

Clearly, the vote on the previous question on a rule does have substantive policy implications. It is one of the only available tools for those who oppose the Republican majority's agenda and allows those with alternative views the opportunity to offer an alternative plan.

Mr. COLE. Mr. Speaker, I yield back the balance of my time, and I move the previous question on the resolution.

The SPEAKER pro tempore. The question is on ordering the previous question.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Ms. SLAUGHTER. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX, further proceedings on this question will be postponed.

COMMUNICATION FROM THE CLERK OF THE HOUSE

The SPEAKER pro tempore laid before the House the following communication from the Clerk of the House of Representatives:

OFFICE OF THE CLERK,
HOUSE OF REPRESENTATIVES,
Washington, DC, July 10, 2014.

Hon. JOHN A. BOEHNER,
The Speaker, House of Representatives,
Washington, DC.

DEAR MR. SPEAKER: Pursuant to the permission granted in Clause 2(h) of Rule II of the Rules of the U.S. House of Representatives, the Clerk received the following message from the Secretary of the Senate on July 10, 2014 at 10:45 a.m.:

That the Senate passed S. 247.
That the Senate passed S. 311.
That the Senate passed S. 354.
That the Senate passed S. 363.
That the Senate passed S. 476.
That the Senate passed S. 609.
That the Senate passed without amendment H.R. 255.
That the Senate passed without amendment H.R. 330.
That the Senate passed without amendment H.R. 507.
That the Senate passed without amendment H.R. 697.
That the Senate passed without amendment H.R. 876.
That the Senate passed without amendment H.R. 1158.
That the Senate passed without amendment H.R. 3110.
That the Senate passed without amendment H.R. 2337.
That the Senate passed without amendment H.R. 272.
That the Senate passed without amendment H.R. 1216.
That the Senate passed without amendment H.R. 356.
That the Senate passed without amendment H.R. 291.

With best wishes, I am

Sincerely,

KAREN L. HAAS.

ENERGY AND WATER DEVELOPMENT AND RELATED AGENCIES APPROPRIATIONS ACT, 2015.

GENERAL LEAVE

Mr. SIMPSON. Madam Speaker, I ask unanimous consent that all Members

may have 5 legislative days in which to revise and extend their remarks and include extraneous material on the further consideration of H.R. 4923, and that I may include tabular material on the same.

The SPEAKER pro tempore (Mr. CASIDY). Is there objection to the request of the gentleman from Idaho?

There was no objection.

The SPEAKER pro tempore. Pursuant to House Resolution 641 and rule XVIII, the Chair declares the House in the Committee of the Whole House on the state of the Union for the further consideration of the bill, H.R. 4923.

Will the gentleman from Illinois (Mr. HULTGREN) kindly take the chair.

□ 1320

IN THE COMMITTEE OF THE WHOLE

Accordingly, the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill (H.R. 4923) making appropriations for energy and water development and related agencies for the fiscal year ending September 30, 2015, and for other purposes, with Mr. HULTGREN (Acting Chair) in the chair.

The Clerk read the title of the bill.

The Acting CHAIR. When the Committee of the Whole rose on Wednesday, July 9, 2014, a request for a recorded vote on amendment No. 14 printed in the CONGRESSIONAL RECORD offered by the gentlewoman from Nevada (Ms. TITUS) had been postponed, and the bill had been read through page 59, line 20.

AMENDMENT NO. 16 OFFERED BY MRS. LUMMIS

Mrs. LUMMIS. Mr. Chairman, I wish to call up amendment No. 16.

The Acting CHAIR. The Clerk will designate the amendment.

The text of the amendment is as follows:

At the end of the bill (before the short title), insert the following:

SEC. 508. None of the funds made available by this Act may be used in contravention of section 3112(d)(2)(B) of the USEC Privatization Act (42 U.S.C. 2297h-10(d)(2)(B)) and all public notice and comment requirements under chapter 6 of title 5, United States Code, that are applicable to carrying out such section.

The Acting CHAIR. Pursuant to House Resolution 641, the gentlewoman from Wyoming and a Member opposed each will control 5 minutes.

Mr. SIMPSON. Mr. Chairman, I reserve a point of order.

The Acting CHAIR. A point of order is reserved.

The gentlewoman from Wyoming is recognized for 5 minutes.

Mrs. LUMMIS. Mr. Chairman, my amendment would reinforce the Department of Energy's already existing legal obligations when it sells or transfers excess uranium from the Federal inventory.

One of these legal obligations is called the "Secretarial Determination" that the uranium transfers will not have an adverse material impact on the

domestic uranium industry. The other obligation is to comply with the public notice and comment requirements of the Administrative Procedure Act.

The Department's actions regarding uranium have come under justified scrutiny, so I will take both of them in turn.

First, my amendment reinforces the required Secretarial Determination that uranium transfers do not adversely impact the domestic uranium industries.

Congress decided to require a Secretarial Determination because, if the government dumps too much uranium onto the market, it can artificially distort the market and hurt domestic uranium industries. These include uranium mining, uranium conversion, and uranium enrichment industries, all crucial to developing a more robust domestic uranium supply chain to feed our nuclear power plants.

Right now, 90 percent of the uranium used to provide electricity in this country is imported, but it doesn't have to be that way. Here in the United States, including my home State of Wyoming, we have abundant uranium resources. With uranium from American soil and through American jobs, we can correct this imbalance; but the task is made difficult, if not impossible, with the Department of Energy's cavalier uranium transfers.

The Secretarial Determination process has, unfortunately, become a sham. Instead of protecting domestic uranium industries, it has become a tool to destroy them. Prior to the May 15, 2014, Secretarial Determination, the Department commissioned a market analysis that concluded the uranium transfers would reduce employment in the domestic uranium industries by 4 percent and reduce the spot price for mined uranium by 8 percent. That is what their own market analysis provided. Yet the Department is ignoring the results of its own study and is proceeding anyway, based on other information and analysis it decided not to share with the public.

My amendment uses the power of the purse to reinforce existing statutory law, lest the Department flaunt the law, rendering it meaningless.

Second, my amendment reinforces the Department's obligation to comply with the public notice and comment requirements of the Administrative Procedure Act. The Department of Energy has used its excess uranium as a slush fund, selling or bartering uranium to subsidize failed companies like the U.S. Enrichment Corporation or to fund other programs without having to come to Congress for the money. This program has operated in the shadows, making a mockery of our budget process.

I want to quote a recent GAO report on the Department's uranium transfers. It says:

We believe transparency is a fundamental tenet of good government and that our recommendations support actions needed to enhance DOE's transparency.

The GAO identified uranium transfers at below market value to prop up USEC, shortchanging the taxpayer and further distorting uranium markets. The report documented shortcomings in the Department's market analysis of how the transfers would impact uranium markets and the failure of the Department to adequately consult with the domestic industries. Unfortunately, on GAO's Web site, all of their recommendations to the Department to increase the transparency of its uranium transfers remained unfulfilled.

