

The Senate passed a Zika Virus Appropriations of \$1.1 billion, but unfortunately the House only provided \$622 million.

The Senate has called for a conference to reconcile the differences between the two bills.

The CDC reported on May 30, 2016, that it has confirmed cases of the Zika Virus include 279 pregnant women in the United States or U.S. Territories.

This number is double the number of cases reported the previous week.

The CDC is reporting all pregnant women who have "any laboratory evidence" of possible infection, no matter what.

The CDC made the change after seeing reports of asymptomatic pregnant women—women with no symptoms who delivered children with known Zika Virus birth defects.

These are sobering and troubling numbers this early in our mosquito season.

These cases of Zika Virus include both travel related and those that were contracted from mosquito bites.

The 13 Local Cases of the Zika Virus are all travel related thus far.

Seven cases of the Zika Virus recorded by Harris County Public Health Environmental Services.

Six reported by the City of Houston Public Health Department Reported cases of the Zika Virus.

We know that 4 in 5 people who contract the Zika Virus have no symptoms.

This is especially problematic for pregnant women who may become infected with the Zika Virus and have no symptoms.

Although the contracting of the disease is most associated with mosquitoes it has been transmitted sexually.

This presents other challenges to Zika Virus public education and preparedness.
