(3) The Department of Defense has several hypersonic research and development efforts underway, including conventional prompt global strike (CPS) weapons system, the Hypersonic Air-Breathing Weapon Concept, and the Tactical Boost Glide program.

(4) In testimony before the Committee on Armed Services of the Senate on April 4, 2017, the Commander of United States Strategic Command, General John Hyten, identified the conventional prompt global strike weapons system as the “leading technology maturation effort in the realm of hypersonics” and stated that his command sees “an operational need for a CPS capabilities by the mid-2020s.”.

(5) Hypersonic weapons present a radical change in warfare, because they can circumvent many of the challenges associated with contested warfare and integrated air defenses.

(6) Hypersonic weapons may provide solutions to difficult problem sets, such as anti-access area denial schemes, deeply buried or hardened target sets, and mobile high value target sets.

(7) Other countries are aggressively pursuing hypersonic weapons at an alarming rate that threaten to outpace the United States if the United States does not more aggressively pursue development of hypersonic weapons.

(8) The Air Force has a \$10,000,000 requirement on the Unfunded Priority List for hypersonic prototyping.

(b) SENSE OF CONGRESS.—It is the sense of Congress that—

(1) the Department of Defense should expedite testing, evaluation, and acquisition of hypersonic weapon systems to meet the stated needs of the warfighter;

(2) testing of such weapon systems should include flight testing, ground based testing, and underwater launch testing;

(3) the Department of Defense should adhere to the requirement in section 1688 of the

National Defense Authorization Act for Fiscal Year 2017 (Public Law 114-328) to proceed to a Milestone A decision on the conventional prompt global strike weapons system not later than September 30, 2020, or the date that is 240 days after the successful completion of intermediate range flight 2 of such system;

(4) the United States cannot afford to lose its advantage over foreign countries in developing hypersonic weapons; and

(5) the Department of Defense should focus on the next generation of weapon systems, including third offset technologies, such as hypersonics.

(2) Afghans who have supported the United States Government in Afghanistan face grave threats from the Taliban and other terrorist groups as a result of their service.

(3) Commander of the United States Central Command, General Joseph L. Votel, warned in a June 14, 2017, letter that “curtailing or abandoning” the special immigrant visa program for Afghans carried out under the Afghan Allies Protection Act of 2009 (8 U.S.C. 1101 note) “would risk significantly undermining years of progress and goodwill and could serve to tip the balance in favor of malign actors”.

(4) Commander of Resolute Support and United States Forces-Afghanistan, General John W. Nicholson Jr., warned in a June 12, 2017, letter that if such program “is not fully resourced it could significantly undermine our credibility and the 16 years of tremendous sacrifice by thousands of Afghans on behalf of Americans and Coalition partners”.

(5) All visas allocated for such program are projected to be exhausted and all visa issuances for principal applicants will cease in October 2017, if additional visas are not authorized.

(6) The cessation of the issuance of special immigrant visas for Afghans is likely to cause panic among the Afghans who are assisting the United States, often at great personal risk, and could significantly affect the operations of the United States Government in Afghanistan.

(b) **SENSE OF CONGRESS.**—It is the sense of Congress that an additional 4,000 visas should be made available for principal aliens who are eligible for special immigrant status under the Afghan Allies Protection Act of 2009 (8 U.S.C. 1101 note) to prevent harm to the operations of the United States Government in Afghanistan.

**SEC. 1248. SUPPORT OF EUROPEAN DETERRENCE INITIATIVE TO DETER RUSSIAN AGGRESSION.**

(a) FINDINGS.—Congress makes the following findings:

(1) Military exercises, such as Exercise Nifty Nugget and Exercise Reforger during the Cold War, have historically made important contributions to testing operational concepts, technologies, and leadership approaches; identifying limiting factors in the execution of operational plans and appropriate corrective action; and bolstering deterrence against adversaries by demonstrating United States military capabilities.

(2) Military exercises with North Atlantic Treaty Organization (NATO) allies enhance the interoperability and strategic credibility of the alliance.

(3) The increase in conventional, nuclear, and hybrid threats by the Russian Federation against the security interests of the United States and allies in Europe requires substantial and sustained investment to improve United States combat capability in Europe.

(4) The decline of a permanent United States military presence in Europe in recent years increases the likelihood the United States will rely on being able to flow forces from the continental United States to the European theater in the event of a major contingency.

(5) Senior military leaders, including the Commander of United States Transportation Command, have warned that a variety of increasingly advanced capabilities, especially the proliferation of anti-access, area denial (A2/AD) capabilities, have given adversaries of the United States the ability to challenge the freedom of movement of the United States military in all domains from force deployment to employment to disrupt, delay, or deny operations.

(b) SENSE OF CONGRESS.—It is the sense of Congress that, to enhance the European Deterrence Initiative and bolster deterrence against Russian aggression, the United States, together with North Atlantic Treaty Organization allies and other European partners, should demonstrate its resolve and ability to meet its commitments under Article V of the North Atlantic Treaty through appropriate military exercises with an emphasis on participation of United States forces based in the continental United States and testing strategic and operational logistics and transportation capabilities.

