

Wisener Field and its early founders and operators have been recognized throughout the years on many occasions, including by the Texas Historical Commission. The Texas Aeronautics Commission and the Federal Aviation Administration recognized Mineola Wisener Field Airport as the "second oldest, continuously-used, uncontrolled airport in the state." As Wood County's first airport, Wisener Field has made a long-lasting impact on the economy, as well as aviation enthusiasts.

As the Representative of the 5th Congressional District of Texas, it is an honor to recognize Wisener Field on the 100th Anniversary of its first landing.

HOW TRUMPCARE WILL EXACERBATE THE TRANSPORTATION BARRIER

HON. TERRI A. SEWELL

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 29, 2017

Ms. SEWELL of Alabama. Mr. Speaker, America is a global leader in health care innovation and discovery. Thanks to the Affordable Care Act, we've made great progress in making sure more Americans have access to health insurance in recent years. We must recognize that much work remains to ensure all Americans have practical access to health services. Financial and structural barriers continue to exist for countless Americans, particularly those in rural and under resourced communities where distance to a hospital is long and the concentration of health professionals is sparse.

Health care access presents a problem for people in rural areas where distance is a taxing obstacle. People in suburban and urban settings, while they may live closer to a doctor or hospital, can still have trouble with transportation. Often, households share one vehicle between many family members if they own one at all. Low-income neighborhoods are often subject to unreliable public transportation. Birmingham is the only city in my district with a public transportation system but it faces many challenges that the city is trying to rectify. For the disabled, obese, or chronically ill, the lack of reliable transportation options lead to missed appointments and overall lower health outcomes.

Patients miss doctor's appointments simply because they do not have transportation to get there. Without transportation access, patients may wait for a medical emergency just to be able to see a doctor. In rural parts of Alabama, the problem is worse among minorities. Throughout the nation, 55 percent of African American and 60 percent of Hispanic survey respondents reported that transportation was a major barrier to medical treatment, compared to 38 percent of white respondents.

Eligibility requirements vary, but each state has a "non-emergency medical transport" benefit for people with Medicaid. It covers a certain number of rides for medical care per month. Some states contract with local companies to provide rides for citizens who otherwise would have no way to receive regular medical attention. These are just some of the benefits millions of beneficiaries will have no access to if Trumpcare becomes law.

The Affordable Care Act's expansion of Medicaid and reforms to the individual insur-

ance market has helped to lower the uninsured rate for African Americans. Between 2013 and 2016, the uninsured rate for African Americans declined from 18.9 percent to 11.7 percent. However, African Americans still have higher uninsured rates than whites (7.5 percent) and Asian Americans (6.3 percent). Repealing the ACA and cutting Medicaid programs reverses the progress America has made to make healthcare more accessible and affordable in recent years.

One's access to quality health care should not depend on where they live, what their race is, or how much money they have. This country should uphold the values it claims to have and ensure that healthcare is not a preferential benefit, but a human right for every citizen.

IN HONOR OF MR. BILL DEBERRY, SR.

HON. MICHAEL C. BURGESS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 29, 2017

Mr. BURGESS. Mr. Speaker, I rise today to recognize the life of Mr. Bill DeBerry, Sr., one of the finest businessmen in Denton, Texas. As the founder and owner of a funeral home in Denton, Bill devoted much of his life to assisting others during some of the most difficult times of their own lives.

Bill left school at an early age to help support his family when he began driving an ambulance for a funeral home. The owner of the funeral home at the time noticed Bill's work ethic and encouraged him to finish his education. With both high school and University of North Texas degrees in hand, Bill worked his way through the Dallas Institute of Mortuary Services.

After graduating with his specialized degree, Bill began his mortuary career at Schmitz-Floyd-Hamlett Funeral Home in Denton. After gaining valuable experience in the industry, he opened Bill DeBerry Funeral Directors in 1990. This local business continues to serve the Denton community today under the leadership and dedication of his sons.

I would like to offer my sincere condolences to Mr. DeBerry's family, friends, and colleagues. He will be remembered for his compassion and commitment to excellence throughout his 60 year career, as well as his service to our Denton community.

IN RECOGNITION OF EDUARDO AND MARIA VALADAO

HON. DAVID G. VALADAO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 29, 2017

Mr. VALADAO. Mr. Speaker, I rise today to congratulate my parents, Eduardo and Maria Valadao, on being nominated the 2017 Kings County Dairy Couple of the Year.

This year, Mr. and Mrs. Valadao are being honored as the 2017 Kings County Dairy Couple of the Year at the Kings County June Dairy Month Committee Dinner in Hanford, California. This award is given to members who are actively involved in industry activities.

As parents, grandparents, and lifetime dairy farmers, Eduardo and Maria Valadao exemplify the values, leadership, and commitment this award stands for by improving the image of the dairy industry.

