

Mr. Speaker, I also want to take a moment to recognize the 3,000 active duty and civilian personnel at Indian Head who work and collaborate every day to develop and deploy technologies to improve the safety and effectiveness of the men and women serving in harm's way. Since 1890, this facility has proven to be an Energetics center of excellence for the Department of Defense (Navy) and I thank those men and women in uniform, along with their families and the civilian employees, for their outstanding service to the Indian Head Division and to the United States of America.

Again, I urge my colleagues to join with me in congratulating the members of the Reactive Materials Team at Indian Head on being recognized as the Navy's top scientists and engineers and in honoring all the men and women at the Indian Head Division of the Naval Surface Warfare Center in Maryland for their continued excellence and commitment to our nation's success.

HONORING THE LIFE OF BYRON  
WAITE LEYDECKER

**HON. GEORGE MILLER**

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Friday, June 3, 2011*

Mr. GEORGE MILLER of California. Mr. Speaker, I rise today to remember my friend Byron Leydecker, who passed away on May 12, 2011.

Byron was a good friend, and he was a true champion on behalf of the rivers and fisheries of California. Thanks to Byron's passion and determined advocacy, the Trinity River is today in better shape than at any time since the 1960s.

Byron lived his life with passion. Passion for what he believed and for his friends. He expected a lot of those of us in public service: he would let you know of his gratitude when you met his expectations and his disappointment when we disappointed him. At the end of the day, Byron was fun.

He will be missed by all his friends in California and across the country, and generations of Californians will benefit from his dedication to the Trinity and his tireless belief in the fundamental and lasting value of a healthy river.

I ask unanimous consent to include in the RECORD this San Francisco Chronicle article about Byron Leydecker's life and many accomplishments, and I ask my colleagues to join me in remembering Byron and in expressing our condolences to his children and grandchildren.

[From the San Francisco Chronicle, May 26, 2011]

BYRON LEYDECKER, FORMER MARIN  
SUPERVISOR, DIES

(By Peter Fimrite)

Byron Waite Leydecker, a former bank executive and Marin County supervisor who helped stop development in the Marin Headlands and, for nearly two decades, drove the restoration and protection of his beloved Trinity River, died May 12 in his home in Mill Valley.

Mr. Leydecker, who was 83, had been battling lung and liver cancer.

Mr. Leydecker was born in Oakland on Aug. 28, 1927. He served briefly on the battleship Iowa at the end of World War II before

enrolling in Stanford University, where he graduated in 1950 with a degree in economics. During the Korean War, he served as a public information officer in the U.S. Army in Washington.

He worked briefly as a securities analyst and in 1953 got a job at Chico's Anglo National Bank, which later became Crocker Bank. By the time he left, he had become the bank's youngest-ever vice president. In 1962 he helped found Redwood Bank, where he was chairman of the board and chief executive officer until the bank was sold in 1981.

In 1963, Gov. Edmund G. "Pat" Brown appointed Mr. Leydecker to the Marin County Board of Supervisors. He won re-election in 1964. As a supervisor he fought a proposed development known as Marincello, which would have allowed construction of 20,000 homes in the Marin Headlands.

Never shy about speaking his mind, Mr. Leydecker could be a gruff taskmaster. He may have sometimes lacked diplomacy, but he was amazingly adept at getting what he wanted, said his friends and colleagues.

He started racing cars in the 1970s and, driving a modified Porsche, won the 1977 Northern California championship of the prestigious Sports Car Club of America circuit.

The construction of Trinity Dam and Lewiston Dam in the 1960s and diversions of water as part of the Central Valley Project were sore spots to Mr. Leydecker, who had fished the Trinity in the 1930s when it was nearly pristine.

He decided to take action in 1991, when a channel improvement project by the U.S. Bureau of Reclamation choked the Trinity River with silt. It was so bad that Mr. Leydecker got stuck in the mud on a side channel while he was fly fishing. "He was madder than a wet hen," said his friend Tom Stokely, the water policy analyst for the California Water Impact Network. "He called me up and he must have yelled at me for a half hour. Then he said, 'I've got money. I can hire a lawyer.' It was the beginning of a long and wonderful relationship."

Mr. Leydecker forced the bureau to stop digging along the river and in 1992 founded the nonprofit Friends of the Trinity River. The group fought to establish minimum annual water flows, improve fish habitat and enhance the riparian ecosystem.

"He was an authentic champion for rivers and fish, but especially the Trinity River," said Assemblyman Jared Huffman, D-San Rafael, who chairs the Assembly Water, Parks and Wildlife Committee.

Mr. Leydecker, who always wore a pressed button-down shirt with blue jeans and cowboy boots, fought until the very end for Trinity River improvements and against water diversions in the Sacramento-San Joaquin River Delta.

"He gave so much of his time and effort that it would be remiss as his friend for me not to continue that effort," said Rep. George Miller, D-Martinez, who once spent several days hiking and rafting the river with Mr. Leydecker. "He had a sense of romance about big rivers and what they bring to a society."

