

## EXECUTIVE CALENDAR—Continued

The PRESIDING OFFICER. The Senator from Nebraska.

HONORING NEBRASKA'S SOLDIERS WHO LOST  
THEIR LIVES IN COMBAT

Mrs. FISCHER. Mr. President, I rise today to remember another of Nebraska's fallen heroes—those young men and women who have given their lives defending our freedom in Iraq and Afghanistan. They all have different stories. Their families all have the same request: Remember their sacrifice. By telling the stories of these heroes here on the Senate floor, we honor the request of these Gold Star families.

## SPECIALIST WILLIAM "BILL" BAILEY

Today, Mr. President, I honor the life and service of William "Bill" Bailey of Bellevue, NE. Now, the name "William" comes from old German. It means "determined protector". Bill Bailey lived up to his name. His mother Margaret says he was a born protector. When Bill was very young, he lost his father to a car accident. Margaret recalls how Bill embraced his younger sister Jessy just after her birth. The word came to her at once: protective.

As he grew, Bill naturally looked to protect those outside his family too. Ron Budwig was matched with Bill through the Big Brothers Big Sisters program.

Ron recalled a simple but profound example of Bill looking out for Ron's family. Ron's mother was running late to one of the program's activities, and, meanwhile, the parking lot was filling up. Bill went and stood in a parking space, keeping it open until Ron's mother could come. It was a simple act, but it said a lot.

Bill attended Bellevue East, where the call to protect his country prompted him to enlist in the Nebraska Army National Guard in 1995. After graduating from high school in 1996, he served out his enlistment with distinction.

A few years later, in December 2000, Bill met Deanna, whom everyone calls Dee. She was a bank teller at Wells Fargo. He drove an armored truck. They met through a service window. Now, Bill had left the service in 2001 when his enlistment ended. After 9/11, he felt the call to serve his country again—but first things first. Bill and Dee married in 2004. Dee's children, Cody and Maquala, took immediately to Bill and his children, Catlynn and Billy. Logan soon followed.

As you can expect, Bill's protective nature made him a great father. It also made him a great firefighter. Extending his protection beyond his family once again, he joined the Bellevue Volunteer Fire Department. He was a natural fit. Whether there or working as a life flight dispatcher, Bill worked to keep Bellevue safe.

That deep desire to serve his country continued to tug at him. In 2005, Bill reenlisted in the Nebraska Army National Guard. Originally assigned to

the 600th Transportation Company, he transferred to the 755th Chemical Company. Why the transfer? Because he learned the 755th would soon deploy. In late 2006 it did. Bill Bailey went with it. The 755th Chemical Company was assigned to provide security escorts for truck convoys operating out of the Balad Air Base in Iraq. Iraq at this time was increasingly unstable. It was dangerous, but Bill's good nature made it bearable.

SGT Timothy Ossowski remembers SPC Bill Bailey fondly: "When I became his team leader, I thought I had struck the jackpot." By 2007, the insurgency in Iraq had erupted to new levels of violence. Increased American forces sought to seek out and destroy the al-Qaida network. Casualties ran high.

Despite the high operations tempo, Bill and Dee communicated almost every day through phone calls or texts. On May 24, they were able to talk by phone. In typical fashion, Bill mentioned he was excited to finish his dull watchtower duty and start a new security escort mission the next day. Bill was also excited for his upcoming leave in June, when the Bailey family planned to celebrate Bill's birthday.

The next day, May 25, 2007, Bill took part in that security escort mission. During it, his vehicle struck an improvised explosive device. Three Nebraska Army National Guard soldiers were wounded, and Bill Bailey was killed.

More than 1,000 people gathered in Bellevue to remember Bill. A Patriot Guard of more than 100 flag-flying motorcycles accompanied his funeral procession. Specialist Bailey earned several military awards, including the Purple Heart, the Bronze Star, the Iraqi Campaign Medal, and the Combat Action Badge. Bill's brother-in-law, Damian Kuzeppa, summarized Bill's life:

Bill was a wonderful husband, brother, son, father. He dedicated quite a bit of his life to helping other people. He was definitely a go-doer. He will definitely be missed.

William Bailey is survived by his mother Margaret, his wife Deanna, and their children, Cody, Maquala, Catlynn, Billy, and Logan. Bill Bailey is a true Nebraska hero. I am honored to tell his story.

I yield the floor.

The PRESIDING OFFICER. The Senator from Delaware.

