cost of substance abuse and drug addiction to our health care system totals \$705 billion annually and the human costs of this disease are nothing short of devastating for many American families.

Providing health care services and treatment resources to those who suffer from substance abuse is critical. However, millions of Americans who need treatment go without services each year. This shortfall is a symptom of outdated policy that limits the availability of substance use disorder services, particularly for those who require residential care to address their addictions.

Under current law, Medicaid beneficiaries are barred access to community-based residential treatment for severe conditions due to the IMD exclusion that prohibits reimbursement care of patients at facilities with more than 16 beds. This nonsensical exclusion has effectively deterred facilities from serving those in dire need of care.

Mr. Speaker, my legislation addresses this problem by eliminating the IMD exclusion and allowing those who suffer from severe addiction to have equal access to treatment and become productive members of society. It will also reduce the social and economic consequences associated with substance abuse. I encourage my colleagues to join me in supporting this bill and addressing a devastating problem affecting far too many communities across the nation.

RECOGNIZING WANDA RAE POWELL OF DANVERS, ILLINOIS RECIPIENT OF THE CONGRESSIONAL GOLD MEDAL

#### HON. DARIN LaHOOD

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES Thursday, July 14, 2016

Mr. LAHOOD. Mr. Speaker, today, I would like to honor Wanda Rae Powell, a cadet volunteer in the Civil Air Patrol during World War II, for receiving the Congressional Gold Medal.

Wanda Rae Powell was raised in Towanda, Illinois and had a love for aviation for as long as she can remember. As a child, Wanda's heroes included Amelia Earhart and Charles Lindbergh. Upon moving to Bell, California in 1944, Wanda served as a volunteer cadet in the Civil Air Patrol while still attending high school. As a cadet, she studied silhouettes of military airplanes and learned to salute, march, and drill. In the summer of 1945, Wanda served in a factory overseeing the manufacture of military life jackets.

After graduating from high school, Wanda returned to Illinois and attended Illinois State University, known as Illinois State Normal University at the time, where she studied Home Economics. Because of a teaching shortage in 1949, Wanda earned an emergency teaching degree and taught in Central Illinois before returning to finish her degree at Illinois State. After receiving her degree in 1955, Wanda continued to serve the Central Illinois community by teaching at Danvers High School. Additionally, she served our community as a Brokaw Hospital volunteer, a Brownie Girl Scout leader, and in the Parent Teachers Association.

I am honored, today, to recognize Wanda for receiving the Congressional Gold Medal.

Since the age of seventeen, she has shown what it means to be a true American, serving her country in the Armed Forces, as an educator, and community volunteer. On behalf of the 18th District, I would like to thank her for her service, and wish her my sincerest congratulations on this much deserved award.

### GUN VIOLENCE

#### HON. SUSAN A. DAVIS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 14, 2016

Mrs. DAVIS of California. Mr. Speaker, two issues have been plaguing communities across the nation: gun violence and excessive force by police.

Make no mistake, these are very separate issues. They're problems that people in my district care deeply about and that deserve to be addressed in their own right.

But both of these are urgent crises that are making our communities less safe.

These issues deserve action here in Congress, but they'll both take much more than that.

Solving these issues won't just happen in this House, it's a discussion that needs to happen in every house across America.

It will require us to come together and really listen to each other, to understand things from a perspective that many of us haven't experienced.

Many of us will never know what it's like to lose someone to gun violence, just as many of us don't know what it's like to have to sit your kids down and explain to them that they need to be careful because they won't necessarily be treated fairly by law enforcement.

Addressing these two issues will take a level of empathy and cooperation that, frankly, we haven't seen a lot of in Washington lately. And it will take a will to act.

These are complicated problems, with no single, simple solution, but that shouldn't stop us from trying.

# PERSONAL EXPLANATION

## HON. PETER A. DeFAZIO

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 14, 2016

Mr. DEFAZIO. Mr. Speaker, on Roll Call Vote 451, I voted No. I intended to vote Aye.

A COMMUNITY APPROACH TO CURBING THE OPIOID CRISIS

### HON. RICHARD M. NOLAN

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 14, 2016

Mr. NOLAN. Mr. Speaker, I rise today to recognize the hard-working medical professionals and law enforcement staff of Morrison County for their successful work in the fight against opioid abuse.

The fight against the epidemic is centered at the St. Gabriel's Hospital in Little Falls, Minnesota, where a collaborative care team fo-

cuses on the unique needs of patients to help them on their individual roads to recovery.

Recently, I was pleased to host the léaders of the collaborative care team at a briefing here in Washington, so that they could share best-practices with Congressional staff. Their comprehensive model for dealing with the crisis focuses on the causes of opioid addiction and utilizes systems like Minnesota's Prescription Monitoring Program to prevent the overprescribing of pain medication. St. Gabrie's approach involves the entire community and creating healing, holistic partnerships between heath care providers and the community based on self-determination, safety and respect.

