# Congressional Record

PROCEEDINGS AND DEBATES OF THE 113<sup>th</sup> CONGRESS, FIRST SESSION

Vol. 159

WASHINGTON, WEDNESDAY, MARCH 13, 2013

No. 36

## House of Representatives

The House met at 10 a.m. and was called to order by the Speaker pro tempore (Mr. BENTIVOLIO).

### DESIGNATION OF SPEAKER PRO TEMPORE

The SPEAKER pro tempore laid before the House the following communication from the Speaker:

WASHINGTON, DC,

March 13, 2013.

I hereby appoint the Honorable KERRY BENTIVOLIO to act as Speaker pro tempore on this day.

JOHN A. BOEHNER,

*Speaker of the House of Representatives.*

### MORNING-HOUR DEBATE

The SPEAKER pro tempore. Pursuant to the order of the House of January 3, 2013, the Chair will now recognize Members from lists submitted by the majority and minority leaders for morning-hour debate.

The Chair will alternate recognition between the parties, with each party limited to 1 hour and each Member other than the majority and minority leaders and the minority whip limited to 5 minutes each, but in no event shall debate continue beyond 11:50 a.m.

### SEQUESTER SHOULD APPLY TO PAY OF MEMBERS OF CONGRESS

The SPEAKER pro tempore. The Chair recognizes the gentleman from Florida (Mr. DESANTIS) for 5 minutes.

Mr. DESANTIS. Mr. Speaker, much has been said about sequestration, but few have mentioned what bothers me the most about it. The pay of Members of Congress is exempted from the sequester. When Members of Congress exempt themselves from the operation of the law, it is not only unfair, it actually violates a core principle of republican government.

There is no less an authority than James Madison who will back me up on this. In *The Federalist* No. 57, he wrote:

I will add, as a fifth circumstance in the situation of the House of Representatives, restraining them from oppressive measures, that they can make no law which will not have its full operation on themselves and their friends, as well as on the great mass of society. This has always been deemed one of the strongest bonds by which human policy can connect the rulers and the people together. It creates between them that communion of interests and sympathy of sentiments, of which few governments have furnished examples; but without which every government degenerates into tyranny. If it be asked, what is to restrain the House of Representatives from making legal discriminations in favor of themselves and a particular class of the society? I answer: the genius of the whole system; the nature of just and constitutional laws; and above all, the vigilant and manly spirit which actuates the people of America—a spirit which nourishes freedom, and in return is nourished by it.

In the spirit of James Madison, I will be filing legislation to make the sequester apply to the pay of Members of Congress at the first moment that is constitutionally permissible. Members of this body must live under the same rules as everybody else. Our Founding Fathers expected it; the American people demand it.

### OUR COUNTRY NEEDS A BALANCED PATH FORWARD

The SPEAKER pro tempore. The Chair recognizes the gentleman from New Mexico (Mr. BEN RAY LUJÁN) for 5 minutes.

Mr. BEN RAY LUJÁN of New Mexico. Mr. Speaker, the House Republican budget unveiled yesterday by Chairman PAUL RYAN is a repeat of the same Tea Party principles that have already been rejected by the American people.

House Republicans are once again determined to place the burden of deficit reduction on the backs of middle class families, while the wealthiest Americans get yet another tax break. After wasting valuable time last Congress voting more than 30 times to repeal

health care reform rather than focus on jobs and the economy, the Republican budget again calls for its repeal.

In addition, their budget ends Medicare as we know it, and surprise, surprise, turns it into a voucher program that reduces benefits and leaves seniors paying higher out-of-pocket costs.

While this budget blueprint is still lacking specific details, it is clear that in order to meet the spending targets it outlines, House Republicans would slash investments in key areas that are essential to economic growth and job creation. Education, job training, science, and research will all be on the chopping block in order to reduce the deficit, with little regard for the jobs that would be lost and the impact it would have on our Nation's competitiveness. The Republican budget factors in the sequestration's arbitrary cuts over the next decade, something else that is being rejected by the American people.

For New Mexico, this can mean more cuts to education targeted at low-income and special needs children; painful cuts to tribal communities that jeopardize our responsibilities to Indian country with our trust responsibilities; and cuts that impact funding for Los Alamos National Lab and the small businesses that contract with it, including cuts to important funding for environmental cleanup at LANL.

Regardless of the Republican rhetoric, the math just doesn't add up without steep cuts that will take their toll on New Mexico, threatening services that support the most vulnerable and investments that lay the foundation for a brighter future.

Our country needs a balanced path forward that focuses on growing the economy and providing opportunities for the middle class families. Sadly, the Republican budget fails to meet this goal.

# IT'S TIME TO APPROVE THE KEYSTONE XL PIPELINE

The SPEAKER pro tempore. The Chair recognizes the gentleman from Montana (Mr. DAINES) for 5 minutes.

Mr. DAINES. Mr. Speaker, 1,636; that's how many days it has been since the application to build the Keystone XL pipeline was filed. It took Canada just 7 months to approve the pipeline. President Obama has taken 4½ years.

Study after study has shown that not only is the pipeline safe, but it will provide a means of transporting oil that is safer than using trains or trucks. It is also environmentally safe. In fact, when compared to other means of transportation, it is perhaps the most environmentally friendly way to transport oil across our country. It will create thousands of jobs—at least 800 in my home State of Montana—and he still won't make a decision.