## BORDER SECURITY

Mr. CARPER. Mr. President, I am pleased to be able to serve with the Presiding Officer on the Committee on Homeland Security. Part of our responsibilities on homeland security is to make sure, to the extent that we can, that our borders are secure. We do that in a variety of ways. We do that, in some cases, with our Border Patrol officers. We have a lot of them. We appreciate the work they do.

We also have, in many places, particularly along the border of Mexico—as the Presiding Officer knows—a lot of fencing that is there. We have a lot of roads that our vehicles can travel

along to have mobility on the ground. Our President has proposed, at least earlier this year, that we spend about \$25 billion to build a wall, maybe 10-, 15-, 25-feet high along the 2,000 miles between the Pacific Ocean and the Gulf of Mexico.

I have never been convinced that that is the best way—to put all of our money in the basket—that that is really the best way to better ensure the security of our border with Mexico. As it turns out, most of the folks who are coming into the United States from that part of the world are not Mexicans. Actually, more Mexicans are going back into Mexico than Mexicans coming across the border into the United States.

Most of the illegal immigration—not all but most of it—is coming from three countries: Honduras, Guatemala, and El Salvador. The reason why they come here is because their lives are miserable. They are miserable because we buy drugs. We have this insatiable appetite for illegal drugs. So a lot of them are trafficked through Honduras, Guatemala, and El Salvador.

We send money down to those three countries for the drugs, and we send guns down to that part of the world. When we catch bad guys in this country from Honduras, Guatemala, and El Salvador, we send them back to those three countries.

So part of the security of our southern border involves actually trying to help those three countries figure out ways to keep their people home, rather than wanting to come to our country. Part of it is making sure that they have decent lives to live. Twenty years ago, as you all may remember, a bunch of gunmen rounded up the supreme court justices in Colombia, took them into a room, and shot and killed them—shot them all to death.

It was a time when the government was tottering and there was a question of whether they were going to survive in Colombia. Some very brave people stood up in Colombia and said: No, no, we want to survive, we want to fend off the drug cartels, and we want to fend off the leftist guerillas. Ultimately, they were successful. It has taken 20 years.

They worked on something called Plan Colombia to help turn around their country. We came in, and we helped them. They did the heavy lifting, and we helped out as well. I like to say that it is sort of like at Home Depot: "You" can do it—using, in that case, Colombia—and "we" being the United States.

A similar kind of thing is going on in Honduras, Guatemala, and El Salvador. They have come up with their own Plan Colombia. You might call it "Plan Central America." The three countries have come up with things they are responsible for doing to improve the quality of life for their folks and the ability to have economic growth and opportunity and hope. We are helping out as well. We have done

that in some appropriations bills for the last fiscal year. We are trying to spend a little bit more. Wisely invested, it will be a fraction of what they are actually spending on their own.

To the extent that those three countries can be more attractive to people who live there, that actually helps a whole lot in terms of the pressure on our own borders. Plus, it is the right thing to do. The other thing I would mention, as to our energy policy in this country, is that sometimes we have had an “all of the above” energy approach. It is not just coal, it is not just wind, it is not just solar, it is not just geothermal, it is not just nuclear, and it is not just natural gas. It is all of the above. It is conservation as well.

We need a similar approach to continuing to protect our borders, whether it is in the South or other places. But it should involve a variety of things. There are some places along the 2,000 miles where it will actually make some sense. There are a lot of places where a fence makes more sense. There are a lot of places where it makes more sense just to pave the roads alongside the border.

The Presiding Officer actually spent, as he said, his “misspent youth”—but I will say his youth—earlier in his life where he and other kayakers were in boats along the Rio Grande River. Part of border security is boats along that stretch of the river, that stretch of the border because it is literally hundreds of miles where the border is defined by a river. So in some places, boats make sense. In other places, boat ramps make sense.

Sometimes it makes sense to have drones up in the air that can surveil up to 100 miles into Mexico for folks coming our way. Sometimes it makes sense to put helicopters, sometimes fixed-wing aircraft. But you can't just send them up with binoculars. You need to put the right kind of surveillance equipment on there. We have that equipment. The key is to put it on the aircraft.

Sometimes stationary towers going up 200, 300 feet makes sense. Sometimes it makes sense to make those mobile. Sometimes we can put those surveillance systems 5,000 feet up in the air to look literally 100 miles into Mexico to see what is coming our way. If we have the right surveillance system, they could see not just during daylight, sunny skies, but they could see at night. They can see in fog and dense fog. So the key is all of the above—it is not any one thing—and to find out what works. The other thing is, maybe to continue to support and ask our Border Patrol: What do you guys and gals think? What do you think makes sense? And listen to them.

