

East. Because I am co-chair of two Israel caucuses, she has coordinated various briefings and meetings on my behalf.

Kristine graduated from Grove City College in December, 2007 with a Bachelor of Arts in History and certification in Secondary Education Social Science.

She is the daughter of Richard and Berit Michalson of Ramsey, New Jersey, and is sister to Jacob and Andrew. She has worked hard for the people of Colorado. Her conservative and Christian values are needed today more than ever. So while I will miss her and her contribution greatly, I know that she will provide great service to our country in the future. I truly believe God will bless her in her future endeavors.

#### THE KEEP AMERICA SECURE ACT

### HON. LOUISE McINTOSH SLAUGHTER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Thursday, August 2, 2012*

Ms. SLAUGHTER. Mr. Speaker, I rise today to take a bold step to keep America secure and rebuild our domestic electronics sector. Today I am introducing the "Keep America Secure Act," legislation that directs the Department of Defense (DoD) and the Department of Homeland Security (DHS) to only purchase electronic components that are manufactured in the United States. These electronic components—including computer chips, communications devices, and guidance systems—are used in crucial defense and homeland security equipment. This bill is the perfect complement to our ongoing efforts to enhance "Buy American" requirements and to ensure that all DoD and DHS equipment be Made-In-America.

If we are to maintain the most advanced military force, with the most advanced weaponry, we must have a dedicated stream of domestically produced parts. Regrettably, today this simply is not happening. Our armed forces dependence on foreign parts has major security ramifications. From missiles to computers, much of our crucial defense and homeland security equipment relies on sophisticated electronic components to function. We must act now to eliminate our reliance on foreign electronic components in our defense systems.

In May 2012 the Senate Armed Services Committee concluded a yearlong investigation that found a substantial increase in the number of counterfeit electronic parts used in the production of sensitive military equipment. The Committee noted, "Our report outlines how this flood of counterfeit parts, overwhelmingly from China, threatens national security, the safety of our troops and American jobs."

Furthermore, the SASC report found approximately 1,800 cases of counterfeit parts in U.S. Military Aircraft while noting that both defense contractors and the Department of Defense lack an adequate understanding of the depth and severity of the problem. My legislation will ensure that no counterfeit parts ever find their way into any U.S. military aircraft by requiring that these parts be made right here at home. And, for the first time, it will require the Federal Aviation Administration to formulate rules to ensure no counterfeit parts are making their way into passenger aircraft as well.

When Operation Iraqi Freedom began in March 2003, a Swiss company stopped shipments of a crucial guidance system component for U.S. smart bombs. Both these incidents could have resulted in U.S. forces being in harm's way without necessary tools to defend themselves. Fortunately, neither incident caused threats to our troops, but they clearly demonstrate the need to protect our production supply lines from being cut, especially in times of war.

Similarly, during the first Gulf War, the United States was forced to turn to Japan—not once, but on three separate occasions—for essential parts in the production of the Patriot Missile.

Additionally, Mr. Speaker, as one who is very concerned about the state of domestic manufacturing, I strongly believe that the Keep America Secure Act will help re-ignite our high-tech sector. Between 2000 and 2010 the United States lost more than 5 million manufacturing jobs.

The Keep America Secure Act would help promote the remaining U.S. high tech firms. We need to rebuild the domestic electronic components industry, and this bill will help us do it.

We have spent the last ten years rebuilding Iraq and Afghanistan while continuing to neglect our weakening manufacture sector here at home. Congress must make a commitment to rebuilding our domestic manufacturing base and to ensuring that our courageous defenders continue to have the best equipment available. And as our economy suffers, let us give the manufacturing sector a needed shot in the arm. Unless Congress stands up and puts a halt to it we will eventually be at the mercy of any adversary who controls the manufacturing of our weapons or the critical components of our weapons.

Mr. Speaker, in the days to come, I will look to my like-minded friends, on both sides of the aisle, and say to my colleagues: let's work together to keep America secure.

#### INTRODUCING TRANSPARENCY FOR LETHAL CONTROL ACT

### HON. SUSAN A. DAVIS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, August 2, 2012*

Mrs. DAVIS of California. Mr. Speaker, I rise today to introduce the Transparency for Lethal Control Act (TLC), legislation requiring the United States Department of Agriculture to publish clear and accessible information on animals killed through the Wildlife Services program of the Animal Health and Inspection Service.

The Wildlife Services program is responsible for intervening in situations when an animal is considered a threat or serious nuisance to humans. In some cases, animals are killed to fulfill this mission.

Efforts to gather adequate information regarding Wildlife Services operations have been difficult. The USDA has not made detailed data available to the public relating to where, why, how, and which animals have been killed. This lack of transparency and public reporting makes oversight impossible. The USDA could be acting inappropriately or recklessly and without this data, we can't

know. That is why I am introducing legislation to require the USDA to publish kill data online by state, county (or other similar political subdivision), and municipality.