(c) REPORT.—

(1) IN GENERAL.—Not later than March 1, 2018, the Secretary of Defense shall submit to the congressional defense committees a report setting forth the following:

(A) An analysis of the challenges to the ability of the United States to flow significant forces from the continental United States to the European theater in the event of a major contingency.

(B) The plans of the Department of Defense, including the conduct of military exercises, to address such challenges.

(2) FORM.—The report required by paragraph (1) shall be submitted in unclassified form, but may include a classified annex.

**SEC. 1249. SENSE OF CONGRESS ON THE EUROPEAN DETERRENCE INITIATIVE.**

It is the sense of Congress that—

(1) the European Deterrence Initiative will bolster efforts to deter further Russian aggression by providing resources to—

(A) train and equip the military forces of North Atlantic Treaty Organization (NATO) and non-North Atlantic Treaty Organization partners in order to improve responsiveness, expand expeditionary capability, and strengthen combat effectiveness across the spectrum of security environments;

(B) enhance the indications and warning, interoperability, and logistics capabilities of Allied and partner military forces to increase their ability to respond to external aggression, defend sovereignty and territorial integrity, and preserve regional stability;

(C) improve the agility and flexibility of military forces required to address threats across the full spectrum of domains and effectively operate in a wide array of coalition operations across diverse global environments from North Africa and the Middle East to Eastern Europe and the Arctic; and

(D) mitigate potential gaps forming in the areas of information warfare, Anti-Access Area Denial, and force projection;

(2) investments that support the security and stability of Europe, and that assist European nations in further developing their security capabilities, are in the long-term vital national security interests of the United States; and

(3) funds for such efforts should be authorized and appropriated in the base budget of the Department of Defense in order to ensure continued and planned funding to address long-term stability in Europe, reassure the European allies and partners of the United States, and deter further Russian aggression.

**SEC. 1250. ENHANCEMENT OF UKRAINE SECURITY ASSISTANCE INITIATIVE.**

Section 1250(b) of National Defense Authorization Act for Fiscal Year 2016 (Public Law 114–92; 126 Stat. 1068), as amended by section 1237(b) of the National Defense Authorization Act for Fiscal Year 2017 (Public Law 114–328; 130 Stat. 2495), is further amended by adding at the end the following new paragraph:

“(12) Treatment of wounded Ukraine soldiers in the United States in medical treatment facilities through the Secretarial Designee Program, and transportation, lodging, meals, and other appropriate non-medical

support in connection with such treatment (including incidental expenses in connection with such support).”.

**SEC. 1251. SENSE OF CONGRESS ON THE IMPORTANCE OF THE NORTH ATLANTIC TREATY ORGANIZATION INTELLIGENCE FUSION CENTER.**

(a) FINDINGS.—Congress makes the following findings:

(1) The North Atlantic Treaty Organization (NATO) Intelligence Fusion Center provides a crucial contribution to the North Atlantic Treaty Organization alliance and the national security of the United States.

(2) The fast-paced evolution of the security situation throughout Europe and its periphery, as well as a marked increase in conventional, nuclear, and hybrid threats from the Russian Federation, require optimized efforts to track and attribute critical threats to the security and stability of Europe and United States national security interests.

(3) The ability of the North Atlantic Treaty Organization Intelligence Fusion Center to leverage strategic intelligence partnerships with the United States and other allies facilitates daily and direct collaboration that provides operational advantages and efficiencies needed to ensure the rapid and proper response by the North Atlantic Treaty Organization to Russian aggression in the conventional, nuclear, and hybrid domains.

(4) The collocation of the North Atlantic Treaty Organization Intelligence Fusion Center with the Joint Intelligence Analysis Complex of the United States European Command facilitates the sharing and fusion of intelligence, contributes to filling intelligence gaps within both the North Atlantic Treaty Organization and the United States European Command, and supports a common intelligence picture for the North Atlantic Council, which is essential to establishing political consensus on evaluating, analyzing, and attributing existing and emerging threats.

(5) The North Atlantic Treaty Organization Intelligence Fusion Center and its collocation with the Joint Intelligence Analysis Complex contribute significantly to providing the North Atlantic Treaty Organization alliance and the United States European Command timely and effective indications and warnings of threats emanating from within and around Europe.

(b) SENSE OF CONGRESS.—It is the sense of Congress that the collocation of the North Atlantic Treaty Organization Intelligence Fusion Center with the Joint Intelligence Analysis Complex of the United States European Command provides the optimal solution to intelligence and operational requirements, while fostering critical diplomatic relationships, and is the most efficient configuration of the intelligence enterprise.

(a) FINDINGS.—Congress makes the following findings:

(1) Since the Declaration of Independence in 1776, which was inspired in part as a response to a “tyrant” who “plundered our seas, ravaged our Coasts” and who wrote laws “for cutting off our Trade with all parts of the world”, freedom of seas and promotion of international commerce have been core security interests of the United States.

