STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. WYDEN:

S. 1874. A bill to direct the Secretary of Energy to establish certain demonstration grant programs relating to the demonstration of advanced distribution systems, smart water heaters, vehicle-to-grid integration, and granular retail electricity pricing, and for other purposes; to the Committee on Energy and Natural Resources.

Mr. WYDEN. Mr. President, today I am introducing a set of three bills that will lower the cost of energy storage, increase flexibility in the power grid, and create a comprehensive set of grant programs to advance development of renewable energy technologies throughout the country.

Currently, many energy technologies—like energy storage—compete in unfair markets, making it hard for new innovations to measure up to more established technologies like those of the fossil fuel industry. Congress and the Department of Energy can work hand-in-hand with industry to level the playing field, using a fair,

tech-neutral approach when updating the electricity system, to benefit the American consumer.

My Reducing the Cost of Energy Storage Act will provide funding to the Department of Energy to research and develop ways to lower the cost of energy storage technologies. Ultimately, this bill will make it possible for renewable energy to be used on a more reliable and affordable basis.

To protect the power supply from disruptions caused by natural disasters, which can wipe out power to millions of homes, my Flexible Grid Infrastructure Act will require the Department of Energy to find and develop ways to make the power grid more flexible and responsive to these challenges. The bill will also connect displaced workers to training programs that will allow them to transition to high-skill clean energy jobs. Finally, this bill will provide states and utilities with resources to upgrade the flexibility and reliability of the power grid.

In order to ensure private sector growth in distributed energy technologies, my Distributed Energy Demonstration Act will create competitive, cost-share grant programs for new small-scale, grid-connected projects such as rooftop solar panels, hot water heaters, electric vehicles and modernized utility pricing technologies.

Together, or apart, these bills will promote a more flexible electricity grid that can respond to power disruptions from natural disasters and ensure reliable, low-cost electricity for consumers now and in the future. They will also lower costs for energy storage technologies that make renewable energy more reliable and cost-effective, boost funding for cutting-edge research and reward state and private sector innovations, which will make renewable energy more reliable and affordable for U.S. energy consumers.

By Mr. WYDEN:

S. 1875. A bill to move the United States toward greater energy independence and security, to increase the flexibility, efficiency, and reliability of the electric grid, to increase the competitiveness of the United States economy, to protect consumers, and to improve the energy performance of the Federal Government, and for other purposes; to the Committee on Energy and Natural Resources.

By Mr. WYDEN (for himself, Mr. WHITEHOUSE, and Mr. REED):

S. 1876. A bill to direct the Secretary of Energy to establish a program to advance energy storage deployment by reducing the cost of energy storage through research, development, and demonstration, and for other purposes; to the Committee on Energy and Natural Resources.

SUBMITTED RESOLUTIONS

SENATE RESOLUTION 269—DESIGNATING SEPTEMBER 2017 AS “NATIONAL PROSTATE CANCER AWARENESS MONTH”

Mr. SCHUMER (for Mr. MENENDEZ (for himself, Mr. CRAPO, Mr. MARKEY, Mrs. FEINSTEIN, Mr. CARDIN, Mr. BOOKER, Mr. BLUNT, and Mr. COONS)) submitted the following resolution; which was considered and agreed to:

S. RES. 269

Whereas over 2,900,000 families in the United States live with prostate cancer;

Whereas 1 in 7 men in the United States will be diagnosed with prostate cancer in their lifetimes;

Whereas prostate cancer is the most commonly diagnosed nonskin cancer and the third-leading cause of cancer-related deaths among men in the United States;

Whereas the American Cancer Society estimates that in 2017, 161,360 men will be diagnosed with, and more than 26,730 men will die of, prostate cancer;

Whereas 43 percent of newly diagnosed prostate cancer cases occur in men under the age of 65;

Whereas the odds of developing prostate cancer rise rapidly after age 50;

Whereas African-American men suffer from a prostate cancer incidence rate that is significantly higher than that of White men and have double the prostate cancer mortality rate than that of White men;

Whereas having a father or brother with prostate cancer more than doubles the risk of a man developing prostate cancer, with a higher risk for men who have a brother with the disease and the highest risk for men with several affected relatives;

Whereas screening by a digital rectal examination and a prostate-specific antigen blood test can detect the disease at the earlier, more treatable stages, which could increase the chances of survival for more than 5 years to nearly 100 percent;

Whereas only 29 percent of men survive more than 5 years if diagnosed with prostate cancer after the cancer has metastasized;

Whereas there are no noticeable symptoms of prostate cancer in the early stages, making appropriate screening critical;

Whereas, in fiscal year 2017, the Director of the National Institutes of Health supported approximately \$274,000,000 in research projects focused specifically on prostate cancer;

Whereas ongoing research promises further improvements in prostate cancer prevention, early detection, and treatment; and

Whereas educating people in the United States, including health care providers, about prostate cancer and early detection strategies is crucial to saving the lives of men and preserving and protecting families: Now, therefore, be it

Resolved, That the Senate—

(1) designates September 2017 as “National Prostate Cancer Awareness Month”;

(2) declares that steps should be taken—

(A) to raise awareness about the importance of screening methods for, and treatment of, prostate cancer;

(B) to encourage research—

(i) to improve screening and treatment for prostate cancer;

(ii) to discover the causes of prostate cancer; and

(iii) to develop a cure for prostate cancer; and

(C) to continue to consider ways to improve access to, and the quality of, health

care services for detecting and treating prostate cancer; and

(3) calls on the people of the United States, interest groups, and affected persons—

(A) to promote awareness of prostate cancer;

(B) to take an active role in the fight to end the devastating effects of prostate cancer on individuals, families, and the economy; and

(C) to observe National Prostate Cancer Awareness Month with appropriate ceremonies and activities.
