STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Ms. COLLINS (for herself and Mr. DURBIN):

S. 2100. A bill to promote the use of clean cookstoves and fuels to save lives, improve livelihoods, empower women, and protect the environment by creating a thriving global market for clean and efficient household cooking solutions; to the Committee on Foreign Relations.

Ms. COLLINS. Mr. President, I rise today to introduce the Clean Cookstove Support Act. This legislation addresses a serious global public health and environmental issue, and I am very pleased to be joined in this effort by my friend and colleague, Senator DURBIN.

Nearly half of the world's population cooks over open fires or with inefficient, polluting, and unsafe cookstoves using wood, agricultural waste, dung, coal, or other solid fuels. Smoke from these traditional cookstoves and open fires is associated with chronic and acute diseases and affects women and children disproportionately.

Alarmingly, the Global Burden of Disease Study of 2010 doubled the mortality estimates for exposure to smoke from cookstoves referred to as household air pollution from 2 million to 4 million deaths annually in the developing world. The GBD indicates this is more than the deaths from malaria, tuberculosis, and HIV/AIDS combined. The GBD ranks household air pollution as the fourth worst overall health risk factor in the world and as the second worst health risk factor in the world for women and girls. Millions more are sickened from the toxic smoke and thousands suffer burns annually from open fires or unsafe cookstoves.

Traditional cookstoves also create serious environmental problems. Recent studies show that the emissions of black carbon or common soot from biomass cookstoves significantly contribute to regional air and climate change. In fact, cookstoves account for some 25 percent of black carbon emissions. Each family using a traditional cookstove can require up to 2 tons of biomass cooking fuel, and where demand for fuel outstrips the natural regrowth of resources, local land degradation and loss of biodiversity often results.

Moreover, the collection of this fuel is a burden that is shouldered disproportionately by women and children. In some regions of the world, women and girls risk rape and gender-based violence during the up to 20 hours a week they spend away from their families gathering fuel.

Replacing these cookstoves with modern alternatives would help reverse these alarming health and environmental trends. This would be relatively inexpensive. In fact, there are stoves

that are coming on the market now that cost as little as \$20 and are 50 percent more efficient than the traditional cooking methods. It also could be done quickly. It is what scientists call the low-hanging fruit of environmental fixes.

Through the leadership of former Secretary of State Hillary Clinton and the United Nations Foundation, the Global Alliance for Clean Cookstoves was formed in 2010. Recognizing the serious health and environmental issues posed by traditional cookstoves, the alliance aims to save lives, improve livelihoods, empower women, and combat pollution by creating a thriving global market for clean and efficient household cooking solutions. Alliance partners are working to help overcome market barriers that currently impede production, deployment, and use of cookstoves that are clean in the developing world.

To assist in this important endeavor, several Federal agencies and departments have committed a total of up to \$125 million to the sector for the first 5 years of the alliance. These include a wide variety of departments, including the Departments of State, Energy, and Health and Human Services, the U.S. Agency for International Development, USAID, the Environmental Protection Agency, the National Science Foundation, and the Overseas Private Investment Corporation. The U.S. Department of Agriculture, NOAA, and the Peace Corps have also made commitments to provide technical assistance in the developing world.

To help advance the alliance's goal to spur the adoption of clean cookstoves in 100 million households by the year 2020, the U.S. Government has focused its commitments on applied research and development, diplomatic engagement to encourage a market for clean cookstoves, and to improve access, international development projects to help build commercial businesses, and development efforts, including humanitarian and empowerment programs for women and girls.

The legislation Senator DURBIN and I are introducing today reinforces this commitment and would require the Secretary of State to work to advance the goals of the alliance. In addition, the bill authorizes the existing funding commitments made by our government to ensure that these crucial pledges toward preventing unnecessary illness and reducing pollution around the globe are met.

By supporting the work of the alliance and the commitments of the U.S. Government to replace traditional cookstoves with modern versions that emit far less soot, this bill aims to directly benefit some of the world's poorest people and to reduce harmful pollution that affects us all. It offers a way for us to address the second leading contributor to greenhouse gas emissions in a way that is inexpensive, not burdensome to the people of this country, and will benefit poor people living in developing nations.

There is yet another reason for my colleagues to support this initiative. Addressing persistent global issues of poverty and underdevelopment makes our country more secure by undercutting some of the key drivers of extremism and militancy around the world.

I urge my colleagues to join Senator DURBIN and me in supporting the Clean Cookstoves and Fuel Support Act.

SUBMITTED RESOLUTIONS

SENATE RESOLUTION 377—RECOGNIZING THE 193RD ANNIVERSARY OF THE INDEPENDENCE OF GREECE AND CELEBRATING DEMOCRACY IN GREECE AND THE UNITED STATES

Mr. MENENDEZ (for himself, Mr. BARRASSO, and Mrs. SHAHEEN) submitted the following resolution; which was referred to the Committee on Foreign Relations:

S. RES. 377

Whereas the people of ancient Greece developed the concept of democracy, in which the supreme power to govern was vested in the people;

Whereas the founding fathers of the United States, many of whom read Greek political philosophy in the original Greek language, drew heavily on the political experience and philosophy of ancient Greece in forming the representative democracy of the United States;

Whereas Petros Mavromichalis, the former Commander in Chief of Greece and a founder of the modern Greek state, said to the citizens of the United States in 1821, "It is in your land that liberty has fixed her abode and . . . in imitating you, we shall imitate our ancestors and be thought worthy of them if we succeed in resembling you.";

Whereas the Greek national anthem, the "Hymn to Liberty", includes the words, "most heartily was gladdened George Washington's brave land";

Whereas the people of the United States generously offered humanitarian assistance to the people of Greece during their struggle for independence;

Whereas Greece, in one of the most consequential "David vs. Goliath" victories for freedom and democracy in modern times, refused to surrender to the Axis forces and inflicted a fatal wound at a crucial moment in World War II, forcing Adolf Hitler to change his timeline and delaying the attack on Russia, where the Axis forces met defeat;

Whereas Winston Churchill said, "if there had not been the virtue and courage of the Greeks, we do not know which the outcome of World War II would have been" and "no longer will we say that Greeks fight like heroes, but that heroes fight like Greeks";

Whereas hundreds of thousands of people of Greece were killed in Greece during World War II in defense of the values of the Allies;

Whereas, throughout the 20th century, Greece was one of a few countries that allied with the United States in every major international conflict;

Whereas Greece is a strategic partner and ally of the United States in bringing political stability and economic development to the volatile Balkan region, having invested billions of dollars in the countries of the region, thereby helping to create tens of thousands of new jobs, and having contributed more than \$750,000,000 in development aid for the region;
