

vana." The Columbus Dispatch similarly noted, "For those inventing the future, Ohio is the hot spot."

They are correct. Ken Murray, Transformatix founder and CEO, explained:

One reason we located our new company, BioLinQ, in Ohio, rather than California, is because Ohio demonstrated the most forward-thinking approach to technology and high-speed innovation.

Ray Leto, president of Total Sim, echoed those sentiments:

Our business focuses on modeling and simulation for the automotive industry, and we chose Ohio over the North Carolina Research Triangle because of the advanced technology infrastructure available here.

The knowledge economy is the pathway to restoring our national prosperity, and I am proud to represent Ohio—a pioneering State that is providing the tools and leading the way.●

RECOGNIZING THE REHOBOTH ART LEAGUE

● Mr. CARPER. Madam President, on behalf of Senator COONS, Congressman CARNEY, and myself, I wish to recognize the Rehoboth Art League, its staff and artist members who on June 21, 2013, will celebrate its founding in 1938 and the 75 subsequent years of cultivating the arts in Sussex County and the State of Delaware.

The Rehoboth Art League was Sussex County's first organized cultural arts center and has been recognized by the State of Delaware Division of Historical and Cultural Affairs for its significance and influence that extends far beyond Rehoboth and even the borders of our State. The Rehoboth Art League grew out of the tradition of the Federal Arts Project, which was a subset of the Works Progress Administration during the Great Depression. This tradition of art appreciation, support for working artists, and the concept of enriched community living, inspired the late Mrs. Louise Corkran to organize the Rehoboth Art League, with the help of her husband, COL Wilbur Corkran. Her involvement with the founding of the Delaware Art Museum, as well as her collaboration through the years with such renowned national artists as Howard Pyle, Frank Schoonover, N.C. Wyeth and others from the Brandywine and Hudson Valley Schools, were a significant factor in the Rehoboth Art League's development. Over the years, it has become a place that attracts and nurtures artists from all over the country, and inspires art appreciation through its many educational offerings.

The Rehoboth Art League sits in the small village of Henlopen Acres, DE, on an historic campus overlooking the Lewes-Rehoboth Canal and the Valley of the Swans, and maintains two colonial period buildings, The Paynter Studio, 1791, the Peter Marsh Homestead and Stables, 1743, as well as Louise Corkran's garden, which is one of the only public gardens in Sussex County.

The Rehoboth Art League owns and cares for a significant collection of Delaware art and archives, with pieces by Howard Pyle, Jack Lewis, Howard Schroeder, Ethel P. B. Leach, and others. Its collection includes the renowned "Doors of Fame," providing tangible evidence of the legacy and history of the Rehoboth Art League. The tradition of signing doors was prevalent in art colonies around the country in the first half of the twentieth century. The Rehoboth Art League has, since its dedication in 1938, provided three doors for signatures by artists, dignitaries, and national and international visitors. These doors record the persons who have contributed to its success over the years. Today there are nearly 300 signatures, often accompanied by a personal artistic flourish or drawing. These signatures include six Delaware Governors, along with many artists from the State and national pantheon, educators, scientists, musicians, and other notables.

Today, the Rehoboth Art League continues to attract artists and visitors from all over the country. Its members hail from 19 different States. It partners with 13 other organizations from the arts, education, and health and human services across the region to provide a variety of programming, both on the campus and around the county. Works from its collection have been on display at the Biggs Museum, Buena Vista Conference Center, the Governor's mansion, and the Federal offices of Senator CHRIS COONS. The Rehoboth Art League also collaborates with First State Community Action Agency to take arts education to 600 at-risk students in Sussex County and to many senior citizens in the region as well.

Today we are delighted to recognize the Rehoboth Art League, which for more than 75 years has been a community of artists who share their art, inspire and support one another and enrich the lives of us all.●

TRIBUTE TO LIEUTENANT COLONEL PETER FORD

● Mr. GRAHAM. Madam President, I ask my colleagues to join in recognizing LTC Peter Ford of South Carolina for his extraordinary service to the Nation while serving in the United States Army Reserves and National Guard for the past 32 years.

Lieutenant Colonel Ford started his military career in 1981 as an enlisted soldier—an infantryman—in the Virginia National Guard. After graduating from Gustavus Adolphus College, where he was the only ROTC cadet, Lieutenant Colonel Ford was commissioned as a second lieutenant in the Army Ordinance Corps. After attending the Officer Basic Course, Lieutenant Colonel Ford, in his civilian capacity, was sworn in as a special agent with the State Department Diplomatic Security Service.

