

Management Agency, part of the Department of Homeland Security, is falling far short on disaster relief in Puerto Rico. In fact, I think one could say they are actually perilously short on helping the people, our fellow citizens, in Puerto Rico.

It has now been 22 days, that is 528 hours, since Hurricane Maria destroyed Puerto Rico. Hundreds of thousands of our fellow citizens in Puerto Rico still—still—have no fresh water, no power, little food, with many villages lacking any means for communication. Many have no dry cots or even dry sleeping bags to replace the wet mattresses and moldy surroundings that characterize the Puerto Rico of today.

Let me say that Puerto Rico is not a large island. It is a little over 100 miles wide, not much larger than my congressional district in Ohio which extends from Cleveland to Toledo. The difference with Puerto Rico is the topography is much more hilly.

I ask myself the question: Why hasn't FEMA had airdrops of vital sustenance from the very start? Where is that help to these far-flung villages that have been cut off because, when the rains came, they washed out bridges and roads that make all these tiny towns inaccessible? Inaccessible.

Fresh water packets can be airdropped. Our military does that all over the world. Why can't those fresh water packets be dropped in Puerto Rico?

We can drop packets with peanut butter and bread. We do that all over the world. Why can't we do that in Puerto Rico? Why can't we airdrop food?

Citizens in Ohio with families and friends in Puerto Rico about whom they are desperately worried have been told that many smaller towns where they have relationships lack relief and any assistance now 528 hours, 22 days, into this deep human tragedy.

I want to place in the RECORD, and I hope somebody at FEMA is listening, names of some of the villages that are completely cut off because roads and bridges were destroyed and no relief has come. No relief has come.

Ponce, in the south, is one. Utuado, Jayuya, Arecibo, Yauco, Corozal, Comerio, Loiza, Toa Baja, Cabo Rojo, and Llanadas. Those are names we have been given. Aid to these pockets of desperation is almost 3 weeks overdue. People need relief now.

FEMA also needs a better plan. In fact, they need a plan. I don't think they have any plan to immediately evacuate people to the mainland for respite. Places like Cleveland, Lorain, and Toledo, Ohio, we could accept people who now are living in conditions you would wish on no American.

We cannot risk more illness and death. Children should not be missing school after the horror they have experienced. We shouldn't have the level of hardship that has been subjected to people who are still enduring the devastation of Maria. What is happening there is inhumane.

Most of the television stations are down in San Juan, and that is where the Governor of Puerto Rico is most of the time when our codes go down there, but the desperation is in the countryside. It is outside of San Juan, which is inaccessible.

President Trump, the people of America and, let me tell you, those in Ohio need you to help their families and countrymen now. FEMA can do so much better for our fellow Americans.

FEMA's initials stand for Federal Emergency Management. So where is the emergency? Where is the management? And where is the Federal reputation for excellence and leaving no man or woman behind?

FEMA, shape up. America demands more, and Americans deserve more.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. The Chair will remind all persons in the gallery that they are here as guests of the House and that any manifestation of approval or disapproval of proceedings is in violation of the rules of the House.

THE IRAN NUCLEAR DEAL WAS A GIANT MISTAKE

The SPEAKER pro tempore. The Chair recognizes the gentleman from Indiana (Mr. MESSER) for 5 minutes.

Mr. MESSER. Mr. Speaker, I rise today to urge President Trump to decertify the disastrous Iran nuclear deal. There are reports that decertification may come as early as tomorrow, and I certainly hope so.

The Iran nuclear deal was a giant mistake. It has been bad for America's national security, bad for our ally Israel's national security, and bad for the world.

By decertifying the flawed Iran nuclear deal before October 15, the administration has a chance to send a strong message that the United States will not sit idly by while the Iranian threat continues to grow.

The deal was premised on a naive notion that Iran would somehow evolve into a peaceful global partner, but that couldn't have been further from the truth. Make no mistake about it: Iran is not our friend, does not share our values, and should not have been trusted.

For decades, Iran has called the United States the Great Satan, and their leadership continues to call for the total annihilation of our ally Israel. Iran remains the largest state sponsor of terrorism in the world and is actively working towards obtaining a nuclear bomb.

This much is clear: Iran has not upheld the spirit of this deal. Now is the time to reassert our authority on the world stage and hold Iran accountable.

I look forward to working with President Trump to keep America, our allies, and the rest of the world safe from Iranian aggression.

