

lives and raise taxes on people who pay taxes. This plan is an attack on freedom. More government spending and control is the problem, not the solution. As Senator RUBIO has said, instead of raising taxes, we should have more taxpayers. More new taxpayers under the concept of developing more businesses, more jobs also yield more taxpayers. This will create revenue.

The White House has operated under crisis management. The doctrine of Obamaism with its expansion of the government has made America worse. It is time for new hope, new change, and a new American day.

And that's just the way it is.

CHRONIC UNEMPLOYMENT IS BIGGEST AMERICAN PROBLEM

The SPEAKER pro tempore. The Chair recognizes the gentleman from Oregon (Mr. DEFAZIO) for 5 minutes.

Mr. DEFAZIO. Madam Speaker, we are in the 10th year of the Bush tax cuts and the third year of the Obama tax cuts. Taxes today are at the lowest percentage of our national economy since 1950; and, of course, that preexists a few things like Medicare, homeland security, massive spending on wars overseas, et cetera.

Yet last Friday, with this very, very light tax burden, we had the official unemployment numbers. They were horrible. But guess what. The reality is worse than the numbers. There are about 20 million people, not 16 million people, unemployed, looking for work, or underemployed. So I guess all we need to do is cut taxes more and cut spending and we will have an economic boom. Yes, we will have a boom, like the boom of an imploding economy. Just like the last 10 years, the worst job creation since the Great Depression under this theory that tax cuts solve every problem.

Now the President's response on Friday was, not surprisingly, continue tax cuts. The new one he has adopted is the Social Security tax holiday. But don't worry, we will make Social Security whole. If we cut their income, we've got to make the trust fund whole. We'll borrow \$110 billion from China. We'll put it into the Social Security trust fund and everybody will get \$15 or \$20 a week, and that'll solve the problems of this economy. Of course, it doesn't do much for the people who aren't working, and it's not going to create jobs. That's his big solution.

Number two solution: more job-killing free trade agreements. Oh, that's great.

Patent reform. Yeah, maybe some day.

And then at the very end, oh, we should have a little bitty infrastructure bank. Okay. Great.

Now, the Republicans on Thursday, they preceded all this and one-upped him. They proposed that the United States of America, with crumbling highways, falling-down bridges, and obsolete transit systems, cut investment

in infrastructure by 35 percent. So the construction industry that has today 16 percent unemployment, under the Republican plan, 25 percent unemployment. That's great. That's going to work, too. Oh, yes, and more tax cuts.

You know, we lack the will around here to address our Nation's greatest problems, not the means. Chronic unemployment is the greatest problem in this country. If we solve chronic unemployment, a quarter of the deficit goes away because those people aren't collecting unemployment benefits, food stamps and other things they need just to survive, and they are working and paying taxes.

Now, how about canceling some of these stupid tax cuts, particularly the Social Security tax holiday? Let's not borrow \$110 billion from China for people to dribble away in \$20-a-week payments. Let's take that \$110 billion and build things in America with American workers and buy American requirements.

□ 1010

We could put 4 million or 5 million people to work. Let's cancel the tax cuts for people earning over \$200,000 a year—the job creators—who are pretty undertaxed right now and who have record savings and wealth. If they contributed a little bit, that would be about another 1 million jobs if we put that \$23 billion a year into investments in infrastructure. These aren't just construction jobs. They're engineering jobs; they're manufacturing jobs; they're small business suppliers. We need an investment-driven recovery. For too long, we've been trying under both Bush and under Obama to have a borrowed money, consumption-driven recovery.

Ain't going to work. Not good long term.

Instead of indebting our kids and giving them nothing but current consumption, let's have something that's investment-driven that will provide benefits for generations to come with a 21st century infrastructure for this country.

H.R. 1861: INFRASTRUCTURE JOBS AND ENERGY INDEPENDENCE ACT

The SPEAKER pro tempore. The Chair recognizes the gentleman from Pennsylvania (Mr. MURPHY) for 5 minutes.

Mr. MURPHY of Pennsylvania. Madam Speaker, while deliberations continue on dealing with our \$14.3 trillion debt and while deliberations continue on raising the debt ceiling, Americans are very concerned about where we're going.

June unemployment at 9.2 percent and a growth of only 18,000 jobs translates into a meager 360 jobs per State. Now, when you look at how many high school students graduated in June, that's 3.7 million. Colleges graduated 1.7 million. Those 360 jobs barely equal the size of a typical large American

high school graduating class, and certainly barely covers students at one typical college per State with a typical major. No wonder Americans are worried about our economy when so many youth are entering the job market only to find there are no jobs.

