

former speech pathologist and research associate professor in the School of Allied Health Professions who directed graduate student research, taught courses in research design and communications disorders, and is a founding member of the Friends of Staller Center Advisory Council.

The culmination of these ongoing efforts is the May 7, 2012 opening of the newly remodeled building to house the Laufer Center on Stony Brook's campus. The Center was established in 2008 in loving memory of Louis and Beatrice Laufer by their children Helen Laufer Kaplan and Howard Kaplan, Jeffrey and Barbara Laufer, and Henry and Marsha Laufer. At that time, Stony Brook University President Shirley Kenny praised the Laufers as "people of remarkable vision and generosity" and recognized the Center's potential to "explore new frontiers in research and education . . . have a profound impact on the future of biomedical research and health care for generations to come."

The Center brings together academic experts and students in math, physics, genetics, biochemistry, engineering, and computer sciences to advance research and innovation that will lead to groundbreaking discoveries in biology and medicine. The Center uses an interdisciplinary approach and involves collaborations among scientists at Stony Brook University, Brookhaven National Laboratory and Cold Spring Harbor Laboratory to provide an important interface between the physical and life sciences.

Mr. Speaker, I am honored to have known the Laufer family for many years and am very proud to call them close friends of mine. They are a great source of inspiration, enthusiasm, and dedication to major advances in research, learning, and a better way of life. On behalf of New York's first congressional district, I congratulate the Laufer family for its generosity and outstanding contributions to Stony Brook University and to our community on this occasion marking the opening of the Louis and Beatrice Laufer Center for Physical and Quantitative Biology.

HONORING ODYSSEY OF THE MIND OF CARROLL SENIOR HIGH SCHOOL

HON. KENNY MARCHANT

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 31, 2012

Mr. MARCHANT. Mr. Speaker, it is with great pride that I recognize the Odyssey of the Mind teams of Carroll Senior High School for their winning the state championship in two categories this year.

Odyssey of the Mind is a widespread program for students that develops team problem-solving and creative thinking. Grouped into teams, students spend many weeks working on solutions to long-term problems which they then present at competitions along with a short-term problem and solution that they are given at the competitions. Odyssey fosters creativity by allowing students to choose from problems that each have multiple possible solutions.

There were 115 teams participating in the Texas state competition this year and Carroll Senior High produced two teams that won

state titles. Ann Dahl, Allison Newman, Braden Anderson, Christie Ballew, Spencer Lankford, Mackenzie Murphy and Jack Veenker earned the state title for Vehicular Problem-Solving and also the award for Most Creative team. The team was led by coaches Megan Anderson, Carl Anderson, and Shauna Newman. A second team, comprised of Jenna Buckley, Nico Scalzo, Emilie Featherston, Nathalie Scherer, Annie Newman, and Lindsey Weiss, won the state title for Technical Problem-Solving. Their coaches were Cindy Featherston and Micki Scalzo. In the course of their accomplishments, these students developed and demonstrated skills in creativity, dialogue, and teamwork.

Mr. Speaker, on behalf of the 24th Congressional District of Texas, I ask all of my distinguished colleagues to join me in congratulating the Carroll Senior High School Odyssey of the Mind Teams for their respective titles at the Texas state competition.

PERSONAL EXPLANATION

HON. ADAM SMITH

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 31, 2012

Mr. SMITH of Washington. Mr. Speaker, on Wednesday, May 30, 2012, I was unable to be present for recorded votes. Had I been present, I would have voted "yes" on vote No. 294 (on the motion to suspend the rules and pass H.R. 5651, as amended); "yes" on vote No. 295 (on the motion to suspend the rules and pass H.R. 4201); and "yes" on vote No. 296 (on the motion to suspend the rules and pass H.R. 915, as amended).

RECOGNIZING THE KEEP PRINCE WILLIAM BEAUTIFUL VOLUNTEERS

HON. GERALD E. CONNOLLY

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 31, 2012

Mr. CONNOLLY of Virginia. Mr. Speaker, I rise today to recognize the volunteers of Keep Prince William Beautiful.

Keep Prince William's objective is to protect the environment. Through the implementation of six programs, the overall focus is on three areas of environmental stewardship: litter removal, recycling education, and water quality initiatives. The six programs include:

Volunteer Storm Drain Initiative, Adopt-A-Spot Program, Volunteer Speakers Bureau, Fall and Spring Cleanup, Litter Survey, Community Cleanup.

