

foreign sources of energy. It has the opportunity to become a major force in the international energy market. It is being made possible through the development of our domestic energy resources, namely the expansion of unconventional resources, such as shale gas and oil.

Through remarkable innovations, the U.S. has been able to access oil and gas from shale formations that were previously inaccessible or uneconomical to produce. As a result, we have quickly moved from energy dependence and a weaker footing to energy abundance and strategic leverage both domestically and abroad.

At a time when the economy has not recovered at an acceptable pace, gas production in particular areas, such as the Marcellus shale in Pennsylvania, have provided a key source of economic relief and job creation. As a result of the Marcellus, Pennsylvanians and Americans across the country are benefiting from lower heating costs, businesses are able to produce goods more efficiently, and manufacturers are looking to relocate to the United States to create products, support economic expansion, and grow jobs that were previously headed overseas.

But, Mr. Speaker, if we are to sustain the same level of growth and expansion, policymakers must make smart choices for the future so that we support rather than hinder this opportunity. To start, we must continue to expand gas utilization domestically.

The Marcellus shale, for example, has changed where, in the United States, gas is transported and utilized and how it is transported from region to region. This reconfiguration requires new infrastructure, including pipelines for transmission and transport and new processing facilities, and this all requires long-term planning and investment.

Additionally, because the domestic production of natural gas is far surpassing U.S. demand, most economists agree that a modest expansion of natural gas exports would serve to stabilize domestic prices and supply, which is critical to sustaining the rapid growth in the industry that we have witnessed. Furthermore, each gas export terminal is a multibillion-dollar investment that creates construction jobs in addition to the more permanent positions within the natural gas value chain. That means jobs for steelworkers, turbine manufacturers, pipefitters, and others, which will help communities across the country.

Given the situation in Ukraine and events in the Middle East, we are reminded that our energy resources can also provide significant geopolitical benefits. Exporting even a small amount of these plentiful resources overseas to our allies will strengthen not only our domestic economy but our national security. President Obama, Secretary of State Kerry, and leaders of the European Union have clearly stated that additional global supplies

of natural gas will benefit Europe and our strategic partners. For this reason, I am proud to say the House recently passed H.R. 6, the Domestic Prosperity and Global Freedom Act. This bipartisan bill would streamline the permitting process for natural gas exports.

In February 2014, the United States Department of Commerce reported that our national trade deficit for 2013 improved by \$63.1 billion in comparison to 2012. However, despite this improvement, figures for the month of April are now showing that imports are increasing and that exports are decreasing, and as a result, the trade deficit is now at a 2-year high. With the U.S. Department of Commerce having acknowledged that increased petroleum exports are a key factor that can contribute to a lower trade deficit, it makes perfect sense to allow additional LNG exports in order to further reduce the trade deficit. In addition to its economic and international benefits, natural gas has helped to significantly lower our carbon emissions, which decreased by 3.8 percent last year in the United States, down to 1994 levels, according to government data.

The United States needs a smart energy policy that enables the citizens to continue receiving the benefits of abundant, low-cost energy, but also one that utilizes these resources as a tool of strategic leverage to improve our environment and shape international events to the benefit of America and its allies.

Mr. Speaker, we have made a smart and strategic decision in the House with the passage of H.R. 6. Let's continue to advance similar policies to further leverage the many benefits of our domestic energy resources. Let's do it for the good of the American people and our Nation's strategic competitiveness in the world.

EXPORT-IMPORT BANK

The SPEAKER pro tempore. The Chair recognizes the gentlewoman from Wisconsin (Ms. MOORE) for 5 minutes.

Ms. MOORE. Mr. Speaker, I rise today in support of the Export-Import Bank, the official export credit agency of the United States of America.

Mr. Speaker, it is so frustrating to see this normally bipartisan effort to support the American economy get hijacked. I would bet, Mr. Speaker, that this bill could pass on suspension, that two-thirds of this House would be willing to reauthorize the Ex-Im Bank, if we were to put it to a vote on this floor—but no. Instead, we are forced, once again, to yield to a minority of the majority—the Tea Party—which demands the decapitation of an economic development and jobs creator giant—the United States of America's Export-Import Bank.

Why is this? Is it because the Bank doesn't work? No. It is an example of how government effectively could partner with the private sector. The Bank puts U.S. exporters on equal footing

when foreign competitors have foreign export aid, and it bridges the gaps in the private market.

