order to highlight the continued Turkish and Azeri aggression toward the Armenian people. This anniversary reminds us yet again of the historical injustices the Armenian people have faced, and the need for strong U.S. engagement in the region to safeguard Armenia against the aggressive tactics of its neighbors.

Mr. Speaker, I ask that my colleagues stand with me in recognizing this tragic moment in history. Through recognizing the atrocities of the past, we can build a more peaceful future.

### IN SUPPORT OF FUNDING FOR PUBLIC LIBRARIES

### HON. SANFORD D. BISHOP, JR. OF GEORGIA

### IN THE HOUSE OF REPRESENTATIVES Friday, February 18, 2011

Mr. BISHOP of Georgia. Mr. Speaker, I rise today to oppose Rep. SCOTT GARRETT's amendment to the FY2011 Continuing Resolution. His proposal to erase funding for the Institute of Museum and Library Services will effectively eliminate all specific federal funding for libraries. Doing so would cut off access to information for millions of Americans.

I believe our government needs to be more fiscally responsible, but as the son a librarian, I know the high cost these cuts will have in the long term. If we are serious about competing in a global economy, we must provide our children with the tools and resources to succeed, and cutting funds for our libraries will only hinder our chance to win the future.

As a nation, we cannot afford to cut ourselves off from such necessary tools for economic recovery as books, periodicals, newspapers, the internet, and the bevy of information our public libraries provide. If funding for public libraries is removed, the Georgia Public Library Service will no longer be able to provide the following:

The statewide network of high-speed Internet data lines providing access to all 400+ libraries in Georgia

The award-winning, nationally-recognized PINES network and statewide library card system, which is used by more than 2.4 million Georgians and provides statewide lending via a shared database of more than 10 million items

A Statewide daily courier service for interlibrary loans to the headquarters of all 61 public library systems in Georgia—nearly 1 million books shared in this way

"Talking book" library services for the blind and other Georgians whose physical abilities require the use of books and magazines in audio format or in Braille—encompassing more than 1 million annual circulations

The GALILEO online databases, which contain essential quality digital resources for students (kindergarten through higher education), teachers, professors and public library users

The statewide Summer Reading Program, which served approximately 450,000 children in 2010—an increase of more than 10 percent from 2009

Shared services that provide necessary OCLC cataloging information and interlibrary loan access to every library in the state

Continuing education programs and training for library staff who work in all types of libraries—public, university, K–12 and specialized and for trustees Consulting services to assist in improving local library operations in technology, governance, services to children, and other areas.

As we bounce back from the recession, it is clear that more Georgians are turning to our public libraries for informational and educational needs. Libraries play a critical role in workforce recovery and economic development throughout our state. These funds allow Georgia's libraries to take advantage of economies of scale that benefit all libraries. The loss of these critical funds would force the elimination of services essential to Georgia residents of all ages—and this, Mr. Speaker, is at a cost we cannot afford!

#### FULL-YEAR CONTINUING APPROPRIATIONS ACT, 2011

### SPEECH OF

# HON. EDDIE BERNICE JOHNSON

### IN THE HOUSE OF REPRESENTATIVES Tuesday, February 15, 2011

The House in Committee of the Whole House on the State of the Union had under consideration the bill (H.R. 1) making appropriations for the Department of Defense and the other departments and agencies of the Government for the fiscal year ending September 30, 2011, and for other purposes:

Ms. EDDIE BERNICE JOHNSON of Texas. Mr. Chair, I've come to the floor today to talk about a crisis our country is facing. I'm not here to talk about the deficit, which is also a problem, but one which pales in importance to the crisis of America's declining economic competitiveness.

I say that the deficit problem pales in comparison to our declining competitiveness because without a robust and innovative economy, it will be next to impossible to ever truly reduce our national deficit.

For some time, important leaders in our business and academic community have warned us about this crisis.

In 2005, a National Academies panel chaired by former Lockheed Martin CEO Norm Augustine released the report, "Rising Above the Gathering Storm."

This report warned that without a focused effort by the Federal Government, the future of American competitiveness was bleak.

It recommended increased efforts in science, technology, engineering, and mathematics education, also referred to as STEM education, and increased federal investment in research and development.

It's not a mystery why that distinguished group made those recommendations: it has long been clear that technological innovation creates jobs, and that Federal investments in R&D have had a major positive impact on innovation in this country.

Our economic rivals understand all too well that America's great economic success has been a direct result of our innovation. And these competitors have begun to pour their resources into research and development and into STEM education.

Those investments are bearing fruit:

In 2004 China overtook the United States to become the world's leading exporter of information and communications technology goods.