Earlier this month, the U.S. State Department issued its Supplemental Environmental Impact Statement for the Keystone XL Presidential permit application, which confirmed what we already knew. The Keystone XL pipeline will have no significant impacts on the environment. In fact, this is the fourth environmental review of the Keystone pipeline—with a final report still to come—even though report after report has stated that the pipeline will not have significant environmental effects.

This report also comes after Nebraska Governor Dave Heineman approved a new route through his State for the Keystone XL pipeline project. Just this past January, I joined 150 other House Members in calling on President Obama to quickly approve the permits for Keystone in light of this new route. That was two months ago, and we have yet to hear anything back from the President.

As a member of the House Energy Action Team, I understand how important this project is to our Nation and to my home State of Montana. Let me be clear—this project means jobs for Montanans. This project could directly create more than 800 good-paying jobs in Montana and thousands more across the Nation.

It means coming one step closer to North American energy independence. The Keystone XL would be able to move up to 830,000 barrels of oil per day. That is about half the amount that the U.S. presently imports from the Middle East. And of the oil moved each day, 100,000 barrels will come from the Bakken formation, which spreads across Montana and North Dakota.

This isn't about politics. Republicans and Democrats alike support the pipeline. This is about our Nation's security. This is about lowering energy costs for American families. This is about American jobs.

Enough is enough. We can't afford to wait any longer. It has been 1,636 days. It's time for President Obama to approve the Keystone XL pipeline.

# HOW ENERGY USE IMPACTS CLIMATE CHANGE

The SPEAKER pro tempore. The Chair recognizes the gentleman from California (Mr. MCNERNEY) for 5 minutes.

Mr. MCNERNEY. Mr. Speaker, I rise today to raise awareness of how energy use impacts climate change and to show by example what is being done about it.

Our Nation continues to rely on high-polluting energy sources that threaten our climate and threaten our national security. We need to focus at all levels of government, Federal, State, and local, as well as in the private sector to promote clean energy and energy efficiency. State and Federal facilities, above all else, should be the gold standard for clean energy and energy efficiency.

For example, the Lincoln Unified School District, located in Stockton, California, recently committed to placing solar panels on rooftops throughout the school district. Lincoln was able to purchase these solar panels through low-interest Clean Renewable Energy Bonds to help finance this project that is estimated to save \$1 million per year on energy costs. Not only does this project increase use of clean energy sources, but all the savings will be put back into educational programs, so this is truly a win-win for our students.

In addition, the University of the Pacific, also located in Stockton, California, has increased energy efficiency and sustainability. Pacific installed solar panels, energy-efficient lightbulbs in the quad and other locations, installed a robust recycling program, and installed a replacement chiller on its air-conditioning system which uses 52 percent less energy than the old chiller. It's impressive that these advancements were led by both students and faculty at the University of the Pacific.

These are just two examples of why I am introducing the Solar Energy Deployment Act. We need to encourage greater use of solar and other clean energies in our neighborhoods and on public and private lands. The Solar Energy Deployment Act awards grants on a competitive basis to State and local governments to design and install solar equipment on rooftops and above parking lots they own.

I commend the efforts made by the schools and public entities such as the Lincoln Unified School District, the University of the Pacific, and others across California and the United States that are making a concerted effort to utilize clean energy resources and to become more energy efficient.

# END HUNGER NOW

The SPEAKER pro tempore. The Chair recognizes the gentleman from Massachusetts (Mr. MCGOVERN) for 5 minutes.

Mr. MCGOVERN. Mr. Speaker, once again I rise to talk about hunger in America and, specifically, the effort to end hunger now.

Mr. Speaker, hunger is still far too prevalent in America. There are more than 50 million people in this country who don't know where their next meal will come from. Seventeen million of those hungry people are children—17 million, Mr. Speaker. That breaks my heart, especially when we have a way to end hunger in this country. It doesn't have to be this way.

The truth is that hunger is solvable. We have the means, the infrastructure, and the food to end hunger. We just don't have the political will to do so.

This point is delivered in a clear, concise, and emotional way in a documentary that is in theaters now called "A Place at the Table." This film at its core may be a simple story of hunger in America, but it's really an emotional tale about how people are struggling with hunger in this country, about piecing just enough together to make ends meet day by day, week by week, and month by month.

These stories are not new and, unfortunately, they aren't unique. We don't have to look far to see a working mother who struggles to provide nutritious food for her children. We don't have to look far to see a young girl who struggles in school simply because hunger prevents her from concentrating in the classroom. We don't have to look far to see food pantries stretched beyond their means as they try to keep up with the demands of feeding the hungry in their communities. And we don't have to look far to see how often the hungry and undernourished are utilizing our health care systems for hunger and nutrition-related conditions.

What is new and unique today is the platform through which we hear these stories and experience what these individuals featured in the film are going through. The stories told by the directors, Kristi Jacobson and Lori Silverbush, weave together the heart-breaking history of how we went from almost ending hunger in America in the late 1970s, thanks in large part to the bipartisan cooperation led by Senator George McGovern and Senator Robert Dole, to now more than 50 million hungry in this country—40 years later, 50 million hungry in this country.

But this isn't just a story of woe, Mr. Speaker. For me, this is also a story of hope and optimism, a story of a difficult struggle, but a struggle fought with dignity. And it is a story that is part of a bigger purpose and goal, and that goal is to end hunger now.

At its heart, the point of this documentary is that we can end hunger now. And I'm pleased and impressed that a strong, coordinated social action plan accompanies this film.

This comprehensive plan can be found online at [www.takepart.com/table](http://www.takepart.com/table), and I encourage everyone to take a look at this Web site. Once there,
