategy”. Furthermore, the Inspector General noted that “effective use of Medicare and Medicaid data is critical to the success of the Government’s efforts to reduce waste, fraud, and abuse”.

(7) The loss of taxpayer dollars due to waste and fraud under the Medicare and Medicaid programs not only threatens the financial viability of those programs, it erodes the public trust. American taxpayers should not be expected to tolerate rampant waste, fraud, and abuse in publicly funded health care programs.

(8) Congress supports the commitment of the Office of the Inspector General of the Department of Health and Human Services to “enhancing existing data analysis and mining capabilities and employing advanced techniques such as predictive analytics and social network analysis, to counter new and existing fraud schemes”.

(9) Congress supports the use of predictive modeling and other smart technologies that can transform the current “pay and chase”

payment cultures under the Medicare and Medicaid programs and prevent taxpayer dollars from being lost to waste, fraud, and abuse.

Subtitle B—National Infrastructure Bank

SEC. 911. FINDINGS.

Congress finds the following:

(1) According to the American Society of Civil Engineers, the current condition of the infrastructure in the United States earns a grade point average of D, and an estimated \$2,200,000,000,000 investment is needed over the next 5 years to meet adequate conditions.

(2) According to the National Surface Transportation Policy and Revenue Study Commission, \$225,000,000,000 is needed annually from all sources for the next 50 years to upgrade our surface transportation system to a state of good repair and create a more advanced system.

(3) According to the Federal Highway Administration up to \$131,700,000,000 must be invested annually for a 20-year period to improve bridge efficiencies and the physical condition and operational performance of the highway system of the United States.

(4) According to the Federal Transit Administration, up to \$21,800,000,000 must be invested annually for a 20-year period to improve conditions and performance of the major transit systems of the United States.

(5) The Environmental Protection Agency projects that—

(A) \$183,600,000,000 is needed for installation and maintenance of drinking water transmission and distribution systems through 2022; and

(B) \$202,500,000,000 is needed for publicly owned wastewater systems-related infrastructure needs through 2024.

(6) According to the Edison Electric Institute, to maintain current levels of service given expected growth in demand, electric utilities need to invest an annual average of—

(A) \$28,000,000,000 for generation;

(B) \$12,000,000,000 for transmission; and

(C) \$34,000,000,000 for distribution of electricity.

(7) According to the American Council on Renewable Energy, renewable energy could provide up to 635 gigawatts of new electricity generating capacity by 2025—a substantial contribution and potentially more than the Nation's need for new capacity, according to the United States Energy Information Administration.

(8) According to the United States Green Building Council, United States buildings account for 38.9 percent of primary energy use, 38 percent of carbon emissions, and 72 percent of electricity consumption.

(9) There are over 1,200,000 units of public housing nationwide, with an accumulated capital needs backlog of approximately \$18,000,000,000, with an additional \$2,000,000,000 accruing each year.

(10) According to the Organization for Economic Cooperation and Development (OECD), the United States ranks 15th among OECD nations in broadband access per 100 inhabitants.

(11) Although grant programs of the Government must continue to play a central role in financing the transportation, environment, energy, and telecommunications infrastructure needs of the United States, current and foreseeable demands on existing Federal, State, and local funding for infrastructure expansion exceed the resources to support these programs by margins wide enough to prompt serious concerns about the United States' ability to sustain long-term economic development, productivity, and international competitiveness.

(12) The capital markets, including central banks, pension funds, financial institutions, sovereign wealth funds and insurance companies, have a growing interest in infrastructure investment. The establishment of a United States Government-owned institution that would provide this investment opportunity through high quality bond issues that would be used to finance qualifying infrastructure projects would attract needed capital for United States infrastructure development.

Subtitle B—Fighting Fraud and Abuse to Save Taxpayers’ Dollars

SEC. 960. FINDINGS.

Congress makes the following findings:

(1) The Medicare program loses an estimated \$60,000,000,000 annually to wasted and fraudulent payments.

(2) The Medicaid program also suffers from rampant fraud. As the Office of the Inspector General of the Department of Health and Human Services noted in 2009, in an analysis of the only source of nationwide Medicaid claims and beneficiary eligibility information, the Medicaid Statistical Information System, the Federal Government does not have “timely, accurate, or comprehensive information for fraud, waste, and abuse detection” in the Medicaid program.

(3) Absent comprehensive estimates, the Medicaid program’s improper payment rate may be the most objective measure of taxpayer dollars lost to fraud. The national average improper payment rate ranges between 8.7 percent and 10.5 percent, but many States have much higher improper payment rates.

(4) The new Federal health reform law substantially expands the Medicaid program, significantly changes the Medicare program, creates new mandates and regulations, and will send hundreds of billions of dollars to insurance companies.

(5) It is the duty of public officials and public servants in Congress and the Administration to protect the American public’s taxpayer dollars. Congress and the Administration must continue to aggressively combat waste, fraud, and abuse in public health care programs.

(6) The Inspector General of the Department of Health and Human Services has stated that “swift and effective detection of and response to waste, fraud, and abuse remain an essential program integrity strategy”. Furthermore, the Inspector General noted that “effective use of Medicare and Medicaid data is critical to the success of the Government’s efforts to reduce waste, fraud, and abuse”.

(7) The loss of taxpayer dollars due to waste and fraud under the Medicare and Medicaid programs not only threatens the financial viability of those programs, it erodes the public trust. American taxpayers should not be expected to tolerate rampant waste, fraud, and abuse in publicly funded health care programs.

(8) Congress supports the commitment of the Office of the Inspector General of the Department of Health and Human Services to “enhancing existing data analysis and mining capabilities and employing advanced techniques such as predictive analytics and social network analysis, to counter new and existing fraud schemes”.

(9) Congress supports the use of predictive modeling and other smart technologies that can transform the current “pay and chase” payment cultures under the Medicare and Medicaid programs and prevent taxpayer dollars from being lost to waste, fraud, and abuse.
