

support each other on the defensive end translated into selflessness in their offensive attack, with a different player leading all scorers on any given night. The senior anchor to these young 'Cats was Darius Miller, one of Kentucky's favorite sons and a high school Mr. Basketball from Mason County. During his freshman season, Kentucky failed to make the NCAA Tournament for the first time in 18 years. After that disappointment, Miller has been a mainstay of teams under Coach John Calipari that have gone undefeated at home for three seasons, earning two Final Fours, an Elite Eight appearance, and a National Championship. Over his career, Darius played in more games than any Kentucky player in history and was one block and thirteen rebounds from having a career stats sheet with some 1,200 points, 500 rebounds, 250 assists, 100 blocks, and 100 steals.

That Miller was the sixth man on this Kentucky squad demonstrates the explosive athleticism of Big Blue's younger stars. Leading the way was Anthony Davis who, with 186 blocks bested most entire teams in that statistic, cleaned up nearly every individual award for which he was eligible, including Freshman of the Year, SEC Player of the Year, Defensive Player of the Year, and the Naismith and Wooden National Player of the Year awards. Though ending the season with a 62% field goal percentage, he was scoreless in the first half of the National Championship Game and yet was Most Outstanding Player for his defensive abilities and capacity to ignite the UK offense. Davis along with fellow freshman point guard Marcus Teague started in a record forty games for UK and were the distributors for an extremely quick and highly efficient offense that was a perpetual threat in transition. Leading that attack were sophomore and freshman forwards Terrence Jones and Michael Kidd-Gilchrist, dangerous whether around the rim or breaking free for an open jump shot, combining for an average 24 points a game. Sophomore Doron Lamb was the team's often unsung hero and clutch shooter, averaging 37% from the three point line during his career and killing the momentum behind several opponents' would-be comebacks. I could go on-and-on celebrating these leaders and the other players who made this team championship caliber. "The Undeniables" will be regarded as one of the greatest all-around teams in college basketball history and that eighth NCAA Championship banner now hanging in Rupp Arena will forever stand as testament to their place in the hearts of the Big Blue Nation. I wish all of these players the best as they continue their careers, whether at Kentucky or at the professional level.

Of course, none of this would have been possible without the boundless energy and enthusiasm of Head Coach John Calipari, who forged a timeless team out of young freshmen and sophomores. Before Coach Cal's arrival, UK basketball was lost in the woods. In a single season he made the Wildcats into a perennial championship contender once again. But more importantly, he has worked selflessly to promote the University nationally and internationally, even more closely involved the community in the basketball program, and pursued philanthropic goals both through the University as well as with his private charity. This winning environment in Lexington is a result of the seamless teamwork and support of the coaching and training staff, Athletic Director

Mitch Barnhart, and University of Kentucky President Eli Capiluto who, in his first year as president, is now one-for-one in national basketball championships.

In closing I would like to once again join the Big Blue Nation in congratulating the team, everyone affiliated with the University and UK fans around the world on a terrific season and our eighth national championship. What a banner year it has been!

RECOGNIZING PROFESSIONAL
GOLF ASSOCIATION TOUR PRO-
FESSIONAL BUBBA WATSON AS
THE WINNER OF THE 2012 MAS-
TERS

HON. JEFF MILLER

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 16, 2012

Mr. MILLER of Florida. Mr. Speaker, I rise today to recognize Northwest Florida's Gerry Lester "Bubba" Watson, Jr. as the winner of the 2012 Masters Tournament on Sunday, April 8, 2012 at Augusta National Golf Club.

Winning a Masters Tournament, professional golf's most prestigious event, is the dream of every tour professional and aspiring amateur. This win—his fourth on the PGA tour—elevated him to the number four position in the world golf rankings, and to number two in the FedEx Cup rankings.

Bubba's humble, small-town upbringing in Bagdad, Florida included no formal golf lessons, save one provided by his father at an early age. He taught himself to play golf by hitting wiffle balls around his house with a cut-off club his father gave him.

Not an inexperienced winner, Bubba won the Divot Derby—a longstanding junior golf tournament in Pensacola, Florida—an astounding 10 years in a row. He continued golfing during his years at Milton High School, where he also excelled as pitcher on the school's baseball team. Despite his significant baseball talents, golf remained his passion. At Faulkner State Community College, he was named First Team Junior College All American. Later, after transferring to the University of Georgia, he led the Bulldogs to an SEC Championship title in 2000. He turned professional when he joined the Nationwide Tour in 2001, and later joined the PGA tour in 2006. Known for his aggressive shot-making abilities and his exceptionally long tee shots, he has quickly established himself as a favorite among golf spectators.

Bubba is not shy about sharing his Christian faith, and he possesses an unwavering commitment to family—most recently demonstrated when he and his wife, Angie, adopted a baby boy just two weeks before his win at Augusta. In addition to his commitment to family, Bubba is actively involved in a number of philanthropic activities, serving as an honorary board member and generous sponsor of The First Tee of Northwest Florida and making significant contributions to the Ronald McDonald House in Pensacola. He has also hosted free golf clinics for children, provided scholarships for Milton High School golfers, and committed to funding the Divot Derby for the next five years, ensuring that children do not need to pay the registration fee to participate in the event.