The reality is that, in the global marketplace, our competitors are aggressively using their export banks. Milwaukee, Wisconsin, which is my district, is still very much a manufacturing economy—the second in the Nation relying on this sector. Every day, workers in Milwaukee compete against foreign workers with extensive and aggressive foreign export credit agency backing.

Today, the United States Export-Import Bank supports an estimated 205,000 export-related jobs in the United States. My fellow Republican Wisconsin colleagues—Representative RYAN and Representative SENSENBRENNER—not long ago urged Bank financing because “all steps should be taken to reinvigorate the economy and bring jobs to the United States.” With higher than average unemployment in Milwaukee, the need for the Bank has not changed. Not only does the Bank support jobs, but it makes a profit from its operation and pays funds back to the U.S. taxpayers—\$5 billion since 1990.

Opponents don't acknowledge that. Instead, they call for gimmick accounting, or, as my CPA and tax attorney colleague Representative BRAD SHERMAN calls it, “fairytale value” accounting. Further, opponents claim that the Bank exclusively helps big corporations, yet 90 percent of the Bank's activities help small business, and that number is on the rise. Just ask Apple Steel Rule Die in Milwaukee, a company you have never heard of because it is not a big company. In fact, new reports from The Brookings Institution show that the failure to reauthorize the Bank hurts small and medium-sized businesses the most.

I hear Delta testify against the Ex-Im Bank, and then, hypocritically, turn around and use foreign export credit agencies for their fleet. By the way, Delta would qualify to use more foreign export credit to buy foreign-made Airbus aircraft if Congress does not reauthorize the Export-Import Bank. For real, colleagues, do any of us believe that Delta will turn down foreign support to buy an Airbus plane or a plane from the Chinese? Come on now. I have got a bridge to sell you.

Opponents also say the Bank only supports 2 percent of exports. Exactly. The Bank's mission is limited. It does not compete when private financing is available. The Export-Import Bank's fees are higher than U.S. commercial bank fees. It is not in competition. It works in concert with banks here in the United States. This is further proof that the Bank is working. However, that 2 percent still supports a lot of economic activity in Milwaukee. When I am back in my district, unions and businesses—large and small—are hand in hand, saying reauthorize the Export-Import Bank.

We use the rhetoric of jobs an awful lot around here in Congress. Now is the time to take a powerful stand for U.S. jobs and U.S. workers. Actions speak louder than words. I urge my colleagues to support the reauthorization of the Export-Import Bank.

COMMEMORATING THE MEMORY
AND HEROIC SACRIFICE OF
STATEN ISLAND FIREMAN LIEU-
TENANT GORDON "MATT"
AMBELAS

The SPEAKER pro tempore. The Chair recognizes the gentleman from New York (Mr. GRIMM) for 5 minutes.

Mr. GRIMM. Mr. Speaker, it is with a heavy heart but also with a swelling of pride that I rise before this House today to honor the memory and the heroic sacrifice of one of the FDNY's bravest—Lieutenant Gordon "Matt" Ambelas.

Lieutenant Ambelas, a veteran Staten Island fireman with 14 years of distinguished service, tragically gave his life this past Fourth of July weekend. He was attempting to rescue victims trapped in a horrific blaze in Brooklyn.

Lieutenant Ambelas leaves behind a devoted wife and two beautiful girls. He is New York's first firefighter to fall in the line of duty since 2012. While a family and a community mourn the excruciating loss of one of their finest native sons—one of their most dedicated protectors—Lieutenant Ambelas is a testament to the uncommon courage and sacrifice at the very core of the entire FDNY family and to the harrowing dangers they face in keeping America's greatest city safe every day.

Lieutenant Ambelas died after searching the 19th floor of a burning Brooklyn housing complex, determined to leave no innocent victim behind, as the flames spread rapidly from floor to floor. Undaunted by the danger that would have melted the courage of most any man, Matt faced it, undeterred, head on.

So I join all of my constituents in Brooklyn, on Staten Island, and all New Yorkers in acknowledging the immense debt of gratitude we all owe to Matt and his brothers in the FDNY, who put our safety above their own day in and day out.

While standing among those honoring Lieutenant Ambelas at his funeral on Staten Island last week, I was humbled by the incredible valor of Matt's actions. We watched as Matt's brothers in uniform, especially the Beach Boys of Ladder 81 on Staten Island and the Hooper Street Gang of Ladder 119 in Brooklyn, paid their final respects to the fallen hero. Seeing firsthand the mixture of strength and despair on their faces, I saw Matt's wife, Nanette, and their beautiful daughters, Giovanna and Gabriella. This was a very stark reminder that not only do we owe an enormous debt of gratitude to fallen heroes like Matt but also to the loving families that bear the immeasurable sacrifice right along with them.