(2) Article I, section 8 of the Constitution of the United States establishes enumerated powers for Congress, which include regulating commerce with foreign nations, punishing piracies and felonies committed on the high seas and offenses against the law of nations, and providing and maintaining a Navy.

(3) For centuries, the United States has maintained a commitment to ensuring the right to freedom of navigation for all law-abiding parties in every region of the world.

(4) In support of international law, the longstanding United States commitment to freedom of navigation and ensuring the free access to sea lanes to promote global commerce remains a core security interest of the United States.

(5) This is particularly true in areas of the world that are critical transportation corridors and key routes for global commerce, such as the South China Sea and the East China Sea, through which a significant portion of global commerce transits.

(6) The consistent exercise of freedom of navigation operations and overflights by United States naval and air forces throughout the world plays a critical role in safeguarding the freedom of the seas for all lawful nations, supporting international law, and ensuring the continued safe passage and promotion of global commerce and trade.

(b) DECLARATION OF POLICY.—It is the policy of the United States to fly, sail, and operate throughout the oceans, seas, and airspace of the world wherever international law allows.

(c) IMPLEMENTATION OF POLICY.—In furtherance of the policy set forth in subsection (b), the Secretary of Defense shall—

(1) plan and execute a robust series of routine and regular naval presence missions and freedom of navigation operations (FONOPs) throughout the world, including for critical transportation corridors and key routes for global commerce;

(3) in addition to the operations executed pursuant to paragraph (2), execute routine and regular maritime freedom of navigation operations throughout the year, in accordance with international law, including the use of expanded military options and maneuvers beyond innocent passage; and

(4) to the maximum extent practicable, execute freedom of navigation operations pursuant to this subsection with regional partner countries and allies of the United States.

**SEC. 1266. SENSE OF CONGRESS ON THE IMPORTANCE OF THE RULE OF LAW IN THE SOUTH CHINA SEA.**

It is the sense of Congress that—

(1) the South China Sea is a vitally important waterway for global commerce and for regional security, with almost 30 percent of the maritime trade of the world transiting the South China Sea annually;

(2) the People’s Republic of China is undermining regional security and prosperity and challenging international rules and norms by engaging in coercive activities and attempting to limit lawful foreign operations in the South China Sea;

(3) a tribunal determined “that China had violated the Philippines’ sovereign rights in its exclusive economic zone by (a) interfering with Philippine fishing and petroleum exploration, (b) constructing artificial islands and (c) failing to prevent Chinese fishermen from fishing in the zone,” and that “Chinese law enforcement vessels had unlawfully created a serious risk of collision when they physically obstructed Philippine vessels”;

(4) the arbitral tribunal award of July 2016 stated that there is “no legal basis for China to claim historic rights to resources within the sea areas falling within the nine-dash line”; and

(5) the United States should play a vital role in securing the South China Sea and ensuring freedom of navigation and overflight for all countries by undertaking freedom of navigation operations on a regular and consistent basis, as well as maintaining persistent presence operations in the region.

**SEC. 1267. SENSE OF CONGRESS ON THE IMPORTANCE OF THE RELATIONSHIP BETWEEN THE UNITED STATES AND JAPAN.**

It is the sense of Congress that—

(1) the United States and Japan are indispensable partners in tackling global challenges, and have pledged significant support for efforts to counter violent extremism (including the threat of the Islamic State), combat the proliferation of weapons of mass destruction, prevent piracy, and assist the victims of conflict and disaster worldwide;

(2) the security alliance between the United States and Japan has evolved considerably over many decades and will continue to transform as a partnership, sharing greater responsibilities, dedicated to ensuring a secure and prosperous Asia-Pacific region and world;

(3) the alliance between the United States and Japan is essential for ensuring maritime security and freedom of navigation, commerce, and overflight in the waters of the East China Sea;

(4) Japan, a cornerstone of peace in the Asia-Pacific region, stands as a strong partner of the United States in efforts to uphold

respect for the rule of law and to oppose the use of coercion, intimidation, or force to change the regional or global status quo, including in the East China Sea and the South China Sea, which are among the busiest waterways in the world;

(5) the United States and Japan are committed to working together towards a world in which the Democratic People’s Republic of Korea (DPRK) does not threaten global peace and security with its weapons of mass destruction and illicit activities, and in which it respects human rights and its people can live in freedom;

(6) the alliance between the United States and Japan should be strengthened to maintain peace and stability in the Asia-Pacific region and beyond, to confront emerging challenges, and to safeguard maritime security and ensure freedom of navigation, commerce, and overflight in the East China Sea and the South China Sea;

(7) although the United States Government does not take a position on sovereignty of the Senkaku Islands, the United States acknowledges that the islands are under the administration of Japan and opposes any unilateral actions that would seek to undermine their administration by Japan; and

(8) the unilateral actions of a third party will not affect the United States acknowledgment of the administration of Japan over the Senkaku Islands, and the United States remains committed under the Treaty of Mutual Cooperation and Security with Japan to respond to any armed attack in the territories under the administration of Japan.