Eduardo F. Valadao was born on October 14, 1943, in Fontinhas, a civil parish on the Terceira Island in the Portuguese Azores. Almost thirteen miles southwest, Maria F. Goncalves was born in Ribeirinha, on February 17, 1953. The couple's relationship bloomed after first meeting at a bull fight in front of Maria's childhood home. Mr. Valadao migrated to Los Angeles County in January of 1969. He immediately took a job milking cows, in hopes of creating a successful life for his future wife and children. After establishing a life in the States, Eduardo traveled back to the Azores and proposed to Maria. Following her fiancé, Maria immigrated to the United States in 1972. The couple married on April 28, 1973, in Artesia, California.

The youngest of eight, Eduardo Valadao was raised on a dairy, and worked close with his father and brothers. He wanted to continue the lifestyle he was raised in, to guarantee his days would be spent with his family, teaching his sons about hard work. After their first son, Eduardo "Eddie" Goncalves Valadao, was born on March 18, 1974, the family partnered with another Portuguese family and purchased their first cows on a dairy in Riverdale. Mr. Valadao worked to grow this dairy until it was large enough to support both families involved. After Mrs. Valadao gave birth to their second son, Miguel "Mike" Goncalves Valadao on August 13, 1975, Mr. Valadao moved his family from Los Angeles County to Riverdale in September of 1975.

As a result of the Valadao household increasing, Mr. Valadao moved on from the partnership and rented a larger dairy facility in Tulare, California, in 1977. The family then welcomed their third son, David Goncalves Valadao, on April 14, 1977. Eduardo continued to farm in Tulare until he was ready to invest in his own dairy. Following the birth of their only daughter, Melinda Goncalves Valadao, on June 16, 1985, Mr. Valadao purchased the family's first dairy facility located in Hanford, California. Eduardo and Maria continued to farm and raise their children on this dairy for twelve years. In 1997, they decided to expand their operation and purchased the land of the current dairy. It wasn't until February of 2000 when the current dairy was in full production.

Today, Eduardo and Maria Valadao remain actively involved in their dairy. Eduardo, continuing the tradition of hard work, can be found at the dairy on a daily basis. This humble dairy couple has successfully raised their sons with the same work ethic, knowledge, and passion for the industry as they each manage their own dairies. The first dairy is still in the family, owned and operated by Eddie Valadao. Due to their lifetime commitment to dairying, and priority to instill those values in their family, Mr. and Mrs. Valadao have become staples in the dairy community.

Mr. Speaker, today I ask my colleagues to join me in recognizing my parents for their strong presence in the dairy industry, and congratulating them on being Kings County Dairy Couple of the Year.

CONGRATULATING THE MARYLAND TERRAPINS ON THEIR WOMEN'S AND MEN'S NATIONAL LACROSSE CHAMPIONSHIPS

HON. STENY H. HOYER

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 29, 2017

Mr. HOYER. Mr. Speaker, it is with great pride that I rise to congratulate the University of Maryland on its double victory last month in the NCAA Division I lacrosse national championships. Both the women's Terrapin and men's Terrapin teams brought the highest prize home to College Park in Maryland's Fifth District, representing the first time that both Maryland lacrosse teams won championships in the same year.

Lacrosse has deep roots in Maryland, an older version having been played across eastern and central North America for centuries by Native American nations. That game inspired European settlers and their descendants in the United States and Canada to implement the modern game of lacrosse, which has become one of our country's most popular sports. Played in youth leagues, high schools, and colleges across America, lacrosse teaches teamwork, sportsmanship, athleticism, strategy, and leadership.

The University of Maryland's lacrosse program has been competitive nationally even long before the NCAA's national championships first began for men in 1971 and for women in 1982. Since the 1930's, the Terrapin men's team won the Wingate Memorial Trophy several times as the victors of the U.S. Intercollegiate Lacrosse Association national championship. For the modern tournament, the Terrapin men won championships in 1973 and 1975 before beginning a forty-two year drought that ended last month with their 9–6 victory over Ohio State in the 2017 championship game, led by Head Coach John Tillman. Coach Tillman took over the Maryland lacrosse program seven years ago and has brought the team to six NCAA Final Four tournaments and five national championships. This year's men's roster included eight All-Americans, who helped make 2017 a year to remember.

For the Terrapin women, winning championships became a tradition, with thirteen national titles since 1982, including a streak of seven consecutive victories from 1995 to 2001. This year, they beat Boston College 16–13 in a closely contested game held in Massachusetts to secure their fourteenth national championship. Head Coach Cathy Reese, herself an alumna of the University of Maryland, has been leading the Terrapin women since 2007. As a former Terrapin lacrosse star, Coach Reese was a two-time All-American and was named the NCAA tournament's 'Most Valuable Player' in 1998. This year, her Terrapins finished the season with an undefeated, 23–0 record, capped by this latest national title. This is their third championship victory in the last four years. Five of the team's athletes were named All-Americans for 2017.