It is my honor to enter into the CONGRESSIONAL RECORD the names of volunteers for Keep Prince William Beautiful:

Barbara Bell, Starbucks-Hoadly Road, Tawnia Jeffery, JoAnn Sherrill, Ron Haynes, Meagan Andrews, Vic Doppee, Delores Gee, Tina McCoy, American Red Cross Youth Task Force, Robert Duecaster, Antoinette Chaisson, Stanley Mahdi, Leigh-Anne Vaughn, Thomas Davis, Sam Shankar, Mary Johnson, Frank Simms, Ed Howell, Allyson Avery, David Mercer, Barbara Conrad, Eric VanNortwick, Minister Spann, Connie Moser, Richard Grant,

Linda Gosnell, James Faison, Gwen Bourke, Joel Contrucci, Randy Baum, Joyce Jolly, Ruth Baxter, Heather Abney, Mark Clark, Jim Hollis, Sunset Lions Club, Abdul Hayee, Jay Leach, Robert Mancini, Pete Mason, Sonia Wood, Gar-Field HS Ecology Club, Marie Vayer, Zoe Vitter, Linda Seemen, Marie Alarcon, Andrew Chung, Diane Puckett, New Life Anointed Ministries International, Brenda Jenkins, LaToya Boyd, Joy Weaver, Misty Hayes-Lee, Nicole Brown, Jacqueline Freeman, Kim Silver, LaLinda McMillon Street, Kelly Easterly, Board President, Delain Moyers, Vice President Connie Moser, Kim Sawicki, William Smith, David Brown, Susan Johnson, Anthony King, Donny Gray, Josh Clark, Mount Zion Baptist Church, Peter Lineberry.

Mr. Speaker, I ask that my colleagues join me in commending the volunteers of Keep Prince William Beautiful and in thanking them for their dedication.

PRENATAL NONDISCRIMINATION ACT (PRENDA) OF 2012

SPEECH OF

HON. DONNA M. CHRISTENSEN

OF THE VIRGIN ISLANDS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 30, 2012

Mrs. CHRISTENSEN. Mr. Speaker, there are few things that anger me more than when Members of this body claim that a piece of legislation will accomplish something that it simply will not accomplish. That is certainly the case with H.R. 3541—a bill that my friends on the other side of the aisle claim will prevent sex-selection abortions and will ensure that the United States does not become a supposed "safe-haven" for women seeking an abortion based on the sex of the pregnancy.

The issue of sex-selection is a very real issue in different nations around the globe. However, even leading international health experts in this field agree that the solution does not lie in criminalizing the practice, which would only keep it behind closed doors. The solution lies in addressing the social, economic, political and cultural factors that create, sustain and exacerbate sex inequality in the first place; the very inequalities that lead to sex-selection in the first place.

Unfortunately, this bill will not achieve any of the claims from my friends on the other side of the aisle and this will certainly will nothing to reduce sex discrimination and gender inequality.

What this bill will do, however, is to exacerbate the unfortunate impacts of sex discrimination and gender inequality by leading to greater stigmatization of women and especially Asian-American women who exercise their choice and control over their reproductive lives. And, there is nothing about that suggests or reflects any intention or hope of fighting back against gender discrimination. What this bill also will do is to restrict access to legal and safe abortion services, violate the very-important doctor-patient relationship and needlessly threaten healthcare providers with civil and criminal liability unless they report any suspicions they have about a woman's reason for exercising her right as a human being to control her body.

It is evident that this legislation has nothing to do with empowering women here or around

the globe nor does it have anything to do with ensuring that women who are faced with a very, very difficult decision have access to the safest care possible. More evident is that this bill is just another attempt to challenge *Roe v. Wade* and achieve an outright ban on all abortion services.

As a Member of Congress and a physician who has worked tirelessly to eliminate all health disparities those along racial and ethnic, geographic and gender lines I cannot and will not support any policy that I know will not improve the health, wellness and thus life opportunities of those who often are marginalized and on the down side of opportunity, access and privilege. And so, I cannot and will not support any bill that will not improve the lives of women and girls by expanding their reliable access to safe and appropriate comprehensive health care—including reproductive health care and by ensuring gender equality across all facets of their lives, from at work to in the classroom.

And so, I strongly encourage my colleagues not to support H.R. 3541. The issue of sex-selection is a very serious challenge, and serious challenges warrant serious, effective solutions. This bill certainly is not that!

We have a chance to stop in its tracks a bill that could worsen the health disparities that affect women, and that give rise to unsafe, often-lethal back-alley abortions.

Let's stop this bill; let's do so now; and let's go back to the table and develop a thoughtful bill that addresses the root causes the sex discrimination and gender inequalities that leave millions of talented girls and women on the downside of opportunity and hope.

RECOGNIZING THE MOTHERS AGAINST DRUNK DRIVING VOL- UNTEERS

HON. GERALD E. CONNOLLY

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 31, 2012

Mr. CONNOLLY of Virginia. Mr. Speaker, I rise today to recognize the Prince William volunteers of Mothers Against Drunk Driving.

MADD's volunteers in Prince William County, Virginia have increased public awareness of the dangers of drunk driving and the assistance families need to survive such tragedies. Volunteers organized a tribute to local victims/survivors at the Walk Like MADD event at Battlefield High School. Volunteers provided literature and displays at National Night Out Against Crime events throughout the county. Monthly volunteer victims spoke of the impact of drunk driving on their lives to court-ordered convicted drunk drivers.

