

saying they would welcome the industry into their hometown. This poll comes just 2 weeks after the Environmental Protection Agency released a report indicating that fracking poses “no widespread systemic harm to drinking water.”

Mr. Speaker, Pennsylvania is the third largest natural gas producer in the Nation and continues to drive record-breaking oil and natural gas production. The Marcellus shale, which extends through most of Pennsylvania, has grown from less than 2 billion cubic feet per day in 2007 to 16 billion in 2014 and has jolted Pennsylvania's economy.

As co-chair of the bipartisan Congressional Natural Gas Caucus, I will continue to explore and promote best practices so that we can highlight the safety and the positive impacts of natural gas.

MEN'S HEALTH WEEK

(Ms. KELLY of Illinois asked and was given permission to address the House for 1 minute.)

Ms. KELLY of Illinois. Mr. Speaker, as we celebrate national Men's Health Week, I urge all Americans to take action to reduce health risks and prevent disease. It can be as simple as exercising, eating right, or setting up an appointment for a checkup.

I also rise as the CBC Health Braintrust chair to bring awareness to the critical state of Black men's health and the need to expand educational opportunities and treatment options to reduce incidence of disease in communities of color.

Black men suffer disproportionately from many chronic and infectious diseases, many of which are preventable. Today, almost 40 percent of Black men are obese, which contributes to stroke, heart disease, and diabetes. In 2015, Black men were found to be twice as likely to die from prostate cancer as White men and have a higher incidence and death rate from colorectal cancer. Your skin color and ZIP Code shouldn't determine your health outcomes.

Together, through legislation and community engagement, we can reduce health inequities and provide a healthier and more prosperous life for all Americans.

PROTECT MEDICAL INNOVATION ACT

(Mr. LAMALFA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LAMALFA. Mr. Speaker, I rise today in support of H.R. 160, the Protect Medical Innovation Act, that will be considered on the floor this week.

One of the most fundamental flaws of what is known as the Affordable Care Act is trying to offset the trillion-dollar price tag by imposing an arbitrary 2.3 percent tax on lifesaving medical devices, such as pacemakers and heart

valves. It actually discourages the type of innovation that will improve our healthcare system for people needing these devices.

Hindered with these new high costs, our small businesses are finding it increasingly difficult to innovate, curtailing medical advancements and often delaying the availability of new treatments and cures for patients. I personally visited a number of these companies and understand how important their work is to improving our healthcare system.

Taxing innovation is not a 21st century healthcare solution. This devastating tax is reported to have already caused a net loss of over 33,000 jobs.

American families and small businesses deserve better, and the House is committed to advancing commonsense ideas to ease the burdens of the President's healthcare law. H.R. 160 is one of those solutions.

I ask my colleagues to join me in support of repealing this job- and innovation-killing tax that only limits options for those who really need these lifesaving devices.

CRIMINAL JUSTICE REFORM

(Ms. JACKSON LEE asked and was given permission to address the House for 1 minute.)

Ms. JACKSON LEE. Mr. Speaker, as we rally around the obvious in the need for criminal justice reform and, in essence, the rehabilitation of our criminal justice laws as we deal with the interaction of law enforcement and civilians, having a pathway for respect for both, one of the most forgotten aspects is dealing with the treatment of juveniles in the criminal justice system.

I intend, over the next couple of weeks, to introduce a series of legislative initiatives that address that form of the criminal justice system, which we find, as parents and family members, touches all juveniles.

One of the things that the bill recognizes is that a young person's brain is still developing into his or her early twenties, and that those who commit crimes before this point should be treated differently by the criminal justice system.

The purpose of this effort is to improve the treatment of young offenders within the Federal criminal justice system and to put them on a path toward successful reentry by providing options for the sentencing judges: a safety valve for young offenders which would, in essence, break through the mandatory minimum; an early release for young offenders; and, particularly, alternatives such as massive use of home arrest.

Our children are our future. They get on the wrong path. Let's not celebrate that wrong path and force them to live that wrong path. Let's save their lives.

AXING THE TAX

(Mr. GUINTA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GUINTA. Mr. Speaker, I rise today on behalf of the estimated 145 million Americans who are at risk of losing their employer-sponsored healthcare insurance due to an excise tax included in the President's healthcare law. Beginning in 2018, employers will be required to pay a 40 percent tax on their employees' healthcare plans due to ObamaCare.