I ask my colleagues in Congress to join me in recognizing the dedicated professionals at St. Gabriel's for their outstanding work which has reclaimed and saved so many precious lives.

#### S. 524, COMPREHENSIVE ADDICTION AND RECOVERY ACT

### HON. SUZANNE BONAMICI

OF OREGON

IN THE HOUSE OF REPRESENTATIVES Thursday, July 14, 2016

Ms. BONAMICI. Mr. Speaker, I voted to support the Conference Report accompanying S. 524, the Comprehensive Addiction and Recovery Act. Although I support this critical legislative effort to begin fighting back against the opioid abuse and addiction crisis that has swept our country, there is much more work to be done to combat this epidemic. Passing this bill is encouraging, but it is only a first step.

Unfortunately, many of the programs laid out in the legislation are not supported by the funding necessary to be fully effective. To achieve any measure of success, we must ensure that health care and treatment providers have the resources they need to effectively curtail opioid abuse and addiction, including robust funding and educational support for state and local initiatives.

I ask my colleagues that we build on the progress made today and work to provide adequate funding and support to those who care for our communities and constituents as we address this enormous challenge.

RECOGNIZING THE RETIREMENT OF PENNSYLVANIA MOTOR TRUCK ASSOCIATION PRESIDENT JIM RUNK

## HON. BILL SHUSTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 14, 2016

Mr. SHUSTER. Mr. Speaker, I rise today to honor and recognize Jim Runk, President of the Pennsylvania Motor Truck Association (PMTA). Jim will be retiring from the PMTA on July 20, 2016, after 44 years of service to the association, the last 25 as its president. As a leading transportation advocate in my home state, Jim's voice, presence, and thoughtful guidance will be deeply missed, but he leaves behind an indelible mark on the trucking industry of Pennsylvania and the country.

Jim began working for the PMTA in 1972 after serving in the U.S. Army, and became

the association's fifth president in 1991. During that time, over four decades of service. Jim and the PMTA have worked on behalf of the Pennsylvania trucking industry, fighting to preserve and strengthen the industry, and protect and promote its jobs. Whether that meant impacting legislation before the Pennsylvania General Assembly, or marching through the halls of Congress to meet with members and staff of the Pennsylvania delegation, Jim and the PMTA's voices were always respected. Without question, during my time representing the 9th Congressional District of Pennsylvania, and serving as Chairman of the House Transportation and Infrastructure Committee, Jim has been the face of trucking and a trusted advisor on the safe and efficient operations of the industry.

Mr. Speaker, it has been a privilege to work with Jim, and I thank him for his decades of service to the PMTA. While he will be truly missed, the Pennsylvania trucking industry will be forever grateful for his tireless leadership and service on their behalf. I wish Jim and his wife Linda the very best in whatever their futures may hold.

URGING IMMEDIATE REAUTHOR-IZATION OF THE RARE PEDI-ATRIC DISEASE PRIORITY RE-VIEW VOUCHER PROGRAM

### HON. MICHAEL T. McCAUL

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES Thursday, July 14, 2016

Mr. McCAUL. Mr. Speaker, I rise today to urge immediate reauthorization of the Rare Pediatric Disease Priority Review Voucher Program before it expires at the end of this fiscal year. Simply put, this program has proven to save the lives of children. My colleague and dear friend from North Carolina, Mr. BUTTERFIELD, and I have introduced legislation that would make it permanent. Last July, thanks to the leadership of Committee on Energy and Commerce Chairman FRED UPTON and his staff and advocates like Nancy Goodman, who is the founder and Executive Director of Kids v. Cancer, this Chamber passed an amended version of this initiative as part of H.R. 6. the 21st Century Cures Act. This program is a crucial incentive-in addition to the Orphan Drug Act-for drug manufacturers to make the significant investment in developing therapies for rare pediatric diseases, including pediatric cancers and lysosomal storage disorders.

When we were considering H.R. 6 last July and again in recognition of National Neuroblastoma Awareness Day last September, I came to this Floor to speak about the positive impact the Rare Pediatric Disease Priority Review Voucher Program has had on children with neuroblastoma. Because of the limited market incentives available prior to the creation of the program, biopharmaceutical companies had been unwilling to risk investing in research and development for a therapy that treats this extremely rare and devastating pediatric cancer. The Rare Pediatric Disease Priority Review Voucher Program proved to be the necessary incentive for United Therapeutics to satisfy this unmet need with the development of Unituxin. In March 2015, this therapy received Food and Drug Administration ("FDA") approval for children with highrisk neuroblastoma. Unituxin was the first drug that FDA approved for this condition and only the second FDA-approved therapy for pediatric cancer. Upon its approval, FDA awarded Unituxin the second voucher from this program.

