

This invention has saved this person's life, because 20 years ago, that young girl would probably have had collapsed blood vessels or died of some type of situation from infection from putting the needles in one's arm. This is what happened 20 years ago and why the survival rate now of such cancer patients has gone up.

I feel like hugging the person who invented that device. That person deserves our love and gratitude. This administration has seen fit to punish this person for this creativity and this innovation.

This administration put a 2.5 percent tax not on the net, not after all the expenses that this inventor went through to invent this, all the expenses to go into producing it, all the expenses that go into distributing it, making sure people knew how to use this new device. No, no. This is a 2.5 percent tax on the gross income. It is a horrendous penalty on the person who has saved the lives of all these people. That is what this Affordable Care Act is all about. That is what ObamaCare is all about.

In some misguided idea that we are going to redistribute the wealth and take care of everybody through government, we are now doing things that are of great harm to the people in this country, not just to the infrastructure, the financial infrastructure of our health care which is collapsing under the incompetence of this law that is foisted upon them with lies, no, but also we are now facing a situation where the very heart and soul of human progress, medical technology, is being punished through this law.

I join with my colleagues and say that this is something we should all join together, repeal, and start again and try to do a better job next time.

Ms. FOXX. I thank my colleague for his comments and yield back the balance of my time.

SENATE ENROLLED BILLS SIGNED
