

to talk about big numbers. I was blessed in my previous life; I lived in a world of big numbers. But how do you visualize \$1 trillion? How do you visualize \$1 billion? How do you visualize \$1 million for many people? So we have been playing with the idea of, Let's make it time.

So your government right now is borrowing about \$4.7 billion every single day, every single day. So let's just think about it, \$4.7 billion every single day. Those taxes on Big Oil—let's make it this. Let's make it taxes on all. Let's just remove those depletion allowances, those tax credits, which are also tied to depreciation that all other businesses get. But let's just wipe them all out. Guess what it buys you? It buys you about 2.2 minutes of borrowing a day.

Now, how many of you feel like you have been told that?

You know, once again, we are engaging often around this place in political theater instead of math. That's been one of my greatest frustrations in my short time here: I wish I saw more Members carrying around their financial calculators so they could look the American people in the eye and tell them the truth.

But think about that. The whole, we will call it, fossil fuels subsidies, tax credits, depreciation allowances, incentives to drill would buy you about 2.2 minutes a day. Oh, come on. And that's just assuming that every dollar came in, and you didn't slow the economy down and didn't slow energy drilling down or energy production down. So this is just throwing your hands up and saying, let's just pretend for a moment that we got rid of those, and it becomes pure income.

Let's actually go to the next level, because there's always that other person that raises their hands and says, "Well, DAVID, I have heard that if we would go out and we would tax the rich more." Remember, that lame duck Congress last December extended what a lot of folks call the Bush tax cuts. Now, around here we often call them the Bush-Obama tax cuts because President Obama is the one who signed them in December. But they extended those tax cuts. And weren't those tax cuts for the rich, and wouldn't that balance the budget?

Well, back to that small problem called math. Let's pretend for a moment that they hadn't happened, and let's pretend that it didn't slow down the economy, and let's pretend every dime that some folks have predicted came in. A lot of this place operates in a fantasy world. Why can't we? So we never had the tax extensions that happened in December. What would it buy you? Well, we once again borrow \$4.7 billion every single day. It would buy you about 28 minutes. Think of that, 28 minutes.

So now I'm at my town hall. I've had two hands go up. The first one saying, "Well, DAVID, if we would tax Big Oil, then that would balance the budget."

Well, what did we learn on the last slide? That was about 2.2 minutes of borrowing every day.

And then the other hand goes up saying, "If we would tax the rich more." As a matter of fact, why don't we do in this slide that tax extenders never happened, so everyone, rich, poor, middle class didn't get the benefit of that extension of the tax cuts last December? Well, guess what. That buys you 28 minutes.

So think about it. We are doing really well here. We are up to 28 minutes plus 2.2 minutes. So now, let's see, what if we do this, because there's always the other hand that goes up and says, "DAVID, I bet you we could balance the budget and wouldn't have this debt and deficit if we did this: We tax Big Oil. And those Bush-Obama tax extenders that happened last December in the lame duck session, we never had that, because those help the rich. Oh, and by the way, if we had never had the wars, you know, if we didn't have Afghanistan, if we didn't have Iraq—and I believe actually in our number here it didn't even have Libya—we could balance the budget then. Couldn't we?"

So we actually, literally a couple hours ago, sat down and said, Let's add it up, and let's make it on a per hour basis so the American people can understand the crazy spending that's going on around this place and how fast the numbers are eroding on us.

Back again to our math: We borrow \$4.7 billion every single day. And let's go back to our pretend world. Every dime of those oil subsidies and depreciation allowances and tax credits come in, and it doesn't actually slow down jobs or the economy and every dime of those taxes were to come in. Even though probably if you did that, you would slow down the economy and people would work less and you would have less dollars. But we are living in our fantasy world here. And because we didn't have the wars, none of that money would be going out the door, even though certain portions of that are actually already built into the defense budget. But every dime that is equated to Iraq, Afghanistan, and now Libya.

What would it buy us? Well, we are borrowing that \$4.7 billion a day. Guess what? It buys you 3 hours of borrowing.

Think about what you have heard around here, and how many people you have seen walk up in front of a microphone and a camera look you in the eye and say, "Well, if we did these things, we wouldn't have this debt?" They are not telling you the truth. All those together are only 3 hours of borrowing.

And, let's see. If I remember correctly, there's like, what, 24 hours in a day? I'm looking for some honest discussion about the other 21 hours a day. You've got to go back to those first boards that I put up and have an honest discussion about entitlements, about the mandatory spending, because they are what are exploding on us.

They are what are consuming us as a people.

We can do this. We can save the future for our kids and our grandkids. We can make sure that these programs exist. But we have to do it rationally, and we have to for once do it honestly, fact-based, maybe someone actually holding a calculator. Because the rhetoric around here, the political folklore around here, when they are willing to look you in the eyes and base their whole world on something that only buys you 3 hours of borrowing a day, you are not being told the truth.

We try to add literally two to four slides a week. We are engaging in a little project. We are a freshman office, but we have some very smart young people who are very good with their calculators, and we are trying very hard to find a way to make these gigantic numbers digestible so we can all understand them so we can have a rational conversation of how we save our country.

If you will go to Schweikert.house.gov, you are going to find a number of these slides. As a matter of fact, all of them are on there, and every week, I promise you, there are going to be more coming. And maybe if we all start to tell each other the truth about the math, we can actually tell the truth about how we are going to save the country.

With that, I yield back the balance of my time.

#### LEAVE OF ABSENCE
