

litigation expenses in exchange for access to data. As a result, foreign regulators may establish their own data repositories and clearing organizations to ensure they have access to data they need to perform their supervisory duties. This would lead to the creation of multiple databases, needlessly duplicative data collection efforts, and the possibility of inconsistent or incomplete data being collected and maintained across multiple jurisdictions.

In testimony before the House Committee on Financial Services in March of 2012, the then-Director of International Affairs for the SEC, Mr. Ethiopis Tafara endorsed a legislative solution to the problem, stating that:

The SEC recommends that Congress consider removing the indemnification requirement added by the Dodd-Frank Act . . . the indemnification requirement interferes with access to essential information, including information about the cross-border OTC derivatives markets. In removing the indemnification requirement, Congress would assist the SEC, as well as other U.S. regulators, in securing the access it needs to data held in global trade repositories. Removing the indemnification requirement would address a significant issue of contention with our foreign counterparts . . .

At the same hearing, the then-General Counsel for the CFTC, Mr. Dan Berkovitz, acknowledged that they too have received growing concerns from foreign regulators, but that they intend to issue interpretive guidance, stating that “access to swap data reported to a trade repository that is registered with the CFTC will not be subject to the indemnification provisions of the Commodity Exchange Act if such trade repository is regulated pursuant to foreign law and the applicable requested data is reported to the trade repository pursuant to foreign law.”

To provide clarity to the marketplace and remove any legal barriers to swap data being easily shared with various domestic and foreign regulatory agencies, this section would remove the indemnification requirements found in Sections 725 and 728 of the Dodd-Frank Act related to swap data gathered by SDRs and DCOs.

On March, 14, 2013, at a hearing entitled “Examining Legislative Improvements to

Title VII of the Dodd-Frank Act,” Mr. Larry Thompson, Managing Director and General Counsel, the Depository Trust and Clearing Corporation, provided the following testimony with respect to provisions of H.R. 742, which were included in Section 331:

The Swap Data Repository and Clearinghouse Indemnification Correction Act of 2013 would make U.S. law consistent with existing international standards by removing the indemnification provisions from sections 728 and 763 of Dodd-Frank. DTCC strongly supports this legislation, which we believe represents the only viable solution to the unintended consequences of indemnification. H.R. 742 is necessary because the statutory language in Dodd-Frank leaves little room for regulators to act without U.S. Congressional intervention. This point was reinforced in the CFTC/SEC January 2012 Joint Report on International Swap Regulation, which noted that the Commissions “are working to develop solutions that provide access to foreign regulators in a manner consistent with the DFA and to ensure access to foreign-based information.” It indicates legislation is needed, saying that “Congress may determine that a legislative amendment to the indemnification provision is appropriate.” H.R. 742 would send a clear message to the international community that the United States is strongly committed to global data sharing and determined to avoid fragmenting the current global data set for over-the-counter (OTC) derivatives. By amending and passing this legislation to ensure that technical corrections to indemnification are addressed, Congress will help create the proper environment for the development of a global trade repository system to support systemic risk management and oversight.