When our Nation was viciously attacked on 9/11, 343 FDNY firefighters gave their lives. Since then, 18 more, including Matt, have fallen in the line of duty. Each loss, while a weight on our hearts, adds yet another angel to that storied brotherhood of heroes. I ask all of my colleagues to join me in the remembrance and commemoration of a true American hero in every sense of the word.

May God bless Lieutenant Ambelas. May He bring comfort to his young family. May He protect all of our brave FDNY firefighters, and may the noble sacrifice enshrined in Matt's memory never be forgotten.

To you, Nanette, please know that you, Gia, and Gabby are in my thoughts, in my prayers, and my heart is broken for your enormous loss.

□ 1030

PAWS FOR CELEBRATION

The SPEAKER pro tempore. The Chair recognizes the gentlewoman from Massachusetts (Ms. CLARK) for 5 minutes.

Ms. CLARK of Massachusetts. Mr. Speaker, Harry Truman famously said that if you want a friend in Washington, get a dog, and I can tell you that many of our Nation's animal shelters and rescue groups would be more than happy to introduce you to a new friend.

Between 5 and 7 million companion animals enter animal shelters nationwide every year, and the hardworking individuals at these shelters and rescues try to make sure that each of these animals makes its way to a forever home.

I have been so fortunate that my entire life I have had rescue dogs as part of my family. As a girl, it was Scotty Daisy. As a newlywed, my husband and I adopted Samantha and Walter, and as a family, with my three sons, we welcomed Bison into our family.

I want to honor the hard work of volunteers and staff at animal shelters and rescue groups across the Nation, and I encourage my colleagues to join me today at this year's Paws for Celebration event on Capitol Hill.

This event, sponsored by the ASPCA and hosted by the Congressional Animal Protection Caucus, will feature adoptable dogs and cats from shelters and rescues from around the Washington, D.C., area.

It will be a great opportunity for Members of Congress to take a moment and thank the shelter and rescue community for their hard work and dedication to our Nation's homeless pets.

Who knows? You might even find that friend in Washington you have been looking for.

HAMAS AGGRESSION FORCES
ISRAEL TO DEFEND ITSELF

The SPEAKER pro tempore. The Chair recognizes the gentleman from

Pennsylvania (Mr. PERRY) for 5 minutes.

Mr. PERRY. Mr. Speaker, 400 rocket attacks from Gaza in the past 3 weeks—Israel has made several attempts to defuse the issue and the situation.

This is how Hamas responded: "We will not agree to quiet in exchange for quiet. If Israel does not agree to our demands, I expect we will continue this battle."

Can you imagine that? Demands from Hamas that Israel not respond to rocket attacks. That is the only way you will get quiet for quiet between Israel and Hamas.

Now, we all know where this recent exchange started. On June 12, the abduction and subsequent murder of three Israeli teenagers, suspected by Hamas members, inflamed the situation, and then it was pushed over the edge by a murder of a Palestinian boy by Jewish extremists, Mr. Speaker.

There is a difference between how both sides act. From the Israeli Prime Minister, "I unequivocally condemn the murder of a Palestinian youth in Jerusalem. Murder, riots, incitement, vigilantism—they have no place in our democracy."

Israel quickly tracked down and arrested the teens' suspected murderers—tracked them down and arrested them and is prosecuting them.

What is the response from Hamas? What is the like response? In response, they launched nearly 400 rockets at Israel since June 14. For a month, this has been going on—into their population centers, not into military targets, Mr. Speaker, but population centers.

Now, last week, I attended a briefing with Israeli Ambassador Ron Dermer to discuss the ongoing operation in Gaza, and one of the things I found interesting was all the members that were there from Israel had on their phones an application which sounded an air raid siren every time one sounded in Israel. We could scarcely get through the briefing because they were just continually going off all around the room.

I imagined myself in my hometown, hunkered down in my basement against a rocket attack. No civilization should live this way.

Interestingly enough, we viewed surveillance video of Hamas members using their own people as human shields. The Israelis actually send a warning shot—this is the building we are going to hit, this is where you are making rockets, and we are going to attack it next.

You would think that people would run from the building, knowing it is going to be blown up, but what does Hamas do? They send people, Mr. Speaker, to the building.

I would remind everybody the responsibility for civilian casualties, when those civilians are used as human shields, lies with the party that deliberately places them at risk, namely, Hamas.