So while our leaders on both sides of the aisle are deliberating—and, unfortunately, too much of this immediately becomes a battle of words—let's keep in mind that one way to balance America's budget, one very important way to deal with America's debt, is to grow jobs. For each 1 percent decline in unemployment, it's \$90 billion per year in Federal revenue. That's a decrease in unemployment compensation. That's an increase in Federal revenues. That's 1.5 million jobs for every 1 percent decline in unemployment.

Let me quote our colleague from across the building here, Senator RUBIO, who said: This is not about increasing taxes; it's about increasing taxpayers. And this could do it.

Now, the cost per job in the failed stimulus bill was at least \$278,000 based upon \$660 billion spent. Of course, that number per job increases dramatically and rapidly if you include the interest paid on that stimulus bill, which takes us over the \$1 trillion mark. That sort of approach is not going to work, and if we open our eyes, we can all honestly admit that. Increasing unemployment is not going to decrease the Federal debt or deficit. We have to grow our way out of this.

Now, a bill that I've introduced and that several colleagues in a bipartisan way have signed onto as cosponsors—and I ask my colleagues to join on as cosponsors—is H.R. 1861. This bill would allow us to say, instead of sending \$129 billion a year to OPEC for foreign aid, to buy their oil, we drill for and we use our own. It would yield somewhere between \$2.2 trillion and \$3.7 trillion over a 30-year period in Federal revenues, not from raising taxes, but from using the standard royalties and lease agreements that come from this. It starts out as a crawl and increases to a walk and then into a run as this money comes through.

What we do in this bill is about growth in America. It isn't just talking about it. It's putting our money where our jobs are because it leads to 1.2 million jobs annually based upon estimates of the American Energy Alliance. That's jobs making steel, making steel pipes, wire, software, technology. It's jobs for the roughnecks. It's the steelworkers, the electricians and the laborers who work on these rigs. It's jobs for those who take this oil and convert it into gasoline, and it's jobs for those who have to put together all the infrastructure to make that happen.

Beyond that, what we do is we dedicate these funds into the infrastructure which America needs. According to the American Society for Civil Engineers, we need over \$2 trillion to deal with our current infrastructure needs. Many

States find that 25 percent of their roads and bridges are structurally deficient, which is unsafe; but for every \$1 billion we spend on our infrastructure, it yields 38,000 jobs. Those jobs are for operating engineers and laborers and carpenters or electricians and engineers and for those who make concrete and steel and all the things that go with what we need for our roads, our highways, our bridges, our locks, our dams, our water and sewer systems.

Let's grow our way back to prosperity. Let's stop saying we're going to send money to OPEC and watch them grow. Let's stop just pointing fingers and blaming and complaining about China. We have the tools here in America to make this happen. So, while our leaders are over at the White House, arguing about how to take care of the debt, let's not forget that, overall, Americans are saying that one way to grow out of this debt is to grow more jobs, to grow more taxpayers, not just to find ways of taxing them. We can do this.

Again, I ask my colleagues to join me in supporting H.R. 1861, where we can do this. Let's not talk about jobs, and let's not complain about it. Americans know when the wool is being pulled over their eyes, and Americans know when they're working. Let's truly help them out and get jobs back on the table.

FIGHTING FOR PEACE EVERY DAY

The SPEAKER pro tempore. The Chair recognizes the gentlewoman from California (Ms. WOOLSEY) for 5 minutes.

Ms. WOOLSEY. Madam Speaker, in April of the year 2004, my staff came to me with a memo, asking if I wanted to give a Special Order speech on some issue of which I can't remember the subject. My answer at that time was, no, I didn't want to speak on that issue, but I did want to deliver a 5-minute speech that day and every day thereafter, when it was possible, to express my opposition to the wars in Iraq and Afghanistan and to express my belief that there is a smarter way to achieve our national security goals.

So, Madam Speaker, since that day, I've stood here in this spot to say over and over again that these wars are eroding our spiritual core, bankrupting us morally and fiscally, teaching our children that warfare is the new normal. I have delivered these speeches as a member of the majority and the minority, when the President was a member of my party and when he was not, and today, I am doing it for the 400th time.

