

hands-on experience he would need as a legislator to take an active role in some of the most important education reforms of modern times.

After working as both a teacher and an administrator, Senator Akaka served as the chief program planner in the department of health, education, and welfare, and eventually served as the director of the Hawaii Office of Economic Opportunity. The sterling reputation Senator Akaka gained in State government helped launch his legislative career, and in 1976, the people of Hawaii elected him to the U.S. House of Representatives. He had a distinguished record as a Congressman before Hawaii elected him to the Senate in 1990.

In this chamber, Senator Akaka worked hard on behalf of our Native populations as the chairman of the Indian Affairs Committee. He also fought valiantly for our troops as the Chairman of the Veterans' Affairs Committee, ensuring that our men and women in uniform were well taken care of upon returning home.

Having served alongside Senator Akaka for more than two decades, I remember best the spirit of civility he embodied as a legislator. He was caring and kind, loving and loyal, genuine and generous to all. He represented the best of this body in his willingness to lay aside partisan differences for the good of the Nation. Although we were members of different parties, he was the kind of Senator you could work with, never letting the perfect be the enemy of the good.

I consider myself lucky to have known Senator Akaka and even luckier to have called him a friend. Today my prayers are with Senator Akaka's family and the people of Hawaii, whom he loved and served so selflessly for so many years.

POLICY JUSTIFICATION

Qatar—Five thousand (5,000) Advanced Precision Kill Weapon Systems (APKWS) and Related Equipment and Support

The Government of Qatar has requested a possible sale of five thousand (5,000) Advanced Precision Kill Weapon Systems (APKWS) II Guidance Sections. Also included are five thousand (5,000) MK66-4 2.75 inch rocket motors, five thousand (5,000) high explosive warheads for airborne 2.75 inch rockets, inert MK66-4 2.75 inch rocket motors, inert high explosive warhead for airborne 2.75 inch rockets, support equipment, spares, training, publications, engineering technical assistance, program management technical assistance, logistics support services, and other related elements of program support. The estimated total program value is \$300 million.

This proposed sale supports the foreign policy and national security objectives of

the United States. Qatar is an important force for political stability and economic progress in the Persian Gulf region. Our mutual defense interests anchor our relationship and the Qatar Emiri Air Force (QEAF) plays a predominant role in Qatar's defense.

Qatar intends to use these defense articles and services to modernize its armed forces. This will contribute to Qatar's military goal by providing additional capability to its new AH-64E aircraft fleet. The APKWS will provide Qatar with a low-cost precision strike capability, decreasing collateral damage and expanding its options for counterterrorism operations. Qatar will have no difficulty absorbing this equipment into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractor involved in this program is BAE, Nashua, New Hampshire. There are no known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will require two U.S. Government or contractor representatives to travel to the State of Qatar for a period of one week to train in assembly and Wing Slot Seal replacement.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

TRANSMITTAL NO. 17-24

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex Item No. vii

(vii) Sensitivity of Technology:

1. The APKWS II All-Up-Round is an air-to-ground weapon that consists of an APKWS II Guidance Section (GS), legacy 2.75 inch MK66 Mod 4 rocket motor and legacy MK152 and MK435/436 warhead/fuse. The APKWS II GS is installed between the rocket motor and warhead and provides a Semi-Active Laser (SAL) precision capability to legacy unguided 2.75-inch rockets. The APKWS II is procured as an independent component to be mated to the appropriate 2.75-inch warhead/fuse; however, for this case the APKWS II will be delivered as an All-up-Round (AUR).

2. The GS is manually set with the appropriate laser code during loading and is launched from any platform configured with a LAU-68F/A, or similar launcher(s). After launch, the GS activates and the seeker detects laser energy reflected from a target designated with a remote or autonomous laser. The control system then guides the rocket to the target.

3. The only interface required with the host platform is a 28V Direct Current (DC) firing pulse.

4. APKWS II increases stowed kills by providing precise engagements at standoff ranges with sufficient accuracy for a high single-shot probability of hit against soft and lightly armored targets, thereby minimizing collateral damage. The APKWS II is capable of day and night operations and performance is many adverse environments.

5. All training for APKWS II is UNCLASSIFIED. The training required is: pilot training to effectively employ the APKWS II, ordnance handler for safe handling and preparation of the APKWS II and AUR, and maintenance training for replacement of the Wing Slot Seal (WSS).

6. All defense articles and services listed in this transmittal are authorized for release and export to the State of Qatar.