My amendment simply reinforces the existing obligation of the Department to comply with the Administrative Procedure Act. Like any other agency, they have a legal obligation to engage in reasoned decisionmaking, not shadowed and arbitrary uranium transactions.

My amendment barely touches the legislative reforms needed to fix this broken program, but I want to thank Chairman SIMPSON for helping me at least identify a way to address this issue that might be suitable to the appropriations process.

Mr. Chairman, I yield back the balance of my time.

Mr. SIMPSON. Mr. Chairman, I withdraw my reservation of a point of order.

The Acting CHAIR. The reservation of a point of order is withdrawn.

Mr. SIMPSON. Mr. Chairman, I claim the time in opposition, although I am not opposed to the amendment.

The Acting CHAIR. Without objection, the gentleman from Idaho is recognized for 5 minutes.

There was no objection.

Mr. SIMPSON. Mr. Chairman, I support the gentlelady's amendment.

For years, our subcommittee has criticized the Department of Energy's use of its uranium transfer authorities. The Department's reliance on its uranium transfers to generate funds for cleanup has inappropriately circumvented the appropriations process, has adversely impacted our domestic uranium mining and conversion industry, and is now creating instability of funding at Portsmouth as the market price of uranium continues to drop.

The amendment restates current law but sends a message to the Department that it must cease relying on these off-budget measures, and I am pleased to support the gentlewoman's amendment and thank her for it.

I yield back the balance of my time.

The Acting CHAIR. The question is on the amendment offered by the gentlewoman from Wyoming (Mrs. LUMMIS).

The amendment was agreed to.

AMENDMENT OFFERED BY MS. DELAURO

Ms. DELAURO. Mr. Chairman, I have an amendment at the desk.

The Acting CHAIR. The Clerk will report the amendment.

The Clerk read as follows:

At the end of the bill (before the short title), insert the following:

SEC. ____ . None of the funds made available by this Act may be used to enter into any

contract with an incorporated entity if such entity's sealed bid or competitive proposal shows that such entity is incorporated or chartered in Bermuda or the Cayman Islands, and such entity's sealed bid or competitive proposal shows that such entity was previously incorporated in the United States.

Ms. DELAURO (during the reading). Mr. Chair, I ask unanimous consent to dispense with the reading of the amendment.

The Acting CHAIR. Is there objection to the request of the gentlewoman from Connecticut?

There was no objection.

The Acting CHAIR. Pursuant to House Resolution 641, the gentlewoman from Connecticut and a Member opposed each will control 5 minutes.

The Chair recognizes the gentlewoman from Connecticut.

Ms. DELAURO. Mr. Chairman, I yield myself 2 minutes.

My amendment would prohibit Federal contracts issued by agencies under the jurisdiction of this bill from going to entities incorporated in Bermuda and the Cayman Islands, the two nations most often abused as tax havens.

This body has accepted similar provisions for the Departments of Defense, Transportation, and Housing and Urban Development. As before, we should not spend taxpayer money on Federal contracts that go to companies that have renounced their American citizenship in favor of an island tax haven.

Just this week, Business Week wrote an article examining the loopholes that longstanding American companies like Ingersol Rand, which was founded in Connecticut in 1871, have been exploiting in order to enjoy lucrative government contracts while pretending to reside overseas for tax purposes.

□ 1330

These firms simply should not be allowed to pretend they are an American company when it comes time to get contracts, then claim to be an offshore company when the tax bill arrives.

According to a recent study, 70 percent of Fortune 500 companies used tax havens last year. They stashed nearly \$2 trillion offshore for tax purposes, nearly two-thirds of which was hidden away by just 30 firms.

Of the companies who have established subsidies and tax havens, nearly two-thirds have registered at least one in Bermuda or the Cayman Islands. The profits these companies claim were earned in these two island nations in 2010 total over 1,600 percent of the country's entire yearly economic output.

These companies take advantage of our education system, our research and development incentives, our skilled workforce, and our infrastructure, all supported by U.S. taxpayers.

We have already acted on the Transportation-HUD bill and Defense. Let us do the same for Energy and Water. Let's support the firms that are staying at home and meeting their obligations and pass this amendment.

I reserve the balance of my time.

Mr. SIMPSON. Mr. Chairman, I claim the time in opposition to the amendment.

The Acting CHAIR. The gentleman from Idaho is recognized for 5 minutes.

Mr. SIMPSON. Mr. Chairman, I rise to oppose this amendment.

The Financial Services Appropriations bill has carried language for years which prohibits funding for any Federal Government contract with foreign incorporated entities which are treated as inverted domestic corporations. This language has been carried annually in the government-wide General Provisions section of the Financial Services Appropriations bill since approximately 2005 and is requested annually by the current administration.

The changes which this amendment would propose to make could have significant consequences and really should be handled by the proper tax committees.

I urge my colleagues to oppose this amendment, and I yield back the balance of my time.

Ms. DELAURO. Mr. Chairman, "The ranks of Federal contractors with foreign addresses"—and I am quoting from an article that appeared in Bloomberg this week—"The ranks of Federal contractors with foreign addresses are likely to grow this year as a new stampede of companies escapes the U.S. tax system." Escapes the U.S. tax system.

These are companies who are taking their funds, bringing them to Ireland, to the Caymans, to Bermuda because they do not want to pay their fair share of taxes in the United States of America. There isn't a citizen who can get away with that, but we are allowing these companies to do it. And not only that—because it is legal under our Tax Code which has to be reformed, but my God, that is going to take a month of Sundays to get done—in the meantime, they are collecting millions and millions of dollars in Federal contracts.

We are rewarding these ardent corporations who renounce their U.S. citizenship. They go offshore, take their money offshore, and don't pay taxes so that we can do anything about education or biomedical research or any other areas that we have had to cut the budget on so that they can save their money and not pay any taxes. Then we say: Okay, the floodgates are open; come and get a Federal contract. It is wrong and we shouldn't do that.

Mr. Chairman, how much time is remaining?

The Acting CHAIR. The gentlewoman from Connecticut has 1½ minutes remaining.

Ms. DELAURO. I yield 1½ minutes to my colleague from Texas (Mr. DOGGETT).

Mr. DOGGETT. Mr. Chair, I thank my colleague. I have been pleased to join her in adding the language of this type to each appropriation bill that has thus far been approved in the House.

I am surprised that there could be any opposition to it today because all this amendment is saying is, if you renounce your citizenship and go abroad to avoid paying taxes, don't come with hand outstretched to ask the other taxpayers who stayed here and worked in America and who are proud to be American businesses and are paying their fair share, don't ask them to put their tax dollars into providing you a government contract.

It seems to me very apparent that some corporations are willing to do their fair share in paying for American security, energy and water projects, and other vital government services and some are not. There are a string of corporations who have decided they would keep their business operations in America, but they would suddenly renounce their American citizenship and become a citizen of one of these island kingdoms. That is not the American approach of fairness in paying for the services that we need.

