HONORING THE MEMORY OF TONY CASTILLO

(Mr. COFFMAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. COFFMAN. Mr. Speaker, I rise today to honor the memory of Tony Castillo, a longtime friend of mine from my hometown of Aurora, Colorado, who recently passed away.

Tony and I had a friendship that started in our youth. We had so much in common. Tony and I both came from military families. Our late fathers had both married war brides in the aftermath of World War II. They were career enlisted soldiers who were transferred to Fitzsimons Army Medical Center for their last assignment in 1964 when we were both just 9 years old. Our military families both came from previous assignments in Europe.

While I followed in my father's footsteps and joined the military, Tony stayed in Aurora and eventually married the love of his life, Nita Adkins of Pueblo, Colorado. Tony and Nita raised two extraordinary children, Ben and Jess, in a loving family that has been inseparable.

Tony was an extraordinary example of a great friend, a loving husband, a devoted father, and he will always be remembered and missed by all who knew him.

Tony was an extraordinary example of a great friend, a loving husband, a devoted father, and will always be remembered and missed by all who knew him.

NATIONAL FOSTER CARE MONTH

(Mr. LANGEVIN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LANGEVIN. Mr. Speaker, as co-chair of the Congressional Caucus on

Foster Youth, I rise today in recognition of May as National Foster Care Month.

Growing up, my parents welcomed many foster children into our family, providing them with a stable and nurturing environment.

One of the biggest challenges for youth in foster care is finding their forever family. Even youth who age out of foster care still need a place to call home after they turn 18, and whether through reunification, adoption, or an individual plan, every foster youth deserves a permanent home.

Mr. Speaker, these children belong to all of us, and we are all responsible for their well-being. I urge my colleagues to join me in recognizing May as National Foster Care Month.

RECOGNIZING MEMBERS OF PENN STATE'S RED CELL ANALYTICS LAB

(Mr. THOMPSON of Pennsylvania asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. THOMPSON of Pennsylvania. Mr. Speaker, I rise today to recognize members of Penn State University's Red Cell Analytics Lab, a unique organization intended to educate students on how to combat threats in an age of ever-evolving technology.

Last weekend, I visited with members of the lab, and I listened in awe to how they are working with local law enforcement to keep students, staff, and spectators safe at events such as Penn State football games and the university's annual dance marathon, or THON.

Quite simply, these students have become experts at recognizing threats and security holes—essential skills in today's world where governments, technology firms, and corporations must stay one step ahead of those who seek to do us harm. I was happy to learn that members of the Red Cell Analytics Lab move on to great careers, working for companies in our financial and technology sectors, along with the Federal Government.

It is unfortunate that these talents are necessary in today's world, but I am glad they are being cultivated at Penn State University.

THE HEROIN EPIDEMIC

(Mr. RYAN of Ohio asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RYAN of Ohio. Mr. Speaker, this week, we are going to take up a package of bills that I support dealing with the massive heroin epidemic plaguing places like Ohio, but all over the country.

In my congressional district, we saw, a few months back, over 22 overdoses. In Trumbull County alone, 7 deaths; in Summit County, city of Akron, 56 people died of a heroin overdose, compared

to just 40 in 2013. Now, in Ohio, these drug overdoses have been the leading cause of accidental deaths in our State, bypassing car accidents.

This House this week is going to do the responsible thing and pass key legislation and hopefully combine with the Senate legislation. But there is a missing piece on the recovery side. We need to make sure that, as we address this issue, it is comprehensive: it is about addiction and it is about treatment, but it also must be about recovery.

So I commend my colleagues on both sides of the aisle for these important pieces of legislation that are coming forth. I will support them, but knowing that we have got a lot more work to do and that the bottom line is we need money behind these programs.

The President put in his budget over \$1 billion. We need to make sure that the resources get down to the local community so that we can help stem the tide of this epidemic in our country.

SUPPORTING TSC GLOBAL AWARENESS DAY AND MAX LUCCA

(Ms. ROS-LEHTINEN asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. ROS-LEHTINEN. Mr. Speaker, today I rise to lend my voice in support of TSC Global Awareness Day on May 15.

Tuberous sclerosis complex, or TSC, is a rare genetic disease that causes uncontrolled tumor growth across the face, body, and organs of affected individuals. Unfortunately, there is no cure for TSC.

South Florida's own Max Lucca—look at that sweet young face—was diagnosed with TSC when he was only 2 weeks old. Now he is 8, and Max Lucca has thrived because of the constant love and care provided by his parents, Vanessa and Max. Max Lucca enjoys baseball—as you can see—and hanging out with his best buddy.

So please think of this sweet young boy, Max Lucca, and others living with TSC on May 15 for TSC Global Awareness Day, and let's work together to find new treatments and a cure for this tragic disease.

GIVING HOPE TO DUCHENNE MUSCULAR DYSTROPHY PATIENTS

(Mr. PAULSEN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PAULSEN. Mr. Speaker, I rise today to speak about a genetic disorder, Duchenne muscular dystrophy, that has caused heartbreak for families across the country. The genetic mutation, found typically in boys, weakens muscles and leaves most sufferers confined to wheelchairs. Due to lung or heart failure, most afflicted with Duchenne pass away before their 25th birthday.

However, there is hope with new medical advancement that could increase the lifespan and improve the quality of life for those living with Duchenne. A new drug was used in a medical trial where every participant was able to walk for 4 years after starting the treatment, and on top of that, there were no negative side effects. However, the FDA has yet to approve this new drug, even with such promising results.