HONORING THE DISCOVERY OF HERNANDO DE SOTO'S 1539 ENCAMPMENT AND THE LOST NATIVE AMERICAN TOWN OF POTANO

The SPEAKER pro tempore. The Chair recognizes the gentleman from Florida (Mr. YOHO) for 5 minutes.

Mr. YOHO. Mr. Speaker, I rise today to honor the discovery of Hernando de Soto's 1539 encampment and the lost Native American town of Potano, by the University of Florida professors, Dr. Fred White and Dr. Michele White, and University of Florida honor student Ethan White. This newly discovered archaeological site is the oldest confirmed New World contact site in the United States.

In one of the most important events in U.S. history, de Soto was the first European to discover the Mississippi River and explore an area that today would hold 10 States. Until this incredible archaeological discovery, there was no physical evidence of de Soto's 4,000-mile journey. The collection of artifacts recovered near Orange Lake, Florida, includes very rare King Ferdinand coins, Queen Isabella coins, and a King Enrique IV of Castile coin that is the oldest dated European artifact ever unearthed in the United States.

Other rare items include Murano glass beads and Spanish weapons and armor dated from the early 1500s. The artifacts were excavated in the lost ancient Native American town of Potano. Also discovered in the town of Potano were the remains of the first location of the San Buenaventura Franciscan mission built there in the 1580s. Within the floors of the 16th century mission, the team discovered the largest cache of medieval coins found in the American mainland so far.

Acknowledgment for confirmation and identification of the artifacts goes to a large and diverse group of scholars throughout the country. The recent scientific findings were published in the peer-reviewed International Journal of Archaeology and with the Florida Department of State, Division of Historical Resources, Bureau of Archaeological Research in Tallahassee, Florida. The collection of artifacts is at the Florida Museum of Natural History on the campus of my alma mater, the University of Florida.

NATIONAL FARMERS DAY

Mr. YOHO. Mr. Speaker, additionally, I would like to recognize today is National Farmers Day, a day when we say thanks to all of our farmers and ranchers for the work they do. Our agricultural industry, in a lot of ways, is the backbone of this country. It feeds our Nation and a big portion of the world, and accounts for 11 percent of overall employment.

Most people don't realize how farmers affect their life, but it is important to reflect on the interdependence between rural and urban life.

People often associate Florida with tourism, but agriculture is actually

Florida's number two industry, utilizing one-third of Florida's available land. Without agriculture, urban developments—in fact, all developments—could not flourish. There is a simple symbiotic relationship between families and communities, and that is, if you are hungry, you are going to eat. Every time you get hungry you think about your farmer, so thank a farmer today.

HONORING THE LIFE OF BUD ADAMS

Mr. YOHO. Mr. Speaker, it is fitting on National Farmers Day that I am able to rise and honor a true Florida legend, Mr. Bud Adams of Fort Pierce, Florida, and his contributions to the Florida cattle industry. He is an icon in Florida and the Nation's cattle industry.

Mr. Adams was a pioneer, a wildlife photographer, but more than anything else, he was a true American pioneer and cattle rancher. He was a real American cowboy in Florida, and they are known in Florida as Florida crackers. That name is derived from the sound of a bullwhip when it is used to round up and herd cattle.

After a stint in the Navy during World War II, Mr. Adams returned home to work and grow the family ranch. For the past 80 years, you could find Mr. Adams on horseback surveying the land and the cattle that they raised. He was a strong advocate for conservation and was nationally recognized for his leadership in preserving the land for future generations.

Even more so, Mr. Adams is known for creating the Braford breed of cattle, which is a cross between the Brahman cattle and the Hereford cattle, a heat-tolerant, heavy-beef-producing cow, ideal for the Florida climate. Mr. Adams was rightfully proud of this breed and went on to help found the United Braford Breeders Association.

Additionally, Mr. Adams was a proud member of the Florida Cattlemen's Association. He served as the president in 1958, and, for the last 59 years, he was always willing to offer a helping hand to the new Florida Cattlemen's leadership.

Mr. Adams will always be remembered for the impact he had on the Florida cattle industry and his willingness to nurture future generations of Florida cattlemen. He will be greatly missed.

SUPPORTING THE CARE CORPS

The SPEAKER pro tempore. The Chair recognizes the gentlewoman from Florida (Ms. ROS-LEHTINEN) for 5 minutes.

Ms. ROS-LEHTINEN. Mr. Speaker, I would like to encourage my colleagues to support the Care Corps Demonstration Act.