This amendment would put an end to that renunciation of citizenship and asking for taxpayer-funded business. It is equitable; it is fair. We cannot have the resources that we need to remain the greatest Nation in the world without having every American citizen contributing their fair share. Most are. Those who renounce their citizenship and nominally declare that they are now a foreign citizen and not subject to full American taxation, they are not carrying their fair share.

I urge adoption of this amendment, an equitable amendment, for fairness in our public policy.

Ms. DELAURO. I yield back the balance of my time.

The Acting CHAIR. The question is on the amendment offered by the gentlewoman from Connecticut (Ms. DELAURO).

The question was taken; and the Acting Chair announced that the yeas appeared to have it.

Ms. DELAURO. Mr. Chairman, I demand a recorded vote.

The Acting CHAIR. Pursuant to clause 6 of rule XVIII, further proceedings on the amendment offered by the gentlewoman from Connecticut will be postponed.

AMENDMENT OFFERED BY MR. KING OF IOWA

Mr. KING of Iowa. Mr. Chair, I have an amendment at the desk.

The Acting CHAIR. The Clerk will report the amendment.

The Clerk read as follows:

At the end of the bill (before the short title), insert the following:

SEC. ____ None of the funds made available by this Act may be used to implement, administer, or enforce the prevailing wage requirements in subchapter IV of chapter 31 of title 40, United States Code.

The Acting CHAIR. Pursuant to House Resolution 641, the gentleman from Iowa and a Member opposed each will control 5 minutes.

The Chair recognizes the gentleman from Iowa.

Mr. KING of Iowa. Mr. Chairman, this is the amendment that strikes the

funds that might be used to enforce the Davis-Bacon wage scale. That is a piece of legislation that passed here in this Congress sometime about 1931. It was designed to keep African Americans out of the labor force in New York as they were building Federal buildings. It is a remnant of the Jim Crow law. In fact, it is the only remnant that remains, as near as I believe, of the Jim Crow law.

So it comes down to this. When you have a relationship between two people and they agree to a wage scale, that is all that should be required here. Instead, this Federal minimum wage scale sets a union scale. It is not prevailing wage; it is union scale.

I have dealt with Davis-Bacon wage scales all of my business life. I started a construction company in 1975. We almost immediately had to deal with the Federal Government coming in and saying, on this side of the road you shall pay your shovel operator this, and on the other side of the road you shall pay him something that might be half again more than that, and the guy that runs the grease gun gets this, and the one that runs the excavator gets that. The Federal Government micromanaging and disrupting the efficiencies in our construction companies results in far higher costs for our construction projects.

We have maintained a series of records over the years what it costs additional when we are doing Davis-Bacon federally mandated union scale jobs, and it runs between 8 and 35 percent in our company over these years. There is other data out there that is done—Beacon Hill has some—that shows a range, but in the end it boils down to a net effect of a 20 percent additional cost for a Davis-Bacon wage scale.

Here we are bleeding red ink in the Federal Government. CBO made a recommendation, if we wanted to move towards balance, the repeal of the Davis-Bacon Act would be one of those things that would help us move in that direction. But on this bill itself, it appropriates \$5.493 billion for Civil Works programs. All of that would fall under the Davis-Bacon-mandated wage scale. And in title II, the Department of the Interior Bureau of Reclamation appropriates \$1.014 billion. So the total in this bill is \$6.507 billion. If my amendment is enacted into law, we are going to see a savings in this bill of \$1.3 billion.

Mr. Chairman, no one can claim to be a fiscal conservative if they think the Federal Government needs to inflate the cost of wages. Supply and demand sets the cost of those wages. A reasonable pay scale is arrived at.

I am hearing people say we must bring in tens of millions of people to do the work Americans won't do and pay them a mandated union scale. This is not settled by the prevailing wage. Somebody will get up and say, no, it is a prevailing wage. They take a survey from contractors and find out what the

prevailing wage is; then they work that out, and a board makes a determination on what is actually the prevailing wage.

It is simply not true in practice, Mr. Chairman. It is not true in practice. In practice, some advisers sit down and they decide whether people in different categories ought to have more money next year or not. It is an arbitrary, subjective decision. It is not prevailing wage.

I know this law. I have been with this for a long time. I know that it costs taxpayers a lot of money. I don't think that there is any way to actually find out how hard this number is. I tell you, it is 8 to 35 percent. Beacon Hill has a different number of around 5 to 38. Mine is 8 to 35. I think theirs is 5 to 38 percent. But it averages out to about 20 percent, and that does not include the inefficiencies that are wired into this.

The inefficiencies come when you have labor that is competing for the highest paying jobs and doing sometimes the most inefficient thing with the most inefficient machine because it pays the most money. It is a Jim Crow law. It needs to be eradicated. It was designed to lock African Americans out of the construction trades, particularly in New York, and now it is a Holy Grail for union wages.

I used to say for the gentleman in Massachusetts who was here at the time, when he would say any time there is a relationship between two or more consenting adults the Federal Government should not stick their nose into it, I would say I agree with that. There is no reason why I shouldn't be able to climb into my son's excavator and let him pay me \$10 an hour, whatever we agree to, or \$15 or \$20, not the mandated wage scale.

So I urge adoption of my amendment that would eliminate the enforcement of the Davis-Bacon wage scale on this bill, and I yield back the balance of my time.

Ms. KAPTUR. Mr. Chairman, I claim the time in opposition.

The Acting CHAIR. The gentlewoman from Ohio is recognized for 5 minutes.

Ms. KAPTUR. Mr. Chairman, I rise in opposition to the King amendment.

What is interesting to me is that the net effect of the King amendment would be to drive wages down, another Republican amendment to not really show any respect for the workers of this country. Are they all going to work for poverty wages?

Millions of our citizens still remain out of work, the middle class is shrinking, and here we have a Member that stands up and he wants to have lower wages. The public wants Congress to create middle class jobs and to pay people what they are worth.

The interesting thing about this amendment is that, when you look back at all the studies that have been done, for instance, when President Bush suspended Davis-Bacon wages during the Hurricane Katrina rebuilding efforts, construction costs went up

due to the dramatic increase in the employment of unqualified workers.

I would like to say to the gentleman—and I know you are a handyman because you have told me you are—that the people who work on these projects are ironworkers. I defy anybody in this place to do that. I think STEPHEN LYNCH did that work. Congressman LYNCH is about the only one that survived that. Boilermakers, carpenters, operating engineers, electricians, laborers, sheet metal workers, cement masons, roofers, painters, these people go up on those high bridges and they risk their lives. They need training. And do you know what? They deserve the wage they get under contract—under contract—not by happenstance, not by accident.

I find it interesting that the gentleman offers this amendment, because in your district, since 1995, you have received \$9 billion in Federal subsidy that goes to your farmers. I don't see the gentleman railing against the subsidies that come to your district. You get insurance. Your farmers get insurance if they lose their crop. What does an ironworker get if he falls off high scaffolding in New York City or Toledo, Ohio, or Cleveland or wherever? What does that worker get?