He is survived by sons John Leydecker of San Rafael and Mark Leydecker of Aspen, Colo.; daughters Caroline "Lama Palden" Alioto of San Rafael and Criss Troast of Nantucket, Mass.; and eight grandchildren.

A memorial service will be held June 5 at 3 p.m. at Marin Art & Garden Center, 30 Sir Francis Drake Blvd., in Ross. Donations may be sent to the California Water Impact Network, 808 Romero Canyon Road, Santa Barbara, CA 93108.

RECOGNIZING THE 90TH ANNIVERSARY OF THE DISABLED AMERICAN VETERANS—DEPARTMENT OF CALIFORNIA

**HON. JERRY MCNERNEY**

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Friday, June 3, 2011*

Mr. MCNERNEY. Mr. Speaker, I ask my colleagues to join me in recognizing the Disabled American Veterans (DAV)—Department of California on the occasion of its 90th anniversary. Founded in 1921, the DAV—Department of California has worked tirelessly to improve the lives of service-connected disabled veterans and their families.

Service officers from the DAV—Department of California offer critical support to our state's service-connected disabled veterans. The service officers—many of whom are disabled veterans themselves—help veterans apply for disability compensation as well as the pension, health, and education benefits they've earned. They also volunteer their time at Department of Veterans Affairs medical facilities and rehabilitation centers, and they help disabled veterans find jobs and secure scholarships to pay for college.

In the area I represent, the Disabled American Veterans George E. Morey Chapter 59 hosts an annual Memorial Day ceremony in Lodi to honor the men and women who have made the ultimate sacrifice in service to our country. Another local chapter in my district, the Disabled American Veterans Al Jordan Chapter 15, provides food coupons to disabled veterans during the holiday season. This group also focuses on community outreach and awareness by holding an annual picnic in Stockton for disabled veterans and their families, an event which I have attended.

The Disabled American Veterans—Department of California's work is just as important today as when the organization was first established 90 years ago. I ask my colleagues to join me in honoring the Disabled American Veterans—Department of California on the occasion of its 90th anniversary for its exceptional service to our Nation's disabled veterans.

PERSONAL EXPLANATION

**HON. MICHAEL K. SIMPSON**

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

*Friday, June 3, 2011*

Mr. SIMPSON. Mr. Speaker, on Motion to Suspend the Rules and Pass H.R. 1407, the Veterans' Compensation Cost-of-Living-Adjustment Act, I was unable to vote.

Had I been present, I would have voted "yea."

HONORING ALLAN ALFRED VOIGT

**HON. MIKE THOMPSON**

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Friday, June 3, 2011*

Mr. THOMPSON of California. Mr. Speaker, I rise today to honor and pay tribute to Allan

Alfred Voigt, a truly remarkable Renaissance man who passed away May 13, 2011.

Al Voigt was a scientist who held several patents, an artist, a community leader, a loving and devoted husband to his wife, Judith, a caring and inspiring father to his children, Che and Shanta, and doting grandfather to Logan Allan and Katherine Annabelle.

Al founded a series of aerospace engineering firms in Sonoma County that contributed to some of our most important national defense projects. His technical innovations in tactical missile and surveillance systems led to the development and success of the Stinger missile and Predator drone. More than 350 people in Sonoma County have high paying, technical engineering and manufacturing jobs because of these projects.

But Al's passions were much more extensive. He and his wife founded the Voigt Family Sculpture Foundation, which has placed more than two dozen sculptures, either pieces owned by the foundation or on loan by collaborative artists, in publically accessible places in Sonoma County.

He also won furniture design awards with his abstract chairs and his aerodynamic tricycles have set world speed records.

Mr. Speaker, Al Voigt was a prodigious thinker who never rested on his laurels. He was always looking ahead for the next idea. His fundamental skill was analyzing a problem and finding the solution, whether it was in national defense, art, or a functional piece of furniture. It is therefore appropriate that we honor him at this time for his service to our country and to his community.

HONORING THE BROWARD COUNTY  
PUBLIC SCHOOL SYSTEM

**HON. ALLEN B. WEST**

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

*Friday, June 3, 2011*

Mr. WEST. Mr. Speaker, I realize education is essential for every child in our nation. Education is the great equalizer and with a sound education any child can live the American Dream.

As a former teacher in Broward County, Florida, I am proud to congratulate Broward County Public Schools (BCPS) for the 11 high schools in their county receiving top national ranking in the Washington Post.

The Washington Post named 11 Broward County high schools in its High School Challenge list of top 1,900 public high schools in the nation. The schools were Fort Lauderdale (109), Marjory Stoneman Douglas (238), Nova (285), Miramar (355), Cooper City (376), Stranahan (431), J.P. Taravella (507), Flanagan (554), Plantation (739), Coral Springs Charter (983) and Pembroke Pines Charter (1,108) high schools join an elite group of public high schools nationwide. The Washington Post list represents only seven percent of schools across the United States.