By the year 2030, there will be more than 72 million older Americans. As they age, many of these seniors will require long-term support and services, placing a significant burden on our elder care system that is already strug-

gling to provide and finance services to our seniors.

The Care Corps Demonstration Act, which my colleague Congresswoman MICHELLE LUJAN GRISHAM and I have introduced, will address this growing need by placing Care Corps volunteers in communities where they will provide essential services to seniors that will allow these older Americans to remain independent. In turn, these wonderful volunteers will receive assistance in paying down their educational expenses.

More importantly, Mr. Speaker, this program will help us train a new generation of healthcare providers to meet our Nation's demand for senior care services by giving our students essential, real-world experience in the field.

Mr. Speaker, this bill will create stronger communities across our Nation by bringing generations of Americans together. I encourage my colleagues to support our bill, the Care Corps Demonstration Act, of this session. The bill number, Mr. Speaker, is H.R. 3493.

So please contact my congressional office or the office of Congresswoman MICHELLE LUJAN GRISHAM to cosponsor H.R. 3493.

NATIONAL FARMERS DAY

The SPEAKER pro tempore. The Chair recognizes the gentleman from Louisiana (Mr. ABRAHAM) for 5 minutes.

Mr. ABRAHAM. Mr. Speaker, I rise today to recognize America's farmers on National Farmers Day.

I call our American farmers the thin green line because food security is national security. We can never discount the importance of our Nation's ability to feed itself, and we can do so only by the hard work of the men and women in the agricultural community.

In honor of National Farmers Day, I wanted to recite a poem first delivered by a radio personality, Paul Harvey, to the FFA Convention in 1978. The poem is as follows:

And on the 8th day, God looked down on his planned paradise and said, "I need a caretaker," so God made a farmer. God said, "I need somebody willing to get up before dawn, milk cows, work all day in the fields, milk cows again, eat supper, then go to town and stay past midnight at a meeting of the school board," so God made a farmer.

"I need somebody with arms strong enough to rustle a calf and yet gentle enough to deliver his own grandchild; somebody to call hogs, tame cantankerous machinery, come home hungry, have to wait for lunch until his wife is done feeding visit ladies, then tell the ladies to be sure and come back real soon, and mean it," so God made a farmer.

God said, "I need somebody willing to sit up all night with a newborn colt, and watch it die, and then dry his eyes and say, 'Maybe next year.' I need somebody who can shape an ax handle from a persimmon sprout, shoe a horse with a hunk of car tire, who can make a harness out of haywire, feed sacks, and shoe straps; who, planting time comes and harvest season, will finish his 40-hour week by Tuesday noon, and then paining

from tractor back, put in another 72 hours," so God made a farmer.

God had to have somebody willing to ride the ruts at double speed to get the hay in ahead of the rain clouds, and yet stop in mid-field and race to help when he sees the first smoke from a neighbor's place, so God made a farmer.

God said, "I need somebody strong enough to clear trees and heave bales, yet gentle enough to tame lambs and wean pigs and tend to the pink-combed pullets, who will stop his mower for an hour to splint the broken leg of a meadow lark."

It had to be somebody who would plow deep and straight and not cut corners; somebody to seed, weed, feed, breed, and rake and disc and plow and plant and tie the fleece and strain the milk and replenish the self-feeder and finish a hard week's work with a 5-mile drive to church; somebody who would bale a family together with the soft strong bonds of sharing, who would laugh, and then sigh, and then reply, with smiling eyes, when his son says that he wants to spend his life "doing what dad does," so God made a farmer.

RECESS

The SPEAKER pro tempore. Pursuant to clause 12(a) of rule I, the Chair declares the House in recess until noon today.

Accordingly (at 11 o'clock and 25 minutes a.m.), the House stood in recess.

□ 1200

AFTER RECESS

The recess having expired, the House was called to order by the Speaker at noon.

PRAYER

Reverend Joshua Leu, First Christian Church, Great Bend, Kansas, offered the following prayer:

God, I ask today that You would open these honorable men and women of the House to the significance, weight, and sacredness of the work that they get to do.

Remind them that the detailed decisions that they make here and now will not only have effects on the entire world, but will ripple through time for generations to come, making a way for all people.

So gift them, O Lord, with Your wisdom today and every day they serve so they can be a part of causing Your kingdom to come, Your will to be done, on Earth as it is in Heaven.

Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

PLEDGE OF ALLEGIANCE

The SPEAKER. Will the gentlewoman from Hawaii (Ms. GABBARD)
