#### STATEMENTS ON INTRODUCED BUS AND JOINT RESOLUTIONS

By Mr. HOEVEN (for himself, Mr. MCCONNELL, Ms. MURKOWSKI, Mr. BARASSO, Mr. CORNYN, Mr. VITTER, Mr. THUNE, Mr. BLUNT, Mr. WICKER, Mrs. HUTCHISON, Mr. BURR, Mr. HELLER, Mr. RISC, Mr. COATS, Mr. PORTMAN, Mr. KYL, Mr. SESSIONS, Mr. SHELBY, Mr. INHOFE, Mr. COCHRAN, Mr. MCCAIN, Mr. ISAKSON, Mr. CRAPO, Mr. ENZI, Mr. ROBERTS, Mr. BOOZMAN, Mr. COBURN, Mr. JOHNSON, of Wisconsin, Mr. CHAMBLISS, Mr. JOHANNIS, and Mr. LUGAR):

S. 3445. A bill to approve the Keystone XL Pipeline, to provide for the development of a plan to increase oil and gas exploration, development, and production under oil and gas leases of Federal land, and for other purposes; to the Committee on Energy and Natural Resources.

Mr. HOEVEN. Mr. President, I rise to discuss this comprehensive plan for energy security for our Nation.

When I say "energy security," I mean producing more energy than we consume. I believe, with this approach, within 5 to 7 years we can truly be a nation that is energy secure. Again, I mean producing more energy than we consume. This comprehensive plan for energy security is about truly producing all our energy resources in this country.

Many of these bills in this package of Energy bills have already been passed by the House that we are introducing now in the Senate, as well as additional legislation—ideas that Senators have put forward that were adding to it as well.

The approach is similar to the approach we have taken in North Dakota over the last decade. My home State of North Dakota has developed all its energy resources—both traditional and renewable—in a vigorous way over the last decade, and we are now an energy powerhouse for the Nation. We can see what we are doing in oil and gas, but we are doing a tremendous amount in all other forms of energy as well—both traditional and renewable. It is because we worked in a very inclusive way to include everybody's ideas in building a comprehensive energy plan that we call Empower ND—Empower North Dakota.

There was no one person who came up this whole comprehensive plan or

with all the ideas, but we reached out to everyone—all the different energy sectors—and said: Let's collaborate, let's work together, let's pass a comprehensive energy plan, and then let's keep improving it. Let's make it a process rather than a one-time product and keep adding ideas and bringing forth items that will help us spur and drive our energy development in the State, ideas that will create the kind of business climate that will truly empower private investment—private investment that will deploy the new technologies that not only produce more energy but do it with sound environmental stewardship. That is exactly what is happening in North Dakota, and that is exactly what need to do at the national level.

This Domestic Energy and Jobs Act clearly demonstrates that we have an energy plan and that we are ready to go and that we are coordinating with our colleagues in the House as well. Right now there are 30 sponsors for this legislation, including the Republican leadership, as well as the energy leaders.

It also is a plan which has reached out to what the House calls their HEAT team—which stands for House Energy Action Team. Representative MCCARTHY and others, certainly FRED UPTON, who is head of their Energy and Commerce Committee, Representative HASTINGS, and others who are truly energy leaders in the House—people whom I have worked with on things such as the Keystone Pipeline, Representative TERRY and Representative CONNIE MACK and others.

This is about getting people involved in an inclusive way and putting in place an energy policy that truly serves this Nation and empowers private investment. We see how important that is now.

We have hundreds of billions of investment dollars waiting to be invested in producing more energy, more jobs, and more security for our country. This approach will empower private investment to develop all our energy resources. It does things such as reduce the regulatory burden, streamlines permitting—both onshore and offshore—and helps us develop vital infrastructure such as the Keystone Pipeline. It develops our resources on public lands, including our renewables, and setting realistic goals with a market-based approach, not picking winners or losers, and preserving multiple use on our public lands throughout this country. It would put in a freeze and require a study of rules that are driving up our gasoline prices.

It also includes a bill from Senator MURKOWSKI. It directs the U.S. Geological Survey to establish an inventory of critical minerals in the United States and to set policies to help us develop those minerals.

What is the impact? The U.S. Chamber of Commerce, in March of 2011, undertook a study. In that study, they looked and determined there are more
