

place in Global Competitiveness, according to the World Economic Forum, to between 3rd and 7th place. This has been attributed in great part to the decades-long decline in the viability and competitiveness of our national infrastructure. (We've not even been in the top 10 of transportation infrastructures for several years).

More to the point, to keep up with expected infrastructure decline, the American Society of Civil Engineers estimates we'll need to spend \$3.6 trillion just in the next five years. This estimate doesn't get us to 1st place, this just keeps us from failing further!

Why has this issue of infrastructure become such a burden to competitiveness and our deficit? For one thing, if we continue rehabilitating our infrastructure as we have, our Nation will be stuck installing and repairing infrastructure using outdated technology from the 1930s.

Today, through the Departments of Transportation at state and federal levels, the regulatory frameworks for materials of construction define requirements that, in most cases, were set several decades to almost a century ago. For a case in point, hot-dipped galvanizing, one of the most commonly used corrosion resistant coatings technologies in the world, was specified in 1928. This specification (ASTM A123) is still actively required by most state and federal DOTs around the country. Epoxy-coated rebar, considered a "new" and now widely specified technology, was finally specified for use in the 1970s, and that only after over 20 years of field trials and testing.

As these regulations are defined as a snapshot in time—focusing on how the materials are manufactured instead of how they should perform—new technologies that offer better performance and cost advantages can't currently qualify for major infrastructure programs. And, since it takes about 17 years to take a new technology through the regulatory specification cycle, most innovative technologies fail to ever reach beyond the test phase, much less to ever achieve full scale deployment.

Using these last-century manufacturing techniques means we have to use more metal and spend more, when more durable and safer innovation would work. It means that now and for the foreseeable future, infrastructure requires more frequent replacement or the possibility of major failure when degradation and corrosion set in.

Why is it so important we employ the best-available metals technology? Because corrosion is a quiet infrastructure killer. Corrosion degrades—sometimes catastrophically. When you read about bridge collapses and unsafe structures, think corrosion. Corrosion is a budget-buster—using lower quality metals which corrode quickly creates a ruinous cycle of more maintenance and faster required replacement of our infrastructure. The National Association of Corrosion Engineers pegs the direct cost of corrosion in the U.S. at over 4 percent of the Gross Domestic Product of our Nation.

Innovative companies across our Nation have answered the call to improve America's infrastructure by reinventing the metals industry. As an example, our nanolaminated metals—using a different manufacturing technique than traditional metals—corrode significantly less, are stronger and lighter, and can require less energy and materials to produce. At Modumetal, we have demonstrated structures that resist corrosion thirty times longer for the same basic cost as the currently-specified materials. This means our bridges could last hundreds of years instead of decades. The net result: safer, longer-lasting infrastructure for less money.

Mr. President-Elect, you have the opportunity now to work with Congress to approve legislation that incentives industries to use innovative materials of construction, based on safer performance-based specifications. Such legislation could provide an incentive tax credit for technologies that extend the life and performance of our infrastructure, thus encouraging competition and adoption of best-performing, lowest-cost, state-of-the-art corrosion mitigation technologies for our Nation's infrastructure and industrial applications.

You don't have to accept the status quo, and I hope that our Government will work together to seek and take on the challenge of innovating, to achieve a national infrastructure that is second to none, at a price that will be sustainable for generations.

HOLOCAUST REMEMBRANCE DAY

HON. BRIAN HIGGINS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 24, 2017

Mr. HIGGINS of New York. Mr. Speaker, Friday we commemorate Holocaust Remembrance Day. A day that was established by the Israeli Parliament in 1951, to coincide with the anniversary of the Warsaw Ghetto Uprising.

This is a time to mourn the millions of victims of the Holocaust. And it serves as an annual reminder to Americans, and indeed to all humanity, that we must never forget the evil that mankind has visited upon itself.

History must serve as a template to right the wrongs that humankind has committed. Famously said, those who do not learn from history are doomed to repeat it.

This week we must reflect on grave consequences of which vilifying individuals based on race, religion, ideology or sexual orientation could yield.

I encourage all those in Western New York and across the country to join in memorializing the victims of the Holocaust, in hope that a tragedy of this scale is never committed again.

HONORING REECE DWIGGINS

HON. SAM GRAVES

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 24, 2017

Mr. GRAVES of Missouri. Mr. Speaker, I proudly pause to recognize Reece Dwiggins. Reece is a very special young man who has exemplified the finest qualities of citizenship and leadership by taking an active part in the Boy Scouts of America, Troop 81, and earning the most prestigious award of Eagle Scout.

Reece has been very active with his troop, participating in many scout activities. Over the many years Reece has been involved with scouting, he has not only earned numerous merit badges, but also the respect of his family, peers, and community. Most notably, Reece earned the rank of Firebuilder in the Tribe of Mic-O-Say. Reece also contributed to his community through his Eagle Scout project. Reece sorted, filed and cataloged all of the choir, organ and piano music for his home church, Macon First Christian Church in Macon, Missouri.