China, Japan, India, and South Korea all graduate more engineers each year than the United States.

U.S. student scores in STEM achievement continue to decline in worldwide comparisons.

So what do we do about it? Once the problem was identified, the Democratically-controlled Congress immediately focused on coming up with solutions.

Over the past four years, we passed bills like the America COMPETES Act, which put NSF, NIST, and the Department of Energy's Office of Science on a doubling path.

We've been changing the way America's children are taught science and math by putting in classrooms teachers who actually have a background and training in those fields, and we've been working to increase opportunities for minorities to contribute their talents to our scientific and technological initiatives.

And we've been investing in clean energy technology development so that America can one day be an energy exporter instead of an energy importer.

Unfortunately, all that work, and all that progress in keeping America competitive is about to be undone. My Republican colleagues have proposed a budget for the rest of 2011 which will severely wound our country's research and development capabilities, and stifle our innovation engine.

Let me cite just a few of the consequences that would flow from enactment of this ill-considered CR:

At the Department of Energy:

Cuts to the Department of Energy will slow down the progress the country has made in demonstrating and deploying carbon capture and sequestration technologies, solar energy and cost-saving energy efficiency technologies.

The cuts in the CR will force a number of world-class labs, which undertake research on cutting edge energy technologies to solve economic and environmental problems, to shut down.

Thousands of scientific and technical staff at the national labs, universities and companies will be laid off, or worse, go to our competitors for support.

This could lead to the United States being even more dependent on other countries for clean energy technologies.

STEM education programs will be cut or eliminated at a time when China is graduating six engineers for every one of ours. We need to capitalize on the interests of our students who are ready and willing to solve our country's energy and environment problems.

At the EPA:

A reduction on the order of \$3 billion to EPA's science programs will negatively impact our ability to find new and innovative solutions to 21st century environmental and public health challenges.

The proposed water research reductions will impact EPA's ability to ensure the Nation's water infrastructure is capable of the sustained delivery of safe water as well as the safe and sustainable removal and treatment of waste water.

At NOAA:

NOAA's weather satellite programs are already in trouble during this difficult economic time.

Without proper additional funding of our satellite programs, we will be faced with less accurate and timely weather predictions. We are not just talking about taking our country back to 2008. We are talking about rewinding the clock two decades. We could soon be relying on 20 year ago weather forecasting capabilities.

I think we are all very well aware that over 70 percent of airplane flight delays are caused by weather. If FAA doesn't have the weather information it needs to safely and efficiently control the nation's air traffic, we face both increased delays and risks to the flying public.

We are potentially putting our lives, property, and critical infrastructure in danger. Without accurate and timely information, we would no longer see the 2–3 day advance warnings of extreme weather events on which we depend.

This will also make it extremely difficult to conduct safe and strategic evacuations of American people during extreme weather events, which have been faced by many regions of our country in recent years.

I could go on and on and cite some of the adverse consequences to each of our agencies and to vital governmental activities that will occur if this CR is adopted, but I think Members now have an idea of what is at stake.

And make no mistake, this is job-killing CR. What makes this bill so dangerous is that it won't just kill jobs today. It won't just kill jobs this year. These cuts to our research and development funding will kill jobs for years to come.

As President Obama noted in his State of the Union address, if an airplane is overloaded, you don't lighten the load by cutting off the engines.

That's exactly what this Republican budget plan does: it cuts the engine off of our economy.

Únfortunately, our children and our grandchildren will be the ones who ultimately pay the price for these efforts when they inherit an America that is no longer the world leader in innovation.

I urge my colleagues to reject the cuts being proposed in the Republican CR. We can do better.

PERSONAL EXPLANATION

# HON. BLAKE FARENTHOLD

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Friday, February 18, 2011

Mr. FARENTHOLD. Mr. Speaker, on rollcall No. 88, I missed the vote due to a previously scheduled satellite interview in my district. Had I been present, I would have voted "no."

OPPOSITION TO MCCLINTOCK AMENDMENT #287, TO ELIMINATE FUNDING TO INTER AMERICAN FOUNDATION (IAF)

## HON. DONALD M. PAYNE

OF NEW JERSEY IN THE HOUSE OF REPRESENTATIVES

Friday, February 18, 2011

Mr. PAYNE. Mr. Speaker, I rise to express my strong opposition to amendment #287, introduced by our colleague Rep. MCCLINTOCK of California. Amendment #287 would eliminate all funding for the Inter American Foundation in the proposed FY2011 Continuing Resolution. This devastating cut would have severe immediate and long term impacts on the most vulnerable communities who share the same hemisphere as the United States.