**SEC. 1268. SENSE OF CONGRESS ON THE IMPORTANCE OF THE UNITED STATES ALLIANCE WITH THE REPUBLIC OF KOREA.**

(a) FINDINGS.—Congress makes the following findings:

(1) The Government of North Korea has repeatedly violated its commitments to the complete, verifiable, and irreversible dismantlement of its nuclear weapons programs.

(2) Based on its past actions, including the transfer of sensitive nuclear and missile technology to state sponsors of terrorism, North Korea poses a grave risk for the proliferation of nuclear weapons and other weapons of mass destruction.

(3) North Korea has—

(A) unilaterally withdrawn from the Korean War Armistice Agreement, done at Panmunjom, Korea, July 27, 1953; and

(B) committed provocations against South Korea—

(i) by sinking the warship Cheonan and killing 46 of her crew on March 26, 2010;

(ii) by shelling Yeonpyeong Island and killing 4 South Korea civilians on November 23, 2010; and

(iii) by its involvement in the “DarkSeoul” cyberattacks against the financial and communications interests of the Republic of Korea on March 20, 2013.

(4) North Korea maintains a system of brutal political prison camps that contain as many as 200,000 men, women, and children, who are—

(A) kept in atrocious living conditions with insufficient food, clothing, and medical care; and

(B) under constant fear of rape, torture, or arbitrary execution.

(5) The Government of North Korea has provided technical support and conducted destructive and coercive cyberattacks including against Sony Pictures Entertainment and other United States persons.

(6) The conduct of the Government of North Korea poses an imminent threat to—

(A) the security of the United States and its allies;

(B) the global economy;

(C) the safety of members of the United States Armed Forces;

(D) the integrity of the global financial system;

(E) the integrity of global nonproliferation programs; and

(F) the people of North Korea.

(b) **SENSE OF CONGRESS.**—It is the sense of Congress that, in order to achieve the peaceful disarmament of North Korea, the United States should—

(1) reaffirm the commitment of the United States to defending our allies in the region, including through the deployment of a Terminal High Altitude Area Defense (THAAD) battery to the Republic of Korea, and the commitment to provide extended deterrence, guaranteed by the full spectrum of United States defense capabilities, including conventional capabilities, missile defense, and the nuclear umbrella;

(2) support ongoing efforts to strengthen the alliance between the United States and the Republic of Korea alliance, to protect the 28,500 members of the United States Armed Forces stationed on the Korean Peninsula, and to defend the alliance against any and all provocations committed by the North Korea regime; and

(3) support efforts to deepen trilateral coordination and cooperation between the United States, the Republic of Korea, and Japan, to address the grave and growing threat of the ballistic missiles and nuclear weapons programs of North Korea.

**SEC. 1269. SENSE OF CONGRESS ON EXTENDED DETERRENCE FOR THE KOREAN PENINSULA AND JAPAN.**

It is the sense of Congress that—

(1) the nuclear and missile program of North Korea is one of the most dangerous national security threats facing the United States today; and

(2) given the threat posed by North Korea to our allies, the Republic of Korea and Japan, the Nuclear Posture Review that will occur this year should fully consider the perspectives of key allies and partners of the United States in East Asia, including the Republic of Korea and Japan.

**SEC. 1270. DEFENSE PARTNERSHIP BETWEEN THE UNITED STATES AND TAIWAN.**

(a) **SENSE OF CONGRESS.**—It is the sense of Congress that United States should strengthen and enhance its long-standing partnership and strategic cooperation with Taiwan, and reinforce its commitment to the Taiwan Relations Act and the “Six Assurances” as both countries work toward mutual security objectives, by—

(1) Since World War II, the United States has sought partnership and cooperation in establishing a rules-based international order which has resulted in one of the most prosperous periods of human history.

(2) The United States is signatory to seven mutual defense treaties with 56 different countries.

(3) One of the United States defense alliances is the 29-nation-strong North Atlantic Treaty Organization (NATO) which is celebrating its 68th anniversary.

(4) The United States has not faced a more diverse and complex array of crises and threats, including the emergence of competitors like Russia and China, increasingly unstable threats from North Korea and Iran, and the continued threat from transnational violent extremist groups like the Islamic State and al-Qaeda.

(5) The strain of a decreased military budget has decreased capability at precisely the time when demand for United States military strength has increased.

(6) Fifteen years of continuous war has stymied military modernization, focused training on asymmetrical warfare over large-scale conflicts.

(7) Secretary of Defense James Mattis stated that “alliances provide avenues for peace,

fostering the conditions for economic growth with countries that share the same vision, while tempering the plans of those who would attack other nations or try to impose their will over the less powerful”.

(b) SENSE OF CONGRESS.—It is the sense of Congress that—

(1) the United States is an ally rich nation and our potential competitors—such as Russia, China, and North Korea—are ally poor;

(2) United States allies and partners are critical to defending peace and prosperity throughout the world;

(3) the rules-based international order supported by the United States and its allies has ensured—and will continue to promote—an international system that benefits all nations;

(4) throughout the world, the United States will continue to foster relationships with nations of like minds and beliefs;

(5) as the United States manages multiple strategic challenges, our enduring strength remains in alliances such as the North Atlantic Treaty Organization; and

(6) the United States will continue to deepen alliances and expand them, and will take no ally for granted.