It is interesting—I think the gentleman is kind of disingenuous—your State ranks second in the Nation for agriculture subsidies. The Federal Government holds you up. Davis-Bacon simply says that, when you go to work, the price of what you are paid, your labor, is by contract; it is not by happenstance; it is not by accident; it is not by exploitation. In fact, we know when better buildings are built, when safe bridges are built, there are no washouts under tunnels and bridges. That is a good thing. That is a good thing for America.

So I hold respect for the workers who want to work, who receive the training to work, who know how difficult the work is.

I will tell you a story from my own district. We built one of the biggest bridges in Ohio several years back. We lost ironworkers and an operating engineer in that process, though we had signed every kind of safety agreement we could possibly sign. And do you know what happened? The construction company decided, because there were at least two lanes, they would pit sets of workers against one another to see who could finish the job fast enough. What happened was some of the cranes were not secured at the base as they hung above the river. The construction company, which was supposed to be abiding by the law and all the safety standards, found a trick in order to save a couple of pennies, and it cost the lives of some of the finest workers in the country.

□ 1345

I devoted months and months and months to making sure that there were good safety standards in place. And they always find a way around it.

This is dangerous work. This is work that most people in this Chamber most likely never thought about, never did; don't understand what these workers go through in cold winter months, hanging above oil rigs across this country; handling public projects underground, above ground, above water.

It is unbelievable what these people do. They go to other countries. Look at the dangerous scaffolding that exists in places like Ukraine, and you respect the trades of this country, who have managed to build apprenticeship and training programs so we don't lose lives needlessly.

Davis-Bacon assures we have a middle class standard; that we have labor valued by contract, not by accident, not by happenstance, not by subsidy, like the gentleman's district gets, but by plain hard work.

I couldn't be more in opposition to any amendment offered this afternoon, and I think the gentleman must be misguided in what he is trying to do here. But I think it is important to have definable standards.

I yield back the balance of my time.

The Acting CHAIR. The Chair would ask Members to address their remarks to the Chair and not to other Members in the second person.

The question is on the amendment offered by the gentleman from Iowa (Mr. KING).

The question was taken; and the Acting Chair announced that the ayes appeared to have it.

Ms. KAPTUR. Mr. Chairman, I demand a recorded vote.

The Acting CHAIR. Pursuant to clause 6 of rule XVIII, further proceedings on the amendment offered by the gentleman from Iowa will be postponed.

AMENDMENT OFFERED BY MS. SPEIER

Ms. SPEIER. Mr. Chairman, I have an amendment at the desk.

The Acting CHAIR. The Clerk will report the amendment.

The Clerk read as follows:

At the end of the bill (before the short title), insert the following:

SEC. ____ . None of the funds made available by this Act may be used in contravention of section 4712 of title 41, United States Code.

The Acting CHAIR. Pursuant to House Resolution 641, the gentlewoman from California and a Member opposed each will control 5 minutes.

The Chair recognizes the gentlewoman from California.

Ms. SPEIER. Mr. Chairman, I think we can all agree that we want the workers at our nuclear facilities to be proactive in reporting health and safety violations. It seems pretty obvious.

In California, whistleblowers were key in pointing out critical safety problems at the San Onofre Nuclear Generating Station. Had these brave whistleblowers not come forward, we could have had a Fukushima-like meltdown right next to the Marine Corps Base at Camp Pendleton and within 50 miles of 8 million Americans. We need more whistleblowers, not less.

That is why I was flabbergasted to learn that the Department of Energy has allowed its contractors to force their employees to sign agreements not to disclose waste, fraud, or abuse. The DOE's allowance of nondisclosure agreements has been the subject of ongoing congressional investigations, which found that whistleblowers at the Hanford plutonium processing plant in Washington State were fired after raising safety concerns. Not only does this violate basic principles of workplace safety, but it circumvents Congress' constitutional duty to conduct oversight over governmental activities.

This is a part of pattern of abuse by contractors using employment contracts to hide outrageous crimes within their organizations.

In 2005, an employee of a contracting company deployed to Iraq was gang-raped by her coworkers and was then prevented from going to court because her employment contract said that sexual assault allegations would only be heard in private arbitration.

Another contract worker in Iraq reported \$80 million in fraud by the major defense contractor that employed him and was terminated for blowing the whistle. The employer used the excuse that the employee had missed a conference.

Shockingly, the Department of Energy is actually subsidizing this type of illegal and unethical activity with taxpayer money. In many instances, DOE is picking up the legal tabs for these contractors, funding long legal battles against the very whistleblowers who have bravely come forward to protect public health and safety.

The DOE told me just this week that they have no intention of stopping these subsidies, and that they would only seek reimbursement from the contractors if the whistleblower won in court.

My amendment is simple. It makes clear that the Department of Energy must protect non-Federal employees from whistleblower retaliation. It is the workers on the front lines who are best suited to identify and expose misconduct, but contract workers are the most vulnerable to termination.

The risk of career-ending retaliation is currently too great for most non-Federal employees to blow the whistle on their employer or contract manager.

The DOE must stop allowing its contractors to stifle whistleblowers through illegal workplace secrecy agreements and taxpayer-funded lawsuits.

Mr. SIMPSON. Will the gentlewoman yield?

Ms. SPEIER. I yield to the gentleman from Idaho.

Mr. SIMPSON. We would be happy to accept the gentlewoman's amendment.

Ms. SPEIER. Mr. Chairman, I yield back the balance of my time.

The Acting CHAIR. The question is on the amendment offered by the gentlewoman from California (Ms. SPEIER).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. LANKFORD

Mr. LANKFORD. Mr. Chairman, I have an amendment at the desk.

The Acting CHAIR. The Clerk will report the amendment.

The Clerk read as follows:

At the end of the bill (before the short title), insert the following:

SEC. 508. None of the funds made available by this Act may be used to prepare, propose, or promulgate any regulation or guidance that references or relies on the analysis contained in "Technical Support Document: - Social Cost of Carbon for Regulatory Impact Analysis - Under Executive Order 12866" issued by the Interagency Working Group on Social Cost of Carbon, United States Government (February 2010), "Technical Support Document: - Technical Update of the Social Cost of Carbon for Regulatory Impact Analysis - Under Executive Order 12866" issued by the Interagency Working Group on Social Cost of Carbon, United States Government (May 2013), "Technical Support Document - Technical Update of the Social Cost of Carbon for Regulatory Impact Analysis - Under Executive Order 12866" issued by the Interagency Working Group on Social Cost of Carbon, United States Government (revised November 2013), or "Technical Support Document - Technical Update of the Social Cost of Carbon for Regulatory Impact Analysis - Under Executive Order No. 12866", published at 78 Fed Reg. 228 (November 26, 2013).

The Acting CHAIR. Pursuant to House Resolution 641, the gentleman from Oklahoma and a Member opposed each will control 5 minutes.

The Chair recognizes the gentleman from Oklahoma.