I am already hearing from constituents back home who hear from their employers and employees alike that are preparing for this devastating tax by looking at increasing deductibles, reducing benefits, and shifting costs to consumers and property taxpayers alike. This tax is set to cost New Hampshire's largest city, Manchester, over \$5 million.

Americans simply can't afford another costly tax, and that is why I introduced H.R. 879, a bill to repeal the so-called Cadillac tax. As we prepare to vote on a series of healthcare bills this week, I urge my colleagues to join me in cosponsoring this commonsense bill.

H.R. 879 is a win for employers. It is also a win for municipalities. And, most importantly, it is a win for all those hard-working Americans who expected the President to keep his promise that, if you like your healthcare plan, you can keep it.

EXPORT-IMPORT BANK REAUTHORIZATION

(Mrs. TORRES asked and was given permission to address the House for 1 minute.)

Mrs. TORRES. Mr. Speaker, in just 6 legislative days, the charter of the Export-Import Bank will expire.

The Ex-Im Bank has proven an important tool in expanding U.S. exports and creating American jobs. It has done that with bipartisan support at zero cost to the taxpayers.

I would like to mention two companies in particular that have received support from the Ex-Im Bank: Able Industrial Products in Ontario and Desiccare in Pomona. These aren't giant, faceless corporations. They are very small businesses that provide jobs for the Inland Empire residents.

The world economy is getting more competitive, and the Ex-Im Bank is helping to level the playing field for American companies. If my colleagues truly want to protect U.S. jobs and U.S. workers, we can't afford to let the Ex-Im Bank expire. It is time to allow a vote.

TRIBUTE TO DORELLA ANDERSON

(Mr. TAKANO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. TAKANO. Mr. Speaker, I rise today to pay tribute to Dorella Alexis Anderson, a resident of Riverside, California, who passed away last month.

For more than 40 years, Dorella worked at the Riverside Community Settlement Association, which provided a number of services for residents in the Eastside area of Riverside.

A lifetime member of the Riverside African American Historical Society, Dorella worked to preserve the rich African American history in Riverside. She worked on numerous charitable endeavors in Riverside, including Toys for Tots, and gave back to the community in countless ways.

Dorella was a wife, a mother, a grandmother, a great-grandmother, a sister, an aunt, and a friend. Her dedication toward our community cements her legacy as one of our greatest residents. She will be missed.

CARRY-ON FREEDOM ACT

(Mr. COHEN asked and was given permission to address the House for 1 minute.)

Mr. COHEN. Mr. Speaker, last week the International Air Transport Association recommended a new guideline that would reduce the size of carry-on luggage. The new carry-on size limit is 21 percent smaller than the size currently permitted by most major domestic airlines.

Eight major international carriers have already adopted the new size limits, and the trade association is suggesting more airlines will be adopting it soon. If implemented by our domestic carriers, this will force consumers to spend more on checked baggage fees and/or purchase new luggage to meet this new guideline.

Enough is enough. Airline passengers are tired of getting squeezed by airlines, both physically and fiscally. The seats are smaller, the legroom is less, the prices are more, and the profits are more.

That is why I introduced the Carry-on Freedom Act. The bill would prohibit airlines who charge for checked baggage from reducing the size of carry-on baggage from the current size standards and would protect consumers from even more cost to travel. I urge my colleagues to stand up for consumers and pass the Carry-on Freedom Act.

PROSTATE CANCER IS A NATIONAL EPIDEMIC

(Mr. BUTTERFIELD asked and was given permission to address the House for 1 minute.)

Mr. BUTTERFIELD. Mr. Speaker, prostate cancer is a national epidemic, the most common cancer in men. One in seven men will be diagnosed, with more than 220,000 new cases each year, and 28,000 men will die from prostate cancer this year. Prostate cancer, Mr. Speaker, disproportionately impacts African American men, who have the

highest prostate cancer rates of any racial or ethnic group. Black men are twice as likely to be diagnosed with prostate cancer, nearly 2½ times as likely to die from that disease.