Fort Lauderdale High School placed top among Broward high schools, with a national ranking of 109 and a state ranking of 24. According to the Washington Post, the Challenge Index's formula is to divide the number of Advanced Placement (AP), International Baccalaureate (IB) or other college-level tests a school gave in 2010 by the number of graduating seniors.

The Washington Post advises that while the index is not a measure of the overall quality of the school, the rating can reveal the level of a high school's commitment to preparing average students for college. With a few exceptions, public schools that achieved a ratio of at least 1.000, meaning they had as many Advanced Placement and International Baccalaureate tests in 2010 as they had graduates, are noted on the national list.

The Broward County Public School System is the nation's sixth largest public school system and the largest fully accredited district with over 234,600 students in more than 230 schools and education centers. The Broward County Public School System is committed to giving all students access to a college-ready, job-ready curriculum that meets rigorous expectations which prepares students for post-secondary options and also ensures that students are able to be successful and complete post-secondary schooling once they begin.

To ensure student's can succeed in the 21st century, I will always focus in Congress on what's best for students, parents, teachers, and communities. This means helping children achieve their full and unique potential by equipping them with the tools and knowledge to succeed in the 21st century workforce. I believe the Federal Government must restore local control, empower parents, let teachers teach, and protect taxpayers. These principles should guide our efforts to reform federal education policy and protect the rights and responsibilities of states and local communities when it comes to educating the next generation.

---

CONGRATULATING FRANK  
GULLUNI

**HON. JOE COURTNEY**

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

*Friday, June 3, 2011*

Mr. COURTNEY. Mr. Speaker, I rise today to congratulate Mr. Frank Gulluni on being honored with the Tom Ahlers Systems Building Award presented by the National Association of Workforce Development Professionals on May 17, 2011.

For 49 years, Frank has played a key role in the workforce development and educational community, touching the lives of countless students. In his position at Asnuntuck Community College in Enfield, Connecticut, he has been a leading force in preparing and training students for careers in our manufacturing sector. And, using his unique experience on the front lines of education, he has been a driver in our community towards finding unique ways to connect the needs of our manufacturing sector with the skills of our students.

Since 2007, I have been proud to work with Frank in advancing his goals of investing in our nation's manufacturing capabilities, helping those who have lost their jobs re-train for new careers, and lay the ground work for a workforce highly skilled in advanced manufacturing of alternate energy technologies and medical devices.

With his leadership guiding the way, Frank and I worked to successfully secure critical funding to expand Asnuntuck's Manufacturing Technology Center (MTC). Thanks to this initiative, new equipment and training services

were developed to ensure that the MTC continues to keep pace with the emerging needs of his students and the manufacturing skills they need to fill the jobs of today—and tomorrow.

I have been so impressed and excited with Frank's results. Thanks in large part to Frank's efforts, Asnuntuck Community College has secured a 90% job placement rate for its students. When I visited the MTC last November, I heard first-hand from the students that the newly expanded center allow the program to continue to grow and expand to allow more services to students enrolled both at the college and those in local K–12 schools that partner with Asnuntuck. I also heard graduates of the program are found to be earning 40% more than their counterparts in all other industries.

Mr. Speaker, simply put Frank is someone who "gets it." When so many simply lament the decline of American manufacturing and the skills mismatch between the training of current workers and the needs of industry, Frank has taken action. He is a passionate believer in manufacturing and education. He truly understands the unique struggles of our laid off and dislocated workers as they seek to transition to new careers. He has built the kinds of partnerships with industries that has ensured that his students on to rewarding and meaningful careers in furthering our manufacturing sector. And, Frank has been a true leader in underscoring the unique value that our community colleges play in training the workforce of the future that will be the backbone of our nation's economy.

Connecticut, New England, and our nation are no doubt better off thanks to Frank's tireless work. For that, I urge all my colleagues to join me in honoring Frank for winning the Tom Ahlers Systems Building Award.

---

HONORING THE 70TH  
ANNIVERSARY OF ROBINS AFB

**HON. AUSTIN SCOTT**

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

*Friday, June 3, 2011*

Mr. AUSTIN SCOTT of Georgia. Mr. Speaker, please join me in wishing a very happy 70th birthday to the Warner-Robins Air Logistics Center and Robins Air Force Base. This is an appropriate occasion to reflect and celebrate their proud history and heritage.

From the United States' entry into World World II to today's conflicts in Afghanistan, Iraq and Libya, the men and women of Warner-Robins ALC and Robins AFB have been an essential ingredient in our U.S. Air Force's ability to provide airpower for freedom around the globe.

One constant theme these past seventy years has been that the men and women of Team Robins have been most ready when the nation has been least ready. In 1948–1949, Robins' repair and supply personnel played a critical role in the Berlin Airlift. In 1950, workers at the center literally unwrapped and refurbished hundreds of "cocooned" Boeing B–29 Superfortresses. Understaffed and working around the clock, they made sure that United Nations forces in the Far East had the necessary tools to fight the North Korean invaders. And in 1973 during the Yom Kippur War,
