

He acted. He picked up his flamethrower, and he ran towards those trying to take him out; and he did it again and again and again. He did so because he believed in something greater than himself, because his country asked him, and he answered. He was there in that place and at that time when his country—our country—needed him the most.

Woody is the last surviving Medal of Honor recipient from the Battle of Iwo Jima, and he is celebrating his 93rd birthday on October 2. I join my State and a grateful Nation in thanking Woody Williams for his service and in wishing him a wonderful birthday.

TRANS-PACIFIC PARTNERSHIP

The SPEAKER pro tempore. The Chair recognizes the gentlewoman from New York (Ms. VELAZQUEZ) for 5 minutes.

Ms. VELAZQUEZ. Mr. Speaker, I rise today to bring attention to another bad trade deal that could soon be forced upon us. It is possible that the Trans-Pacific Partnership, or TPP, could be brought before this body for a final vote before the end of the year and end of this Congress.

We have seen time and again what bad trade deals do to our communities and to working families across this Nation. You see, when NAFTA was under consideration, American workers were told that the trade benefits would mean more jobs and economic opportunities.

What actually happened? We saw a net loss of 700,000 jobs thanks to NAFTA. So if history is any guide, we know what to expect from TPP. But in many ways, this agreement is even more harmful than NAFTA. In fact, the core of this deal is allowing foreign corporations to sue the U.S. Government over regulations they simply do not like.

□ 1045

Imagine, any time there is an environmental regulation or worker safety regulation that a company does not care for, they can sue.

These cases will not go through the regular legal process. Instead, TPP creates a special tribunal of three corporate lawyers to evaluate the case. And if a company convinces these three lawyers that a law or regulation violates their TPP rights, well, then the American taxpayer has to pay these corporations enormous compensation.

Let's be clear. There is no appeal process. There is no way to reverse these decisions. The TPP could put the taxpayer on the hook for almost unlimited sums of money.

It is no wonder that this agreement was negotiated in private. While corporations were given plenty of opportunity to comment on how they wanted the agreement to look, the public and workers were not given a seat in the room—or even the chance to review the text before it was finalized.

The end result, unsurprisingly, is an agreement that is bad for the American people and would affect their daily lives in countless ways. American workers would find themselves competing for jobs against workers in places like Vietnam, who make 65 cents an hour—65 cents an hour.

It is no wonder that this agreement would require the U.S. to import food that does not meet our own safety standards. It would mean more expensive prescription drugs for our seniors, and it would curtail policies meant to fight climate change.

Mr. Speaker, the TPP is 6,000 pages long. It is too big and covers too much. It has too many unintended consequences. There should be no rush to push this agreement through the House before the end of the year.

However, if this agreement is put on the floor this year, I will vote “no,” and I encourage all of my colleagues to do the same. Protect working families. Protect the American consumer. Protect our environment. Vote “no” on the TPP.

CONGRESS MUST ACT AFFIRMATIVELY TO PROTECT THE INTERNET

The SPEAKER pro tempore. The Chair recognizes the gentleman from Wisconsin (Mr. SENSENBRENNER) for 5 minutes.

Mr. SENSENBRENNER. Mr. Speaker, unless the Congress acts affirmatively by the end of next week, the Obama administration will turn over the core functions of the Internet to an international body. We cannot allow this to happen.

Look at the consequences. Using domain names, we have control over the protection of free speech on the Internet. One of the real positive things of the development of this type of technology over the last 45 or 50 years has been that people have been able to express themselves the way they want to on the Internet and be able to get a huge worldwide audience. Now, I recognize that there is no truth meter on the Internet, but people who make ridiculous statements on the Internet end up getting denigrated in the court of public opinion anyhow.

Free speech is at stake here, but also the national security of our country is at stake. The core functions of the Internet, including control over domain names, should not be turned over to countries that do not have America's best interests or values at heart, like China or Russia or Iran. They have no protections for free speech, they have no value for free speech, and they will do what they want to to put censorship on the Internet, particularly as a way of controlling their own population within their country. If we don't act, that is going to be something that happens, and I think we can guarantee it.