It is my honor to enter into the CONGRESSIONAL RECORD the names of volunteers for Mothers Against Drunk Driving:

Darlene Adams
Susan Baldassari
Laura Dawson
Whitney Manning
Debbie Sausville
Ann Taylor
Dorothy Waldron

Mr. Speaker, I ask that my colleagues join me in commending the Prince William volun-

teers of Mothers Against Drunk Driving for their service and in thanking them for their dedication to our community. These volunteers work to prevent families from experiencing the pain of losing a loved one to drunk driving.

CONGRATULATING THE AMERICAN PODIATRIC MEDICAL ASSOCIA- TION ON ITS 100TH ANNIVER- SARY

HON. CHRIS VAN HOLLEN

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 31, 2012

Mr. VAN HOLLEN. Mr. Speaker, I rise today to recognize and congratulate the American Podiatric Medical Association on its 100th anniversary.

Founded in 1912, the American Podiatric Medical Association (APMA), located in Bethesda, is the nation's leading and recognized professional organization for doctors of podiatric medicine (DPMs), and the pre-eminent trade association representing podiatric medicine and surgery. I am very proud that the APMA's national headquarters is in Maryland's Eighth Congressional district.

DPMs, also known as podiatrists, are recognized as physicians and surgeons, qualified by their education, training and experience to diagnose and treat conditions affecting the foot, ankle, and structures of the leg. The medical education and training of a DPM includes four years of undergraduate education, four years of podiatric medical education at an accredited podiatric medical college, and at least three years of hospital residency training. In short, Mr. Speaker, podiatric medicine is to the foot and ankle what ophthalmology is to the eye, cardiology is to the heart, or otolaryngology is to the ear, nose, and throat.

Podiatric medicine has witnessed a tremendous evolution over the past 100 years, and podiatrists are now the preeminent providers of foot and ankle care. On July 1, 1912, 225 charter members gathered at the LaSalle Hotel in Chicago to organize a national association dedicated to the needs of practicing chiropodists. Today, what began as the National Association of Chiropodists is the American Podiatric Medical Association, home to more than 12,000 member podiatrists. APMA has 53 component organizations across the United States and its territories, and all practicing APMA members are licensed by the state in which they practice podiatric medicine.

It seems at times that many Americans may not think about podiatrists until they experience foot or ankle problems. But we should be thankful that we have the expertise of thousands of podiatric physicians throughout the country as focused and dedicated medical professionals, medical professionals who really do help keep America walking.

Within the field of podiatric medicine and surgery, podiatrists can focus on specialty areas such as surgery, sports medicine, biomechanics, geriatrics, pediatrics, orthopedics, or primary care. Podiatric physicians routinely perform comprehensive medical history and physical examinations; prescribe drugs and order and perform physical therapy; perform

basic and complex reconstructive surgery; repair fractures and treat sports-related injuries; prescribe and fit orthotics, insoles, and custom-made shoes; and perform and interpret X-rays and other imaging studies.

Mr. Speaker, an individual's feet often reveal indicators of that individual's overall health. The feet are affected by chronic diseases leading to decreased mobility and disability for individuals already in poor health. Arthritis, diabetes, and neurologic and circulatory disorders can all have an effect on our feet. Therefore, we must ensure that all individuals receive the expert foot care they need regardless of their disability status or expected longevity, and at all stages in their lives.

In a 2010 survey by APMA, 50 percent of Americans indicated that they experience foot pain and discomfort. The same survey found that those who had foot pain were much more likely to experience problems in other areas of the body. Specifically, 65 percent of Americans who were overweight experienced regular foot pain, 32 percent with foot pain also had circulatory problems, and 20 percent of Americans with foot pain suffered from heart problems. The connection between chronic diseases and foot pain is not coincidental. Foot pain, regardless of its cause, can limit the mobility of individuals and contribute to a more sedentary lifestyle and the onset of numerous chronic conditions.

Medically necessary care provided by podiatrists can reduce the risk of and prevent complications from diabetes as well as other diseases, while at the same time offer savings to our heavily burdened health care system. A recent study conducted by Thomson Reuters indicates that foot and ankle care furnished by podiatric physicians improves patient health and has a positive return on investment. According to the study, patients with diabetes presenting with foot ulcers who see podiatrists are less likely to suffer hospitalization or amputation than patients who had not received care from a podiatrist. Moreover, the study found that each dollar invested in care furnished by podiatric physicians offers the payer up to \$51 in savings.

In its first century, APMA has served the nation through two world wars and other conflicts; helped standardize and enhance educational standards; promoted the profession to patients and the public; and built lasting relationships with other medical specialties. The association regularly hosts medical and scientific meetings dedicated to highlighting and disseminating research findings and clinical advances in the prevention, detection, treatment, and the cure of foot, ankle and related conditions. And it continues to meet its clinical and scientific mission through its publication of academic journals and clinical statements on the prevention, diagnosis, treatment, and cure of foot and ankle disorders; through providing continuing medical education in foot and ankle care; and through consumer education on foot and ankle health.

Mr. Speaker, I ask my colleagues to join with me in congratulating the American Podiatric Medical Association on its 100th anniversary, and in recognizing its members' significant service and contributions to our country's health-care delivery system.
