

borne improvised explosive device into our compound wall injuring 13 U.S. soldiers. I ran to those who were calling for help and found the Sergeant I had been speaking with moments before; he was severely injured and later died. My partner and I ran back-and-forth across the compound under heavy gunfire to get medical bags and stretchers, and to give combat aid. More than a dozen Taliban tried to breach our compound throughout the attack but the team held them back. The rush of emotions throughout was unbelievable—the highest of highs and lowest of lows. The carnage of war is horrendous. The valor of warriors is inspiring. We should all be grateful to the members of our military who defend our enduring freedom and I am honored to support them in their mission.

I thank Mr. Boyd and his family for their honorable contributions toward the goals of our great Nation. I wish him and his family only the best in their future endeavors.●

#### STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Ms. MURKOWSKI (for herself and Mr. BEGICH):

S. 313. A bill to authorize the Secretary of the Interior to issue permits for a microhydro project in nonwilderness areas within the boundaries of Denali National Park and Preserve, to acquire land for Denali National Park and Preserve from Doyon Tourism, Inc., and for other purposes; to the Committee on Energy and Natural Resources.

Ms. MURKOWSKI. Mr. President, I rise today to reintroduce legislation, cosponsored by my colleague MARK BEGICH from Alaska, that represents an important step in the conversion to renewable energy sources in rural Alaska.

Today I introduce the Kantishna Hills Renewable Energy Act of 2011.

The Kantishna Roadhouse, owned by Doyon Tourism, Inc., is located 100 miles inside Denali National Park and Preserve. The settlement of Kantishna was founded in 1905 as a mining camp near the juncture of Eureka and Moose Creeks. Gold in the region brought a flurry of prospectors in the early days, but as the gold began to run out, so did interest in mining the Kantishna Hills. The original roadhouse at Kantishna was built in the early 1900s, serving as a private residence, a community center, post office, and informal hotel accommodations for those who visited Kantishna in Denali Park.

The Roadhouse, like many structures within Denali National Park, is entirely off the grid and generates all of its electricity needs with a diesel generator. As a result, all guests and supplies, including diesel, are trucked through the Park to the Roadhouse over National Park roads. The construction of the micro hydro project would allow the Roadhouse to cut down their diesel usage by approximately 50%, which would result in a decrease in diesel truck traffic on the Park Road, improved local air quality, and less sound pollution in this remote area, as well as reduce disturbance and vehicle impacts on park wildlife, allowing for an enhanced visitor experience for tourists within the National Park.