Mr. Speaker, I proudly ask you to join me in commending Reece Dwiggins for his accomplishments with the Boy Scouts of America and for his efforts put forth in achieving the highest distinction of Eagle Scout.

INTRODUCTION OF THE TRANSITION-TO-SUCCESS MENTORING ACT

HON. ANDRÉ CARSON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 24, 2017

Mr. CARSON of Indiana. Mr. Speaker, I am introducing the Transition-To-Success Mentoring Act to help local education agencies prepare at-risk students for the transition from middle school to high school.

During middle school, studies show that many students struggle to balance priorities between school, peer groups and their lives at home. Research also indicates that school-based mentoring is an innovative supplement to the traditional learning that takes place in the classroom. Mentoring provides underserved and at-risk students with much needed attention and support to help keep them engaged in school. For these reasons, I am proposing the creation of the Transition-To-Success Mentoring Program. With this bill, students participating in the program will develop and execute a plan for academic progress with the assistance of a school faculty member or volunteer from the community.

RECOGNIZING ROSE BLACKWELL

HON. TOM REED

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 24, 2017

Mr. REED. Mr. Speaker, I rise today to congratulate Rose Blackwell on her retirement and to recognize her outstanding career as City Clerk of Corning, New York.

Mrs. Blackwell was appointed City Clerk by Corning Mayor Daniel Killigrew in 1984 and worked in that capacity for over 30 years. She served through numerous changes in city government and clerked under eight city mayors. It was during my own time as Mayor of Corning that I came to recognize Mrs. Blackwell for her dedication and caring service to the people of our community.

Mrs. Blackwell completed training at Syracuse University, Maxwell School in 1993 and received the designation of Certified Municipal Clerk from the International Institute of Municipal Clerks in 1994. In 1996, she was appointed Registrar of Vital Statistics for Corning, New York, a responsibility she maintained alongside her duties as City Clerk to the end of her career.

I ask my colleagues to join me in commending Rose Blackwell for the dedication with which she served the citizens of her community and wishing her all the best in her well-earned retirement.

PERSONAL EXPLANATION

HON. DONALD M. PAYNE, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 24, 2017

Mr. PAYNE. Mr. Speaker, I was not present for the following Roll Call votes. Had I been present, I would have voted "YEA" on Roll Call No. 60 (H.R. 423 Anti-Spoofing Act) and "YEA" on Roll Call No. 61 (H.R. 582—Karis Law Act).

TRIBUTE TO DR. RAYMOND
GORDON KLOCKOW

HON. TODD ROKITA

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 24, 2017

Mr. ROKITA. Mr. Speaker, I rise today to honor a great Hoosier and my dear friend, Dr. Raymond Gordon Klockow who passed away January 13, 2017. Not only was he a constituent in my district, but he was also a good friend to our family and to our office. Most recently, he served as our county coordinator in Jasper County.

Gordon was born in South Bend, Indiana and graduated from South Bend Central High School in 1965. He then attended Purdue University and received a Bachelor of Science in 1970, graduated from the Loyola University School of Dentistry in 1974 with a Doctor of Dental Surgery, and completed his General Practice Residency at Berkshire Medical Center in 1975. That same year he moved to Rensselaer, Indiana and began practicing dentistry at the Clinic of Family Medicine.

Gordon took a lot of pride in his work. He practiced general dentistry in Rensselaer at the Clinic of Family Medicine from 1975–1983, Hillcrest Family Dental Center, P.C. from 1983–2011, and Sheets Medical Practice from 2014–2015. It was at his dental office where I first met Gordon. It seemed we talked for hours about my family's profession, dentistry. And of course we talked politics in that first meeting, and every conversation since. But talk from him of politics and American Exceptionalism in every conversation is not surprising to all who knew Gordon. He put a lot of care and dedication to the smiles of so many Hoosiers during the course of his career. Gordon himself was rarely ever seen without a smile on his face and it was infectious to those around him.

One of the many things I admired about Gordon was his servant's heart. He served as the Jasper County Coroner, a Jasper County Deputy Coroner, and a Newton County Deputy Coroner. He was board certified in Pain Management, Forensic Medicine, Forensic Dentistry, and as a Forensic Examiner. Gordon was also currently a managing partner of Ritz Cinema in Rensselaer where he took great pride in the service he provided for the community.

Some of my most vivid memories of Gordon were at the town hall meetings we have in our district. I frequently asked him to help us with the meetings, sometimes as a host and other times as a participant in the reading of the Constitution. He was the perfect leader, in body and temperament, to do so. Gordon was

the type of individual who always asked what he could do to help and would go above and beyond for anyone who needed him.