Stopping this move by the Obama administration will also ensure that the

United States Government would maintain ownership and control over the dot-gov and dot-mil domain names. That is necessary to protect our national security.

Just think of what would happen if a hostile power like Iran would be able to get control of both the dot-gov and dot-mil domain names. They would be easier able to hack, they would be easier able to spread around propaganda and disinformation, and unwitting people would think that this is coming from the United States Government. How denigrating will that be? It will be huge, and I think we all know the answer to that.

Now, who is best able to protect a free and open Internet? It is the United States of America, with the protections that we have in our Bill of Rights. Those are protections that have made the Internet grow and flourish.

I tell the administration, if it ain't broke, don't fix it. The Internet ain't broke, but it will become broken if we have countries that do not have our values and stick their nose into the governance of the core functions of the Internet. It is kind of like a termite. You don't see the danger right when the termite starts eating away, but if you allow it to start eating away and don't send the exterminator out, sooner or later there is going to be a big-time problem. Let's keep the termite of hostile powers who don't share our values out of getting into the Internet.

Congress must act affirmatively. We have to stop this from happening, and we don't have much time to do it.

FIND A SOLUTION SO ALL AMERICANS CAN HAVE CONTINUED ACCESS TO AN OPEN AND FREE INTERNET

The SPEAKER pro tempore. The Chair recognizes the gentleman from Iowa (Mr. YOUNG) for 5 minutes.

Mr. YOUNG of Iowa. Mr. Speaker, America is a compassionate country. We are a very giving country. America gives a lot. But I am not sure we need to be giving away a free and open Internet.

If Congress does not act soon, our free and open Internet is going to be handed over by our President to a global bureaucratic body, a body that may not respect the freedom of information and speech that we experience today, a body that may censor what Americans have to say or how journalists can receive information and cover certain stories on governments, on current events.

What does handing the Internet over to a global bureaucracy mean for privacy? for freedom of information? commerce? national security? The question is really: What is the need to do this, to hand over the administration of a working, free, and open Internet to a global bureaucracy? And why the rush?

Now, my colleagues, the gentleman from Wisconsin (Mr. DUFFY) and we

just heard from the gentleman from Wisconsin (Mr. SENENBRENNER), are supporters of a great bill Mr. DUFFY introduced called the Protecting Internet Freedom Act, H.R. 5418. It has many sponsors on it. There are efforts in the Senate as well to do the same thing to protect the Internet.

In 2014, the National Telecommunications and Information Administration, the NTIA, announced its intention to relinquish, to give away, its procedural authority over Internet domain and functions to the global Internet stakeholder community. Many of the Iowans I represent, and I know many others around the country, are incredibly concerned about this—and rightly so—about shifting U.S. oversight and giving authority to regimes that have repeatedly censored the Internet.

As a member of the Appropriations Committee, I have worked with my colleagues to try to block funding for the administration's appeal to do this, this bogus plan, and I am hopeful U.S. Internet protections will remain in any final spending bill coming up. Mr. Speaker, the proper place for debate over important issues like this, like the integrity of the Internet, is here in Congress, not behind closed doors at the NTIA, a Federal agency, with these unilateral actions.

I urge my colleagues and I urge my fellow Americans to reach out to the Members of Congress and tell them and ask them and plead with them to protect the Internet, to make sure it is free and it is open, and to find a solution so that Iowans and all Americans have continued access to an open and free Internet, uncensored, where information can flourish and speech can flourish.

UNITED STATES GOVERNMENT
WILL GIVE UP CONTROL OF THE
INTERNET IN 9 DAYS

The SPEAKER pro tempore. The Chair recognizes the gentleman from Wisconsin (Mr. DUFFY) for 5 minutes.

Mr. DUFFY. Mr. Speaker, I rise today to express my great concern that in a mere 9 days the United States Government is going to give up control of the Internet. This is one of those issues that I don't think many Americans know about. This is not on the front page above the fold of your paper. It is not splashed across your nightly news. You are not seeing it everywhere on the Internet. So Americans aren't really aware of it 9 days before this transfer is about to take place.