Bubba's strong character, athletic prowess, and commitment to family and community make it all the more enjoyable to call him "Masters Champion." His nail-biting win after two playoff holes on Sunday afternoon may be his first in a major tournament, but it will likely not be his last.

On behalf of the United States Congress and the citizens of Northwest Florida, I congratulate Bubba for his extraordinary victory. My wife Vicki joins me in offering our best wishes to Bubba; his wife, Angie; and their son, Caleb, for their continued success.

HONORING THE ROCK BRIDGE
HIGH SCHOOL LADY BRUINS
BASKETBALL TEAM

HON. BLAINE LUETKEMEYER

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Monday, April 16, 2012

Mr. LUETKEMEYER. Mr. Speaker, I rise today to ask my colleagues to join me in congratulating the Rock Bridge High School Lady Bruins Basketball team for winning the Class 5 Missouri State Championship on March 10, 2012.

The young women and their coaches should be commended for all their hard work throughout their stunning season. In the championship game against Blue Springs, the Lady Bruins prevailed 52 to 41, marking the team's first title since 2008. The Lady Bruins had come to win starting with a 14 to 0 lead and then never letting their opponent come closer than five points.

I ask that you join me in recognizing the Rock Bridge High School Lady Bruins for a job well done.

IN RECOGNITION OF THE LIFE OF
MIKE WALLACE

HON. LAURA RICHARDSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 16, 2012

Ms. RICHARDSON. Mr. Speaker, it is with deep sadness that I rise today to pay tribute to Mike Wallace, a man whose determination and tenacity shaped investigative reporting as we know it today.

Mr. Wallace died on April 7, 2012, surrounded by family in New Caanan, Connecticut. He was 93.

Mr. Speaker, Mike Wallace was one of the original correspondents for the news program, 60 Minutes, and his reporting helped to cement the show's reputation for hard-hitting but fair journalism. He interviewed world leaders and celebrities, never shying away from difficult and often confrontational lines of questioning. Nevertheless, his impeccable research and balanced approach made him as respected as he was feared.

The list of persons interviewed by Mike Wallace over the past half century reads like a Who's Who of the leading figures of the twentieth century: reverend and activist Dr. Martin Luther King, Jr.; famed surrealist painter Salvador Dali; former Palestinian leader and Nobel Prize Laureate Yasser Arafat; former Iranian leader Ayatollah Khomeini; civil rights

advocate Malcolm X; first lady Eleanor Roosevelt; president Ronald Reagan; former Secretary of State Henry Kissinger; then-Russian President Vladimir Putin.

Despite his steely demeanor, Mike Wallace struggled with personal hardships, including the death of a son and bouts with depression. At a time when such vulnerabilities were often hidden from public view, Mike Wallace shared these challenges with American audiences. His bravery and openness helped to dissolve the social stigma around depression and made a tremendous impact on the lives of many Americans.

Mike Wallace was honored with 21 Emmy Awards, five Peabody Awards, and the Robert F. Kennedy Journalism Award. He was also inducted into the Television Academy Hall of Fame in 1991. His legacy continues through the Knight-Wallace Fellowship program at the University of Michigan, which gives mid-career journalists the opportunity to explore new subjects of interest.

Mr. Speaker, as we reflect on the life and legacy of Mike Wallace, one can be certain that his memory will be an inspiration for a new generation of journalists as well as for every American who values such a strong commitment to integrity and truth.

PAUL ALLEN AND THE ALLEN
INSTITUTE FOR BRAIN SCIENCE

HON. DAVID G. REICHERT

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Monday, April 16, 2012

Mr. REICHERT. Mr. Speaker, I rise today in recognition of a philanthropist and forward-looking individual who made a remarkable announcement a few weeks ago. Paul Allen, the founder of the Allen Institute for Brain Science, yesterday announced that he is giving \$300 million toward the invaluable research at the Allen Institute for Brain Science, which he started with \$100 million of his own money.

Mr. Speaker, the researchers at The Allen Institute employ an extraordinary team approach to brain research and all strive, every single day, toward the same goal: mapping the human brain with the goal of finding the causes and cures of vexing diseases—Alzheimer's, Parkinson's, dementia, autism, depression and many more.

Perhaps most impressively, Mr. Speaker, Mr. Allen's team at the Institute share what is learned as it happens. Each month, tens of thousands of scientists from around the world access the vast data stores and web-based tools available via the Institute's brain map website to learn and advance their own research. The investment Mr. Allen and the brilliant team of researchers make are intriguing and hopeful.

I'm proud to say, Mr. Speaker, that Mr. Allen and his team are doing the bulk of their work in the Pacific Northwest providing hope for the future—and opportunities for the present. I salute Mr. Allen, his team of researchers, and our talented and motivated medical professionals around this Nation. The dollars and time being invested should never be forgotten in this House, nor by humanity.