Gordon leaves Nancy, his beloved wife for over 27 years, three children, and seven grandchildren to carry on his legacy of service to fellow Hoosiers. Anyone who knew him well knows what a great loss his passing is for the community. Mr. Speaker, we lost a good one last week. He will be missed. Rest in peace Gordon, you will not be forgotten.

PERSONAL EXPLANATION

HON. EARL BLUMENAUER

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 24, 2017

Mr. BLUMENAUER. Mr. Speaker, had I been present for the vote on the passage of H.R. 423, the Anti-Spoofing Act (Roll Call No. 60), I would have voted "aye." This bill would expand prohibitions on "spoofing," the changing of a cell phone's identification in order to mislead the recipient of a call or a text message. Fraudulent calls and texts are on the rise, and Congress should update the tools that law enforcement can use to address and prevent lawbreakers.

Had I been present for the vote on the passage of H.R. 582, the Kari's Law Act (Roll Call No. 61), I would have voted "aye." This bill would require multiline telephone systems to allow direct emergency 911 calls without first dialing out of the system.

HONORING HODGSON RUSS, LLP
AS IT CELEBRATES ITS 200TH
ANNIVERSARY

HON. BRIAN HIGGINS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 24, 2017

Mr. HIGGINS of New York. Mr. Speaker, today I stand before you to recognize and honor Hodgson Russ, LLP as the firm celebrates its 200th Anniversary.

Hodgson Russ is not only Buffalo's oldest law firm, but the city's oldest continuously operating business, with roots dating back to 1817. The firm has played a pivotal role in the City of Buffalo's history and has been instrumental in the growth and expansion of the region.

One of the first independent law firms in the nation, it was founded in 1817 by Mr. Hodgson Russ. Today, the firm employs 208 attorneys and more than 275 staff members who continue to follow the same philosophies upon which Mr. Russ originally founded the firm.

The firm extends into industries such as health care, construction, life sciences, railroads, steel, banking, milling and manufacturing. It practices in areas that extend from business transactions and compliance to environment and energy, immigration, tax and real estate to name but a few. Since the firm's inception, Hodgson Russ provides representation to its clients with the utmost respect and integrity.

Notably, Hodgson Russ has a long and substantial record shaping early Buffalo, producing notable attorneys that played key roles both locally as well as on a national stage.

The founder of Hodgson Russ's earliest predecessor firm, Mr. Asa Rice, played a key role in the completion of the western terminus of the historic Erie Canal project in 1825.

In 1832, partners Joseph Clary and Millard Fillmore drafted the first Buffalo city charter, playing a pivotal role in the city's municipal incorporation. A few years later, it was partner Nathan Hall who led the effort to create the Buffalo public school system, the first tuition-free, tax-supported public school system in the State of New York.

The Hodgson Russ legal family more than made its contribution in and around elective public office as well. In 1849, Millard Fillmore was sworn in as the 12th Vice President of the United States, and sixteen months later, upon the death of President Zachary Taylor, was inaugurated the 13th President of the United States. A few years later, Grover Cleveland joined the firm as a clerk and in 1859 was admitted to practice, after which he would, during the period 1870–1892, be successively elected Sheriff of Erie County, Mayor of Buffalo, Governor of New York and twice as President of the United States. The firm's role in the history books continues in 1901 when Hodgson Russ partner John Milburn played an instrumental role in bringing the Pan-American Exposition to Buffalo. A sad postscript: President William McKinley—wounded by an assassin's bullet at the Exposition—succumbs to his injuries at Mr. Milburn's home on Delaware Avenue, on the site where Canisius High School now stands.

While the firm honors its illustrious past, it remains focused on the future, providing emerging businesses and new industries with business-focused legal advice that contributes to the growth of our overall economy. The firm is also known for providing charitable contributions through their financial support of more than 250 organizations, as well as its work providing pro-bono legal services throughout local communities.

Mr. Speaker, thank you for allowing me a few moments to recognize and honor the Hodgson Russ Law Firm. I would also ask that my colleagues join me in congratulating Hodgson Russ, as they celebrate their Bicentennial with an event planned for Thursday, January 25, 2017 at their offices at the historic Guaranty Building, a National Historic Landmark designed by renowned architect Louis Sullivan. Hodgson Russ has produced leaders in Congress and the Court System, in the NYS Senate and Supreme Court. This local Buffalo firm produced a president of the World Bank and not one, but two Presidents of the United States. It is my distinct honor to join current president Rick Kennedy and the many partners, associates, clerks, and other members of the Hodgson Russ legal family as they celebrate this momentous occasion.

SOLIDARITY WITH AMERICANS
PARTICIPATING IN WOMEN'S
MARCHES

HON. GERALD E. CONNOLLY

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 24, 2017

Mr. CONNOLLY. Mr. Speaker, I rise today in solidarity with the millions of Americans who participated in Women's Marches around the country on Saturday.