**SEC. 1654. SENSE OF THE SENATE ON THE STATE OF UNITED STATES MISSILE DEFENSE.**

It is the sense of the Senate that—

(1) The Secretary of Defense should use the Ballistic Missile Defense Review (BMDR) to consider accelerating the development of technologies that will increase the capacity, capability, and reliability of the ground-based midcourse defense element of the ballistic missile defense system;

(2) upon completion of the Ballistic Missile Defense Review, the Director of the Missile Defense Agency should, to the extent practicable and with sound acquisition practices, accelerate the development, testing, and fielding of such capabilities as they are prioritized in the Ballistic Missile Defense Review, including the redesigned kill vehicle, the multi-object kill vehicle, the C3 booster, a space-based sensor layer, boost phase sensor and kill technologies, and additional ground-based interceptors; and

(3) in order to achieve these objectives, and to avoid post-production and post-deployment problems, it is essential for the Department of Defense and the Missile Defense Agency to follow a “fly before you buy” approach to adequately test and assess the elements of the ballistic missile defense system before final production decisions or operational deployment.

**SEC. 1655. SENSE OF THE SENATE AND REPORT ON GROUND-BASED MIDCOURSE DEFENSE TESTING.**

(a) SENSE OF THE SENATE.—It is the sense of the Senate that—

(1) at a minimum, the Missile Defense Agency should continue to flight test the ground-based midcourse defense element at least once each fiscal year;

(2) the Department of Defense should allocate increased funding to homeland missile defense testing to ensure that our defenses continue to evolve faster than the threats against which they are postured to defend;

(3) in order to rapidly innovate, develop, and field new technologies, the Director of the Missile Defense Agency should continue to focus testing campaigns on delivering increased capabilities to the Armed Forces as quickly as possible; and

(4) the Director of the Missile Defense Agency should seek to establish a more prudent balance between risk mitigation and the more rapid testing pace needed to quickly develop and deliver new capabilities to the Armed Forces.

(b) REPORT TO CONGRESS.—

(1) IN GENERAL.—Not later than 90 days after the date of the enactment of this Act, the Director of the Missile Defense Agency shall submit to the congressional defense committees a revised missile defense testing campaign plan that accelerates the development and deployment of new missile defense technologies.

(C) An identification of any funding or policy restrictions that would slow down the deployment of the technologies under the programs listed in subparagraph (A).

(D) A risk assessment of the potential cost-overruns and deployment delays that may be encountered in the expedited development process of the capabilities under paragraph (1).

(c) REPORT ON FUNDING PROFILE.—The Director shall include with the budget justification materials submitted to Congress in support of the budget of the Department of Defense for fiscal year 2019 (as submitted with the budget of the President under section 1105(a) of title 31, United States Code) a report on the funding profile necessary for the new testing campaign plan required by subsection (b)(1).

**SEC. 5202. PILOT PROGRAM TO IMPROVE INCENTIVES FOR TECHNOLOGY TRANSFER FROM DEPARTMENT OF DEFENSE LABORATORIES.**

(a) IN GENERAL.—The Secretary of Defense shall establish a pilot program to assess the

feasibility and advisability of distributing royalties and other payments as described in this section. Under the pilot program, except as provided in subsections (b) and (d), any royalties or other payments received by a Federal agency from the licensing and assignment of inventions under agreements entered into by Department of Defense laboratories, and from the licensing of inventions of Department of Defense laboratories, shall be retained by the laboratory which produced the invention and shall be disposed of as follows:

(1)(A) The laboratory director shall pay each year the first \$2,000, and thereafter at least 20 percent, of the royalties or other payments, other than payments of patent costs as delineated by a license or assignment agreement, to the inventor or coinventors, if the inventor's or coinventor's rights are directly assigned to the United States.

(B) A laboratory director may provide appropriate incentives, from royalties or other payments, to laboratory employees who are not an inventor of such inventions but who substantially increased the technical value of the inventions.

(C) The laboratory shall retain the royalties and other payments received from an invention until the laboratory makes payments to employees of a laboratory under subparagraph (A) or (B).

(2) The balance of the royalties or other payments shall be transferred by the agency to its laboratories, with the majority share of the royalties or other payments from any invention going to the laboratory where the invention occurred. The royalties or other payments so transferred to any laboratory may be used or obligated by that laboratory during the fiscal year in which they are received or during the 2 succeeding fiscal years—

(A) to reward scientific, engineering, and technical employees of the laboratory, including developers of sensitive or classified technology, regardless of whether the technology has commercial applications;

(B) to further scientific exchange among the laboratories of the agency;

(C) for education and training of employees consistent with the research and development missions and objectives of the agency or laboratory, and for other activities that increase the potential for transfer of the technology of the laboratories of the agency;

(D) for payment of expenses incidental to the administration and licensing of intellectual property by the agency or laboratory with respect to inventions made at that laboratory, including the fees or other costs for the services of other agencies, persons, or organizations for intellectual property management and licensing services; or

(E) for scientific research and development consistent with the research and development missions and objectives of the laboratory.