Mr. LANKFORD. Mr. Chairman, in 2010, the administration put together a working group to monetize the cost per ton of carbon emissions for use in cost-benefit analyses for rulemaking undertaken by all agencies in the Federal Government, and then reconvened this group again in 2013 to further increase what they called the "social cost of carbon." They increased that amount by 50 percent in just 3 years.

The process was done behind closed doors and without any public input. The administration refuses to release how much of their deliberations were done in public, how much were done in private, or any of the details of their deliberations. They refuse to release the way they used the scientific modeling or even who actually did the modeling for them, or even something as basic as the list of participants at the meeting—even when it was discussed.

Months after releasing the report—and only after sustained pressure—the administration relented, put the document and the numbers up for public comment, a procedure that is routine for the rulemaking process. But the administration has continued to use the calculations that they said they set aside. They use those calculations for the recent EPA rules decreasing emissions by 30 percent for existing power plants by 2030.

My amendment would prevent the Department of Energy from doing the same thing. This is a rule that has been set aside. It is a number that has not

been agreed to and there was no public comment for. They cannot change a regulatory number without any notice and comment and without any public input. This would prevent them from doing that.

The DOE rulemakings using the social cost of carbon have the potential to raise the cost for everyday activities and purchases for all Americans.

I would ask that this group join me in supporting the amendment, which would prohibit the flawed and capricious social cost of carbon rule from being implemented by the Department of Energy.

With that, I reserve the balance of my time.

Ms. KAPTUR. Mr. Chairman, I claim the time in opposition.

The Acting CHAIR. The gentlewoman from Ohio is recognized for 5 minutes.

Ms. KAPTUR. Mr. Chairman, this amendment tells the Department of Energy to deny the latest climate change science.

The amendment denies that carbon pollution is harmful and, according to this amendment, the cost of carbon pollution is zero. That is science denial at its worst.

You don't have to look too far to discover the damage already caused by climate change. In fact, in the State that I live in, what used to be Tennessee's ecosystem and climate zone is no more. It has been moved up. If you plant any seed in the ground, you look at the back of the packet, it has all been changed.

We see very unusual weather patterns developing all across our Nation and the world.

We can't put our heads in the sand and deny reality. There is a reality out there.

There was a book written called, "Last Child in the Woods," and it talks about how most Americans now don't spend enough time outdoors. In fact, a lot of them are even afraid to be out there. So a lot of people spend their life in air-conditioned situations or well-heated situations and don't really look at what is happening to our ecosystem.

In May, our Nation's leading climate scientists released the National Climate Assessment, which confirmed that climate change is real, it is caused by humans, and it is already harming communities across America. The assessment explains that scientific evidence is "unequivocal." This amendment tells the Department to ignore these scientific findings.

The latest science shows that climate change is expected to exacerbate heat waves. Has anybody noticed the erratic nature of what is happening in the places you live?

Droughts. I heard Senator FEINSTEIN say the other day that California is become a desert State. Interesting statement.

Wildfires. Who can deny those?

Floods and water- and vector-borne diseases will pose greater risk to human health, to animal life, and any living creatures around us.

It is interesting to me that, in my own State, the pork industry is undergoing an incredible implosion because of something that is infecting the hog population and they are being lost, not by the tens or the hundreds or the thousands, but by the millions. There is something wrong.

Wheat and corn yields are already experiencing negative impact due to climate change. After 2050, the risk of overall declining crop yields increases substantially.

Federal agencies have a responsibility to calculate the cost of climate change and take them into account.

Unfortunately, what this amendment would require is that the government assume zero harm and zero cost from carbon pollution and carbon change.

The truth is that unchecked climate change would have catastrophic economic impacts here in the United States and across the globe. Those who are less fortunate will bear the heaviest burdens.

I urge my colleagues to reject this amendment. Don't be a science denier. Pretending that climate change doesn't exist won't make it go away. Maybe every single Member of this Chamber should have to enroll in some STEM classes so that science and technology and engineering and math are a part of our DNA and it might be easier to really evaluate the world around us with more objectivity.

I reserve the balance of my time.

Mr. LANKFORD. Mr. Chairman, I would be glad for the Members of this body to enroll in a science class. I would also be glad for the Members of this body to enroll in a world history class and possibly look at the history of the Earth.

Do you realize there were glaciers in Ohio centuries ago?

If we are talking about weather today, we are talking about a different topic. We are talking about an administration not following the Administrative Procedure Act.

If this is about an administration saying they can change rules as they choose to, I look forward to seeing that same standard being applied to Republican Presidents in the days ahead.

But when an administration can change a rule without notice and comment and shift the social cost of carbon by 50 percent in a 3-year time period without following the rule, without following the law, so much so that when we addressed it in a hearing, they admitted it, set the rule aside, and then the EPA chose to use it anyway, we are not talking about weather anymore. We are suddenly talking about the rule of law.

□ 1400

Now, this is not an area on which we had disagreement—Republicans and Democrats—in committee because it was clear that the administration did not follow the rule of law. This is a simple statement. It is not a statement

about climate change. It is not a statement about a future ice age or of a future flood. It is a statement about: Do we choose to follow the law or not?

If someone wants to argue that we shouldn't follow the Administrative Procedure Act, I look forward to the day when we just set the entire thing aside and let the administration do whatever it wants to at any point, but I hope that day does not occur and that we do follow the rule of law and require the administration to do the same.

With that, I reserve the balance of my time.

Ms. KAPTUR. Mr. Chair, I would inquire of the time remaining on both sides.

The Acting CHAIR (Mr. WESTMORELAND). The gentlewoman from Ohio has 1½ minutes remaining, and the gentleman from Oklahoma has 1 minute remaining.

Ms. KAPTUR. Mr. Chairman, in closing, let me say that Federal agencies have a responsibility to calculate the costs of climate change and to take them into account. This amendment would tell the Department to ignore those impacts, and that, in my judgment, is irresponsible.

The administration is using common sense, and that was the clear message from the Government Accountability Office when it added climate change to its high-risk list. That is exactly what the Obama administration is doing.

An interagency task force worked over the last couple of years to estimate the costs of harm from carbon pollution. The cost calculation was first issued in 2010, and a refined and updated calculation was published last year.

It incorporated updated scientific and technical information, and it was a very conservative calculation. The full costs of climate change are almost certainly going to be significantly higher, but it is better than the previous estimate, and it is much, much better than assuming that the costs are zero.

So I urge my colleagues to reject the Lankford amendment. Again, don't be a science denier. Let's not pretend climate change doesn't exist. That won't make it go away.

Let's behave as though we care about future generations and are doing our very best to meet the challenges of the current era.

I yield back the balance of my time.

Mr. LANKFORD. I can assure you I have great care, Mr. Chairman, for future generations, as I do for this generation and as I do for the United States Constitution.

No administration can ignore the Administrative Procedure Act, change it capriciously by 50 percent and say, I have new science, and go into a room and literally not publish who was in the room, not take any public comment, not even disclose what the memos were or all of the models that were even used in the discussion, but just say, I am going to change this by 50 percent because there have been up-

dates, and so everyone's costs just went up dramatically.

