

Mr. KATKO. Mr. Speaker, I rise today to recognize an important milestone in my congressional district: the bicentennial of the Auburn Citizen.

Two hundred years ago today, this daily publication began serving the people of Cayuga County by providing news and community announcements. Born in 1816 as the Auburn Gazette, this community newspaper has been known by many names over the years.

In an editorial placed this past weekend, publisher Rob Forcey noted that the Auburn Citizen began publishing just 40 years after the birth of our country.

The history of accomplished journalists at this publication includes William Dapping, a community hero who was awarded the very first special Pulitzer in 1930 for his esteemed work in covering the bloody 1929 Auburn State Prison riots.

Today, the Citizen has evolved to cover a wide area of central New York, with web-based access to local and national news, weather, and community events. What is more, the publication has expanded into western Onondaga County, with the Skaneateles Journal and West Onondaga County Journal.

Congratulations again to this community-based publication on two centuries of being the voice of the Auburn community.

REMEMBERING DAVID GILKEY

(Mr. BLUMENAUER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BLUMENAUER. Mr. Speaker, last Sunday, David Gilkey, an NPR photojournalist from Portland, Oregon, was killed with his Afghani translator in a Taliban ambush in Afghanistan.

I cannot fully express my gratitude for David's tireless commitment to his profession. His evocative, beautiful work, and many contributions to NPR will be remembered for generations.

He covered conflict areas around the globe. Since 2001, he extensively covered the wars in Iraq and Afghanistan.

He was one of the most decorated of photo journalists, including an Emmy, and the first multimedia journalist to be awarded the Corporation for Public Broadcasting's prestigious Edward R. Murrow Award for Journalism.

David played an essential role in helping us understand the global events. He was one of those who put themselves in harm's way to open the world's window for the rest of us. They are true heroes.

Our hearts go out to the Gilkey family and to his NPR family for their loss.

APPRECIATING PRIME MINISTER NARENDRA MODI

(Mr. WILSON of South Carolina asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WILSON of South Carolina. Mr. Speaker, on Wednesday, I was grateful to serve on the escort committee for Prime Minister Narendra Modi of India, due to my former co-chairmanship of the Caucus on India and Indian Americans, with my father having served in India during World War II.

The Prime Minister was warmly received with his positive presentation:

As a representative of the world's largest democracy, it is indeed a privilege to speak with the leaders of its oldest.

Connecting our two nations is also a unique and dynamic bridge of 3 million Indian Americans. Threats of terror are expanding, and new challenges are emerging in cyber and outer space. India is undergoing a profound social and economic change.

A commitment to rebuild a peaceful and stable and prosperous Afghanistan is our shared objective. In every sector of India's forward march, I see the U.S. as an indispensable partner.

In conclusion, God bless our troops, and may the President, by his actions, never forget September the 11th in the global war on terrorism.

South Carolina especially recognizes the success of Indian Americans, with their Governor, Nikki Haley, the second Indian American Governor elected in history.

CONGRATULATING TWIN SCHOLARS

(Mr. VEASEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. VEASEY. Mr. Speaker, I rise today to tell you a really cool story about two smart sisters, Estrella and Perla Ortiz, identical twins who earned the valedictorian and salutatorian status at their high school in Fort Worth.

Estrella and Perla are the two youngest of seven siblings in the Ortiz family. The sisters worked hard and excelled academically at North Side High School, the home of the Steers.

In their spare time, the Ortiz sisters participated in the National Honor Society, Health Occupations Students of America, tutored their peers, and even helped adults obtain their GED.

Their hard work paid off in academia when they were awarded scholarships at Texas Christian University, where the sisters will receive a full ride to TCU to continue their studies in biology and premed.

The Ortiz sisters demonstrate that anything is possible with dedication and perseverance. And, oh, I want to also mention that their sister, Maria, was also valedictorian in 2014 at the same school.

I ask my colleagues to join me in congratulating Estrella and Perla on their extraordinary academic achievement.

CHEROKEE TRAIL BOYS BASEBALL TEAM

(Mr. COFFMAN asked and was given permission to address the House for 1

minute and to revise and extend his remarks.)