(3) All royalties or other payments retained by the laboratory after payments have been made pursuant to paragraphs (1) and (2) that are unobligated and unexpended at the end of the second fiscal year succeeding the fiscal year in which the royalties and other payments were received shall be paid into the Treasury of the United States.

(b) TREATMENT OF PAYMENTS TO EMPLOYEES.—

(1) IN GENERAL.—Any payment made to an employee under the pilot program shall be in addition to the regular pay of the employee and to any other awards made to the employee, and shall not affect the entitlement of the employee to any regular pay, annuity, or award to which the employee is otherwise entitled or for which the employee is otherwise eligible or limit the amount thereof. Any payment made to an inventor as such

shall continue after the inventor leaves the laboratory.

(2) CUMULATIVE PAYMENTS.—(A) Cumulative payments made under the pilot program while the inventor is still employed at the laboratory shall not exceed \$500,000 per year to any one person, unless the Secretary concerned (as defined in section 101(a) of title 10, United States Code) approves a larger award.

(B) Cumulative payments made under the pilot program after the inventor leaves the laboratory shall not exceed \$150,000 per year to any one person, unless the head of the agency approves a larger award (with the excess over \$150,000 being treated as an agency award to a former employee under section 4505 of title 5, United States Code).

(c) INVENTION MANAGEMENT SERVICES.—Under the pilot program, a laboratory receiving royalties or other payments as a result of invention management services performed for another Federal agency or laboratory under section 207 of title 35, United States Code, may retain such royalties or payments to the extent required to offset payments to inventors under subparagraph (A) of subsection (a)(1), costs and expenses incurred under subparagraph (D) of subsection (a)(2), and the cost of foreign patenting and maintenance for any invention of the other agency. All royalties and other payments remaining after offsetting the payments to inventors, costs, and expenses described in the preceding sentence shall be transferred to the agency for which the services were performed, for distribution in accordance with subsection (a)(2).

(d) CERTAIN ASSIGNMENTS.—Under the pilot program, if the invention involved was one assigned to the laboratory—

(1) by a contractor, grantee, or participant, or an employee of a contractor, grantee, or participant, in an agreement or other arrangement with the agency; or

(2) by an employee of the agency who was not working in the laboratory at the time the invention was made, the agency unit that was involved in such assignment shall be considered to be a laboratory for purposes of this section.

(e) SUNSET.—The pilot program under this section shall terminate 5 years after the date of the enactment of this Act.

**SEC. 6213. SUPPORT OF EUROPEAN DETERRENCE INITIATIVE TO DETER RUSSIAN AGGRESSION.**

(a) FINDINGS.—Congress makes the following findings:

(1) Military exercises, such as Exercise Nifty Nugget and Exercise Reforger during the Cold War, have historically made important contributions to testing operational concepts, technologies, and leadership approaches; identifying limiting factors in the

execution of operational plans and appropriate corrective action; and bolstering deterrence against adversaries by demonstrating United States military capabilities.

(2) Military exercises with North Atlantic Treaty Organization (NATO) allies enhance the interoperability and strategic credibility of the alliance.

(3) The increase in conventional, nuclear, and hybrid threats by the Russian Federation against the security interests of the United States and allies in Europe requires substantial and sustained investment to improve United States combat capability in Europe.

(4) The decline of a permanent United States military presence in Europe in recent years increases the likelihood the United States will rely on being able to flow forces from the continental United States to the European theater in the event of a major contingency.

(5) Senior military leaders, including the Commander of United States Transportation Command, have warned that a variety of increasingly advanced capabilities, especially the proliferation of anti-access, area denial (A2/AD) capabilities, have given adversaries of the United States the ability to challenge the freedom of movement of the United States military in all domains from force deployment to employment to disrupt, delay, or deny operations.

(b) SENSE OF CONGRESS.—It is the sense of Congress that, to enhance the European Deterrence Initiative and bolster deterrence against Russian aggression, the United States, together with North Atlantic Treaty Organization allies and other European partners, should demonstrate its resolve and ability to meet its commitments under Article V of the North Atlantic Treaty through appropriate military exercises with an emphasis on participation of United States forces based in the continental United States and testing strategic and operational logistics and transportation capabilities.

(c) REPORT.—

(1) IN GENERAL.—Not later than March 1, 2018, the Secretary of Defense shall submit to the congressional defense committees a report setting forth the following:

(A) An analysis of the challenges to the ability of the United States to flow significant forces from the continental United States to the European theater in the event of a major contingency.

(B) The plans of the Department of Defense, including the conduct of military exercises, to address such challenges.

(2) FORM.—The report required by paragraph (1) shall be submitted in unclassified form, but may include a classified annex.