That is not the way we work things in America. This is not about science. This is about law, though this is the first time I have ever heard anyone, Mr. Chairman, discuss the loss of piglets as being connected to weather, as has been discussed on the floor today. It was a virus that spread across the entire United States. This is not about piglets. This is not about weather. This is just law.

With that, I would encourage the passage of this amendment, and I yield back the balance of my time.

The Acting CHAIR. The question is on the amendment offered by the gentleman from Oklahoma (Mr. LANKFORD).

The question was taken; and the Acting Chair announced that the ayes appeared to have it.

Ms. KAPTUR. Mr. Chair, I demand a recorded vote.

The Acting CHAIR. Pursuant to clause 6 of rule XVIII, further proceedings on the amendment offered by the gentleman from Oklahoma will be postponed.

Ms. KAPTUR. Mr. Chairman, I move to strike the last word.

The Acting CHAIR. The gentlewoman from Ohio is recognized for 5 minutes.

Ms. KAPTUR. I wonder if the chairman would be willing to engage in a brief colloquy regarding transparency and accountability regarding transmission and capacity market changes imposed by the Federal Energy Regulatory Commission.

Mr. SIMPSON. I would be happy to join the gentlelady in a colloquy.

Ms. KAPTUR. Thank you, Mr. Chairman.

I now yield to the gentleman from New York (Mr. SEAN PATRICK MALONEY).

Mr. SEAN PATRICK MALONEY of New York. I would like to thank the chairman and the ranking member for working with me on this issue.

Mr. Chairman, in January, the Federal Energy Regulatory Commission, known as FERC, approved a proposal by the New York Independent System Operator to create a new capacity zone in the Hudson Valley. The committee report accompanying the fiscal year 2015 Energy and Water Appropriations bill acknowledges that zones like this one may result in increases in consumer energy costs.

In the case of the Hudson Valley, this new zone would impose an unprecedented \$230 million increase in energy costs for our region in just the first year and nearly \$500 million in increased costs over a 3-year period. Initial estimates suggest that customers throughout the Hudson Valley could see their utility bills go up by 3 to 10 percent.

Not only did FERC approve this new zone, but they have completely disregarded ratepayers and local officials in this decision. They have consistently ignored local stakeholders' warn-

ings that this zone will arbitrarily hurt families and businesses.

Moreover, they have failed to demonstrate that the zone would even achieve the result that they are seeking. FERC has also failed to take into account a wide range of ongoing investments that will facilitate the movement of energy in New York State and which may reduce or eliminate the need for such high-capacity payments.

Would the chairman and the ranking member agree that it is the intent of the report language to ensure that FERC reexamines and reforms the way they conduct this type of decision-making, so that the proceedings ensure the Commissioners hear and consider the concerns of local ratepayers?

Mr. SIMPSON. Yes, I would agree that that is the intent.

Ms. KAPTUR. I also agree.

Mr. SEAN PATRICK MALONEY of New York. I want to thank the chairman and the ranking member.

Would you also be committed to continuing to work with me during fiscal year 2015 to ensure that FERC makes reforms to ensure that the views of residents, local and State officials, regulators, and business leaders are taken into account when FERC makes these major decisions?

Mr. SIMPSON. I would agree to do so, and I believe the gentlelady from Ohio would agree to do so as well.

Ms. KAPTUR. I would.

Mr. Chair, I yield back the balance of my time.

AMENDMENT OFFERED BY MR. CASSIDY

Mr. CASSIDY. Mr. Chairman, I have amendment No. 91 at the desk, a limitation amendment regarding life-cycle greenhouse gas emissions and LNG exportation.

The Acting CHAIR. The Clerk will report the amendment.

The Clerk read as follows:

At the end of the bill (before the short title), insert the following:

SEC. ____ None of the funds made available by this Act may be used by the Department of Energy to apply the report entitled "Life Cycle Greenhouse Gas Perspective on Exporting Liquefied Natural Gas from the United States", published in the Federal Register on June 4, 2014 (79 Fed. Reg. 32260), in any public interest determination under section 3 of the Natural Gas Act (15 U.S.C. 717b).

The Acting CHAIR. Pursuant to House Resolution 641, the gentleman from Louisiana and a Member opposed each will control 5 minutes.

The Chair recognizes the gentleman from Louisiana.

Mr. CASSIDY. Mr. Chairman, the United States is the largest producer of natural gas in the world and has a large and growing natural gas reserves base.

The Energy Information Administration estimates that proven and unproven reserves of natural gas are large enough to fuel America for over 90 years at current consumption rates, and more is being found.

A study sponsored by the U.S. Chamber of Commerce and published by IHS concluded that unconventional gas development supported over 900,000 jobs in recent years.

The U.S. Department of Energy, however, recently changed the process by which it reviews and approves liquefied natural gas export projects to non-free trade agreement countries.

Among its process changes, the DOE is releasing a new environmental report that explores the life-cycle greenhouse gas impact of U.S. LNG exports. According to the DOE, the report will be used to “inform its decisions” regarding greenhouse gas emissions of U.S. LNG exports for use in electric power generation in Europe and Asia.

With this new report, the DOE is compromising with intervening environmental groups that want the criteria and scope of the “public interest” to include life-cycle greenhouse gas emission impacts.

While the DOE claims that impacts are not “reasonably foreseeable” at this time, by acknowledging special interest environmental group requests for expanded scope of review beyond the LNG facility, the DOE opens the door to prolonged litigation.

LNG export projects already go through extensive environmental impact analysis during the project’s National Environmental Policy Act, or NEPA, review. This new report adds another layer of legal risk and uncertainty to an already extensive and difficult process.

The U.S. Chamber of Commerce supports the Cassidy-Fleming amendment and notes that the DOE’s sole jurisdiction lies in considering the public interest of exporting the commodity and should not waste funds, potentially delaying license application review in an effort beyond its jurisdiction.

The Cassidy-Fleming amendment prohibits the DOE from applying its report or the perceived impact on life-cycle greenhouse gas emissions in its LNG export public interest determination process, so I urge my colleagues to support this amendment.

Mr. Chairman, I yield to my colleague from Louisiana, Dr. FLEMING.

Mr. FLEMING. I thank my good friend, who is also from Louisiana (Mr. CASSIDY), and I do support the Cassidy-Fleming amendment.

Mr. Chairman, the President has bragged about the increase in energy production during his tenure as President of the United States.

However, what we have actually found is that there has been a 15 percent decline in energy production on Federal lands and offshore, where he is in control. On the other hand, in the private sector, we have had a veritable explosion in production, if you don’t mind my using that term.

What is that reflective of? It is reflective of the miracle that is fracking, which is going on in the U.S. today.

One of the centers of that is the Haynesville shale in my district, where

we have produced an abundance of natural gas. We used to have to import it from other countries. Today, we have such a glut that we have capped many of the wells.