Mr. COFFMAN. Mr. Speaker, I rise today to recognize the boys baseball team of Cherokee Trail High School on winning the 2016 Colorado 5A State championship game on May 29, 2016.

The students and staff who were a part of the title-winning Cougars team deserve to be honored for winning the State championship for the first time since they won the 4A State championship in 2007. The Cougars beat Rocky Mountain High School 5-1 in the series, and ended the season with a winning 22-5 record.

Throughout the season, the boys of the Cherokee Trail baseball team were dedicated, worked hard, and persevered. These traits were a key factor in their endeavor to win the championship, but winning could not have been possible without the tireless leadership of their head coach, Allan Dyer, and his commendable staff.

It is with great pride that I join all of the residents of Aurora, Colorado, in congratulating the Cherokee Trail Cougars on their State championship.

EXPAND ECONOMIC OPPORTUNITIES

(Ms. KELLY of Illinois asked and was given permission to address the House for 1 minute.)

Ms. KELLY of Illinois. Mr. Speaker, I rise today on behalf of the families who are still struggling to make ends meet.

Our economy has made great strides since the end of the recession. Like my colleagues, I have watched the unemployment rate tick down each month from 10 percent in 2009 to 5 percent today.

According to the story that these numbers tell, our economy has recovered. But for nearly 8 million Americans still looking for work, our economy is still in a state of crisis.

In my home district, more than 16 percent live in poverty, and the unemployment rate is three times the national rate, at 15 percent. I have met hundreds of these unemployed constituents at my annual job fair. They aren't looking for a handout; they are looking for a hand up, an opportunity to work, a chance to live a better life, a shot at the American Dream.

As we enter the second half of 2016, I urge my colleagues to stand with me and take action to expand economic opportunities and to ensure that all Americans who want to work have the chance to do so.

RECOGNIZING COACH LORI BLADE

(Mr. RODNEY DAVIS of Illinois asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RODNEY DAVIS of Illinois. Mr. Speaker, I rise today to recognize someone who has a lot of heart, who carries herself with class and humility, and who pushes her players to be better on and off the court.

Coach Lori Blade's incredible success has produced 624 wins, dozens of conference titles, and two State championships.

On April 30, Coach Blade was enshrined into the Illinois Basketball Coaches Association Hall of Fame. Her 22 seasons of accomplishments have vaulted both Edwardsville and Carrollton High Schools' programs to statewide dominance.

Beyond the victories, Coach Blade has made a profound impact on countless lives, teaching players to take pride not just in the game, but in everything they do. Pushing her players never to be satisfied or content, Coach Blade has had a phenomenal career on the court and on the softball diamond, being the only coach in IHSA history to have over 600 wins in two sports.

Congratulations, Coach Blade, on all of your accomplishments. Thank you for your commitment to our students, and I wish you all the best in your future seasons, unless you play my hometown Taylorville Tornadoes.

LYNN WOOLSEY'S VISIT

(Mr. HUFFMAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HUFFMAN. Mr. Speaker, 444. That is the number of times Lynn Woolsey came to this floor, stood at that podium right over there, and addressed this House during Special Orders, speaking against war and in support of peace.

Lynn Woolsey, for 20 years, represented much of my congressional district. My colleagues here in Congress will remember her as a passionate and outspoken advocate—a leader—in the effort to strengthen our national security without war. One of the ways that she did that was through her hundreds of Special Order hour speeches. In the final one of these, No. 444, she said the following:

"Sometimes I've been accused of wanting a 'perfect world.' But I consider that a compliment. Our Founders strove to form a 'more perfect Union.' Why shouldn't we aim for a perfect world? You see, I'm absolutely certain that if we don't work toward a perfect world, we won't ever come close to providing a safe, healthy, and secure world for our grandchildren and their grandchildren."

She is with her grandchildren Carlo and Luca here today.

Let us thank Lynn Woolsey for her service, and let's urge all Members of Congress to approach our work with the same tenacity and resolve to work together toward peace, health, and security for all.

EXPRESSING THE SENSE OF CONGRESS THAT A CARBON TAX WOULD BE DETRIMENTAL TO THE UNITED STATES ECONOMY

Mrs. BLACK. Mr. Speaker, pursuant to House Resolution 767, I call up the concurrent resolution (H. Con. Res. 89) expressing the sense of Congress that a carbon tax would be detrimental to the United States economy, and ask for its immediate consideration.