**SEC. 6214. SENSE OF CONGRESS ON THE EUROPEAN DETERRENCE INITIATIVE.**

It is the sense of Congress that—

(1) the European Deterrence Initiative will bolster efforts to deter further Russian aggression by providing resources to—

(A) train and equip the military forces of North Atlantic Treaty Organization (NATO) and non-North Atlantic Treaty Organization partners in order to improve responsiveness, expand expeditionary capability, and strengthen combat effectiveness across the spectrum of security environments;

(B) enhance the indications and warning, interoperability, and logistics capabilities of Allied and partner military forces to increase their ability to respond to external aggression, defend sovereignty and territorial integrity, and preserve regional stability;

(C) improve the agility and flexibility of military forces required to address threats across the full spectrum of domains and effectively operate in a wide array of coalition

operations across diverse global environments from North Africa and the Middle East to Eastern Europe and the Arctic; and

(D) mitigate potential gaps forming in the areas of information warfare, Anti-Access Area Denial, and force projection;

(2) investments that support the security and stability of Europe, and that assist European nations in further developing their security capabilities, are in the long-term vital national security interests of the United States; and

(3) funds for such efforts should be authorized and appropriated in the base budget of the Department of Defense in order to ensure continued and planned funding to address long-term stability in Europe, reassure the European allies and partners of the United States, and deter further Russian aggression.

**SEC. 6215. ENHANCEMENT OF UKRAINE SECURITY ASSISTANCE INITIATIVE.**

At the end of subtitle E of title III, add the following:

**SEC. . SECURE ENERGY FOR READINESS AND NATIONAL SECURITY.**

(a) FINDINGS.—Congress makes the following findings:

(1) Secretary of Defense James Mattis testified in writing to the Senate Armed Services Committee in March of this year that “climate change can be a driver of instability and the Department of Defense must pay attention to potential adverse impacts generated by this phenomenon.” The Department of Defense must not only prepare for the impacts of climate change, but also implement sustainable energy projects to fight climate change and to enhance force readiness and national security.

(2) Department of Defense Directive 4715.21, Climate Change Adaptation and Resilience, states that the Department of Defense must adapt current and future operations to address the impacts of climate change in order to maintain an effective and efficient United States military.

(3) According to the U.S. Energy Information Agency, the Department of Defense accounts for more than 75 percent of all energy consumed by the Federal Government, and fully 30 percent of Department of Defense energy costs are related to the operation of military installations. The Energy Independence and Security Act of 2007 included goals to reduce energy intensity in Federal buildings.

(4) The Office of the Deputy Assistant Secretary of Defense for Installation Energy has outlined a strategy to—

(A) reduce demand for military installation energy through conservation and efficiency;

(B) expand the supply of distributed (on-site) energy for mission assurance;

(C) improve the energy grid and storage resilience of installations; and

(D) leverage advanced technology for energy resource efficiencies and increased security.

(5) The rising costs of fossil fuel derived energy will continue to cause budgetary pressures on the operation of United States military bases.

(6) The United States Armed Forces have begun to implement important alternative energy projects and energy efficiency programs. However, the Department of Defense needs to do much more to contain energy costs and improve access to reliable and sustainable energy sources.

(7) Efficient lighting reduces energy costs, enables backup power to work more efficiently during disruptions to the electrical grid, and the payback periods are short. These projects enable critical functions to continue longer in a state of electrical emergency.

(8) In the face of growing national security and climate crises, the United States Armed Forces require emergency power backup, independent of the power grid, to confront threats from sabotage, cyberattack, terrorism, extreme weather, or mechanical failure. Currently, most bases depend on fossil fuel backup generation, and as was evident during Hurricanes Harvey and Irma, fuel supplies are likely to be interrupted during and immediately after extreme weather events and other emergencies.

(9) Our Armed Forces require new and more reliable forms of electric backup, including locally generated solar, wind, or geothermal power with an uninterruptible power supply, available instantly whenever other power sources fail.

(10) By reducing energy use, generating electrical energy from both solar photovoltaic panels and wind sources, and storing that energy in state-of-the-art batteries, these projects will enhance the continuity of critically important military functions in times of crisis, including the defense of the homeland.

(b) DEFINITIONS.—In this section:

(1) DISTRIBUTION ELECTRIC UTILITY.—The term “distribution electric utility” means a distribution utility providing retail electric service.

(2) GEOTHERMAL HEATING SYSTEM.—The term “geothermal heating system” means a system that uses the heat from ground water for heating applications.

(A) a generator that creates electricity from the heat of ground water; and

(B) the accompanying hardware enabling that electricity to flow—

(i) onto the electric grid; or

(ii) into an uninterruptible power supply.

(4) HIGHER-EFFICIENCY LIGHT BULBS.—The term “higher-efficiency light bulbs” means light bulbs that are more efficient than bulbs currently installed.

(5) NET METERING.—The term “net metering” refers to a system that allows excess electricity to be sold to a distribution electric utility or transmission electric utility so that the Department of Defense customer may either receive payment or credit on their utility bill.

