

Do you think the time might come when China says, hey, we have 1.3 billion people, and these 900 million people who are in rural areas through the miracle of communications know the value of an industrialized society and they say, gee, how about us? I think China sees their empire unraveling the way the Soviet empire saw their empire unravel if they can't meet the needs of these people. China is buying oil reserves and building a big blue water Navy because the day will come they will tell us, gee, I'm sorry, but it is our oil. We have 1.3 billion people, and we can't share the oil.

I led a codel to China a little over 4 years ago, and I was stunned. This wasn't just the people concerned about energy in China; it was everybody we met. They talked about post-oil. There will, of course, be a post-oil world. It will be a long while from now. Hyman Rickover had no idea how long this age of oil would last. He was 100 years into what we call this golden age. We now know pretty much how long the age of oil will last. We are about halfway through it. We are 150 years in it. And he was right, in the 8,000-year recorded history of man, Hyman Rickover said the age of oil would be but a blip. It will be about 300 years long. We are about 150 years in it. From now on, the next 150 years, there will be less and less. It will be harder and harder to get, more and more expensive.

This is the five-point plan. Conservation. My wife says that she thinks that conservatives ought to be interested in conservation—they don't seem to be—because they come from a common root. Conservatives aren't interested in conservation. That is the only thing we can do to buy some time, to free up some energy so we can invest in developing alternatives.

The second and third are domestic sources of energy and diversify as much as you can.

The fourth one may surprise you: environmental impact. Be kind to the environment. They know that they are not. But as I mentioned, they have these 900 million people that are clamoring for the benefits of an industrialized society, so they are building a coal-fired power plant every week, and they are starting the construction of 100 nuclear power plants.

And the fifth bullet here: international cooperation. They know that there is no way that any one nation can face this problem alone, that we need international cooperation. But while they plead for international cooperation, they are planning for the eventuality that we won't have international cooperation because they are buying up oil reserves all over the world. And they are not just oil reserves; they are buying goodwill. What do you need, a soccer stadium? roads? a hospital? Wherever they buy oil reserves, they are buying goodwill. And remember, they are simultaneously building this huge blue water navy.

What now? Our next and last chart for this evening, What America Needs.

We are the most creative, innovative society in the world. If we understand the problem, there is nothing that we can't do. Our people just need to understand the problem. We need to have leadership that understands the problem. I tell audiences that the innocence and ignorance on matters of energy in our general population is astounding; and, sadly, we have truly representative government.

Well, what do we do? We need the total commitment of World War II. I lived through that war. I was born in 1926. I know the total commitment we had during that war. There has been nothing like it since. We need the technology and intensity and focus of the Apollo program to land a man on the moon. That cost \$275 billion in 2006 dollars, which is when oil peaked. And we need to have the urgency of the Manhattan Project. Minus that, we are going to face the kind of disruptions that were forecasted by the Hirsch Commission, the big SAIC report.

The world has never faced a problem like this. I like challenges. They excite me. And this is a huge challenge. It is an exhilarating challenge, but I know with proper information, with proper knowledge, with proper leadership, the United States is up to the task.

By the way, developing this green technology will again make us an exporting country. People brag about we have this nice, clean, service-based economy. If you think about that, no matter how much you charge for cutting each other's hair and taking in each other's laundry, that is not going to be a viable economy. Only three things produce wealth, and manufacturing is a major one of those. That is now all moving offshore.

We can again become a major manufacturing country by focusing on this green technology and by developing the alternatives that we must develop if we're going to continue to maintain our quality of life.

I look forward to a very challenging future.

Mr. Speaker, I yield back the balance of my time.

#### REPORT ON RESOLUTION PROVIDING FOR FURTHER CONSIDERATION OF H.R. 1540, NATIONAL DEFENSE AUTHORIZATION ACT FOR FISCAL YEAR 2012

Ms. FOXX (during the Special Order of Mr. BARTLETT) from the Committee on Rules, submitted a privileged report (Rept. No. 112-88) on the resolution (H.
