

last year. While that of course sounds like good news, the story is more complicated. We have heard of at least three child deaths related to abuse or neglect. Some abuse is going unreported. And there are clear gaps in data between the agencies and in the reporting. So I am urging my state to elevate the standards of protective services even higher.

Child Protection Services needs to coordinate with other agencies. They need to share data so we can have a clear picture of the full scope of the problem. Everyone needs to work together to make sure that all Montana kids are safe.

Our Nation must tackle this issue head on. We must embrace our responsibility to protect our children. We need to provide them with safe, nurturing environments and the support they need to thrive and succeed in our society.

We need to make sure that kids have access to physical and mental health services, so they can grow into happy, productive adults. We need to help children with mental illnesses by reducing the stigma surrounding mental health services and ensuring that these young people know there is a strong support network backing them up.

We should look at programs like home visits, which currently provide professional assistance, right at home, for more than 50,000 families across our Nation, and see how they can be improved to do an even better job supporting vulnerable families.

We are blessed to live in the richest, most powerful country in the world. We have to use every resource at our disposal to strengthen our laws to ensure that all children are given a chance to succeed in life.

This bipartisan legislation we are introducing today is a step in the right direction to protect our kids.

I commend my colleagues Senators KERRY and COLLINS for their years of tireless work, fighting for the rights of our children. The House of Representatives has already acted on this legislation. Let us now join together and create a life free of violence and fear for our most vulnerable citizens.

Let us pass the Protect Our Kids Act.

By Mr. KYL:

FINDINGS AND PURPOSES**

SEC. 111. (a) FINDINGS.—Congress finds that—

(1) duties collected on imports of citrus and citrus products have ranged from \$50,000,000 to \$87,000,000 annually since 2004, and are projected to increase, as United States production declines due to the effects of huanglongbing (also known as “HLB” or “citrus greening disease”) and imports increase in response to the shortfall in the United States;

(2) in cases involving other similarly situated agricultural commodities, notably wool, the Federal Government has chosen to divert a portion of the tariff revenue collected on imported products to support efforts of the domestic industry to address challenges facing the industry;

(3) citrus and citrus products are a highly nutritious and healthy part of a balanced diet;

(4) citrus production is an important part of the agricultural economy in Florida, California, Arizona, and Texas;

(5) in the most recent years preceding the date of the enactment of this Act, citrus fruits have been produced on 900,000 acres, yielding 11,000,000 tons of citrus products with a value at the farm of more than \$3,200,000,000;

(6) the commercial citrus sector employs approximately 110,000 people and contributes approximately \$13,500,000,000 to the United States economy;

(7) the United States citrus industry has suffered billions of dollars in damage from

disease and pests, both domestic and invasive, over the decade preceding the date of the enactment of this Act, particularly from huanglongbing;

(8) huanglongbing threatens the entire United States citrus industry because the disease kills citrus trees;

(9) as of the date of the enactment of this Act, there are no cost effective or environmentally sound treatments available to suppress or eradicate huanglongbing;

(10) United States citrus producers working with Federal and State governments have devoted tens of millions of dollars toward research and efforts to combat huanglongbing and other diseases and pests, but more funding is needed to develop and commercialize disease and pest solutions;

(11) although imports constitute an increasing share of the United States market, importers of citrus products into the United States do not directly fund production research in the United States;

(12) disease and pest suppression technologies require determinations of safety and solutions must be commercialized before use by citrus producers;

(13) the complex processes involved in discovery and commercialization of safe and effective pest and disease suppression technologies are expensive and lengthy and the need for the technologies is urgent; and

(14) research to develop solutions to suppress huanglongbing, or other domestic and invasive pests and diseases will benefit all citrus producers and consumers around the world.

(b) **PURPOSES.**—The purposes of this title are to authorize the establishment of a trust to support scientific research, technical assistance, and development activities to combat citrus diseases and pests, both domestic and invasive, harming the United States.

(c) **EFFECT ON OTHER ACTIVITIES.**—Nothing in this title restricts the use of any funds for scientific research and technical activities in the United States.