(6) PHOTOVOLTAIC SOLAR ELECTRICITY GENERATING ARRAY.—The term “photovoltaic solar electricity generating array” means—

(A) a generator that creates electricity from light photons; and

(B) the accompanying hardware enabling that electricity to flow—

(9) WIND TURBINE.—The term “wind turbine” means—

(A) a generator that creates electricity from the kinetic power of wind; and

(B) the accompanying hardware enabling that electricity to flow—

(i) onto the electric grid; or

(ii) into an uninterruptible power supply.

(c) AUTHORITY.—The Secretary of Defense shall carry out a program—

(1) to design and build wind turbines, geothermal heating or power systems, and ground or roof mounted fixed-tilt or dual-axis tracked photovoltaic solar electricity generating arrays on Department of Defense installations, the generated power from which shall be used by the military customer on base or stored in uninterruptible power supplies or sold to a transmission electric utility or through net metering for additional revenue to be used by the Department of Defense or utility energy services contractor as defined in part 41 of the Federal Acquisition Regulation;

(2) to design and install uninterruptible power supplies to mission critical functions; and

(3) to replace mission critical lighting with higher-efficiency bulbs to maximize energy efficiency.

(d) AUTHORIZED APPROPRIATIONS.—There is authorized to be appropriated for fiscal year 2018 \$176,500,000 for the Secretary of Defense to carry out the program under this section.

**SA 1045.** Mr. SANDERS submitted an amendment intended to be proposed by him to the bill H.R. 2810, to authorize appropriations for fiscal year 2018 for military activities of the Department of Defense, for military construction, and for defense activities of the Department of Energy, to prescribe military personnel strengths for such fiscal year, and for other purposes; which was ordered to lie on the table; as follows:

**PART II—REAUTHORIZATION OF NORTH KOREAN HUMAN RIGHTS ACT OF 2004**

**SEC. 1294. SHORT TITLE.**

This part may be cited as the “North Korean Human Rights Reauthorization Act of 2017”.

**SEC. 1295. FINDINGS.**

Congress makes the following findings:

(1) In 2014, the United Nations Commission of Inquiry (in this section referred to as the “COI”) on Human Rights in the Democratic People’s Republic of Korea found that the grave human rights violations still being perpetrated against the people of the Democratic People’s Republic of Korea, due to policies established at the highest level of the state, amount to crimes against humanity. Crimes include forced starvation, sexual violence against women and children, restrictions on freedom of movement, arbitrary detention, torture, executions, and enforced disappearances, among other hardships.

(2) The COI also noted that the Government of the People’s Republic of China is aiding and abetting in crimes against humanity by forcibly repatriating North Korean refugees back to the Democratic People’s Republic of Korea. Upon repatriation,

North Koreans are sent to prison camps, tortured, or even executed. The Government of the People's Republic of China's forcible repatriation of North Korean refugees violates its obligation to uphold the principle of non-refoulement, under the United Nations Convention Relating to the Status of Refugees, done at Geneva July 28, 1951 (as made applicable by the Protocol Relating to the Status of Refugees, done at New York January 31, 1967 (19 UST 6223)).

(3) Estimates from the COI suggest that between 80,000 and 120,000 people are believed to be imprisoned in political prison camps in the Democratic People's Republic of Korea. Another 70,000 are believed to be held at other detention facilities. Prisoners in both situations are subject to harsh conditions, limited food, sexual abuse, and in most cases hard labor.

(4) One of the most overlooked findings of the COI report was the persecution of religious minorities, especially Christians. There is effectively no freedom of religion in the Democratic People's Republic of Korea, only worship of the Kim family. Christians are subjected to particularly acute persecution. It has been reported that Christians in the Democratic People's Republic of Korea have been tortured, forcibly detained, and even executed for possessing a Bible or professing Christianity.

(5) The Democratic People's Republic of Korea profits from its human rights abuses. One report from the Asan Institute for Policy Studies suggests that there are nearly 50,000 North Korean workers forced to labor overseas, sometimes without compensation, and for as much as 20 hours at a time. Workers that received compensation were not to be paid more than \$150 per month, which is between 10 to 20 percent of the value of the labor they performed. Based on this report, the regime may profit as much as \$360,000,000 annually from just 50,000 laborers.

(6) On July 6, 2016, the United States imposed sanctions on North Korean leader Kim Jong Un and other senior North Korean officials for human rights violations as required by the North Korea Sanctions and Policy Enhancement Act of 2016 (Public Law 114-122). This was the first time that the United States had designated North Korean entities for human rights abuses.

(7) The North Korea Sanctions and Policy Enhancement Act of 2016 (Public Law 114-122) requires the President to impose mandatory penalties under United States law on any person that "knowingly engages in, is responsible for, or facilitates serious human rights abuses by the Government of North Korea".

(8) Although the United States Refugee Admissions Program remains the largest in the world by far, the United States has resettled only 174 refugees from the Democratic People's Republic of Korea between January 2008 and January 2017. Since the enactment of the North Korea Human Rights Reauthorization Act of 2008 (Public Law 110-346), the United States has resettled a total of 212 refugees from the Democratic People's Republic of Korea.