Now, as the Speaker knows, there are many things in this House both parties don't always agree on—that might be an understatement. The President just transferred \$1.7 billion to Iran; \$400 million, arguably, was Iranian money, but \$1.3 billion was American money, U.S. taxpayer money, transferred to Iran, the lead sponsor of Tehran cash. I disagree with that. Some of my colleagues on the other side might ap-

plaud that and think that is a great idea. I would disagree.

Or the fact that we are releasing prisoners from Guantanamo Bay. Folks who helped craft the 9/11 attack are being released from GTMO back to areas where they can do America more harm. I disagree with that. My friends across the aisle might agree with those releases. Those are some big items that this Chamber does not agree on.

But the transfer of control of the core functions of the Internet is something that many Members of this Chamber and many Americans agree with. It is going to transfer those core functions to an international foreign body that will include Russia and China and Iran and even Europe, transferring that control.

And let's make no mistake; the Internet was made in America. The Internet was paid for by American taxpayers at its point of invention, and the Internet has revolutionized the world, revolutionized the form in which we communicate. Not only is it great technology, but it embodies the American idea of freedom of speech. It is all open. Put out your ideas; some are good, some are bad, some are true, some are false, but it is free, just like that American idea of free speech. We have exported that freedom of speech idea to the rest of the world on the Internet, radically transformed the way people around the world communicate, and it was made in America with the American idea of free speech.

Now, 9 days from now, we are on the cusp of transferring its control to a foreign body that doesn't share that same idea of freedom of speech. We all know Russia doesn't share that idea, China doesn't share that idea, and Iran doesn't share that idea. But you might say, my friends, Europe, they share that idea, don't they? Not necessarily, they don't. They have rules in the European Union that will delineate hate speech and offensive speech that has to be taken off the Internet—not an American idea. That is a European idea of free speech.

But when you talk about offensive speech, offensive to whom? I could say, well, Catholics or Christians might hold certain positions and put certain things on the Internet that another group finds offensive, or the LGBT community might put something on the Internet that another group finds offensive. I am sorry. In a debate of ideas where you have a free flow, people can get offended, and that is okay.

□ 1100

But, to shut down speech that is offensive, even in the European model, frankly, to me, is offensive.

I think what we have to do in this body is to prevent the transfer. The Internet, I would argue, is U.S. Government property; and if the President is you-know-what-bent on transferring its control, it should come to this House and to the Senate. We should vote. We should have hearings and a debate.

In the end, the American people should see how their Senators and their House Members vote on the transfer of the core functions of the Internet. They should have a say. They should be able to petition their elected Representatives to say: I love the idea that you are going to transfer control to a global body that doesn't share our ideas, or, my goodness, stop the transfer.

Petition your elected Representatives, and let's have them take a vote. That is not going to happen. It is going to be transferred by the President—without a vote. I would ask all Americans to stand up, to push back, to fight back, and to make sure we maintain the great idea of the American and now global Internet.

RECESS

The SPEAKER pro tempore. Pursuant to clause 12(a) of rule I, the Chair declares the House in recess until noon today.

Accordingly (at 11 o'clock and 1 minute a.m.), the House stood in recess.

□ 1200

AFTER RECESS

The recess having expired, the House was called to order by the Speaker at noon.

PRAYER

Reverend Clarence A. Williams, Greater Mt. Zion African Methodist Episcopal Church, St. Petersburg, Florida, offered the following prayer:

Our Father and our God, we are grateful for this Nation, its vastness, its beauty. Truly, we live in a land of milk and honey. Help us, we pray, to protect and preserve it so that its grandeur and fullness always remains.

We are grateful for our people. A Nation of many cultures, from many different cultures, from many different races, many different religions, help us to love each other.

We are grateful for our history, a rich, gleaming heritage, a heritage born from a spirit to be free; one moment defending freedom, at other times struggling to find it. Forgive us for the times that we have missed the mark.

We are grateful for our leaders. Lord, bless the Members of this Chamber and the leadership of our great Nation. Help these Members own our country's problems and work to find solutions.

Finally, we are grateful for our future. Lord, bless the United States of America to be Your champion of righteousness that, supported by Thy powerful hand, we will establish Thy justice among nations and among men.

Amen.