CLINTON RIVER WATERSHED
COUNCIL CELEBRATES FORTY
YEARS

HON. SANDER M. LEVIN

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, April 16, 2012

Mr. LEVIN. Mr. Speaker, I rise today to congratulate the Clinton River Watershed Council as it celebrates 40 years of making a positive difference to the Clinton River and its watershed.

Forty years ago, the Clinton River was a very different waterway than it is today. Decades of uncontrolled dumping of industrial wastewater and raw sewage had taken a huge environmental toll on water quality in the river. There were no fish to speak of in the river, and certainly none that you would care to eat. Far from being an asset to the communities along its banks, the Clinton River was slowly dying.

That might have been the end of the story except for two key developments in 1972. The first was the passage of the Clean Water Act which spelled out ambitious programs for water quality improvement. The second key development was the formation of the Clinton River Watershed Council. Both of these had a profound impact on water quality in the Clinton River.

Passage of the Clean Water Act 40 years ago was one of the most important environmental milestones in our nation's history. It marked a fundamental change in how our nation views and manages water in this country. After decades of polluting the Great Lakes and their tributaries—including the Clinton River—we finally recognized that healthy rivers and lakes are vital to the health of our communities, and we required that steps be taken to restore them.

The formation of the Clinton River Watershed Council marked another important turning point. It takes time and resources to undo decades of pollution and neglect, and still more time for an ecosystem to heal. Restoring an urban waterway like the Clinton River is especially complicated. I am convinced that the effort to heal the Clinton River has gone much faster because it had advocates to coordinate action and focus attention and resources. Thanks to the work of the Clinton River Watershed Council and its members and member units of government, real progress is being made on water quality, and once again the Clinton River is being used for fishing, canoeing, and hiking. The Council's efforts in the areas of watershed management, stewardship and education have also had a tangible, positive impact.

There was a time when we turned our backs to our rivers and lakes. Today, we know better. As the hard-won progress in the Clinton River and Lake St. Clair shows, waterfront development is a real generator of economic activity and a one-of-a-kind asset to communities.

We need to build on the progress that has been made in the Clinton River Watershed as well as Lake St. Clair. This absolutely requires a partnership of effort by Federal, State, and local governments, as well as local stakeholders and advocacy groups. It also means a continued commitment of resources from the Federal Government, especially when it

comes to funding the Great Lakes Restoration Initiative. Now is not the time to cut funding for this vital initiative. Congress and the Obama Administration must also work to clarify and restore long-standing Clean Water Act protections for U.S. streams, wetlands, and other waters.

But the real work of completing the restoration of the Clinton River will continue to be done by groups like the Clinton River Watershed Council and the many volunteers and sponsors that support their efforts. The Watershed Council's work underscores the value that a healthy Clinton River holds for our citizens and communities. I ask all of my colleagues to join me in recognizing the Clinton River Watershed Council as it begins its fifth decade of work to protect, enhance and celebrate the Clinton River and its watershed.

RECOGNIZING THE SERVICE AND
OUTSTANDING ACHIEVEMENT OF
SENIOR AIRMAN ALEXANDER W.
BLENCH, UNITED STATES AIR
FORCE

HON. JEFF MILLER

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 16, 2012

Mr. MILLER of Florida. Mr. Speaker, I rise today to recognize the outstanding achievement of Senior Airman Alexander W. Blench, who recently received the 2011 Lieutenant General Leo Marquez Award as the Air Force's Outstanding Aircraft Maintenance Airman.

Originally hailing from Escondido, California, SrA Blench joined the United States Air Force as an F-15 Avionics Technician in 2008. He served at RAF Lakenheath, England and in Afghanistan before reporting to Eglin Air Force Base, Florida, in 2010. A self-described tinkerer who developed a love of mechanics as a child working in his father's machine shop, SrA Blench now specializes in repairing electronic warfare and countermeasure systems in F-15C and F-15E aircraft. He also works on aircraft wiring, flight controls, environmental systems, munitions guidance systems and video lines. At only 24 years old, SrA Blench has already compiled an impressive list of contributions to our nation's Air Force. His sharp eye and keen understanding of avionics allowed him to identify and quickly rectify countermeasure and flight control failures, faulty telemetry data, a radar elevation discrepancy and crucial systems malfunctions. His personal efforts led to five modifications of three separate types of aircraft and contributed directly to 1,700 sorties and over 2,600 flying hours resulting in the success of several critical test missions.

SrA Blench's dedication to excellence, however, goes beyond his professional duties. In addition to his significant professional achievements, SrA Blench also completed a Community College of the Air Force degree in Avionics Systems Technology. He is also pursuing a Bachelor of Science degree with a 3.95 GPA, he volunteered his off-duty time to clean and paint a local middle school, and he participated in a local Northwest Florida beach conservation effort by assisting with planting 1,400 trees along the shoreline. Not only has SrA Blench proven himself to be a good Airman, he has also shown himself to be a good