As the chairman of the Childhood Cancer Caucus, I recognize the importance of this therapy to the community, especially to children like four-year-old Rex Ryan from Austin in the 10th District of Texas. Diagnosed with high-risk neuroblastoma at 17 months old, Rex's parents Leslie and Casey enrolled him in the clinical trial for Unituxin at Children's Blood and Cancer Center at Dell Children's Medical Center of Central Texas in Austin. Rex is a neuroblastoma survivor because of this new drug, which would not have been developed without the voucher program. After witnessing the direct impact Unituxin has had on Rex and his parents, it would be unconscionable for Congress to allow this program to expire. As I have previously described, the hope afforded by the Rare Pediatric Disease Priority Review Voucher Program extends to other conditions as well.

Nearly two years ago, I came to this Floor to speak about the value of the program just after BioMarin Pharmaceuticals sold the first voucher from this program for \$67.5 million, which the company immediately reinvested to build a clinical laboratory on its campus in San Rafael, California. The laboratory is a critical component of its development of a gene therapy platform for hemophilia A, which is showing promising early data in eight patients. BioMarin received this first voucher for developing a therapy for Morquio A syndrome, is also known mucopolysaccharidosis ("MPS") type IV. Unfortunately for the millions of children affected by one of the nearly 7.000 rare diseases without a treatment, such as several of the other types and subtypes of MPS, including Sanfilippo syndrome and Sly syndrome, politics have hampered Senate negotiations on its larger innovation package, which is putting the program in jeopardy.

Patients like eight-year-old Beckett Weldon, who is from Cypress in the 10th District of Texas, cannot afford for Congress to allow this program to lapse. Beckett suffers from SYNGAP1-related intellectual disability, which is an ultra-rare and severely disabling, genetic neurological disorder. Approximately two-thirds of the children with this condition have some form of epilepsy. Other symptoms include hypotonia, behavioral disorders, language impairment, and oral dyspraxia. Beckett began his four-year diagnostic odyssey at 4 months old, when he began missing milestones his twin sister Pyper was meeting. After visiting 19 specialists and several diagnostic tests, Beckett received his diagnosis.

Only recently identified, SYNGAP1-related intellectual disability has no FDA-approved treatment. Beckett's parents Monica and Chris hope to change that for this community. Less than two years after Beckett's diagnosis in 2012, Monica Weldon—with the help of Global Genes—founded Bridge the Gap-SYNGAP Education and Research Foundation, which is a member of the National Organization for Rare Disorders ("NORD"). Due to Monica's efforts, the Foundation was one of twenty rare disease patient organizations selected in April to develop natural history studies with the as-

sistance of NORD and supported in part by a cooperative agreement with the FDA. The Bridge the Gap-SYNGAP Education and Research Foundation is also hosting the first ever SYNGAP1 International Conference November 30–December 1, 2016 at Texas Children's Hospital in Houston in an effort to bring together families, researchers, and clinicians to foster a collaborative environment that will lead to the development of treatments and ultimately a cure for the condition.

As the SYNGAP1 community initiates these efforts toward treatments and a cure, it is critical that the Rare Pediatric Disease Priority Review Voucher Program be available as an incentive for manufacturers to consider investing in therapies for this condition. Congress must continue to help sick children and their families find treatments by extending this valuable program.

TRIBUTE TO MINERVA CRANTZ ALLEN

# HON. MICHAEL M. HONDA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 14, 2016

Mr. HONDA. Mr. Speaker, I rise today to recognize Minerva Crantz Allen, a bilingual Native American educator, linguist, and poet. It is my pleasure to commend Minerva for her lifelong commitment to preserving the Assiniboine (Nakoda) tradition, heritage, and culture. Her civic accomplishments for the Native American people truly make her the embodiment of leadership and service.

Minerva was born in the spring of 1934 on the Fort Belknap Indian reservation, in Northcentral Montana. Her grandfather instilled in her at an early age the importance of education for her future. The daughter of a French Chippewa father and an Assiniboine-Gros Ventre mother, Minerva spoke her native languages, but also taught herself English by singing songs with the Presbyterian ministers' wife. Minerva's grandmother, aunts and uncles still conversed in the Sakoda language, because of their culture and belief system.

Growing up was hard, not only because of the Great Depression. Minerva hid her language, culture and religion, and was scared of being turned into the law. Minerva thrived on following her passions, despite the sacrifices. At thirteen years old, she was sent to attend Indian Boarding School at Flandreau, South Dakota. Minerva was a very outgoing member of the student body-a cheerleader, Homecoming Queen, playing football and basketball. Despite the death of her grandfather and her parents' divorce, she went on to obtain a bachelor's degree from Central Michigan University, a master's degree from Northern Montana State College, and completed additional coursework a Weber State College.

Minerva has proven herself time and again, holding various critical positions with the Hays' Lodge Pole school system. As the Head Start director for eight years, Minerva helped to establish the first Foster Grandparent Program, bringing grandmothers and grandfathers into the classroom to teach the students their language and culture. She has written several books that translate Indian history and folklore into English, and she has published two books of her own poetry which are used widely in Montana.