At the end of the amendment, add the following:

Subtitle B

Citrus Disease Research and Development Trust Fund

SHORT TITLE

SEC. 111. This subtitle may be cited as the “Citrus Disease Research and Development Trust Fund Act of 2012”.

FINDINGS AND PURPOSES

SEC. 112. (a) FINDINGS.—Congress finds that—

(1) duties collected on imports of citrus and citrus products have ranged from \$50,000,000 to \$87,000,000 annually since 2004, and are projected to increase, as United States production declines due to the effects of huanglongbing (also known as “HLB” or “citrus greening disease”) and imports increase in response to the shortfall in the United States;

(2) in cases involving other similarly situated agricultural commodities, notably wool, the Federal Government has chosen to divert a portion of the tariff revenue collected on imported products to support efforts of the domestic industry to address challenges facing the industry;

(3) citrus and citrus products are a highly nutritious and healthy part of a balanced diet;

(4) citrus production is an important part of the agricultural economy in Florida, California, Arizona, and Texas;

(5) in the most recent years preceding the date of the enactment of this Act, citrus fruits have been produced on 900,000 acres, yielding 11,000,000 tons of citrus products with a value at the farm of more than \$3,200,000,000;

(6) the commercial citrus sector employs approximately 110,000 people and contributes approximately \$13,500,000,000 to the United States economy;

(7) the United States citrus industry has suffered billions of dollars in damage from disease and pests, both domestic and invasive, over the decade preceding the date of the enactment of this Act, particularly from huanglongbing;

(8) huanglongbing threatens the entire United States citrus industry because the disease kills citrus trees;

(9) as of the date of the enactment of this Act, there are no cost effective or environmentally sound treatments available to suppress or eradicate huanglongbing;

(10) United States citrus producers working with Federal and State governments have devoted tens of millions of dollars toward research and efforts to combat huanglongbing and other diseases and pests, but more funding is needed to develop and commercialize disease and pest solutions;

(11) although imports constitute an increasing share of the United States market, importers of citrus products into the United States do not directly fund production research in the United States;

(12) disease and pest suppression technologies require determinations of safety and solutions must be commercialized before use by citrus producers;

(13) the complex processes involved in discovery and commercialization of safe and effective pest and disease suppression technologies are expensive and lengthy and the need for the technologies is urgent; and

(14) research to develop solutions to suppress huanglongbing, or other domestic and invasive pests and diseases will benefit all citrus producers and consumers around the world.

(b) **PURPOSES.**—The purposes of this subtitle are—

(1) to authorize the establishment of a trust funded by certain tariff revenues to support scientific research, technical assistance, and development activities to combat citrus diseases and pests, both domestic and invasive, harming the United States; and

(2) to require the President to notify the chairperson and ranking member of the Committee on Finance of the Senate and the Committee on Ways and Means of the House of Representatives before entering into any trade agreement that would decrease the amount of duties collected on imports of citrus products to less than the amount necessary to provide the grants authorized by section 1001(d) of the Trade Act of 1974, as added by section 113(a) of this Act.

(c) **EFFECT ON OTHER ACTIVITIES.**—Nothing in this subtitle restricts the use of any funds for scientific research and technical activities in the United States.

“SEC. 1002. REPORTS REQUIRED BEFORE ENTERING INTO CERTAIN TRADE AGREEMENTS.

“The President shall notify the chairperson and ranking member of the Committee on Finance of the Senate and the Committee on Ways and Means of the House of Representatives not later than 90 days before entering into a trade agreement if the President determines that entering into the trade agreement could result—

“(1) in a decrease in the amount of duties collected on articles that are citrus or citrus products classifiable under chapters 8, 20, 21, 22, and 33 of the Harmonized Tariff Schedule of the United States; and

“(2) in a decrease in the amount of funds being transferred into the Citrus Disease Research and Development Trust Fund under section 1001 so that amounts available in the Trust Fund are insufficient to meet the purposes of the Citrus Disease Research and Development Trust Fund Act of 2012.”.
