STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. ROBERTS:

S. 2064. A bill to provide for the repeal of certain provisions of the Patient Protection and Affordable Care Act that have the effect of rationing health care; to the Committee on Finance.

Mr. ROBERTS. Mr. President, I come to the floor today to discuss ObamaCare provisions that should be keeping my colleagues and all Americans up at night. Obviously, my views are very different from my colleagues who have just propounded their views on the same subject.

Unfortunately, since the implementation of ObamaCare began, the stories and reports have only confirmed the many warnings that I and many of my colleagues made during the debate. Most of the stories Kansans tell me now involve many hundreds of dollars in increases in monthly premiums or people simply losing their coverage. These are real stories from real Kansans, and they are not lies.

Compounding the problem, this administration has made it a routine practice to do what we call a regulations dump on Friday. This is a deliberate posting of sometimes thousands of pages of regulations during the time when the American public and the press is least likely to be paying attention.

Most recent reports from the Centers for Medicare and Medicaid Services—what we call CMS—are that millions of small businesses will face increased premium rates under ObamaCare. The President promised to make it easier for small businesses to offer coverage and, lo and behold, it may even become impossible for them to do so.

Then there are the cuts our seniors are about to face to their Medicare plans. We can't forget that the President pilfered—that is a good word, pilfered—\$1 trillion from Medicare to pay for ObamaCare. These cuts have been delayed, but the most recent regulation on Part D and Medicare Advantage will be extremely detrimental to seniors' access to the availability of Medicare plans. And because of this, for once—for once—I wish to speak about a subject where we get ahead of the curve, get in front of the next disaster, and repeal specific provisions of this law that I think will be most harmful to patients.

I have talked before about how this law comes between patients and doctors, but I think we need to bring more attention to the specter of what I call rationing—yes, rationing. In the absence of complete repeal, I urge my colleagues that these provisions must be repealed.

During the health care reform debate, and many times since then, I have spoken at length about rationing. Specifically, I want people to know about what I refer to as the four rations that are included in ObamaCare. Yes, this is a very real threat. And, yes, they will ration care.

Let me start with something called the Centers for Medicare and Medicaid Services Innovation Center. That is a pretty big, fancy government name. The Center has an enormous budget to match, aimed at finding innovative ways to reform payment and the delivery of health care. That sounds very good, but what this means is that the "innovation center" can now use taxpayer dollars to invest in ways to reduce patient access to care.

Let me say that again. The government can now use taxpayer dollars to invest in ways to reduce patient access to care. It gives the government new powers to cut payments to Medicare beneficiaries with the goal to reduce program expenditures. The reality is they are going to reduce patients' ability to access the care they want and need—all hidden under the cloak of innovation. And that isn't innovation at all. Even if they did give it a fancy title, folks, it is smoke and mirrors. This outfit is already pushing out all of the regulations to implement ObamaCare that are now hurting patients—all the regulations we hear about from our health care providers.

Let me move to the second ration. It grants new authorities to the U.S. Preventive Services Task Force—that is another nice-sounding entity with a long title. This Preventive Services Task Force used to be a body that was scientific and academic, that reviewed treatment, testing, and prevention information, and made recommendations for primary doctors. Nothing is wrong with that. It used to be an academic body that made recommendations, not a body pushing through mandates and regulations. Many would argue that is still what they do today. However, the effect of their recommendations is they are significantly more costly and burdensome. Because of ObamaCare, the task force can now decide what should and, more importantly, should not be covered by health plans. That is not prevention, that is rationing. If the task force doesn't recommend it, then it won't be covered by health plans and patients bear the cost of the procedure. We are seeing this already with things such as prostate exams and mammograms for breast cancer which have been so helpful to so many people—saved their lives.

The third rationer is the Patient Centered Outcomes Research Institute. Yes, that is another mouthful. This is the outfit that was given millions and millions of dollars to do comparative effectiveness research. I am not opposed to research. I don't know anyone in this body who is opposed to research, especially when it is used to inform the conversation between doctors
