## STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mrs. FEINSTEIN (for herself and Ms. AYOTTE):

S. 2622. A bill to require breast density reporting to physicians and patients by facilities that perform mammograms, and for other purposes; to the Committee on Health, Education, Labor, and Pensions.

Mrs. FEINSTEIN. Mr. President, despite significant progress in the diagnosis and treatment of breast cancer, this continues to be the second leading cause of cancer death for women, affecting one of every 8 women in the United States.

Women with dense breast tissue may receive a normal mammogram report even if cancer is present. Dense breast tissue makes it harder to catch cancer early because it can obscure cancer in the mammogram image. This is why, for some women, additional screening is so important in catching breast cancer early.

Despite this risk for cancer being missed, when women receive their mammogram report there is no Federal standard for them to be told if they have dense tissue—even though this is already noted by the radiologist reading their mammogram.

This bill simply requires that women be informed if they have dense tissue, and that they may want to talk with their doctor if they have questions and to find out if they might benefit from additional screening. Early detection is the key to survival. Withholding this kind of information from women just doesn't make sense.

This bill sets a minimum Federal standard, so any state that wants to have additional reporting requirements may do so. The bill also requires the Department of Health and Human Services to focus on research regarding dense breast tissue, and better screening tools. Early detection is the key to beating cancer and patients deserve access to information that might just save their life.

I urge my colleagues to join Senator AYOTTE and me in supporting the Breast Density and Mammography Reporting Act. This commonsense bill increases transparency in medicine by