The United States has a vested interest in assuring that the poorest communities have the resources to organize, develop, and advance. The IAF works to promote economic opportunity, reduce poverty and foster civic and social inclusion in Latin America and the Caribbean, consistent with U.S. foreign policy and national security interests.

Without such proactive measures in international economic opportunity and development, the United States would cripple its own internal interest in the areas of drug trafficking, immigration, and maintaining its role as a promoter of democracy globally. There are many adverse consequences if programs like IAF ceases to exist. Studies show that farmers and agricultural workers of poverty-stricken communities migrate far from their families to make a living, and in many Latin American countries, like Colombia, this often means driving small farmers into illicit coca cultivation. Cutting IAF funds will aid in forcing men and women into the dangerous, yet lucrative work of narcotics production just to provide basic needs for their families.

There is a myth that foreign assistance using public funds is ineffective and inefficient. That is farther from the truth. IAF is a conduit to creating future allies; future business partners, and future collaborators. Investing in self-help solutions which enable the poor to help themselves ultimately creates an intimate bond between nations. As our world becomes more competitive in everything from education to science to defense, we must not cut ourselves off from future relationships by cutting developing countries off from aid today.

One of the many countries that would be affected by this cut is Haiti. Haiti is a nation that suffered one of the greatest devastations in history, with a 7.4 magnitude earthquake that killed over 200,000 people, affected over 2 million Haitians, and destroyed their capitol, Port au Prince. While much aid has gone towards immediate disaster relief, the United States seeks to gain enormously by supporting sustainable solutions that IAF currently helps fund.

IAF provides grants for the Haitian Partners for Christian Development—an organization that continues its services as a business incubator, which includes reaching women entrepreneurs and supporting them with business endeavors. Such seed money literally produces economic leaders which are necessary to shape the Haiti of tomorrow.

Through a single grant, IAF also has a project which provides farmers displaced by the 2010 earthquake with agricultural training and technical assistance, as well as give education scholarships to 100 displaced children, and distributes food to another 150 quake victims.

With all the tremors the people of Haiti still are enduring, IAF is essential to ensuring these survivors do not experience a social aftershock due to cutting funding that ultimately has long-term benefits for both Haiti and the United States.

Being the leaders in international economic empowerment today is a wise investment for tomorrow.

I urge you to join me in opposing this amendment.

OPPOSITION TO H.R. 1 GARRETT AMENDMENT 34

### HON. RUSH D. HOLT

OF NEW JERSEY IN THE HOUSE OF REPRESENTATIVES

Friday, February 18, 2011

Mr. HOLT. Mr. Speaker, I rise today in opposition to the amendments offered by Representative GARRETT to eliminate funding for the National Endowment for the Arts and the National Endowment for the Humanities, as well as the amendments by Representatives WALBERG and CANSECO to decrease such funding.

As a member of the Congressional Arts Caucus, I believe that the arts play a crucial role in our society, enhancing our creativity, promoting critical aspects of education, and providing Americans with the opportunity to view works of beauty and personal expression. Furthermore, the arts inspire our children to explore their own creativity and encourage positive development in the course of their educational careers. The arts are a fundamental component of our society and warrant federal funding.

As noted by Americans for the Arts in its report Arts and Economic Prosperity III, across the county "nonprofit arts and culture industry generates \$166.2 billion in economic activity every year." The report also details that the arts support 5.7 million jobs and generate \$29.6 billion in government revenue. In my district in New Jersey alone, as of January 2010, there were 1,841 arts-related businesses employing almost 10,000 people. So not only are the arts good for our cultural development as a society, they are good for our economic development as well.

I have heard from hundreds of my constituents on this matter, and nearly every one has pleaded with me to preserve as much funding as possible for the arts. As one of them said, poignantly, "a nation without culture is a nation without a soul."

I strongly oppose any cuts to the National Endowment for the Arts and the National Endowment for the Humanities, and I urge my colleagues to oppose the amendments offered by Representatives GARRETT, WALBERG and CANSECO on this subject.

FULL-YEAR CONTINUING APPROPRIATIONS ACT, 2011

SPEECH OF HON. CYNTHIA M. LUMMIS

OF WYOMING IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 15, 2011

The House in Committee of the Whole House on the State of the Union had under consideration the bill (H.R. 1) making appropriations for the Department of Defense and the other departments and agencies of the Government for the fiscal year ending September 30,2011, and for other purposes:

Mrs. LUMMIS. Mr. Chair, I along with Representative GWEN MOORE from Wisconsin, submit the following statement on H.R. 1, the Full-Year Continuing Appropriations Act for 2011.

As Co-Chairs of the bipartisan Women's Caucus, the Special Supplemental Food Program for Women, Infants, and Children (WIC)