Natural gas is the cleanest carbon-based energy; so, while we are taking down coal, why aren’t we increasing the production of natural gas? In doing so, why not supply it to the rest of the world? Because the air we breathe in the United States is the same air they breathe in China and in Russia and vice versa.

I support this amendment. Let’s stop throwing monkey wrenches into the machinery of natural gas production and energy production in general, and let’s get the cost of energy down for Americans.

Let’s stop this nonsense, this hyperregulatory atmosphere we have. Despite the President’s claim, it is American ingenuity—it is innovation by Americans, specifically fracking technology and horizontal drilling—that has brought about this wonderful miracle that we have.

Let’s get on board. Let’s get both sides of the aisle on board with this, and let’s stop messing around with our technology. This is going to be the first LNG export facility—that is, Lake Charles, which is just below my district, in Congressman BOUSTANY’S district—from which we are going to be supplying the rest of the world with natural gas—which, as I say, has half the carbon footprint of coal.

The Acting CHAIR. The time of the gentleman has expired.

Mr. WAXMAN. Mr. Chairman, I rise in opposition to this amendment.

The Acting CHAIR. The gentleman from California is recognized for 5 minutes.

Mr. WAXMAN. Mr. Chairman, when a company wants to export liquefied natural gas, LNG, it has to submit an application with the Department of Energy.

For the export to countries with a free trade agreement with the U.S., the DOE must grant the applications without modification or delay. For the export to countries without a free trade agreement, the DOE has to approve an application, unless it finds that the proposed export will not be consistent with the public interest.

To make this determination, the DOE evaluates a range of factors. It looks at the economic impacts, the international considerations, U.S. energy security, and environmental effects.

Mr. CASSIDY’S amendment would prohibit the DOE from even considering one of the most important factors: the impact of LNG exports on climate change. I don’t understand why we would do that.

The world’s leading scientists are unequivocal: climate change is already happening on all continents and across the oceans, and it is going to get much worse if we don’t cut our emissions of carbon and other greenhouse gases.

□ 1415

So that would mean that we need to scrutinize the energy infrastructure decisions that we make today for their impact on climate change in the future. Every decision to build a new LNG export terminal has climate implications. We need to understand and weigh those effects.

Now, whether exporting LNG will have a positive or a negative impact on global greenhouse gas emissions is a complex but a critical question. Natural gas consumption for electricity emits less carbon pollution than coal. So proponents of LNG exports argue these exports will displace coal consumption in these other countries, the way it is happening here in the United States, and that would produce a climate benefit; but other LNG exports will raise natural gas prices in the United States, which could increase the coal use here in the United States and carbon pollution from coal-fired power plants. So, on the one hand, it helps; on the other hand, it might hurt.

LNG exports would also drive new domestic natural gas production in the U.S. Now, that could increase emissions of methane—that is a potent greenhouse gas—unless we take measures to control that pollution at the wellhead and throughout the natural gas system.

So, if we are going to live in a carbon-constrained world, we need to understand and consider the climate impacts of key energy policy decisions, such as building a new LNG export terminal and exporting America’s natural gas.

Mr. CASSIDY’S amendment takes a head-in-the-sand approach. DOE shouldn’t even look at this. DOE shouldn’t look at the lifecycle carbon emissions from LNG. This amendment says that DOE can’t even consider those findings for any future studies of climate impacts when making a public interest determination.

If you are going to have the consequences of climate change, shouldn’t we know about it if we are going to say that a particular application is or is not in the public interest?

Considering climate impacts is not going to slow down the review process. Nobody has made that argument. It makes no sense to require DOE to make a determination without the benefit of all the facts.

Ignoring climate change will not make it go away. Quite the opposite. So I am urging my colleagues to oppose this amendment. It is a shortsighted amendment.

DOE has to make a determination in those cases where it is before them on what is the public interest. They have to look at the economic impacts. They have to look at international considerations. They have to look at U.S. energy security and environmental effects.

Why should we say they should look at everything else but not be able to look at the environmental effect if it

deals with climate change? It is a mystery to me why we would want to do something like this.

Now, Mr. CASSIDY made an argument that that is not within the jurisdiction of DOE. Well, we know DOE can look at energy security, but the economic impacts, they are going to have to look to other agencies of the government to help them with that one. The international considerations, they will probably want the State Department and others to help them with that one.

So don't limit DOE and take away their jurisdiction as they make what is in the public interest, because it is in the public interest to look at all these considerations.

Mr. Chair, I yield back the balance of my time.

The Acting CHAIR. The question is on the amendment offered by the gentleman from Louisiana (Mr. CASSIDY).

The question was taken; and the Acting Chair announced that the noes appeared to have it.

Mr. CASSIDY. Mr. Chairman, I demand a recorded vote.

The Acting CHAIR. Pursuant to clause 6 of rule XVIII, further proceedings on the amendment offered by the gentleman from Louisiana will be postponed.

AMENDMENT OFFERED BY MR. MCNERNEY

Mr. MCNERNEY. Mr. Chairman, I have an amendment at the desk.

The Acting CHAIR. The Clerk will report the amendment.

The Clerk read as follows:

At the end of the bill, before the short title, insert the following:

SEC. _____. None of the funds made available in this Act may be used for the Bay Delta Conservation Plan.

The Acting CHAIR. Pursuant to House Resolution 641, the gentleman from California and a Member opposed each will control 5 minutes.

The Chair recognizes the gentleman from California.

Mr. MCNERNEY. Mr. Chairman, California, like most of the West and Midwest, is suffering and enduring a devastating drought. This is impacting the livelihoods of our families, our farmers, our small businesses throughout the State. California produces about half of the Nation's fruits, vegetables, and nuts; in other words, California feeds the rest of the country.

California's Governor wants to move forward with something called the Bay Delta Conservation Plan, or the BDCP, which will build two massive tunnels to facilitate shipping water from one part of the State to the other.

I agree with every Californian that we need long-term, statewide solutions to our State's water needs. There needs to be some level of predictability for our families, farmers, and small businesses about our water supply. To do that, we need to focus on conservation, recycling, reuse, and storage. The BDCP does none of these things.

California voters and the State legislature haven't agreed on whether or not to fund this project, which is ex-

pected to cost \$25 billion, a cost that keeps rising. The project is still in the draft stage. Right now, the plan is already more than 30,000 pages, and final comments aren't even due until the end of July. According to the plan, the Federal Government is expected to contribute \$4 billion.

Anyone who follows California water knows it is an emotional issue, one the State has been debating for decades. But the BDCP is not based on sound science. For example, the Delta Independent Science Board issued a report this year that said:

We find the science in this BDCP falls short of what the project requires. Many of the impact assessments hinge on overly optimistic expectations about the feasibility, effectiveness, or timing of the proposed conservation actions, especially habitat restoration.

The Science Board goes on to say:

The analyses largely neglect the influences of levee failures and environmental effects of increased water for agriculture.

I want to thank the chairman and the ranking member for making time for me to discuss this important issue today, and I hope in the future we can look at this type of funding from the Federal Government.