No, I am not smart enough to figure out how much money we put exactly in each one of those, but I think it makes sense, depending on what the needs are and on the advice of the folks who really are the experts on the ground, what

they suggest, and we can do an “all of the above” approach. But we also have to consider that the reason most of the illegals are coming to our country is that they live their lives in misery. If we don't do something to help them help themselves, we are going to be falling short of where we want to be.

I just wanted to share that before we recognize the next Senator.

I am looking forward to the inaugural address of the new Senator from Illinois.

The PRESIDING OFFICER. The Senator from Oregon.

Mr. MERKLEY. Mr. President, I am honored to be on the floor for the maiden speech of my colleague Senator DUCKWORTH.

The PRESIDING OFFICER. The Senator from Illinois.

#### OUR SHARED VALUES

Ms. DUCKWORTH. Mr. President, I thank my friend and mentor, a great Illinoisan, Senator DURBIN for being here today. I wouldn't be here without his guidance and friendship over the years.

It is truly an honor to stand at this desk, which was once held by another great Illinoisan by the name of Barack Obama, delivering my maiden speech from the floor of the U.S. Senate to the people of Illinois, the same State that has been represented in Washington by other impressive leaders like Paul Simon and Abraham Lincoln. And it is an honor to address the people of the United States of America, the greatest Nation in the world.

Though we have occasionally made choices as a society that do not reflect our best selves, we are today the greatest Nation on Earth because of the founding ideals that have anchored our Nation and because of the shared values that have guided the development and strength of our economy and our people—values like treating each other equally, showing strength and resilience in the face of hardship, and embracing the diversity that makes us who we are. They are shared values that have helped us to strive toward that more perfect Union the Constitution's Framers envisioned, a more perfect Union that offers everyone a chance to reach his or her potential, a more perfect Union that will not give up on its people, and a more perfect Union whose people don't give up on themselves either.

We face a great deal of challenges and threats, threats I know well, but we cannot allow today's hardships to change who we are as a people, to tear down the pillars that make this Nation great. Falling victim to fear and demagoguery will only ensure a weaker America for our children, and that is simply not the future I want for my Abigail.

When we, as a society, think about the future we want for all of our children, I think it is important for us to remember how we got here. Our Nation wasn't founded as the dominant global economic and military force that it is

today. We were not founded as the leader of the free world; our people built that. Americans understood that when we invest in ourselves, the fabric that holds our country together only grows stronger. A scrappy gang of patriots in the American Revolution—my own family included—won us our liberty, which we used to push for greater civil and human rights and to make investments in agricultural and educational systems that sparked our economy, allowing us to strengthen our military into the greatest fighting force the world has ever seen.

Success, however, was never guaranteed. From our founding, the United States of America was forged through fierce debates and stark divisions. Slavery led to bloodshed across the country, including in the Senate Chamber, and culminated in brothers killing brothers during our Civil War. Yet our Union made it through our greatest challenges and emerged even stronger. We emerged a more perfect Union.

Our strength has been on display outside of our military as well: When heroes like Frederick Douglass and Harriet Tubman risked everything to help bring an end to slavery; when Martin Luther King, Jr., had a dream; when the children of the Little Rock Nine braved harassment and abuse to bring an end to segregated schools and ensure educational opportunity for all; and when the backbreaking work of Asian and American laborers united our Nation from sea to shining sea with the completion of the transcontinental railroad.

America catalyzed the industrial revolution for the globe. We helped rescue the global community from fascism during World War II. We promoted civil and human rights around the globe. We explored space, launched the internet revolution, helped feed the world, built a world-class infrastructure network, developed a gold standard education system, and grew the strongest economy ever seen.

We were able to win World War II not because of the brave troops in our Armed Forces alone but also because our Nation's manufacturers and steel mills were able to produce the tanks and planes and firearms and other tools we needed to defeat the Nazis. We were able to build those weapons, launch the internet revolution, and send a man to the Moon only because we had a well-educated workforce made of people from all around the globe, all of whom had an opportunity to attend world-class colleges and universities right here in the United States, universities we spent generations strengthening.

Our economy was able to grow to its current strength not only because of that well-educated workforce and those who came from distant lands but also all who came and stayed to contribute to our society. It was also able to grow because we had invested heavily in infrastructure and built an interstate system and air and rail networks that enabled our farmers, ranchers, and