While serving as the Regional Security Officer, RSO, at the embassy in

Switzerland, Lieutenant Colonel Ford was assigned as a military intelligence officer at the Military Intelligence Group at the 7th Army Reserve Command in Germany. In 1997, he mobilized to support the war in Bosnia. Following his return to the United States, he joined the Office, Chief of the Army Reserves, as a reserve congressional liaison officer and also served as a reservist with the 157th Individual Mobilization Augmentee Detachment.

In 2003, Lieutenant Colonel Ford was assigned as a congressional detailee to the Committee on Homeland Security and was named executive officer of the 157th. After serving as RSO in Armenia, he was detailed to the House Committee on Foreign Affairs.

In the fall of 2007, at the beginning of the surge during Operation Iraqi Freedom, Lieutenant Colonel Ford volunteered to serve as an Army reservist in Iraq. He was attached to the American Embassy in Baghdad and, as the director of the Office of Hostage Affairs, was responsible for U.S. kidnapping cases throughout the country. Following the completion of his military tour, Lieutenant Colonel Ford continued his service in Iraq. For an additional year, he worked as a DSS agent with the State Department in the same position.

Returning to the United States, Lieutenant Colonel Ford obtained a masters degree from the National Defense Intelligence College and joined Prisoner of War/Missing in Action Affairs as a drilling Reservist. He was subsequently assigned to the Diplomatic Security's Overseas Security Advisory Council, OSAC. In October 2011, Lieutenant Colonel Ford took command of the 157th Individual Mobilization Augmentee Detachment. During his military and civilian careers, Lieutenant Ford has worked in over 110 countries.

On behalf of a grateful nation, I join my colleagues today in saying thank you to LTC Peter Ford for his extraordinary dedication to duty and service to the country throughout his distinguished career in the United States Army.●

TRIBUTE TO KATHERINE BOMKAMP

● Mr. MANCHIN. Madam President, today I wish to recognize Katherine Bomkamp, a West Virginia University student who has, out of profound compassion for wounded veterans and incredible talent in STEM sciences, created a prosthetic device to address phantom pain felt by millions of the world's amputees.

At a young age, Katherine spent a significant amount of time at the Walter Reed Army Medical Center with her father, a U.S. Air Force veteran. There, she discovered her passion and eagerness to help suffering soldiers as she listened to the difficult challenges many of them were facing upon returning home.

The conversations between Katherine and the many veterans she encountered are what inspired her to create the Pain Free Socket, an invention that incorporates thermal biofeedback to eliminate phantom pain. This device began as a tenth grade science project and has made her a hero to veterans in distress.

Since patenting the invention, Katherine has started her own company and will soon begin clinical trials.

Not surprisingly, Katherine has received a lot of media attention as a result of her innovation and achievement, including global coverage by CNN, the New York Times, BBC, and many others.

The West Virginia University junior was even featured in Glamour Magazine as one of the Top 10 College Women in the country and won \$2,500 from the L'Oreal Paris Beauty of Giving Award.

Katherine, who came to West Virginia from Waldorf, MD, is an extraordinary example of success in the STEM fields of science, technology, engineering and mathematics, not just in my home State, but across the Nation and the world.

A Newman Civic Fellow, she is one of the youngest ever to present to the Royal Society of Medicine's Medical Innovations Summit in London, England.

I am so proud of Katherine and her dedication to helping those who have fought courageously and honorably for this country. She has found a way to serve those who have served this great Nation—and who have risked it all in doing so.

On behalf of the State of West Virginia, I congratulate Katherine on all her achievements and wish her the best of luck in her very bright future. And I ask my Senate colleagues to join me in thanking Katherine for her compassion to work for the brave men and women of our Armed Forces.●

UNIVERSITY OF CENTRAL FLORIDA

● Mr. RUBIO. Madam President, I would like to take this opportunity to recognize the 50th anniversary of the University of Central Florida, UCF. As a shining success story in America's higher education system, UCF has recently become the Nation's second-largest university. Not only has UCF grown in size, but also diversity, quality of education, and reputation. Today, UCF serves nearly 60,000 students, including a 39 percent minority population.