Ms. MATSUI. Mr. Chair, over the past four years, I have been heavily engaged in the BDCP process, actively promoting Sacramento's interest to President Obama's administration, Governor Brown's administration and the many stakeholders that would be affected by the project.

It has not been an easy road as we all know.

While I support a Delta solution because a sustainable system is necessary, I continue to have serious concerns that the BDCP process will ultimately create significant and irreversible harm to the Sacramento region.

GOVERNANCE

First, the BDCP process must respect northern California's interests. Unfortunately, it currently does not. The current governance structure of the BDCP includes the Delta water exporters and the state and federal water agencies. There is no representation for us in that structure. We cannot affect the process at all. We are left to a spectator role.

Given that this project is the largest water infrastructure project ever undertaken by California and that it has a permit for 50 years attached to it—this governance structure is totally unacceptable.

Here is why governance matters. Northern California was clearly harmed this year by the poor operations of our reservoirs. Yes, the drought has caused the low water levels in our reservoirs, but we should NEVER have a community on the brink of running out of drinking water. That is totally unacceptable. And with a BDCP in place and no role in the governance structure we would not be able to prevent operations, like this year, from happening again.

OPERATIONS

Sacramento County is the home of the BDCP's three water intakes; this will forever change our County's landscape not to mention how much water is available in the river.

The current BDCP framework does not specify how the project will be operated, quite literally building the project first and then fig-

uring out how much water to send south later. This is also unacceptable.

You can imagine that after the Delta water exporters spend over \$15 billion building a new conveyance structure there will be tremendous pressure to maximize its water delivery output.

There have been times where the entire flow of the Sacramento River has been less than 15,000 cfs. Under the BDCP framework announced today, this would mean the Sacramento River would be reduced . . . to a trickle.

In addition, this plan must recognize senior water rights in northern California. Currently there are no assurances that those will be preserved.

THE DELTA

I also need to mention that the BDCP was created to solve two pressing issues—restoration of the Delta and a stable water supply for Delta water exporters. All I have seen is an urgency to push a new water conveyance with a guaranteed water supply for the exporters. I have not seen glowing reports from the fish agencies that the BDCP is going to guarantee restoration of the Delta ecosystem. To the contrary the state and federal Fish and Wildlife and National Marine Fisheries sound doubtful that the BDCP will recover the salmon and smelt species.

In conclusion, I will just say that what I have seen of the BDCP is alarming. I do not believe that its current form will achieve California's co-equal goals. And as for Northern California—there are no benefits—only negative impacts.

Mr. THOMPSON of California. Mr. Chair, I rise today in support of this amendment. The proposed Bay Delta Conservation Plan (BDCP) is not a workable solution to California's water challenges.

We have a serious statewide drought in California, yet the BDCP doesn't do a single thing to alleviate this drought. Further, the current BDCP is flawed, hurts wildlife and puts the interests of South-of-Delta water contractors ahead of North-of-Delta farmers, fishers and small business owners.

Until we have a plan that is transparent, based on sound science and developed with all stakeholders at the table, the federal government shouldn't be wasting taxpayer dollars on this proposal.

We must remain focused on solutions to the statewide drought in California and not on a misguided plan that will risk billions in California tax dollars and thousands of jobs. I support this amendment and thank my colleague for raising this important issue.

Mr. MCNERNEY. Mr. Chairman, I ask unanimous consent to withdraw this amendment.

The Acting CHAIR. Is there objection to the request of the gentleman from California?

There was no objection.

ANNOUNCEMENT BY THE ACTING CHAIR

The Acting CHAIR. Pursuant to clause 6 of rule XVIII, proceedings will now resume on those amendments on which further proceedings were postponed, in the following order:

An amendment by Mr. MCCLINTOCK of California.

An amendment by Ms. BONAMICI of Oregon.

An amendment by Ms. SPEIER of California.

Amendment No. 15 by Ms. TITUS of Nevada.

An amendment by Mr. SCHIFF of California.

An amendment by Mr. QUIGLEY of Illinois.

An amendment by Mr. CHABOT of Ohio.

Amendment No. 14 by Ms. TITUS of Nevada.

An amendment by Ms. DELAURO of Connecticut.

An amendment by Mr. KING of Iowa.

An amendment by Mr. LANKFORD of Oklahoma.

An amendment by Mr. CASSIDY of Louisiana.

The Chair will reduce to 2 minutes the time for any electronic vote after the first vote in this series.

AMENDMENT OFFERED BY MR. MCCLINTOCK

The Acting CHAIR. The unfinished business is the demand for a recorded vote on the amendment offered by the gentleman from California (Mr. MCCLINTOCK) on which further proceedings were postponed and on which the noes prevailed by voice vote.

The Clerk will redesignate the amendment.

The Clerk redesignated the amendment.

RECORDED VOTE

The Acting CHAIR. A recorded vote has been demanded.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 129, noes 290, not voting 13, as follows:

[Roll No. 379]

ANNOUNCEMENT BY THE ACTING CHAIR

The Acting CHAIR (during the vote).
 There is 1 minute remaining.

□ 1539

So the amendment was agreed to.
 The result of the vote was announced
 as above recorded.

Mr. SIMPSON. Mr. Chairman, I move
 that the Committee do now rise.

The motion was agreed to.

Accordingly, the Committee rose;
 and the Speaker pro tempore (Mr. ROD-
 NEY DAVIS of Illinois) having assumed
 the chair, Mr. WESTMORELAND, Acting
 Chair of the Committee of the Whole
 House on the state of the Union, re-
 ported that that Committee, having
 had under consideration the bill (H.R.
 4923) making appropriations for energy
 and water development and related
 agencies for the fiscal year ending Sep-
 tember 30, 2015, and for other purposes,
 had come to no resolution thereon.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX, proceedings will resume on questions previously postponed.

Votes will be taken in the following order:

Ordering the previous question on House Resolution 661;

Adopting House Resolution 661, if ordered.

Both electronic votes will be conducted as 5-minute votes.

PROVIDING FOR CONSIDERATION OF H.R. 5016, FINANCIAL SERVICES AND GENERAL GOVERNMENT APPROPRIATIONS ACT, 2015, AND PROVIDING FOR CONSIDERATION OF H.R. 4718, BONUS DEPRECIATION MODIFIED AND MADE PERMANENT

The SPEAKER pro tempore. The unfinished business is the vote on ordering the previous question on the resolution (H. Res. 661) providing for consideration of the bill (H.R. 5016) making appropriations for financial services and general government for the fiscal year ending September 30, 2015, and for other purposes, and providing for consideration of the bill (H.R. 4718) to amend the Internal Revenue Code of 1986 to modify and make permanent bonus depreciation, on which the yeas and nays were ordered.

The Clerk read the title of the resolution.

The SPEAKER pro tempore. The question is on ordering the previous question.

This is a 5-minute vote.

The vote was taken by electronic device, and there were—yeas 229, nays 192, not voting 11, as follows:

[Roll No. 391]