The killing of animals should not be a routine or reflexive government response. It should only be undertaken, if at all, after careful deliberation and under strict supervision. For that reason, the public and Congress need to have the opportunity for vigorous oversight to ensure that the USDA is acting appropriately and considering all cheaper and more humane alternatives.

Congress must improve oversight of the Wildlife Services program and ensure that the USDA is using tax dollars efficiently and appropriately. I urge passage of the Transparency for Lethal Control Act (TLC).

#### DISTRICT OF COLUMBIA PAIN-CAPABLE UNBORN CHILD PROTECTION ACT

SPEECH OF

### HON. YVETTE D. CLARKE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, July 31, 2012*

Ms. CLARKE of New York. Mr. Speaker, today I rise to applaud, yes applaud, my Republican colleagues, who voted this week with the Democrats to reject the anti-choice legislation H.R. 3803 D.C., the 20 Week Abortion Ban Bill. This bill was rejected by a vote of 220 to 154.

Had it passed, H.R. 3803 would have contained no exception for rape or incest, for medically futile pregnancies, or for the health of the woman—forcing pregnant women facing medical complications to wait until their conditions become life-threatening before termination of the pregnancy becomes an option. Additionally, under this piece of legislation, doctors could face two years in prison and fines of up to \$250,000 for performing abortions and could be sued by their patients or their patients' families.

This bill would have not only harmed women, but also is unconstitutional since this legislation absolutely goes against current law as established in 1973 by *Roe v. Wade*. Herein lies the irony of the bill, Republicans, especially those who are members of the Tea Party, constantly espouse their support and respect for the law, yet they conveniently forget the fact that *Roe v. Wade* is the law of the land. Trying to circumvent that law, which this bill attempted to do, is in fact unconstitutional.

My colleague Delegate ELEANOR HOLMES NORTON, who is the only duly elected representative for Washington, D.C. in Congress, was even denied an opportunity to testify during a hearing on this bill. Even the Republicans know that this bill is a travesty of justice!

No matter what a person believes about abortion, everyone can agree that we should reduce the number of unintended pregnancies and the need for abortions. Abortion should be a last option, not a form of birth control. In order to reduce the demand for abortion, we must provide our children with comprehensive sex education and access to safe and affordable health care and birth control.

Since the Republicans want to deny women their right to choose, why not do something so

that most women will not have to be put in a situation where they have to choose. So, I ask my Republican colleagues to join me in supporting the implementation of the Affordable Care Act, which will provide the needed access to affordable health care and contraceptives and in doing so, not put women in the position where they have to consider abortion.

**HONORING NEW JERSEY'S PROUD AGRICULTURAL TRADITION AND THE CONTRIBUTIONS OF FARMS LOCATED IN THE 11TH CONGRESSIONAL DISTRICT**

**HON. RODNEY P. FRELINGHUYSEN**

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

*Thursday, August 2, 2012*

Mr. FRELINGHUYSEN. Mr. Speaker, I rise today to recognize New Jersey's proud agricultural tradition and the contribution of farms located in our 11th Congressional District.

The prospering agricultural industry of today's New Jersey is the continuation of many years of farming dating back to colonial settlement in the sixteenth century. Primarily a rural society, struggling settlers developed small family farms to stave off starvation. Soon local farms not only became an important source of fruits, vegetables, and grain, but also for raw materials used for the prospering textile industry. Easy access to cotton, wool, and other farm products fueled the Industrial Revolution in New Jersey. Agriculture became not only a very profitable industry on its own, but also fed secondary manufacturing and merchant businesses.

Every day, farmers across the state raise animals, harvest vegetables, pick fruit, and participate in the 400 year old tradition that built New Jersey into an economic powerhouse.

Today, New Jersey agriculture constitutes an \$82 billion industry that provides a strong backbone for New Jersey's economy. It also benefits surrounding businesses with the growing popularity of agrotourism. This extremely successful business model involves enticing people from near and far to visit, learn about everyday farm-life, and participate in activities such as pumpkin, wine tasting, hay rides, petting zoos, or horseback riding. This not only brings customers from the surrounding tri-state area to appreciate what New Jersey has to offer, but also fosters a greater public understanding of commercial farming. New Jersey's large agricultural sector provides employment, not only for farm workers, but also for those in construction for irrigation and drainage projects. This multibillion dollar industry supports New Jersey, providing jobs and raw materials, drawing in customers, and serving as its own lucrative business.

New Jersey truly is the Garden State, as our motto says. Having a strong agricultural industry not only provides a great deal of economic benefits to New Jersey, but also contributes to a rich social tapestry. There are over 790,000 acres of lands across the state devoted to farmland. This has been celebrated as an extremely environmentally friendly use of land that preserves both a smaller carbon footprint and the beautiful greenery characteristic of New Jersey. In a world where food insecurity remains one of the most dif-

ficult problems for mankind to combat, thriving agriculture reduces the acuteness of this issue and diminishes our dependence on food imports. This land also provides access to fresh, locally grown foods, giving residents in the area healthier meal options. The agricultural industry is unparalleled in its contributions to New Jersey society, providing jobs, tourism, environmental protection, food security, raw materials for manufacturing, and so much more.