The Clerk read the title of the concurrent resolution.

The SPEAKER pro tempore. Pursuant to House Resolution 767, the concurrent resolution is considered read.

The text of the concurrent resolution is as follows:

H. CON. RES. 89

Whereas a carbon tax is a Federal tax on carbon released from fossil fuels;

Whereas a carbon tax will increase energy prices, including the price of gasoline, electricity, natural gas, and home heating oil;

Whereas a carbon tax will mean that families and consumers will pay more for essentials like food, gasoline, and electricity;

Whereas a carbon tax will fall hardest on the poor, the elderly, and those on fixed incomes;

Whereas a carbon tax will lead to more jobs and businesses moving overseas;

Whereas a carbon tax will lead to less economic growth;

Whereas American families will be harmed the most from a carbon tax;

Whereas, according to the Energy Information Administration, in 2011, fossil fuels share of energy consumption was 82 percent;

Whereas a carbon tax will increase the cost of every good manufactured in the United States;

Whereas a carbon tax will impose disproportionate burdens on certain industries, jobs, States, and geographic regions and would further restrict the global competitiveness of the United States;

Whereas American ingenuity has led to innovations in energy exploration and development and has increased production of domestic energy resources on private and State-owned land which has created significant job growth and private capital investment;

Whereas United States energy policy should encourage continued private sector innovation and development and not increase the existing tax burden on manufacturers;

Whereas the production of American energy resources increases the United States ability to maintain a competitive advantage in today's global economy;

Whereas a carbon tax would reduce America's global competitiveness and would encourage development abroad in countries that do not impose this exorbitant tax burden; and

Whereas the Congress and the President should focus on pro-growth solutions that encourage increased development of domestic resources: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That it is the sense of Congress that a carbon tax would be detrimental to American families and businesses, and is not in the best interest of the United States.

The SPEAKER pro tempore. The concurrent resolution shall be debatable for 1 hour, equally divided and controlled by the chair and ranking minority member of the Committee on Ways and Means.

The gentlewoman from Tennessee (Mrs. BLACK) and the gentleman from Michigan (Mr. LEVIN) each will control 30 minutes.

The Chair recognizes the gentlewoman from Tennessee.

GENERAL LEAVE

Mrs. BLACK. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks and to include extraneous materials on H. Con. Res. 89, currently under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from Tennessee?

There was no objection.

Mrs. BLACK. Mr. Speaker, I yield myself such time as I may consume.

I rise in support of H. Con. Res. 89, which takes a strong stand against the carbon tax that would hurt American families, workers, and job creators.

As the President closes out his time in office, he would like nothing more than to ram through more of his harmful energy agenda. Just look at the President's budget this year. Among the \$3.4 trillion in tax hikes he proposed, the President included a \$10 per barrel tax on oil. This tax alone would cause gas prices to increase by an estimated 25 cents per gallon. With a carbon tax, there would be a tax hike on production, distribution, and the use of not only oil but also of natural gas and any other form of energy that emits carbon. Such a tax would have many serious impacts on our economy by making day-to-day life more expensive for families throughout this country.

First, a carbon tax could drive up the cost of energy for both the producers and the consumers. This translates to larger energy bills that eat up even more of Americans' take-home pay, especially during the hottest and coldest months of the year.

Second, a carbon tax would destroy well-paying jobs throughout the American energy sector—a sector that has fueled significant job growth throughout the country.

Third, a carbon tax would deliver a direct hit to working families and have compound effects that would reach all corners of the economy. In fact, a carbon tax would increase the cost of, virtually, every good manufactured or service performed in the United States, including everyday necessities. If a good requires energy to make or transport, which most do, taxes on that energy are, essentially, a tax on that good. As a result, Americans would have to pay more for everything—from milk to clothing to school supplies.

Finally, to make this bad idea even worse, we know that a carbon tax would hurt those who are living in poverty and those who are on fixed incomes more than anyone else.

Put simply, a carbon tax would make it harder for us to grow our economy and help working families and small businesses succeed.