Both teams were led by standout stars, and for the first time in NCAA lacrosse history both recipients of the prestigious Tewaaraton Award, which honors the top men's and women's players each year, were won by Maryland athletes. For the women's team, midfielder

and captain Zoe Stukenberg brought home the award, while for the men attackman Matt Rambo received the honor. Both of them have also been nominated for Espy awards, with the winners to be announced on July 12.

I'm proud that the University of Maryland is a national powerhouse for both athletics and academics, leading the country both on the playing field and in classrooms and laboratories. I join in congratulating our victorious Terrapins and wishing them much success as they prepare for next season and to defend their historic double-victory.

RECOGNIZING ALZHEIMER'S AWARENESS MONTH

HON. JOE WILSON

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 29, 2017

Mr. WILSON of South Carolina. Mr. Speaker, June marks Alzheimer's Awareness Month, a time when we especially recognize the patients and caregivers who are fighting Alzheimer's—a terrible disease that impacts 11 percent of South Carolina's seniors.

As a member of the Congressional Task Force on Alzheimer's, I am dedicated to working with my colleagues in Congress to support patients and caregivers and to encourage the advancement of treatment.

I was grateful to support the Palliative Care and Hospice Education and Training Act, legislation that supports families facing Alzheimer's. I was also grateful that the House passed the 21st Century Cures Act—legislation that encourages and supports innovations in research and medical treatments.

I appreciate the service of advocates from the Alzheimer's Association-South Carolina Chapter, especially those who serve the Midlands and Aiken-Barnwell communities: Program Director Sheila Lewis, Program Director Elizabeth Brantley, Director of Development Alexis Watts, and Director of Communications and Advocacy Taylor Wilson.

In conclusion, God Bless our Troops, and may we never forget September 11th in the Global War on Terrorism.

IN HONOR OF DR. ROBERT B. TOULOUSE

HON. MICHAEL C. BURGESS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 29, 2017

Mr. BURGESS. Mr. Speaker, I rise today to recognize the life and public service of Robert B. Toulouse. Dr. Toulouse, provost emeritus and dean of the Toulouse Graduate School at the University of North Texas in Denton, Texas, devoted his life to the education of others.

Robert Toulouse served his country for 25 years. Beginning in World War II, Dr. Toulouse served five years of active duty in the United States Air Force and twenty years in the U.S. Air Force Reserve. In 1978, he retired at the rank of Lieutenant Colonel.

Dr. Toulouse earned three degrees in education from the University of Missouri, which led him to a robust career in academia. In

1948, Dr. Toulouse began his distinguished career in education as assistant professor in the University of North Texas' College of Education. He made a significant impact on campus through his service as dean of the graduate school from 1954 to 1982. During this time, the graduate school grew to host more than 100 graduate programs, increasing from just a few hundred graduate students to more than 5,000.

After 28 years at the helm of the graduate school, Dr. Toulouse joined the university's leadership team as provost and vice president for academic affairs in 1982. After he retired as provost emeritus, the University of North Texas named the Robert B. Toulouse School of Graduate Studies in 1990 in honor of his tremendous professional and personal contributions to the institution.

Dr. Toulouse passed away this year at the age of 98, leaving a rich legacy of service to our community. I would like to offer my sincere sympathy to the Toulouse family on their loss. I am grateful for the service Dr. Robert B. Toulouse rendered to this nation and to the university of which I am a proud alumnus.

TRIBUTE TO MR. RICHARD BICE

HON. ROD BLUM

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 29, 2017

Mr. BLUM. Mr. Speaker, I rise today to honor Mr. Richard Bice of Cedar Rapids, for his services as a local ambassador for the Cedar Rapids Alzheimer's Association. Earlier this year, Mr. Bice was awarded the Alzheimer's Association Advocate of the Year for the Greater Iowa Chapter.

Mr. Bice has dedicated himself to service throughout his life: serving in the United States Army, running a successful insurance business in Cedar Rapids, serving as a state president for Multiple Sclerosis and Muscular Dystrophy associations in Iowa, and forming the Cedar Rapids Metro Optimists Club. Mr. Bice was also a dedicated husband to his late wife, Carolyn Bice, who was diagnosed with Alzheimer's in 2002. Mr. Bice cared for her at home for over 11 years until her death in 2013.

Although he misses his wife dearly, Mr. Bice has maintained a positive outlook on life and has continued to better the community around him. Mr. Bice is a tremendous advocate for the Alzheimer's Association, where he discusses the journey that he and his wife went through after her Alzheimer's diagnosis. Thanks to the hard work of Richard and countless others we have hope that new opportunities for a cure will be available for future generations. It is clear that Richard lives by the words of his father, "whatever you've been given, if you give back, it'll double."

Mr. Speaker, I am proud to rise today to recognize Mr. Bice during Alzheimer's and Brain Awareness Month, and thank him for his outstanding contributions to the Eastern Iowa community, to the State of Iowa, and to our country.