Last week, I introduced the National Prostate Cancer Plan Act along with Congressmen MIKE MCCAUL, ELIJAH CUMMINGS, and WALTER JONES. The bill would establish the National Prostate Cancer Council and direct them to develop and implement a national strategic plan to accelerate the innovation of diagnostic tools to improve early detection and reduce unnecessary treatment.

Prostate cancer can strike anyone. Many of us have either been personally affected by this disease or have lost a loved one. Enactment of this bill would be a giant step forward in our battle to combat this treatable disease so that men can live longer and healthier.

My bill, Mr. Speaker, has been endorsed by the American Urological Association, American Medical Association, Prostate Cancer Foundation, ZERO, and PCRI.

Mr. Speaker, I urge my colleagues to join me in this effort by cosponsoring H.R. 2730.

WOMAN ON THE TWENTY ACT

(Mrs. BEATTY asked and was given permission to address the House for 1 minute.)

Mrs. BEATTY. Mr. Speaker, the American people have spoken. I join over 1 million Americans who voted in an online poll conducted by Women on 20s, a nonprofit grassroots organization, to put a woman on the \$20 bill.

To celebrate the amazing achievements of women throughout our history, I introduced the legislation to Put a Woman on the Twenty Act, H.R. 2147, which would empower the Secretary of Treasury to put a woman on the face of a \$20 bill as soon as possible.

Since the first general circulation of paper currency in this country, no woman has ever held the honor of being featured on paper money, and I would say to Secretary Lew that you need look no further than the people's choice winner, Harriet Tubman, for inspiration. In her words, "Every great dream begins with a dreamer." In her dreams, she always had a vision. More than ever, my vision is a redesign of the \$20 bill.

Mr. Speaker, I ask my colleagues to join me and support putting a woman on the \$20 bill.

CONGRATULATIONS TO THE GUAM MEN'S NATIONAL SOCCER TEAM

(Ms. BORDALLO asked and was given permission to address the House for 1 minute.)

Ms. BORDALLO. Mr. Speaker, I rise today to congratulate the Guam men's national soccer team, Team Matao, as they lead group D in the second round of the FIFA World Cup Asian qualifiers. It was a David versus Goliath mo-

ment yesterday when Team Matao defeated India with a 2-1 victory. This follows Team Matao's 1-0 victory over Turkmenistan last week.

I congratulate Guam Football Association President Richard Lai, coach Gary White, and all of Team Matao on their great victory. Biba Guam.

HONORING DR. DENNIS GALLON ON HIS RETIREMENT

(Mr. DEUTCH asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DEUTCH. Mr. Speaker, I rise today for myself and on behalf of my colleague Congresswoman LOIS FRANKEL to honor one of south Florida's most respected leaders in higher education.

After 18 years of service, our friend Dr. Dennis Gallon is retiring as president of Palm Beach State College. Under his watch, Palm Beach State College has become the eighth-largest producer of associate degree graduates in America. From expanding STEM education programs coveted by local employers to creating an honors college for high-achieving students, Palm Beach State College flourished under Dr. Gallon's leadership.

Just last year, the United States Department of Education reported that Palm Beach State College offers the sixth-lowest tuition rates nationwide. Dr. Dennis Gallon's commitment to high-quality, affordable higher education is truly admirable, and his tenure as president of Palm Beach State College deserves our praise and gratitude.

Congresswoman FRANKEL, and I am sure Congressman HASTINGS, and I proudly thank him for his remarkable service.

RENEW THE EXPORT-IMPORT BANK

(Mrs. CAROLYN B. MALONEY of New York asked and was given permission to address the House for 1 minute.)

Mrs. CAROLYN B. MALONEY of New York. Mr. Speaker, there are just 6 more working days before the Ex-Im Bank expires, and given the critical importance of this program, I thought it would be useful to provide a quick index of hard numbers showing what this would mean to the United States economy:

Sixty—the number 60. That is the approximate number of Ex-Im credit agencies that are competing with us around the world that are waiting for our Bank to expire so they can grab that American export business.

3,340. That is the number of small businesses that are supported right now by the Ex-Im Bank, helping them to export their goods and provide jobs.

164,000. That is the number of American jobs that are provided right now this year by the Ex-Im Bank that we would lose immediately.