Mr. Speaker, Duchenne muscular dystrophy is an awful condition that more or less guarantees a short life for those who live with it. Medical advancement is giving hope to those patients for a longer and a better life, but bureaucratic redtape is preventing those folks from accessing it. It is time for the FDA to remove those roadblocks and to move forward for a new, possible, life-improving treatment.

SALEM TOWNSHIP FIRST RESPONDERS

(Mr. ROTHFUS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ROTHFUS. Mr. Speaker, on April 29, a natural gas pipeline exploded in Salem Township, Westmoreland County, Pennsylvania, immediately destroying one home, injuring a resident, and forcing the evacuation of a dozen other homes.

I rise to thank the first responders who selflessly and swiftly arrived on the scene:

Forbes Road Volunteer Fire Department Chief Bob Rosatti led incident command during the crisis, and he is to be commended for the tremendous job he did. In addition to Chief Rosatti's department, the following volunteer fire departments also responded: Slickville, White Valley, Export, Crabtree, Greensburg, Delmont, Hannastown, Grandview, New Alexandria, Jeannette, Harrison City, Washington Township, Saltsburg, Tunnelton, and Sardis.

These departments were joined by seven other local, county, and State agencies. The firefighters, police, and emergency teams who choose these selfless and courageous professions make our communities safer, better places to live, and for this, we should all be grateful.

THE IRAN DEAL

(Mr. DESANTIS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DESANTIS. Mr. Speaker, Ben Rhodes from the administration said that the Iran deal would be the ObamaCare of the administration's second term. When I heard that, I thought, "Sheesh," because a lot of us don't think highly of ObamaCare. We don't think it has worked out well. We didn't think the Iran deal was going to

work out well. But now that actually has a deeper meaning.

ObamaCare was sold to the American people on a set of deceptions: if you like your plan, you can keep it; if you like your doctor, you can keep him; you are going to pay \$2,500 less per family for health insurance. Now, it turns out, so was the Iran deal.

They concocted a narrative—a false narrative—that, with the election of Rouhani, a moderate who really wanted to have an opening, this was a once-in-a-generation opportunity for America to seize this day and strike a deal with Iran—even though they are the world's leading state sponsor of terrorism—and bring peace to the world.

That was all false. This started before Rouhani was elected. He is not a moderate. This was a deal made in conjunction with Iran's hard-liners; and as we are seeing now with how they are behaving, it is benefitting Iran's hard-liners.

ObamaCare we can fix. It will be tough. But we may not be able to recover if Iran gets a nuclear weapon.

NATIONAL NURSES WEEK

(Mr. GUINTA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GUINTA. Mr. Speaker, I rise to recognize National Nurses Week, a time to celebrate the contribution of over 3 million registered nurses around our country. They are our friends and neighbors who care for our loved ones and treat us when we are sick.

A nurse is usually the first person we talk to at the doctor's office, even first thing in the morning. A nurse may be the first person we meet in life. Increasingly, as the American population ages, nurses are filling larger roles.

In New Hampshire, especially rural regions, we need them more than ever. At job fairs I hosted in Manchester and Laconia, healthcare employers are scouring the State for help. I cosponsored the Home Health Care Planning Improvement Act to allow nurse practitioners to visit more patients at home.

Nurses are on the front lines of the heroin epidemic in the Granite State and around the country. Some are Members of Congress, putting their kindness, compassion, and understanding to work in government. During National Nurses Week, please thank a nurse for his or her contributions.

PUBLIC LAND ACCESS BY THE GO ACT

(Mr. LAMALFA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LAMALFA. Mr. Speaker, the current process to obtain outfitter and

guide permits for hiking, hunting, and fishing exhibitions on our public lands for recreation events is too expensive and very complicated. Guides and outfitters should not have to navigate arbitrary rules, inconsistent practices, and unresponsive Federal agencies.

As a result, I have introduced the Guides and Outfitters Act, known as the GO Act, H.R. 5129, which will renew the authorization for these recreation permits while eliminating burdensome red tape.

This measure will also cap permit fees, ensure that fees are charged only for activities on the actual public lands, not on private lands, provides categorical exclusions for previously studied uses to reduce delays, and allows online applications.

The GO Act is consistent with my commitment to increasing public access to the public lands, making Federal agencies more responsive to the communities in which they operate and removing unnecessary bureaucratic red tape that keeps people off of their lands.

NATION'S OPIOID EPIDEMIC

The SPEAKER pro tempore (Mr. YOUNG of Iowa). Under the Speaker's announced policy of January 6, 2015, the gentlewoman from Massachusetts (Ms. CLARK) is recognized for 60 minutes as the designee of the minority leader.

GENERAL LEAVE

Ms. CLARK of Massachusetts. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days to revise and extend their remarks and include extraneous material on the subject of this Special Order.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from Massachusetts?

There was no objection.

Ms. CLARK of Massachusetts. Mr. Speaker, I would like to thank my colleagues for joining us this evening for this critically important discussion.

I thank the chairs of the bipartisan task force on the opioid epidemic for their leadership and tenacity in pushing reforms. I thank Congresswoman KUSTER and Congressman GUINTA.

This week the House will debate solutions to our Nation's opioid crisis. If there has ever been a time to put away partisan differences and ideological rhetoric, it is now. I am proud of the work of the task force in supporting bipartisan bills to help stem the tide of this epidemic.

This is a public health crisis that reaches into every community. It is an equal opportunity killer, without regard for age, gender, race, or economic background. It does not care if you are a Democrat or a Republican.

In Massachusetts, just last year we lost nearly 1,400 lives to this opioid crisis. Half of all of the deaths in Massachusetts of opioid overdoses involve heroin, but prescription opioid overdoses are also surging. Between