Standing as a shining example of New Jersey's proud agricultural tradition is Wightman's Farms, located in Harding Township, Morris County. Celebrating their 90th Anniversary this year, Wightman's Farms has worked continuously to expand what began as a farm into the prospering business it is today. The farm is one of over 8,000 other family owned and operated farms in New Jersey that support their local and state economy. Currently managed by the third generation of Wightmans, the integration of tradition and innovation has certainly helped Wightman's Farms not only last the test of time, but develop into a flourishing business enjoyed by customers near and far.

Mr. Speaker, I ask you and my colleagues to join me in recognizing New Jersey's agricultural tradition and the contributions of 11th District farmers.

**RECOGNIZING THE PORT OF SEATTLE FOR RECEIVING THE 2012 SECRETARY OF DEFENSE EMPLOYER SUPPORT FREEDOM AWARD**

**HON. ADAM SMITH**

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

*Thursday, August 2, 2012*

Mr. SMITH of Washington. Mr. Speaker, I rise to honor the Port of Seattle for receiving the 2012 Secretary of Defense Employer Support Freedom Award. The Port of Seattle is one of just fifteen employers across the country to receive this honor.

Each year, the Employer Support of the Guard and Reserve, an agency of the Department of Defense, awards employers with their annual Freedom Award. This is the Department of Defense's highest recognition awarded to employers for their exceptional support of Guard and Reserve employees. More than 3,000 nominations from Guardsmen and Reservists, or their family members on their behalf, were submitted and the Port of Seattle distinguished themselves among all the nominees.

A Naval Reservist nominated the Port of Seattle because of the Port's focus on hiring military members and veterans, as well as for their participation in the military's Transition Assistance Program. Twenty percent of the Port's employees have served in the military and the Port has started a fellowship program to help returning service members transition from active duty to the civilian workforce. The Port of Seattle's efforts at employing Guardsmen and Reservists serves as a model for other port districts that are establishing programs to hire more service members.

Mr. Speaker, it is with great pleasure that I honor the Port of Seattle for their superb treatment of Guard and Reserve employees. The Defense Employer Support Freedom Award is a well-deserved honor.

**HONORING REPRESENTATIVE ELENA PARENT**

**HON. JOHN LEWIS**

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, August 2, 2012*

Mr. LEWIS of Georgia. Mr. Speaker, I rise today to recognize Georgia State Representative Elena Parent on the occasion of her retirement from the Georgia General Assembly. In her short time in the Georgia State House, Elena has made a profound impact on the Georgia Legislature, and I know that she will be missed by her constituents from the 81st District.

Outside of public office, Elena is incredibly involved in the Metro Atlanta community, currently serving on the Foundation Board of the Georgia Association of Women Lawyers, the Advisory Board of Directors of It's a Journey, Inc., and the Women and Minorities in the Profession Committee of the State Bar of Georgia. She has also conducted fundraising and development efforts for HOPE Atlanta, a homelessness-prevention non-profit. I commend her for such meaningful service to the people of Georgia.

Elena recently announced that she will begin working as the Executive Director of Georgia Watch, a consumer advocacy group, at the end of her term this year. Having already received numerous awards for her leadership, including inclusion in the Atlanta Business Chronicle's "40 Under 40," Elena is an excellent choice for this position, and I look forward to hearing of her successes in the future.

I wish Elena, her husband, Briley, and their son, Brooks, the very best.

**IN RECOGNITION OF THE SERVICE OF AUTUMN M. LEVA TO THE CONSTITUENTS OF COLORADO'S FIFTH DISTRICT**

**HON. DOUG LAMBORN**

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

*Thursday, August 2, 2012*

Mr. LAMBORN. Mr. Speaker, it is with mixed emotions that I announce the departure of a valued member of my staff, Autumn M. Leva.

Autumn has served in my Washington D.C. office for the past year and a half, first as our Staff Assistant and most recently as my Executive Assistant, Scheduler, and Legislative Aide. She has successfully handled her duties with a wealth of knowledge of the legislative and procedural processes. Her dedication and work ethic will be very difficult to replace.

A longtime resident of Colorado's fifth Congressional District and a graduate of Salida High School, Autumn received her Bachelor of Arts in Elementary Education with a minor in Spanish from the University of Montana in 2007 and went on to receive her Juris Doctor from Regent University School of Law in 2010. She is the daughter of Kathy Messick of Salida, Colorado and sister to Shane Leva.

Autumn's sparkling personality, enthusiastic can-do attitude, and team-player mentality will be truly missed. However, it is her love for the Lord that will be most remembered by myself