When I began, the war in Iraq was still quite popular, as was the President who launched it, but we spoke out anyway, refusing to bend on principle because we knew that we did not belong there. My colleagues Representative BARBARA LEE and Representative MAXINE WATERS and I called ourselves the "Triad." We started the Out of Iraq

Caucus, and we forced the first House vote to bring our troops home. Along the way, I visited Iraq, and my opinion was confirmed against that very war, but at the same time, it increased my admiration for our troops. Gradually, the tide of public opinion turned. President Bush lost the confidence of the American people, and eventually had to start winding down the war. I don't believe that would have happened unless a few lonely voices had dared to be heard in those early, early days.

I am proud of what we have accomplished, but I am also very frustrated because nearly a decade after the first American boots hit the ground in Afghanistan, here we are—still at war, still occupying sovereign countries on missions that aren't making us safer or advancing our interests. The cost has been devastating. Over 6,100 Americans are dead, and thousands more civilians have died for the cause of their so-called "liberation." Thousands of U.S. servicemembers have come home but may never be the same, either because of physical wounds or mental health trauma, which can, with the physical and the mental health, destroy lives just as well.

In addition to the staggering \$3.2 trillion price tag that has piled up over the last 10 years, I don't think we've even begun to come to grips with the resources that the VA will need for the next 50 or so years to meet the responsibility we have to our veterans as a result of these wars.

Madam Speaker, I've said it over and over again that I'm not suggesting we abandon the people of Afghanistan and Iraq. Anti-war doesn't mean anti-engagement or anti-security. The underlying principle behind my 400 speeches has been that we need a completely different approach to protecting America—one that emphasizes diplomacy, reconciliation and peaceful conflict resolution.

□ 1020

From the beginning, I have been pushing my own solution called SMART Security, fighting terrorism with better intelligence, with a stronger nuclear nonproliferation program, with humanitarian and economic aid that will give hope to people around the world, with less spending on weapon systems and more on homeland security, human rights monitoring, and energy independence.

Most importantly, SMART Security insists that war is an absolute last resort because, Madam Speaker, for the sake of the future of the human race, we must and we can figure out a way to resolve our differences without resorting to war and violence. I will continue to do this for the remaining 1½ years that I will be in Congress, giving as many of these speeches as I can. And Madam Speaker, I will not rest until we finally bring our troops home and we adopt the SMART Security approach to preventing war and preserving peace so that my grandchildren

and your grandchildren and their grandchildren will have a peaceful, productive world to live in in the future.

LET'S GET SERIOUS ABOUT THE DEBT CRISIS

The SPEAKER pro tempore. The Chair recognizes the gentleman from Louisiana (Mr. LANDRY) for 5 minutes.

Mr. LANDRY. Madam Speaker, let me help this body interpret how the American people see this debt crisis. Now some of you may question how I can, with this accent, provide an interpretation. Well, let me show you.

Americans have a keen understanding of how credit cards work. They know that each card holds a limit on it, and this limit is the borrowing limit on that particular card. And it is a fact that when one reaches the limit on his or her card, that they are unable to borrow more money or charge more at that time.

Now it is not factual to say, however, that when one maxes out his credit card, that he is in default personally, or in layman's terms, that he is bankrupt. No. When one reaches his limit, you simply cannot use the card anymore. If you want to continue to use the card, you need to pay down on the principal amount that is owed.

If and when you reach this unfortunate circumstance, you and your family are required to live within your means. As long as you can continue to pay the interest on the card and the bills that you have accrued, then you are not in jeopardy of defaulting. Of course you can only do this if you're employed and you have income, unlike the approximately 9.2 percent of Americans out there who are looking for us to do everything we can to help create private sector jobs.

So this is where we are. Look, I don't believe if we fail to raise the debt ceiling that we will default. What I do believe is not raising the debt ceiling will finally require Congress to make the tough decisions necessary to restore fiscal sanity to our Federal Government. It will force Congress to understand that at this time we need to live within our means. Why? Because going back to our layman's term, if the Federal Government was a person, that person is not unemployed, they still have a job, unlike the approximately 9.2 percent of Americans I spoke earlier about. So if we still have a job, that means we're still getting a paycheck. That paycheck is currently sufficient to pay our bills.

After 2 years, where the President and previous Congresses spent like they were going out of style, the President is starting to understand that we have spent too much. What he hasn't realized yet—and I hope he does—is that we don't have a revenue problem here; we have a spending problem.

Now, I know that we would like to spend more on things we like. That is human nature. But the reason so many of us are opposed to increasing taxes is