I was pleased to learn the first class of medical students graduated from UCF earlier this year, those graduates were a part of a historical undertaking. The impact of UCF's medical school in the region is historic as well. UCF's College of Medicine plays a vital role in Orlando's "Medical City" at Lake Nona, a cluster of research institutions that will help to position Central Flor-

ida as a leader in medical care. UCF hopes for the medical school to not only increase opportunities for medical education in Florida, but to create a climate of excellence among regional research, education and medical care that will make it one of the premier institutions in the world.

I would also like to mention the Institute for Simulation and Training at UCF, who has recently celebrated 30 years of Modeling and Simulation Training and is an internationally recognized research institute who has partnered with both military contractors and the Department of Defense.

Congratulations to the University of Central Florida on reaching this milestone and on its many distinguished achievements in research, teaching, and public service as it celebrates its Golden Anniversary. I look forward to 50 more years of accomplishments.●

TRIBUTE TO KATHRYN A. CONDON

● Mr. SANDERS. Madam President, as chairman of the Senate Committee on Veterans' Affairs, I would like to take a moment to recognize Ms. Kathryn A. Condon, who has retired after over 30 years of public service. Specifically, I would like to thank Ms. Condon for her steadfast leadership as the Executive Director of Arlington National Cemetery.

Arlington National Cemetery embodies one of our commitments to those who defend our Nation—to provide them with a final resting place that honors their service. With approximately 27 to 30 funeral services a day, Arlington is one of many active cemeteries for our fallen heroes. It is also considered a national treasure for its rich history, dating back to the Civil War, and historic memorials, such as: the Tomb of the Unknowns; the Women in Military Service Memorial, which honors the brave women who have honorably worn our Nation's uniform; and Chaplains Hill, the eternal resting place of Chaplains from four different wars.

Although Arlington is now a shining example of how we honor those who have made the ultimate sacrifice, it has not always been so. In 2010, the Army's inspector general discovered grievous errors, dysfunction, and mismanagement at Arlington. These highly publicized problems were linked to antiquated procedures and failure by the cemetery's senior leadership.

Ms. Condon's steadfast commitment and dedication as Arlington's top executive has reinstated Arlington as a national shrine for those who have made the ultimate sacrifice. Her leadership has led to the correction of all of the issues highlighted by the Army inspector general's 2010 report and the creation of processes that will ensure the longevity of this national shrine and make certain that previous mistakes are not repeated.

Particularly, I would like to highlight Arlington's new burial record sys-

tem, ANC Explorer. In 2010, Arlington relied on a paper-based record system that caused confusion and led to the misplacement of burials. Thanks to Ms. Condon, Arlington now operates a new geospatial tracking system, which permits the families of our fallen heroes and cemetery staff to, among other things: receive turn-by-turn direction to any burial site or monument; view events, in real-time, occurring through the cemetery; and easily track and maintain burial space.

On behalf of our Nation's veterans and their families, I would like to thank Ms. Condon for her devotion to reaffirming Arlington National Cemetery's status as a national treasure and commend her on an illustrious career in public service.●

TRIBUTE TO CAROL MACK

● Mrs. SHAHEEN. Madam President, today I wish to recognize Carol Mack, principal of Matthew Thornton Elementary School in Londonderry, NH. Carol's dedication to the school's faculty, the Town of Londonderry and the students and families who comprise the school community has shone throughout her 25 years of service to Matthew Thornton. While I know that her leadership will be missed by the school community, I join Carol's family and friends in recognizing her impact and achievements and celebrating her retirement.

Carol's connection to Matthew Thornton began in 1983, when her son Jack was a first grade student at the school and she served as a volunteer. Carol then accepted a position as a teaching assistant at the school, and eventually decided to return to graduate school to attain a Master's Degree in education. Upon completion of her professional degree, Carol rose quickly at Matthew Thornton, serving first as a substitute teacher, then a first grade teacher, and eventually becoming the school's assistant principal. Carol's dedication and hard work was recognized statewide when she was named Assistant Principal of the Year by the New Hampshire Association of School Principals in 2002.

In 2004, Carol moved into a new role as principal of Matthew Thornton Elementary School. Her leadership, vision and commitment to the school's betterment was recognized again in 2012 when the New Hampshire Parent Teacher Association named Carol its Administrator of the Year. But as a former public school teacher, Carol's rewards have come from the students with whom she works on a daily basis. Her vision and leadership undoubtedly inspired generations of students to make the world a better place.

I would like to thank Carol Mack for her hard work on behalf of countless residents of New Hampshire. I am sure that she will be truly missed by the families, staff, and most importantly, the students, of Matthew Thornton Elementary School. I know that her family, including her husband Andy and
